Annex D	Task Authorisation Form

CONTRACT

This sole source one year contract is being put in place by Canada as part of its response to the COVID-19 pandemic.

CBSA has invoked the National Security Exception under all of Canada's trade agreements and, as a result, the usual disciplines of the Trade agreements do not apply to this contract.

The following clauses and conditions apply to and form part of any contract resulting from the bid solicitation.

1. Statement of Work

The Contractor must perform the Work in accordance with the Statement of Work in Annex A.

1.1 Task Authorization

(a) Work described at Annex A, Statement of Work, will be performed under the Contract on an "as and when requested basis".

(b) With respect to the Work mentioned under paragraph (a) of this clause,

  (i) an obligation will come into force only when the Contractor receives a Task Authorization (TA), inclusive of any revisions, authorized and issued in accordance with this clause, and only to the extent designated in the authorized TA;

  (ii) the TA Authority and limit will be determined in accordance with paragraph (c) of this clause;

  (iii) the Contractor must not commence work until a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract. The Contractor acknowledges that work performed before a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract will be done at the Contractor's own risk and expense;

  (iv) the task description, inclusive of any revisions, included in an authorized TA must fall within the scope of the Statement of Work, in Annex A; and

  (v) the TA, inclusive of any revisions, will be authorized under the Contract through the use of Annex D Task Authorization Form. An authorized TA is a completed Annex D signed by the TA Authority.

(c) TA Authority and Limit

The Project Authority may authorize individual TAs, inclusive of any revisions, the sole applicable Contract basis of payment of which is Limitation of Expenditure up to a limit of $300,000.00 Applicable Taxes extra. Any TA the total value of which would exceed that limit or any revision to a previously authorized TA that would increase the TA total value above that limit, or any revisions to any previously authorized TA the applicable Contract basis of payment must be authorized by the Contracting Authority before issuance to the Contractor.

(d) The authority specified under paragraph C of this clause is granted subject to the sum specified in the Contract under clause 7 (Canada's Total Liability, Cumulative Total of all authorized TA)s not being exceeded.

(e) TA Process

For each task or revision of a previously authorized task, the Project Authority will provide the Contractor with a request to perform a task prepared using Annex D Task Authorization Form, containing as a minimum:

(i) the task or revised task description of the Work required, including:
  - the details of the activities or revised activities to be performed;
  - a description of the deliverables or revised deliverables to be submitted; and
  - a schedule or revised schedule indicating completion dates for the major activities or submission dates for the deliverables, or both, as applicable;

(ii) the Contract security requirements applicable to the task or revised task;
(iii) the Contract basis (bases) of payment applicable to the task or revised task; and
(iv) the Contract method(s) of payment applicable to the task or revised task;

(f) Within 5 calendar days of its receipt of the request, the Contractor must provide the Project Authority with a signed and dated response prepared and submitted using the TA form received from the Project Authority, containing as a minimum:

(i) the total estimated cost proposed for performing the task or, as applicable, revised task;
(ii) a breakdown of that cost in accordance with Annex B; and
(iii) for each resource proposed by the Contractor for the performance of the Work required:

the name of the proposed resource;
the resume of the proposed resource; and
a demonstration that the proposed resource meets:
the Contract security requirements.

(g) TA Authorization

(i) The TA Authority will authorize the TA based on:

- the request submitted to the Contractor pursuant to paragraph (f) of this clause;
- the Contractor's response received, submitted pursuant to paragraph (f) of this clause; and
- the agreed total estimated cost for performing the task or, as applicable, revised task.

(h) Minimum Work Guarantee - All the Work - Authorized TAs

1. "Maximum Contract Value" means the sum specified in Contract clause 7 (Canada's Total Liability, Cumulative Total of all authorized TAs); and "Minimum Contract Value" means a fixed amount of $5,000.00.

2. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with

paragraph (i).3 of this clause. In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract period to perform the Work. Canada's maximum liability for Work requested in authorized TAs, performed by the Contractor and accepted by Canada must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

3. In the event that Canada does not request Work in the amount of the Minimum Contract Value during the period of the Contract, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work requested in authorized TAs, performed by the Contractor and accepted by Canada.

4. Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract in whole or in part for default.

(i) Periodic Usage Reports - Contracts with TAs

1. The Contractor must compile and maintain detailed and current data on its performance of Work required and requested under TAs (inclusive of any revisions) authorized and issued under the Contract.

2. No later than 15 calendar days after the end of each of the reporting periods below, the Contractor must submit to the Contracting Authority and Project Authority a periodic usage report containing, in an electronic spreadsheet (such as MSOffice Excel), the data elements specified in paragraphs (i).3 and (i).4 of this clause in the order they are presented. Where at the end of a reporting period, no changes are required to be made to the data contained in the periodic usage report submitted for the previous period, the Contractor must submit a "NIL" report to the Contracting Authority and Project Authority.

The reporting periods are defined as follows:

1st quarter: April 1 to June 30;
2nd quarter: July 1 to September 30;
3rd quarter: October 1 to December 31; and
4th quarter: January 1 to March 31.

3. For each TA authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- the TA number appearing on the TA form;
- the date the task was authorized appearing on the TA form;
- the total estimated cost of the task (Applicable Taxes extra) before any revisions appearing on the TA form;
- the following information appearing on the TA form must be included for each authorized revision, starting with revision 1, then 2, etc:
- the TA revision number;
- the date the revision to the task was authorized;
- the authorized increase or decrease (Applicable Taxes extra);
- the total estimated cost of the task (Applicable Taxes extra) after authorization of the revision;
- the total cost incurred for the task (as last revised, as applicable), Applicable Taxes extra;
- the total cost incurred and invoiced for the task (as last revised, as applicable), Applicable Taxes extra;

- ○ the total amount of Applicable Taxes invoiced;
- ○ the total amount paid, Applicable Taxes included;
- ○ the start and completion date of the task (as last revised, as applicable); and
- ○ the active status (i.e., the percentage of the work completed) of the task (as last revised, as applicable) with an explanation (as applicable).

4. For all TAs authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- ○ the sum (Applicable Taxes extra) specified in clause 7, Canada's Total Liability, Cumulative Total of all Authorized TAs, as last amended;
- ○ the total cost incurred for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- ○ the total cost incurred and invoiced for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- ○ the total amount of Applicable Taxes invoiced for all authorized tasks inclusive of any revisions; and
- ○ the total amount paid for all authorized tasks inclusive of any revisions, Applicable Taxes extra.

(j) Administration of the TA Process –Public Works and Government Services Canada

The administration of the TA process will be carried out by PWGSC. This process includes: monitoring, controlling and reporting on expenditures of the Contract to the Contracting Authority.

2. Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines /standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

2.1 General Conditions

2035 (2020-05-28), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

a. With respect to Section 30 - Termination for Convenience, of General Conditions 2035, unless already present, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.
5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of
   a. the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or
   b. the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

b. 6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

2.2. Inspection and Acceptance

The Project Authority is the Inspection Authority. All reports, deliverable items, documents, goods and all services rendered under the Contract are subject to inspection by the Inspection Authority or representative. Should any report, document, good or service not be in accordance with the requirements of the Statement of Work and to the satisfaction of the Inspection Authority, as submitted, the Inspection Authority will have the right to reject it or require its correction at the sole expense of the Contractor before recommending payment.

3. Security Requirement

3.1 The following security requirement (SRCL and related clauses provided by the Industrial Security Program (ISP) (http://ssi-iss.tpsgc-pwgsc.gc.ca/index-eng.html) apply and form part of the Contract:

SECURITY REQUIREMENT FOR CANADIAN SUPPLIER:
PWGSC FILE No. 47319-213137

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer, hold a valid Designated Organization Screening (DOS), issued by the Contract Security Program (CSP), Public Works and Government Services Canada (PWGSC).
2. The Contractor/Offeror personnel requiring access to PROTECTED information, assets or sensitive site(s) must EACH hold a valid RELIABILITY STATUS, granted or approved by the CSP, PWGSC.
3. The Contractor/Offeror MUST NOT remove any PROTECTED information or assets from the identified site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.
4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of the CSP, PWGSC.
5. The Contractor/Offeror must comply with the provisions of the:
    a) Security Requirements Check List and security guide (if applicable), attached at Annex C;
    b) Industrial Security Manual (Latest Edition).

ADDITIONAL CBSA SECURITY REQUIREMENT:

(a) **IMPORTANT:** CBSA has its own unique security requirements. The client will conduct its own personnel Reliability Status assessment on the proposed contractor and its personnel** as per the Treasury Board Secretariat of Canada's (TBS) Security and Contracting Management Standard and the ARCHIVED - Policy on Government Security – Personnel Security Standard, irrespective of whether such assessment has already been conducted under any such policies. The Reliability Status assessment conducted by the CBSA will include a credit check performed by an authorized security official with the CBSA's Personnel Security Screening Section (PSSS),

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

which is independent of PWGSC's Canadian Industrial Security Directorate (CISD) and the International Industrial Security Directorate (IISD).

***In some instances, "contractor and its personnel" can include landlords, property management employees and principles of companies when the latter have access to the premises where the CBSA designated or classified information/assets are kept.*

(b) For each proposed resource, the bidder must submit a completed signed original TBS/SCT 330-23E – Personnel Screening Consent and Authorization Form upon request of the contracting authority prior to contract award.

(c) Until the credit check and all other security screening processes required by this Request for Proposal have been completed and the Contractor and its personnel is considered suitable by the CBSA, no contract will be awarded and the recommended Contractor / Offeror (specifically the Contractor / Offeror personnel) shall not be permitted access to Protected / Classified information or assets, and further, shall not be permitted to enter sites where such information or assets are kept.

(d) In the event the Contractor (specifically the Contractor) does not pass the security screening process required by the CBSA, the said Contractor's proposal will be considered non-responsive and the next ranked bidder will be contacted. If only one bid was obtained and the proposed bidder does not meet the security requirement, then, the contracting officer will determine the next steps in order to ensure all requirements are met.

3.2 Use of individual protective equipmet and Occupational Health and Safety (OHS) guideline(s)

(a) The Contractor must comply with Government of Canada onsite requirements in respect of individual Protective Pieces of Equipment (PPE) and adhere to Occupational Health and Safety (OHS) guidelines in force in the workplace.

(b) The Contractor will provide its resources the following individual PPE for working on site: prescribed face covering mask, gloves, protective shield, and anything else that is required as a pre-requisite to entry and to work on Government of Canada premises. Canada reserves the right to modify the list of PPE and OHS guidelines, if required, to include any future recommendations proposed by the Public Health Agencies.

(c) The Contractor warrants that its resources will wear the PPE mentioned above when onsite and follow at all times the Occupational Health and Safety (OHS) guidelines in force in the workplace during the contract period. If resources are not wearing the prescribed PPE and/or are not following the Occupational Health and Safety (OHS) guidelines in force in the workplace, they will not be permitted access to government of Canada sites.

4. Term of Contract

4.1 Period of the Contract

The period of the Contract is from date of Contract to One Year later inclusive.

5. Authorities

5.1 Contracting Authority

The Contracting Authority for the Contract is:

Name: Sylvie Cloutier
Title: Supply Specialist
Public Works and Government Services Canada
Procurement Branch
Directorate: Professional Services Procurement Directorate
Address: 10 Wellington Street, 5th Floor
Telephone: 873-455-5077
E-mail address: sylvie.cloutier2@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

5.2 Project Authority

The Project Authority for the Contract is:

Name: Megan Young
Title: Director, Automation, Integration & Emerging Technologies Division
Address: Border Technology Innovation Directorate / Information, Science and Technology Branch
Canada Border Services Agency / Government of Canada
Telephone: 343-550-4073
E-mail address: megan.young@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

5.3 Contractor's Representative

The Contractor's Representative for the contract is:

Name :
Title : Contract and Security Officer
Organization : 49 Solutions Inc
Address : 1053 Somerset St W., Ottawa, ON K1Y 3C4
Telephone :
E-mail address :

6. Payment

6.1 Basis of Payment

a. **Basis of Payment**

   i. **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex "B", Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

   ii. **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex "B"), Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

   iii. **Pre-Authorized Travel and Living Expenses** : Canada will not pay any travel or living expenses associated with performing the Work.

   iv. **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Policy (or equivalent) then in effect, which may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

   v. **Contractor's Firm Per Diem Rates**: The Contractor agrees that the rates set out in Annex B remain firm throughout the Contract Period, except as may be provided for in the express terms of the contract. In reference to Article 18(1) of SACC General Conditions 2035, the Contractor acknowledges that its obligation to provide services in accordance with the firm rates set out in Annex B is unaffected by the application of any existing law or any new law which may come into effect during the Contract Period.

   vi. **Purpose of Estimates**: All estimated costs contained in the Contract are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to purchase services in these amounts. Any commitment to purchase specific amounts or values of services are described elsewhere in the Contract.

7. Limitation of Expenditure – Cumulative Total of all Task Authorizations

i. Canada's total liability to the Contractor under the Contract for all authorized Task Authorizations (TAs), inclusive of any revisions, must not exceed the sum set out on page one of the Contract. Customs duties are included or subject to exemption and Applicable Taxes are included.

ii. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

iii. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

   A. when it is 75 percent committed, or
   B. four (4) months before the contract expiry date, or

[illegible] the Access to Information Act
AIPRP - Divulgation en vertu de la loi sur l'Accès à l'information.

C. as soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

iv. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority, a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

8. Method of Payment

8.1 Method of Payment for Task Authorizations with a Maximum Price: For each Task Authorization validly issued under the Contract that contains a maximum price:

i. Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.
ii. Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

8.2 Single Payment

Canada will pay the Contractor upon completion and delivery of the Work in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work delivered has been accepted by Canada.

8.3 Monthly Payment Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if :

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

8.4 Time Verification

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contract must repay any overpayment, at Canada's request.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

9. SACC Manual Clauses

A9117C (2007-11-30), T1204 - Direct Request by Customer Department
C0305C (2014-06-26), Cost Submission-limitation of expenditure or ceiling price

10. Electronic Payment of Invoices - Contract

The Contractor accepts to be paid using the following Electronic Payment Instrument:

- Direct Deposit (Domestic and International);

10.1 Discretionary Audit

C0705C (2010-01-11), Discretionary Audit
C0002T (2010-01-11), Price Certification – Canadian-based Suppliers (other than agency and resale outlets)

11. Invoicing Instructions

1. The Contractor must submit invoices in accordance with the section entitled "Invoice Submission" of the general conditions. Invoices cannot be submitted until all work identified in the invoice is completed.

   Each invoice must be supported by:

   a. a copy of time sheets to support the time claimed;

   b. a copy of the release document and any other documents as specified in the Contract;

   c. a copy of the invoices, receipts, vouchers for all direct expenses, and all travel and living expenses;

   d. a copy of the monthly progress report.

2. Invoices must be distributed as follows:

   a. The original and one (1) copy must be forwarded to the address shown on page 1 of the Contract for certification and payment.

   b. One (1) copy must be forwarded to the Contracting Authority identified under the section entitled "Authorities" of the Contract.

12. Certifications and Additional Information

i. Compliance

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire period of the Contract.

ii. Federal Contractors Program for Employment Equity - Default by the Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the Federal Contractors Program (FCP) for employment equity "FCP Limited Eligibility to Bid List" available at the bottom of the page of the Employment and Social Development Canada (ESDC) - Labour's website (https://www.canada.ca/en/employment-social-development/programs/employment-equity/federal-contractor-program.html#). The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

13. Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

14. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the list, the wording of the document that first appears on the list has priority over the wording of any document that subsequently appears on the list.

(a) the Articles of Agreement;
(b) the general conditions 2035 (2020-05-28), General Conditions - Higher Complexity - Services;
(d) Annex A, Statement of Work;
(e) Annex B, Basis of Payment;
(f) Annex C, Security Requirements Check List;
(g) Annex D, Task Authorizations (including all annexes, if any);
(i) the Contractor's bid dated ______

15. Foreign Nationals (Canadian Contractor)

SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

16. Insurance Requirements

(a) Compliance with Insurance Requirements

(i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

(ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

(iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) **Commercial General Liability Insurance**

(i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

(ii) The Commercial General Liability policy must include the following:

(A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

(B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

(C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

(D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

(J) Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(K) If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(L) Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

17. Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

18. Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Project Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

19. Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Project Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the

replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

20. Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

21. Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

22. Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Project Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

23. Termination for Convenience

With respect to Section 30 of General Conditions 2035, if applicable, or Section 32 of 2030, if applicable, subsection 4 is deleted and replaced with the following subsections 4, 5 and 6:

4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of

   (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or

   (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

24. Dispute Resolution

(a) The parties agree to maintain open and honest communication about the Work throughout and after the performance of the contract.

(b) The parties agree to consult and co-operate with each other in the furtherance of the contract and promptly notify the other party or parties and attempt to resolve problems or differences that may arise.

(c) If the parties cannot resolve a dispute through consultation and cooperation, the parties agree to consult a neutral third party offering alternative dispute resolution services to attempt to address the dispute.

(d) Options of alternative dispute resolution services can be found on Canada's Buy and Sell website under the heading "Dispute Resolution".

25. Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(e) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(f) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(g) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(h) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(i) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

26. No Responsibility to Pay for Work not performed due to Closure of Government Offices

Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation, closure of government offices or there are enhanced measures to restrict access to government premises and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation, closure or restricted access.

If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

ANNEX A, STATEMENT OF WORK

1.0 Title: COVID-19 Pandemic Requirement – Informatics Professional Services

2.0 Objective

***** THIS CONTRACT IS BEING PUT IN PLACE BY CANADA AS PART OF ITS RESPONSE TO THE COVID-19 PANDEMIC *****

The public health threat posed by the COVID-19 pandemic has led all levels of government to take unprecedented measures to help slow the spread of COVID-19 and thereby minimise serious illness, death and social disruption resulting from the pandemic. Difficult choices are being made in a context of considerable uncertainty, as knowledge about COVID-19 and the impact of unprecedented public health measures evolves rapidly. In March 2020, COVID-19 was declared a pandemic by the World Health Organization (WHO). As it began to spread across the world, the Government of Canada (GoC) enacted a number of public health measures, including actions to tighten Canada's border and reduce international travel.
The Canada Border Services Agency (CBSA) requires a variety of Information Management (IM)/Information Technology (IT) professional resource services to support changes to the operational environment to better respond to the needs of the public, public safety and employee safety given the threat of Covid19 and its variants. Engendering trust in; the health and safety within Canada's travel industry, commercial industry and safety at the front lines for Border Services Officers protective measures in-line with he need to address the risks of Covid, the CBSA needs to react and adapt, leveraging IT to meet these needs.

These immediate health and safety requirements will leverage information technology tools and capabilities to provide safe social distancing and touch-less alternative methods for the management of the border and protect Canadians, travelers to Canada and CBSA Officers against potential exposure to the Covid19 virus and variants.

Work will focus on the following areas:

1. Border Services Officers Tools – Protective Measures in-line with Covid-19 environment.

2. Engender trust in the health and safety within Canada's air industry by implementing alternatives to move away from airport high touch/zero social distancing/paper methods to airport low touch/high social distancing/paper-less alternative methods.

3. Increase and enhance remote border and migrant workers reporting opportunities & capabilities (social distancing) at land border crossings, marine (pleasure boats), train and private/remote airports.

4. Implement modern risk assessment tools to support and enable predictive analytics to address the growing volumes of low-value shipments (contact-less delivery).
5. Ensure the safety of all travelers crossing ports of entry with proof of vaccination, digital credentials and reporting of Covid19 test results to the appropriate health authority.
6. Increasing and enhancing safety within the commercial industry in reducing risk of Covid transmission by implementing low touch/no touch methods.

This will include, but not be limited to work in the following technical areas; mobile applications development (both iOS and Android), web applications, smart mobile technologies, biometrics, digital credentials, CBSA public cloud (services (AWS, Azure, etc), infrastructure and operations), predictive analytics, geolocation (remote border), API development, cyber security, near field communication, optical character recognition, document reading, electronic data manifest ingestion, architecture (mobile, security, cloud), digitization of paper forms (and process), user experience, design sessions, user-analytics, accessibility requirements, hands-free capabilities/technologies integration, systems integration, federation, integrated control systems, sensor technology, experimentation framework, smart orchestration, Border Services Officers Risk Assessment augmentation technology, artificial intelligence and machine learning.

3.0 Background

CBSA is responsible for providing integrated services supporting national security and public safety priorities while facilitating the free flow of people and goods. CBSA manages this priority through its design, development, implementation and ongoing support of IM/IT tools and systems.at the Agency, while maintaining the integrity and availability of all technology infrastructures and applications.

ISTB provides technology leadership of operational IT applications/programs and corporate business applications at CBSA. ISTB provides delivery of technology products, applications and services to meet business needs while investing in modern IT infrastructure to maintain, build on and innovate current and future IM/IT Agency initiatives.

The Border Technologies Innovation Directorate (BTID) is responsible for the prototyping, development, and deployment of innovative and transformative initiatives while overseeing Enterprise Architecture for ISTB. These initiatives include, but are not limited to, critical systems and applications that serve as common components for internal and external stakeholders. As well, BTID is accountable for the design, development and delivery of enterprise and corporate IT/IM solutions in support of CBSA's mandate.

The BTID is responsible for the design, development, planning and analysis, maintenance and implementation/roll out of IM/IT innovation enterprise programs across CBSA. BTID is the National Centre of Expertise (NCOE) for all innovation IT development projects. BTID is accountable for the coordination, technical lead on and delivery of the IM/IT critical innovation projects.

As a result of the COVID 19 pandemic CBSA is looking to engage IT Professional Services to help them to develop critical solutions in the areas pertaining to our national ArriveCan application, AI driven tools for CBSA's frontline officers (BSO's), remote Border crossing capabilities, touchless services (leveraging biometrics) across our traveler, commercial & Enforcement & Intelligence operational and program business lines, cloud and e-commerce solutions to facilitate and increase~~d~~ amount of shipments crossing the border due to COVID. All solutions are put in place to increase safety ~~and~~ security to all Canadians during this pandemic and onward.

4.0 Scope of the Work

The intent of these solutions ~~are~~ is to provide safe, digital, data driven and secure alternatives for CBSA to continue to conduct their business and fulfil their mandates during the COVID pandemic and onward. These solutions will primarily reduce exposure of potential risk for Canadians, travelers and front line Border Services Officers when travelers and shipments are entering Canada from abroad.

The Contractor must provide IM/IT professional services on an as and when required basis in the National Capital Area (NCA) (as outlined in the Task Authorization sent for the Work) and in accordance with best practices. Projects may be in any of the following stages: scoping and approval, experimentation, prototyping, minimal viable product, piloting, operationalization, transition to IT OPS, identification, in the midst of work, or delivery. CBSA requires the following IT Professional Services:

RESOURCE CATEGORY	LEVEL OF EXPERTISE
B.1 Business Analyst	Level 3
B.4 Business Continuity/Disaster Recovery Specialist	Level 3

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

I.7 Platform Analyst	Level 3
I.9 System Administrator	Level 3
I.10 Technical Architect	Level 3
I.11 Technology Architect	Level 3
P.5 Project Executive	Level 3
P.8 Project Leader	Level 3

The Work will involve, but not be limited to, the ability of industry to provide such IT Services as outlined below:

a. **Business Analysis**: Provide overall advice on all matters associated with the departments cloud-based initiative, while serving as the communication conduit between the business community (internal and external clients) and the software development team through which requirements flow. A description of the structure and interaction between the business strategy, Functions and/or Services Capabilities, related business, value streams, value chains, Processes producing product deliverables and information records of Business values, achieving results and information needs in compliance with the Record Keeping Directive and other information management policies and best practices. Business Analysts often work with Service Architects, Business Architects and Business Process modelers.

b. **Platform Analysis**: Provide operations of infrastructure, systems and network management, monitor controls and application release and maintenance activities and make recommendations on platforms, applications and solutions. A description of the structure and interaction of the applications and platforms as groups of capabilities that provide key business functions, services related processes. They can be involved in management of the data assets inclusive of Critical Services, Business Impact Assessments, Business Continuity Plan, Disaster Recovery Plans.

c. **Technology Architecture**: Are responsible for designing the high level structure of new technology Solutions, including emerging and potentially disruptive technologies that Solution teams may use. The description of the structure and interaction of the platform services, and logical and physical technology components often include related risks and potential roadblocks. This includes IT infrastructure, middleware, networks, communications, end

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

user devices, service and systems management, hybrid cloud services, processing and related standards.

d. **Project Management**: Is the process of leading the work of a team to achieve all project goals within the given constraints. Project managers will be responsible for providing leadership and expertise in all facets of the project with an IT component. Project managers will support planning and execution of the departments mandate, day to day planning and reporting, and identify and deliver industry best practices.

5.0 Tasks

The Contractor must provide support for IM/IT professional services on an as and when required basis. Each validly issued Task Authorization will outline the type of resource(s), the Work and tasks to be completed and the location of the Work, whether in the NCA or remotely.

Tasks include, but are not limited to the following:

5.1 Business Analyst – Level 3

Resource tasks may include, but are not limited to the following:

- Lead the design, implementation and management of CBSA's cloud systems, applications, policies, and overall strategy;
- Apply business process re-engineering methodologies for CBSA systems modernization;
- Analyze, evaluate, and develop high profile informatic initiatives, business processes and strategies as they relate to a cloud environment;
- Conduct financial, operational, and systems analysis to ensure the economic and efficient delivery of the project;
- Identify organizational and/or project business opportunities for improvement and streamlining of business processes;
- Identify and evaluate critical success parameters, factors and performance measurements;
- Collaborate with other stakeholders in the development and implementation of business improvement processes and programs to ensure complete organizational engagement;
- Maintain strategic objectives while aligning individual efforts by setting up collaboration sessions with client and stakeholders;
- Collect and analyze information, present findings on complex issues, coordinate research as required, manage the preparation of reports and required business documents;

- Evaluate existing procedures and methods, make recommendations and provide advice for improvements;
- Provide leadership, guidance, and support to more junior level resources through knowledge transfer and cross-training.

5.2 Business Continuity/Disaster Recovery Specialist – Level 3

- Develop and implement an enterprise-wide IT disaster recovery strategies and continuity plans for restoring critical business systems in a cloud environment;
- Provide recommendations and solutions on risk mitigation, develop risk management strategies and plans for emerging technologies, as listed above;
- Review and recommend business improvement processes and IM/IT solutions for CBSA's cloud adoption strategy;
- Analyze and develop cloud architecture requirements design, process development and process mapping;
- Develop and provide presentations and facilitate discussions with stakeholders in support of business changes and continuity;
- Develop crisis communication planning strategies, specific to CBSA guidelines;
- Identify past and potential impact resulting from disruptions, develop techniques to identify and evade potential disruptions;
- Develop and implement backup, replication and redundancy strategies as required;
- Develop awareness, training, and communication programs for emerging technologies (listed above) with both internal staff and other stakeholders;
- Develop and implement monitoring activities and performance management for ongoing maintenance of business continuity plans.

5.3 Platform Analyst – Level 3

Resource tasks may include, but are not limited to the following:

- Develop and document current state documentation as well as statement of requirements for cloud implementation strategy;
- Design, implement, administer, maintain and support services for cloud-based applications, work loads and services;
- Execute the departmental cloud migration and adoption plan by implementing AWS cloud target architecture, including IaaS and emerging technologies, as listed above;
- Analyze existing platform architecture capabilities and requirements;
- Define and review CBSA infrastructure requirements, develop recommendations to support defined requirements through selection of appropriate platforms and design solutions;
- Design, review, plan and define cloud strategies and solutions;

- Support the maintenance and delivery of infrastructure services;
- Design and support the development and integration of architecture for cloud environment, capable of incorporating large datasets;
- Support the implementation of external datasets with internal processes and systems;
- Develop and support information management designs required for the implementation of emerging technologies, as listed above;
- Installs, configure, optimize and monitor technical installations of emerging technologies;
- Provide advice in defining new requirements and opportunities for applying efficient and effective solutions.
- Provide leadership, guidance, and support to more junior level resources through knowledge transfer and cross-training.

5.4 System Administrator – Level 3

Resource tasks may include, but are not limited to the following:

- Develop and prepare diagrammatic plans for the successful implementation of a cloud environment;
- Review and analyze the effectiveness and efficiency of existing systems and develop strategies for improving or further leveraging current systems and tools;
- Determine, install, monitor, upgrade and maintain appropriate software and incorporate emerging technologies, as available;
- Assist in the prioritization and planning for resolution of all known defects and enhancements in support of cloud solutions;
- Create, test, and deploy code;
- Develop, maintain and troubleshoot network connections of cloud computing resources and emerging technologies;
- Administrate and maintain cloud systems through patches, permissions and service deployments;
- Integrate and implement artificial intelligence (AI) algorithms within software/applications;
- Design, develop, implement, oversee, and adapt existing and new Application Programming Interfaces (APIs);
- Develop, deploy, and maintain advanced analytics and business intelligence (BI) interfaces;
- Design and write programs for automation on new and existing software;
- Translate detailed flow charts into coded machine instructions and confer with technical personnel in planning programs;
- Analyze cloud environment and system performance, recommending solutions;

- Develop and maintain effective collaborative relationships with the stakeholders to discuss and resolve issues, and to maintain and improve software performance;
- Work with stakeholders to proactively ensure all IT systems documentations align with business documentation
- Provide updates on work in progress, work completed, work planned, and issues potentially impacting the timely completion or quality level of work;
- Provide leadership, guidance, and support to more junior level resources.

5.5 Technical Architect – Level 3

Resource tasks may include, but are not limited to the following:

- Develop and implement technical architectures, frameworks and strategies as they relate to the deployment of cloud environments;
- Develop technical architecture options and recommendations for cloud implementation plan development, and providing the specified deliverables;
- Provide and implement IaaS solutions within a cloud environment;
- Deliver solutions utilizing containerization-technologies within a cloud production environment;
- Define, design and build solutions to drive business growth, performance and productivity though automation;
- Review computer software systems and data requirements as well as communication and response needs and determine operating systems and languages needed to support them;
- Identify the policies and requirements necessary to solve CBSA technological gaps;
- Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
- Provide information, direction and support for emerging technologies, as listed above;
- Analyze 'current to future' technical architecture roadmaps and plans, in order to include these items in planning for the environment implementations for the projects;
- Analyze and evaluate alternative technology solutions to meet business problems;
- Support the integration of technology solutions;
- Prepare and deliver presentations for architectural working groups and senior management, as required;
- Provide detailed technical analysis of each option including technical components, diagrams, integration points and linkages to architecture evolution;

- Collaborate with project resources to organize the collection of all relevant data from various technical stakeholders including IT solution providers and IT support service teams.

5.6 Technology Architect – Level 3

Resource tasks may include, but are not limited to the following:

- Lead the project during the development, implementation, testing and operations start-up by ensuring that resources are made available and that the project is delivered successfully;
- Provide strategic advice, guidance, input and recommendations to the entire project team and ensure proper implementation and integration of emerging technologies;
- Analyze existing capabilities and requirements within Covid-19 era, develop redesigned frameworks and recommend areas for improved capability and integration for increased capacity at CBSA;
- Develop and implement proof of concepts to elaborate technical architectures, frameworks, and strategies for a cloud environment, to meet the business and application requirements;
- Develop departmental strategy to incorporate cloud adoption plans, cloud application design, cloud management and continuous monitoring;
- Develop IaaS and PaaS solution architectures on cloud platforms, utilizing its technology stacks, open-source alternatives and/or a combination;
- Provide cloud architecture solutions and best practices to effectively meet and support strategic needs of the department;
- Provide support to applications and/or technical support teams in the proper application of existing infrastructure and procedures;
- Identify the policies and requirements that drive out a particular solution;
- Define, present and defend options analysis selection criteria;
- Perform impact analysis of technology changes;
- Present architecture briefs on technology selections;
- Lead the integration of all aspects of technology solutions, providing entire project team with expert-level guidance;
- Review application and program design or technical infrastructure design to ensure adherence to standards and to recommend performance improvements;
- Provide advice in defining new requirements and opportunities for applying efficient and effective solutions;
- Coach, mentor and train the department to perform any of the above.

5.7 Project Executive – Level 3

Resource tasks may include, but are not limited to the following:

- Define and document project objectives and determine budget requirements for CBSA's cloud migration strategy;
- Meet with organizational executives to ensure all internal and external stakeholders (including international contacts) are committed and moving forward on project and departmental goals;
- Determine stakeholder engagement and align strategic planning within project objectives;
- Identify business and technology trends that create opportunities for business improvement;
- Track status of various CBSA projects by gathering data and information to evaluate and report to senior executives;
- Provide guidance, advice and coaching on project management for CBSA employees, as required;
- Monitor, evaluate and provide hands-on assistance in long-term strategic areas as well as the daily operations of the department;
- Review documents on current and emerging issues, including briefing materials, position papers, speaking points, policy research, corporate reporting, protocols, media information and presentations for consistency with departmental and other government department positions;
- Provide constant training and provision of guidance of CBSA staff, which includes transfer of knowledge.

5.8 Project Leader – Level 3

Resource tasks may include, but are not limited to the following:

- Concurrently support, plan and manage the implementation of one or more project(s) for emerging technology within CBSA;
- Specify the general requirements of a proposed platform, develop broad system alternatives and identify the administrative, economic and technical feasibility requirements;
- Design and test new and existing systems to ensure that the objectives of the system are met and that the outputs produced are in accordance with client requirement;
- Monitor the design, implementation and operations start-up of the cloud environment against established goals, objectives and milestones;
- Track problems, establish procedures for the development and implementation of all project elements, and obtain all required approval;
- Prepare project progress reports on an ongoing basis and at scheduled points in the project's lifecycle, presenting findings to stakeholders;
- Prepare, review and present plans, charts, tables and diagrams to assist in analyzing or displaying problems with a variety of project management tools;

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

- Provide and propose solutions to stakeholders and other project managers as issues arise throughout project lifecycle;
- Determine budgetary requirements, composition, roles and responsibilities, and terms of reference for the project team;
- Conduct project sign-off.

6.0 Deliverables

The Contractor must provide the following deliverables in accordance with validly issued Task Authorizations which include, but are not limited to:

- “Touchless border” target models
- Rapid diagnostic and scope/landscape summaries
- High-level data integration target operating models
- Industry leading practice frameworks and adoption approach roadmaps
- Application Programming Interface(s) (API) strategy to deliver connectivity for ArriveCAN
- Detailed operational work plans and playbooks
- Written and verbal advice;
- Issues papers/Briefing Notes;
- Presentation decks and materials;
- Meeting facilitation and reports (e.g. Monthly Progress Reports);
- Management Action Plans;
- Work plans for specific initiatives;
- Business Cases;
- Business Planning, including risk planning and risk analysis, Risk Management Plans, and Statement of Requirements;
- Tracking against plans – including level of effort and resource estimation as part of IM/IT business planning;
- Trend Analyses;
- Fit/Gap Analyses;
- Guides, manuals, reports to be disseminated to various stakeholders as required;
- Meeting agendas, schedules and minutes;
- Synthesis report of facilitated meetings;
- Activity reports;
- Project Management Plans and project documentation such as Project Schedules, Lessons Learned, Progress Reports, Deficiency Reports, Project Forecasts, Road Maps; and Post Project Review Reports; and
- Conversation notes, design documentation, change management documentation, site inspection reports and other Work requested under the Task Authorization.

The level of support versus management services provided by the Contractor's resources for items listed above will vary depending on the needs of the Work.

Deliverables to be submitted in hard and soft copies in the appropriate software formats (e.g. MS Project or MS Office Suite applications as identified by the Project Authority). All electronic deliverables must comply with departmental software standards, currently MS Office Suite latest version. Where required, the project management team will provide the Contractor with the required forms and templates to meet these standards.

7.0 Client Support

The Client will provide all documentation and information necessary for the Work.

8.0 Work Location

Work locations may vary across the NCR depending on the requirement. The Contractor's resources may be required to work onsite at CBSA site offices or project site locations in the NCR depending on the Task Authorization issued.

CBSA will provide, in accordance with CBSA security requirements, and only to the specified resource personnel, access to identified databases or applications resident on CBSA computers or networks for the sole purpose of executing tasks associated with this Contract. CBSA, at its sole discretion, will identify the nature and characteristics of such access.

CBSA will provide, in accordance with CBSA security requirements, specified consultants with CBSA issued laptops. All CBSA information and assets must remain resident within Canada.

9.0 Travel

There are no travel related expenses or living expenses associated with this Contract. All Work will be within the NCR or performed remotely.

10.0 LANGUAGE OF WORK

The Work will be performed in English.

11.0 Accessibility - The Government of Canada strives to ensure that the goods and services it procures are inclusive by design and accessible by default, in accordance with the Accessible Canada Act, its associated regulations and standards, and Treasury Board Contracting Policy.

The Work will include development, architecture and integration of CBSA applications including the ArriveCan web and mobile applications to ensure the removal of barriers and provide ease of access in compliance with Bill C-65.

In accordance with **Bill C-65** **- Accessibility Plans — Regulations Under This Act Link:** https://lop.parl.ca/sites/PublicWebsite/default/en_CA/ResearchPublications/LegislativeSummaries/421C65E#:~:text=Bill%20C%E2%80%9165%2C%20An%20Act%20to%20amend%20the%20Canada,Hajdu%2C%20Minister%20of%20Employment%2C%20Workforce%20Development%20and%20Labour.

Initial accessibility plan

- ***65 (1)*** *A regulated entity referred to in subsection 60(1) must, before the expiry of one year after the day fixed or determined by regulations made under subsection 117(1) that apply to that regulated entity, prepare and publish, in accordance with this Act and regulations made under subsection 117(1), an accessibility plan respecting*
    - ***(a)*** *its policies, programs, practices and services in relation to the identification and removal of barriers, and the prevention of new barriers, in*
        - ***(i)*** *the areas referred to in paragraphs 5(a) and (g),*
        - ***(ii)*** *the built environment, other than passenger aircraft, passenger trains, passenger buses, passenger vessels, aerodrome passenger terminals, railway passenger stations, bus passenger stations or marine passenger terminals, and*
        - ***(iii)*** *the area referred to in paragraph 5(c.1) as it relates to the areas referred to in paragraphs 5(a) and (g) and to the built environment referred to in subparagraph (ii); and*

(B) THE PROVISIONS OF REGULATIONS MADE UNDER SUBSECTION 117(1) THAT APPLY TO IT.

[illegible] under the Access to Information Act
[illegible] Divulgation en vertu de la Loi sur l'Accès à l'information.

ANNEX B, BASIS OF PAYMENT

A- Contract Period (From ____ to _____)

During the period of the Contract, for Work performed in accordance with the Contract, the Contractor will be paid as specified below.

1.0 Authorized TA

The Contractor will be paid all-inclusive firm prices as follows:

For the work on "as and when required basis":

Resource Category	Level of Expertise	All-Inclusive Firm Per Diem Rate (in CDN$)
Business Analyst	Level 3	[redacted]
Business Continuity/Disaster Recovery Specialist	Level 3	[redacted]
Platform Analyst	Level 3	[redacted]
System Administrator	Level 3	[redacted]
Technical Architect	Level 3	[redacted]
Technology Architect	Level 3	[redacted]
Project Executive	Level 3	[redacted]
Project Leader	Level 3	[redacted]

For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and sick leave. If time worked is more or less than a day, the all-inclusive firm per diem rate must be prorated to reflect the actual time worked.

7.22 Access to Canada's Property and Facilities
7.23 Government Property
7.24 Transition Services at end of Contract Period
7.25 Identification Protocol Responsibilities
7.26 Non-Disclosure Agreement

List of Annexes to the Resulting Contract:

Annex A - Statement of Work
Appendix A to Annex A - Task Authorization (TA) Form
Annex B - Security Requirements Check List (SRCL)
Annex C - Basis of Payment
Annex D - Non-Disclosure Agreement

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

PART 7 - RESULTING CONTRACT CLAUSES

The following clauses apply to and form part of any contract resulting from the bid solicitation.

7.1 REQUIREMENT

a. TRM Technologies Inc. (the Contractor) agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with and at the prices set out in the Contract. This includes providing professional services, as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

b. **Client(s)**: Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

c. **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

d. **Defined Terms:** Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

e. **Location of Services:** Services must be delivered as requested to the locations specified in the Contract, which delivery locations must exclude any area subject to one of the Comprehensive Land Claim Agreements (CLCAs).

7.2 TASK AUTHORIZATION ("TA")

a. **As and When Requested Task Authorizations:** The Work or a portion of the Work to be performed under the Contract is on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

b. **Evaluation and Qualification of Additional Resources:** Resources who are being proposed in response to a TA who were not qualified at bid closing must meet all mandatory requirements and the minimum score of the Technical Criteria, as per Attachment 1 to Part 4 of the Solicitation, for the resource category under which they are being proposed.

c. **Form and Content of Task Authorization:**
   i. If a requirement for a specific task is identified, a draft "statement of task" in a draft TA using the form specified in Appendix A to Annex A will be prepared by the Client and sent to the Contractor by the Contracting Authority. Once it receives the statement of task, the Contractor must submit a response to the Contracting Authority identified in the TA detailing the cost and time to complete the task.
   ii. The draft Task Authorization will contain the details of the activities to be performed, and must contain the following information, if applicable:

      A. a task number;

B. The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);
C. the details of any financial coding to be used;
D. the category of resources and the number required;
E. a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);
F. the start and completion dates;
G. milestone dates for deliverables and payments (if applicable);
H. the number of person-days of effort required;
I. whether the work requires on-site activities and the location;
J. the language profile of the resources required;
K. the level of security clearance required of resources;
L. the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and
M. any other constraints that might affect the completion of the task.

d. **Contractor's Response to Draft Task Authorization:** The Contractor must provide the Technical Authority, within **two (2)** working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

e. **Approval Process:** If Canada approves the Contractor's task response, Canada (by its authorized representative, as described in this contract) will issue the TA by forwarding a fully signed copy of the final TA form to the Contractor. Whether or not to approve or issue a TA is entirely within Canada's discretion.

f. **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations:**

To be validly issued, a TA must include the following signature(s):

A. for any TA with a value less than or equal to $0.00 (including Applicable Taxes), the TA must be signed by the Technical Authority and the Contracting Authority; and
B. for any TA with a value greater than this amount, a TA must be signed by the Technical Authority and the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TAs at any time, or reduce the dollar value threshold described in sub-article (A) above; any suspension or reduction notice is effective upon receipt.

g. **Periodic Usage Reports:**
    i. The Contractor must compile and maintain records on its provision of services to the federal government under validly issued TAs issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below.. If any required information is not available, the Contractor must indicate the reason. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The Contractor must submit the periodic usage reports on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

ii. The quarterly periods are defined as follows:

    A. April 1 to June 30;
    B. July 1 to September 30;
    C. October 1 to December 31; and
    D. January 1 to March 31.

    The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

iii. Each report must contain the following information for each validly issued TA (as amended):
    A. the Task Authorization number and the Task Authorization Revision number(s), if applicable;
    B. a title or a brief description of the task;
    C. the name, Resource category and level of each resource involved in performing the TA, as applicable;
    D. the total estimated cost specified in the TA (GST or HST extra);
    E. the total amount (GST or HST extra) expended to date;
    F. the start and completion date; and
    G. the active status, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

iv. Each report must also contain the following cumulative information for all the validly issued TAs (as amended):
    A. the amount (GST or HST extra) specified in the contract (as last amended, if applicable) as Canada's total liability to the contractor for all validly issued TAs; and
    B. the total amount, GST or HST extra, expended to date against all validly issued TA's.

h. **Refusal of Task Authorizations:** The Contractor is not required to submit a response to every draft TA sent to it by Canada. However, in addition to Canada's other rights to terminate the Contract, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions if the Contractor in at least three instances has either not responded or has not submitted a valid response when sent a draft TA. A valid response is one that is submitted within the required time period and meets all requirements of the TA issued, including proposing the required number of resources who each meet the minimum experience and other requirements of the categories identified in the TA at pricing not exceeding the rates set out in Annex C. Each time the Contractor does not submit a valid response, the Contractor agrees Canada may at its option decrease the Minimum Contract Value in the clause titled "Minimum Work Guarantee" by 2%. This decrease will be evidenced for administrative purposes only through a contract amendment issued by the Contracting Authority (which does not require the agreement of the Contractor).

i. **Consolidation of TAs for Administrative Purposes:** The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TAs for administrative purposes.

7.3 MINIMUM WORK GUARANTEE

a. In this clause,
    i. "**Maximum Contract Value**" means the amount specified in the "Limitation of Expenditure" clause set out in the Contract (excluding Applicable Taxes); and
    ii. "**Minimum Contract Value**" means 5 % of the Maximum Contract Value on the date the contract is first issued.

b. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

c. In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work performed.

d. Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract:
   i. for default.
   ii. for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or
   iii. for convenience within ten business days of Contract award.

7.4 STANDARD CLAUSES AND CONDITIONS

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual issued by Public Works and Government Services Canada.

a. **General Conditions :**

2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

The text under Subsection 04 of Section 41 - Integrity Provisions - Contract, of General Conditions 2035 referenced above is replaced by:

> During the entire period of the Contract, the Contractor must diligently update, by written notice to the Contracting Authority, the list of names of all individuals who are directors of the Contractor whenever there is a change. As well, whenever requested by Canada, the Contractor must provide the corresponding Consent Forms.

With respect to Section 30 - Termination for Convenience, of General Conditions 2035, unless already present, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

> 4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.
>
> 5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of
>
> > (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or
> >
> > (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.
>
> 6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

7.5 SECURITY REQUIREMENT

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

The Security Requirement Check List (SRCL and related clauses), as set out under Annex "B" to Part B to the Supply Arrangement, applies to the Contract.

SECURITY REQUIREMENT FOR CANADIAN SUPPLIER: PWGSC FILE COMMON-PS-SRCL#06

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer/Supply Arrangement, hold a valid Designated Organization Screening (DOS), issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).
2. The Contractor/Offeror personnel requiring access to PROTECTED information, assets or sensitive work site(s) must EACH hold a valid **RELIABILITY STATUS**, granted or approved by CISD/PWGSC.
3. The Contractor/Offeror MUST NOT remove any PROTECTED information or assets from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.
4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.
5. The Contractor/Offeror must comply with the provisions of the:
    a. Security Requirements Check List and security guide (if applicable), attached at Annex B;
    b. *Industrial Security Manual* (Latest Edition).

7.5.1 ADDITIONAL SECURITY REQUIREMENT:

The CBSA, will conduct its own personnel Reliability Status assessment of the Contractor (specifically the Contractor personnel), which is allowed under the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security - Personnel Security Standard. Reliability Status assessment conducted by the CBSA will include a credit check.

If the Contractor (specifically the Contractor personnel), has already been screened under the TBS Policy on Government Security - Personnel Security Standard, the Contractor (specifically the Contractor personnel), will still undergo a security screening process to be conducted by the CBSA.

The credit check and fingerprinting*, if required, will be performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian and International Industrial Security Directorate" (CIISD).

Until the credit check, fingerprinting* (if required) and all other security screening processes required have been completed and the Contractor (specifically the Contractor personnel) is deemed suitable by the CBSA, the Contractor (specifically the Contractor personnel) will not be permitted access to Protected / Classified information or assets, and further, will not be permitted to enter sites where such information or assets are kept.

***Fees are applicable. Fingerprinting, if required, will be at the Bidder's cost.**

7.6 CONTRACT PERIOD

a. **Contract Period** : The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

    i. The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends five (5) years later.

7.7 AUTHORITIES

a. **Contracting Authority**

The Contracting Authority for the Contract is:

Name: Robert Penwarden
Title: A/Team Leader, SPMMD
Organization: Canada Border Services Agency
Address: 355 North River Road, 17th Floor, Tower B, Ottawa, Ontario K1A 0L8
Telephone: 343-291-5669
E-mail address: Robert.Penwarden@cbsa-asfc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

b. **Technical Authority**

The Technical Authority for the Contract is:

Name: Bruno Ouellet
Title: Director, Enterprise Architecture
Organization: Canada Border Services Agency
Address: 355 North River Road, 17th Floor, Tower B, Ottawa, Ontario K1A 0L8
Telephone: 343-291-7388
E-mail address: Bruno.Ouellet@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

c. **Contractor's Representative**

Name:
Title: VP Sales
Organization: TRM Technologies Inc.
Address: 1000 - 280 Albert Street, Ottawa, ON K1P 5G8
Telephone:
E-mail address:

7.8 PROACTIVE DISCLOSURE OF CONTRACTS WITH FORMER PUBLIC SERVANTS

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

7.9 PAYMENT

a. **Basis of Payment:**

One or more of the basis of payment options below will be specified in the TA:

i. **Professional Services provided under a Task Authorization with a Limitation of Expenditure:** For professional services requested by Canada, Canada will pay the Contractor, in arrears, up to the Maximum Price, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex C, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

ii. **Professional Services provided under a Task Authorization with a Firm Price:** For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

iii. **Professional Services provided under a Task Authorization with a Ceiling Price:** For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the ceiling price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

iv. **Pre-Authorized Travel and Living Expenses:**

Canada will not pay any travel or living expenses associated with performing the Work.

v. **Competitive Award:** The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

vi. **Professional Services Rates:** In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Policy (or equivalent) then in effect, which may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

vii. **Purpose of Estimates:** All estimated costs contained in the Contract are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to purchase services in these amounts. Any commitments to purchase specific amounts or values of services are described elsewhere in the Contract.

b. **Limitation of Expenditure:** (Cumulative Total of all Approved Task Authorizations) Canada's total liability to the Contractor under the Contract must not exceed the amount set out on page one of the Contract, less any Applicable taxes. With respect to the amount set out on page one of the Contract, Customs duties are included and Goods and Services Tax or Harmonized Sales Tax is included, if applicable. Any commitments to purchase specific amounts or values of goods or services are described elsewhere in the Contract.

i. No increase in the total liability of Canada or in the price of the Work resulting from any design changes, modifications or interpretations of the Work, will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been approved, in writing, by the Contracting Authority before their incorporation into the Work. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceed before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum when:

A. It is 75 percent committed, or

B. 4 months before the Contract expiry date, or

C. as soon as the Contractor considers that the contract funds provided are inadequate for the completion of the Work,

whichever comes first.

If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

c. **Methods of Payment - Approved TA:** One or more of the following methods of payment will form part of the approved TA:

For a Firm Price TA:

(a) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

(b) **Milestone Payment:** Canada will pay the Contractor on a milestone basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete claim for payment and any other document required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all required certificates have been signed by the respective authorized representatives; all work associated with the milestone and as applicable any deliverable required has been completed and accepted by Canada.

For the Work specified in an approved TA subject to a cost reimbursable to a limitation of expenditure or ceiling price:

(c) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

(d) **Monthly Payment:** Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

d. **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contract must repay any overpayment, at Canada's request.

e. **Payment Credits**

i. **Failure to Provide Resource:**

A. If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of *10 days*.

B. **Corrective Measures:** If credits are payable under this Article for *two consecutive months* or for *three months in any twelve-month period*, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and *20 working days* to rectify the underlying problem.

C. **Termination for Failure to Meet Minimum Availability Level:** In addition to any other rights it has under the Contract, Canada may terminate the Contract for default by giving the Contractor *3 months'* written notice of its intent, if any of the following apply :

1. the total amount of credits for a given monthly billing cycle reach a level of *10%* of the total billing for that month; or
2. the corrective measures required of the Contractor described above are not met.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

ii. **Credits Apply during Entire Contract Period:** The Parties agree that the credits apply throughout the Contract Period.

iii. **Credits represent Liquidated Damages:** The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

iv. **Canada's Right to Obtain Payment:** The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

v. **Canada's Rights & Remedies not Limited:** The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

vi. **Audit Rights:** The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

f. **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

i. Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

ii. If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

7.10 INVOICING INSTRUCTIONS

a. The Contractor must submit invoices in accordance with the information required in the General Conditions.

b. The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

c. By submitting invoices the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

d. The Contractor will submit invoices on its own form, which will include:

    (i) the date;
    (ii) the Contractor name and address;
    (iii) the Destination
    (iv) Standing Offer/Supply Arrangement number;
    (v) Contract serial number;
    (vi) Financial codes, including GST or HST (as applicable) registration number;
    (vii) Description of the Work
    (viii) Category(ies) of Personnel and number of days worked;
    (ix) Firm Per Diem Rate on which the total dollar amount of the invoice is based;
    (x) the amount invoiced (exclusive of the Goods and Services Tax (GST) or Harmonized Sales Tax (HST) as appropriate) and the amount of GST or HST, as appropriate, shown separately;
    (xi) Client Reference Number (CRN);
    (xii) Business Number (BN); and
    (xiii) Total value billed to date and the dollar amount remaining in the Contract to date.

e. The Contractor must send the original and one copy of the invoice to the Technical Authority`s paying office (CBSA Finance) at the following location on a monthly basis:

All invoices must be submitted using the following method (**only one copy of the invoice should be sent to the Agency**):

Email: Only legible electronic (PDF, Word, Excel) files will be accepted; all others will be returned.

vendors-fournisseurs@cbsa-asfc.gc.ca

This email address is to be used for submitting invoices and for payment status inquiries.

Direct Deposit:
The Government of Canada will soon be phasing out federal government cheques; we strongly encourage Businesses that supply goods and services to the Government of Canada to enrol in direct deposit for account payable.

Please contact ca-ci@cbsa-asfc.gc.ca to obtain additional information, to confirm direct deposit enrolment process and the steps to be followed.

***IMPORTANT NOTE:* If a supplier omits any required information pertaining to payment processing from the invoice, the invoice will be returned at the discretion of the CBSA and will not be paid until valid payment referencing is provided.**

7.11 CERTIFICATIONS

a. Compliance with the certifications provided by the Contractor in its bid or any TA quotation is a condition of the Contract and subject to verification by Canada during the entire Contract Period. If the Contractor does not comply with any certification or it is determined that any certification made by the Contractor is untrue, whether made knowingly or unknowingly, Canada has the right, under the default provision of the Contract, to terminate the Contract for default.

b. **SACC Manual Clauses:**

A3010T (2010-08-16), Education and Experience:

The Bidder certifies that all the information provided in the résumés and supporting material submitted with its bid, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Bidder to be true and accurate. Furthermore, the Bidder warrants that every individual proposed by the Bidder for the requirement is capable of performing the Work described in the resulting contract.

7.12 FEDERAL CONTRACTORS PROGRAM FOR EMPLOYMENT EQUITY - DEFAULT BY CONTRACTOR

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and HRSDC-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by HRSDC will constitute the Contractor in default as per the terms of the Contract.

7.13 APPLICABLE LAWS

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in the province Ontario.

7.14 PRIORITY OF DOCUMENTS

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

a. these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;
b. General Conditions 2035 (2016-04-04);
c. Annex A, Statement of Work;
    i. Appendix A to Annex A - Task Authorization (TA) Form;
d. Annex C, Basis of Payment;
e. Annex B, Security Requirements Check List;
    i. Attachment 1 to Annex B – Security Guide
f. the signed Task Authorizations including any required Certifications;
g. Supply Arrangement Number EN578-170432/297/EI (the "**Supply Arrangement**")
h. the Contractor's bid dated April 26th, 2017.

7.15 FOREIGN NATIONALS (CANADIAN CONTRACTOR)

The Contractor must comply with Canadian immigration requirements applicable to foreign nationals entering Canada to work temporarily in fulfillment of the Contract. If the Contractor wishes to hire a foreign national to work in Canada to fulfill the Contract, the Contractor should immediately contact the nearest Service Canada regional office to enquire about Citizenship and Immigration Canada's requirements to issue a temporary work permit to a foreign national. The Contractor is responsible for all costs incurred as a result of non-compliance with immigration requirements.

7.16 INSURANCE REQUIREMENTS

A. Compliance with Insurance Requirements

1. The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.
2. The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.
3. The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

B. Commercial General Liability Insurance

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

2. The Commercial General Liability policy must include the following:

    a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

    b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

    c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

    d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

    e. Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

    f. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

    g. Employees and, if applicable, Volunteers must be included as Additional Insured.

    h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

[illegible] Information Act
ASFC - Divulgation en vertu de la Loi sur l'Accès à l'information.

i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

j. Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

l. Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

m. Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

C. Errors and Omissions Liability Insurance

1. The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

2. If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

3. The following endorsement must be included:

   Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

7.17 LIMITATION OF LIABILITY - INFORMATION MANAGEMENT/INFORMATION TECHNOLOGY

a. This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

b. **First Party Liability** :
   i. The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to :
      A. any infringement of intellectual property rights to the extent the Contractor breaches the section of the general conditions entitled "Intellectual Property Infringement and Royalties";
      B. physical injury, including death.
   ii. The Contractor is liable for all direct damages affecting real or tangible personal property owned, possessed, or occupied by Canada.
   iii. Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.
   iv. The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i.A) above.
   v. The Contractor is also liable for any other direct damages to Canada caused by the Contractor in any way relating to the Contract, including :

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

A. any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and
B. any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of [.75] times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under paragraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00 , whichever is more.

vi. If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent backup kept by Canada. Canada is responsible for maintaining an adequate backup of its records and data.

c. **Third Party Claims :**
   i. Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.
   ii. If Canada is required, as a result of joint and several liability, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite paragraph (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.
   iii. The Parties are only liable to one another for damages to third parties to the extent described in this paragraph c.

7.18 PROFESSIONAL SERVICES - GENERAL

a. The Contractor must provide professional services on request as specified in this contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, and language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.
b. If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.
c. In General Conditions 2035, the Section titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

1. If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:
    a. the name, qualifications and experience of a proposed replacement immediately available for Work; and
    b. security information on the proposed replacement as specified by Canada, if applicable.

    The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

2. Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:
    a. exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract for default under Section titled "Default of the Contractor", or
    b. assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that meet or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this subarticle (c).
3. Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Section. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that a resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order that a resource stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.
4. The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

7.19 SAFEGUARDING ELECTRONIC MEDIA

a. Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.
b. If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

7.20 REPORTING REQUIREMENTS

The Contractor must provide reports identified in the Task Authorization or the Statement of Work, if any, to the Technical Authority and or the Contracting Authority.

7.21 REPRESENTATIONS AND WARRANTIES

The Contractor made statements regarding its own and its proposed resources experience and expertise in its bid that resulted in the award of the Contract and issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract,

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

7.22 ACCESS TO CANADA'S PROPERTY AND FACILITIES

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

7.23 GOVERNMENT PROPERTY

Canada agrees to supply the Contractor with the items listed in the statement of work (the "**Government Property**"). The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

7.24 TRANSITION SERVICES AT END OF CONTRACT PERIOD

The Contractor agrees that, in the period leading up to the end of the Contract Period and for up to three months afterwards, it will make all reasonable efforts to assist Canada in the transition from the Contract to a new contract with another supplier. The Contractor agrees that there will be no charge for these services.

7.25 IDENTIFICATION PROTOCOL RESPONSIBILITIES

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

a. Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify if an individual is not a permanent employee of the Contractor prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not a Contractor permanent employee;
b. During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and
c. If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.
d. If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.
e. In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

7.26 NON-DISCLOSURE AGREEMENT

The Contractor must obtain from its employee(s) or subcontractor(s) the completed and signed non-disclosure agreement, which can be found in Annex "D", and provide it to the Contracting Authority before they are given access to information by or on behalf of Canada in connection with the Work.

ANNEX A - STATEMENT OF WORK

TITLE

CBSA requires as and when requested services of two (2) Enterprise Architect Level 3 to work and assist in the deliverables in support of the Enterprise Business Architecture team

BACKGROUND

CBSA was created in 2003 as part of major restructuring of the public safety portfolio in response to the events of 9/11 2001. In its first five years, CBSA's focus was on the transitioning and integration of the selected portfolios from Canada Customs and Revenue Agency, Citizenship and Immigration Canada, and the Food Inspection Agency. During the transition, CBSA maintained the services and service levels that were provided by the three legacy organizations while initiating incremental changes to the CBSA service delivery.

In fiscal 2008-09, CBSA initiated a change agenda with the goal of achieving greater efficiency, increase emphasis on public safety while facilitating the flow of legitimate goods and people across the Canadian border. As part of the change agenda, a cross-agency team was formed to support the development and analysis of business models with the goal of creating a transformation strategy and a maintainable asset. This team created an initial set of models that describe (at a high-level) what CBSA does.

In fiscal years 2009-10 and 2010-11, the initial work of the cross-agency team was leveraged to build a consolidated and integrated set of business models that reflect what CBSA does to deliver its legislated mandate and to create a business architecture capability to manage and apply the business models to the Agency. During this period, the business architecture capability has been applied to strategic planning, performance measurement, service strategy and business requirements management for eManifest and major projects.

OBJECTIVE

The objective is to acquire resources that have the expertise in Enterprise and Business architecture area to guide and support program areas and IT architecture to advance the Travellers and Commercial projects at the CBSA.

SCOPE

The focus of this statement of work is to build upon the work of the past four years and fully integrate the business architecture capability with the enterprise architecture program with the goal of improving the integration of the business of CBSA with its core capabilities including information and other technologies. Success of the continued work will require the ability to integrate the business architecture capability with TOGAF® 9 and the demand driven service oriented approaches to business architecture articulated in the Government Strategic Reference Model (GSRM) and the related methods described by the Treasury Board Secretariat's Business Transformation Enablement Program (BTEP). Also key to success is the ability to maintain the results of this work in an integrated repository.

The work on the project will include but not limited to the following:

4.1.1 The development of business architecture artifacts as they relate to TOGAF® and the GSRM;
4.1.2 The harvesting/development of logical business models to show both the "as is" and "to be" states of service processes related to specific CBSA programs;
4.1.3 Facilitate meetings with key staff assigned to this effort in order to define, test, and agree upon information collection, modeling and analytical approaches;
4.1.4 Facilitate meetings with stakeholders within CBSA;
4.1.5 Participate in the planning, design, and conduct of meetings with external stakeholders;
4.1.6 Provide mentoring and ad hoc training to the working group members; and
4.1.7 Provide other advice on enterprise business architecture as required.

TASKS AND ACTIVITIES

The Enterprise Architect, Level 3 will be working with the following:

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

- TOGAF® 9;
- Governments of Canada Strategic Reference Model (GSRM);
- The CBSA Agency Business Model Framework
- The integration of GSRM and TOGAF® 9;
- The integration of business architecture within the context of an overall Enterprise Architecture program;
- The integration of enterprise architecture with strategic planning;
- The application of business architecture to business requirements management; and
- Risk management and public safety community.

The Enterprise Architect Level 3 will be responsible for, but not limited to doing the following:

5.1.1 Using the CBSA's Agency Business Model Framework facilitate the extension and maintenance of the Enterprise Business Architecture, and the Enterprise Architecture Program;
5.1.2 Provide customized training and mentoring to staff on the application of CBSA's Agency Business Model Framework and its integration within the project management and enterprise architecture processes;
5.1.3 Develop guidance on the application of business architecture within CBSA;
5.1.4 Lead staff assigned to this effort in the identification opportunities for consolidation of common processes and common information systems;
5.1.5 Lead staff assigned to this effort in the identification of activities which are candidates for process improvement;
5.1.6 Facilitate meetings and workshops;
5.1.7 Develop business models and process models as required;
5.1.8 Create presentations and present to various stakeholders, and facilitate meetings and discussions; and,
5.1.9 Review all work products for consistency and correctness.

DELIVERABLES AND ASSOCIATED SCHEDULE

Each Task Authorization will specify the deliverables to be produced as well as the associated schedule. Work is ongoing and based on project plans and schedules. Schedules will be determined as far as in advance as possible based on monthly status reports from key stakeholders.

The Enterprise Architect Level 3 may be required to deliver, but not limited to, the following:

- 7.1.1 Maintain the Agency Business Model Framework ensuring that the framework and guidance reflects the practices as implemented;
- 7.1.2 Manage the development and implementation of an architectural improvement plan;
- 7.1.3 Coach, mentor and train the organization to perform enterprise business architecture using TOGAF® and GSRM-BTEP methods;
- 7.1.4 Participate in the development of the business models and process models as required;
- 7.1.5 Create and deliver presentations to various stakeholders, and facilitate meetings and discussions to support the use of GSRM and BTEP;
- 7.1.6 Using the BTEP-GSRM methodologies, customize an approach to creating the business models;
- 7.1.7 Coach, mentor and train the organization to perform enterprise business architecture using GSRM-BTEP methods; and,
- 7.1.8 Create and deliver presentations to various stakeholders, and facilitate meetings and discussions.

Technical Documentation will be created using Microsoft Word, Excel, PowerPoint, Project and Visio, with templates provided, unless otherwise directed by the Project Authority.

CONSTRAINTS

At no time and in no way is CBSA data to be removed from CBSA sites, nor will access to or from the Contractor's IT systems through the use of a session or ling (e.g. VPN) be permitted. The contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

The CBSA's working hours are between 08:00 to 18:00 Monday through Friday, except for Statutory Holidays where Government Offices are closed. These are core hours and are not representative of the duration of a Contractor's work

[illegible] to Information Act
ASFC - Divulgation en vertu de la loi sur l'Accès à l'information.

day. The hours that the Contractor will work will be specified in the TA and are expected to be 7.5 hours daily, within the core hours. All proposed personnel must be available to work outside normal office hours during the duration of the Contract. The Technical/Project Authority will advise the Contractor as soon as possible of any required work outside standard working hours.

METHOD AND SOURCE OF ACCEPTANCE

All services rendered under the Contract/TAs are subject to inspection by the Project Authority.

LANGUAGE

The proposed Resource will be required to perform the work in English. Every individual proposed in its bid will be fluent in English. The individual proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

REPORTING REQUIREMENTS

If a TA has been authorized, the resource must provide a weekly status report in MS Word electronically to the Project Authority outlining what work was undertaken during the reporting period, what work is still outstanding, and any issues or concerns that the resource wants to identify to the attention of the Project Authority. The status reports must also be supported by a monthly detailed time sheet mapped to deliverables, using standard template.

LOCATION OF WORK

The work is expected to be performed on CBSA premises located at 333 North River Road, Ottawa, Ontario, K1A 0L8 or an alternative CBSA location in the National Capital Region.

There is no travel requirement under this Contract.

CLIENT SUPPORT

The Project Authority will ensure that the Contractor's resource is provided with:

- Security access to the building;
- Workstation and network access; and
- Access to relevant project/architecture documentation.

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

APPENDIX A TO ANNEX A - TASK AUTHORIZATION (TA) FORM

TASK AUTHORIZATION	
Contractor:	**Contract Number:**
Task Number:	**Date:**
Amendment Number:	**Date:**

1. **TA Request**
(For completion by Technical Authority)

Background/Objective:

This section should provide context for the work and a high level outcome. For example: This is the 1st phase of the project so the focus is only on certain aspects of the work. This will assist the procurement officer in their review and will distinguish from previous or subsequent TAs.

Tasks:

This section lists the detailed and specific tasks the resource is required to perform to achieve the outcome.

Deliverables and Associated Schedule:

This section lists the detailed deliverables the resource must produce along with the due dates of when they must submit them. The description of the deliverables should make it clear to the supplier and their resource what constitutes an acceptable deliverable so there is no ambiguity in terms of the quality we expect. If we do not provide this, we have little to no recourse for poor performance.

Format of Deliverables:

2. PERIOD OF SERVICES	**From:** ___________	**To:** _______________
3. Work Location		
4. Other Conditions /Restraints	**[ ] Yes [ ] No Specify:**	
5. Travel	**[ ] Yes [ ] No Specify:**	
6. Basis of Payment	**Limitation of Expenditure [ ]** **Firm Price [ ]**	**Ceiling Price [ ]**

7. METHOD OF PAYMENT:

☐ Single ☐ Monthly ☐ Milestones

8. LEVEL OF SECURITY CLEARANCE REQUIRED FOR THE CONTRACTOR'S PERSONNEL

[ ] Reliability Status [ ] Confidential [ ] Secret [ ] Not Applicable

9. BILINGUALISM (if applicable)

ANNEX C - BASIS OF PAYMENT

A. CONTRACT PERIOD

During the period of the contract, the Contractor will be paid as specified below for work performed in accordance with the contract.

1.0 LABOR

The Contractor will be paid as specified below for work performed in accordance with the Contract.

Category of personnel and level	Firm all-inclusive per diem rate (GST/HST extra)
P.2 Enterprise Architect	

1.1 Definition of a Day/Proration:

A day is defined as 7.5 hours exclusive of meal breaks. Payment will be for days actually worked with no provision for annual leave, statutory holidays and sick leave. Time worked which is more or less than a day will be prorated to reflect actual time worked in accordance with the following formula:

$$\frac{\text{Hours worked X applicable firm per diem rate}}{\text{7.5 hours}}$$

(i) All proposed personnel must be available to work outside normal office hours during the duration of the Contract.

(iii) No overtime charges will be authorized under the Contract. All time worked will be compensated according to terms of payment.

1.2 GST/HST

(a) All prices and amounts of money in the contract are exclusive of Goods and Services Tax (GST) or Harmonized Sales Tax (HST), as applicable, unless otherwise indicated. The GST or HST, whichever is applicable, is extra to the price herein and will be paid by Canada.

(b) The estimated HST is included in the total estimated cost shown on page 1 of this Contract. The estimated HST to the extent applicable will be incorporated into all invoices and progress claims and shown as a separate item on invoices and progress claims. All items that are zero-rated, exempt, or to which the HST does not apply, are to be identified as such on all invoices. The Contractor agrees to remit to Canada Revenue Agency (CRA) any amounts of HST paid or due.

(c) All deliverables are F.O.B. Destination, and Canadian Customs Duty included, where applicable.

(d) The Crown will not accept any travel and living expenses incurred by the Contractor as a consequence of any relocation required to satisfy the terms of the Contract.

All estimates contained in the Contract relating to travel, optional items or as and when requested goods or services are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to exercise such options or purchase such services.

2.0 TRAVEL AND LIVING EXPENSES

Total Estimated Cost of Travel and Living Expenses: $0.00

ANNEX D - NON-DISCLOSURE AGREEMENT

The successful resource(s) will be required to sign the agreement prior to commence any work under this contract. The document will be completed at contract award.

I, ______________________________, recognize that in the course of my work as an employee or subcontractor of ______________________________, I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. ____________ between Her Majesty the Queen in right of Canada, represented by Canada Border Services Agency and ______________________________, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.
I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: ____________.

Annex C - Basis of Payment
Annex D - Non-Disclosure Agreement

PART 7 - RESULTING CONTRACT CLAUSES

The following clauses apply to and form part of any contract resulting from the bid solicitation.

7.1 REQUIREMENT

a. TRM Technologies Inc. (the Contractor) agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with and at the prices set out in the Contract. This includes providing professional services, as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

b. **Client(s):** Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

c. **Reorganization of Client:** The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

d. **Defined Terms:** Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

e. **Location of Services:** Services must be delivered as requested to the locations specified in the Contract, which delivery locations must exclude any area subject to one of the Comprehensive Land Claim Agreements (CLCAs).

7.2 TASK AUTHORIZATION ("TA")

a. **As and When Requested Task Authorizations:** The Work or a portion of the Work to be performed under the Contract is on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

b. **Evaluation and Qualification of Additional Resources:** Resources who are being proposed in response to a TA who were not qualified at bid closing must meet all mandatory requirements and the minimum score of the Technical Criteria, as per Attachment 1 to Part 4 of the Solicitation, for the resource category under which they are being proposed.

c. **Form and Content of Task Authorization:**
   i. If a requirement for a specific task is identified, a draft "statement of task" in a draft TA using the form specified in Appendix A to Annex A will be prepared by the Client and sent to the Contractor by the Contracting Authority. Once it receives the statement of task, the Contractor must submit a response to the Contracting Authority identified in the TA detailing the cost and time to complete the task.
   ii. The draft Task Authorization will contain the details of the activities to be performed, and must contain the following information, if applicable:

      A. a task number;

B. The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);
C. the details of any financial coding to be used;
D. the category of resources and the number required;
E. a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);
F. the start and completion dates;
G. milestone dates for deliverables and payments (if applicable);
H. the number of person-days of effort required;
I. whether the work requires on-site activities and the location;
J. the language profile of the resources required;
K. the level of security clearance required of resources;
L. the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and
M. any other constraints that might affect the completion of the task.

d. **Contractor's Response to Draft Task Authorization:** The Contractor must provide the Technical Authority, within **two (2)** working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

e. **Approval Process:** If Canada approves the Contractor's task response, Canada (by its authorized representative, as described in this contract) will issue the TA by forwarding a fully signed copy of the final TA form to the Contractor. Whether or not to approve or issue a TA is entirely within Canada's discretion.

f. **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations:**

To be validly issued, a TA must include the following signature(s):

A. for any TA with a value less than or equal to $0.00 (including Applicable Taxes), the TA must be signed by the Technical Authority and the Contracting Authority; and
B. for any TA with a value greater than this amount, a TA must be signed by the Technical Authority and the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TAs at any time, or reduce the dollar value threshold described in sub-article (A) above; any suspension or reduction notice is effective upon receipt.

g. **Periodic Usage Reports:**

i. The Contractor must compile and maintain records on its provision of services to the federal government under validly issued TAs issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below.. If any required information is not available, the Contractor must indicate the reason. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The Contractor must submit the periodic usage reports on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

ii. The quarterly periods are defined as follows:

  A. April 1 to June 30;
  B. July 1 to September 30;
  C. October 1 to December 31; and
  D. January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

iii. Each report must contain the following information for each validly issued TA (as amended):
  A. the Task Authorization number and the Task Authorization Revision number(s), if applicable;
  B. a title or a brief description of the task;
  C. the name, Resource category and level of each resource involved in performing the TA, as applicable;
  D. the total estimated cost specified in the TA (GST or HST extra);
  E. the total amount (GST or HST extra) expended to date;
  F. the start and completion date; and
  G. the active status, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

iv. Each report must also contain the following cumulative information for all the validly issued TAs (as amended):
  A. the amount (GST or HST extra) specified in the contract (as last amended, if applicable) as Canada's total liability to the contractor for all validly issued TAs; and
  B. the total amount, GST or HST extra, expended to date against all validly issued TA's.

h. **Refusal of Task Authorizations:** The Contractor is not required to submit a response to every draft TA sent to it by Canada. However, in addition to Canada's other rights to terminate the Contract, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions if the Contractor in at least three instances has either not responded or has not submitted a valid response when sent a draft TA. A valid response is one that is submitted within the required time period and meets all requirements of the TA issued, including proposing the required number of resources who each meet the minimum experience and other requirements of the categories identified in the TA at pricing not exceeding the rates set out in Annex C. Each time the Contractor does not submit a valid response, the Contractor agrees Canada may at its option decrease the Minimum Contract Value in the clause titled "Minimum Work Guarantee" by 2%. This decrease will be evidenced for administrative purposes only through a contract amendment issued by the Contracting Authority (which does not require the agreement of the Contractor).

i. **Consolidation of TAs for Administrative Purposes:** The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TAs for administrative purposes.

7.3 MINIMUM WORK GUARANTEE

a. In this clause,
  i. "**Maximum Contract Value**" means the amount specified in the "Limitation of Expenditure" clause set out in the Contract (excluding Applicable Taxes); and
  ii. "**Minimum Contract Value**" means 5 % of the Maximum Contract Value on the date the contract is first issued.

b. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

c. In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work performed.
d. Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract:
    i. for default.
    ii. for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or
    iii. for convenience within ten business days of Contract award.

7.4 STANDARD CLAUSES AND CONDITIONS

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual issued by Public Works and Government Services Canada.

a. **General Conditions :**

2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

The text under Subsection 04 of Section 41 – Integrity Provisions - Contract, of General Conditions 2035 referenced above is replaced by:

> During the entire period of the Contract, the Contractor must diligently update, by written notice to the Contracting Authority, the list of names of all individuals who are directors of the Contractor whenever there is a change. As well, whenever requested by Canada, the Contractor must provide the corresponding Consent Forms.

With respect to Section 30 - Termination for Convenience, of General Conditions 2035, unless already present, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

> 4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.
>
> 5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of
>
> > (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or
> >
> > (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.
>
> 6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

7.5 SECURITY REQUIREMENT

The Security Requirement Check List (SRCL and related clauses), as set out under Annex "B" to Part B to the Supply Arrangement, applies to the Contract.

SECURITY REQUIREMENT FOR CANADIAN SUPPLIER: PWGSC FILE COMMON-PS-SRCL#06

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer/Supply Arrangement, hold a valid Designated Organization Screening (DOS), issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).
2. The Contractor/Offeror personnel requiring access to PROTECTED information, assets or sensitive work site(s) must EACH hold a valid **RELIABILITY STATUS**, granted or approved by CISD/PWGSC.
3. The Contractor/Offeror MUST NOT remove any PROTECTED information or assets from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.
4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.
5. The Contractor/Offeror must comply with the provisions of the:
    a. Security Requirements Check List and security guide (if applicable), attached at Annex B;
    b. *Industrial Security Manual* (Latest Edition).

7.5.1 ADDITIONAL SECURITY REQUIREMENT:

The CBSA, will conduct its own personnel Reliability Status assessment of the Contractor (specifically the Contractor personnel), which is allowed under the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security - Personnel Security Standard. Reliability Status assessment conducted by the CBSA will include a credit check.

If the Contractor (specifically the Contractor personnel), has already been screened under the TBS Policy on Government Security - Personnel Security Standard, the Contractor (specifically the Contractor personnel), will still undergo a security screening process to be conducted by the CBSA.

The credit check and fingerprinting*, if required, will be performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian and International Industrial Security Directorate" (CIISD).

Until the credit check, fingerprinting* (if required) and all other security screening processes required have been completed and the Contractor (specifically the Contractor personnel) is deemed suitable by the CBSA, the Contractor (specifically the Contractor personnel) will not be permitted access to Protected / Classified information or assets, and further, will not be permitted to enter sites where such information or assets are kept.

***Fees are applicable. Fingerprinting, if required, will be at the Bidder's cost.**

7.6 CONTRACT PERIOD

a. **Contract Period** : The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

    i. The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends five (5) years later.

7.7 AUTHORITIES

a. **Contracting Authority**

The Contracting Authority for the Contract is:

Name: Robert Penwarden
Title: A/Team Leader, SPMMD
Organization: Canada Border Services Agency
Address: 355 North River Road, 17th Floor, Tower B, Ottawa, Ontario K1A 0L8
Telephone: 343-291-5669
E-mail address: Robert.Penwarden@cbsa-asfc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

b. **Technical Authority**

The Technical Authority for the Contract is:

Name: Bruno Ouellet
Title: Director, Enterprise Architecture
Organization: Canada Border Services Agency
Address: 355 North River Road, 17th Floor, Tower B, Ottawa, Ontario K1A 0L8
Telephone: 343-291-7388
E-mail address: Bruno.Ouellet@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

c. **Contractor's Representative**

Name:
Title: VP Sales
Organization: TRM Technologies Inc.
Address: 1000 - 280 Albert Street, Ottawa, ON K1P 5G8
Telephone:
E-mail address:

7.8 PROACTIVE DISCLOSURE OF CONTRACTS WITH FORMER PUBLIC SERVANTS

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

7.9 PAYMENT

a. **Basis of Payment:**

One or more of the basis of payment options below will be specified in the TA:

i. **Professional Services provided under a Task Authorization with a Limitation of Expenditure:** For professional services requested by Canada, Canada will pay the Contractor, in arrears, up to the Maximum Price, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex C, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

ii. **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

iii. **Professional Services provided under a Task Authorization with a Ceiling Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the ceiling price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

iv. **Pre-Authorized Travel and Living Expenses:**

Canada will not pay any travel or living expenses associated with performing the Work.

v. **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

vi. **Professional Services Rates:** In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Policy (or equivalent) then in effect, which may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

vii. **Purpose of Estimates**: All estimated costs contained in the Contract are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to purchase services in these amounts. Any commitments to purchase specific amounts or values of services are described elsewhere in the Contract.

b. **Limitation of Expenditure:** (Cumulative Total of all Approved Task Authorizations) Canada's total liability to the Contractor under the Contract must not exceed the amount set out on page one of the Contract, less any Applicable taxes. With respect to the amount set out on page one of the Contract, Customs duties are included and Goods and Services Tax or Harmonized Sales Tax is included, if applicable. Any commitments to purchase specific amounts or values of goods or services are described elsewhere in the Contract.

i. No increase in the total liability of Canada or in the price of the Work resulting from any design changes, modifications or interpretations of the Work, will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been approved, in writing, by the Contracting Authority before their incorporation into the Work. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceed before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum when:

A. It is 75 percent committed, or

B. 4 months before the Contract expiry date, or

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

C. as soon as the Contractor considers that the contract funds provided are inadequate for the completion of the Work,

whichever comes first.

If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

c. **Methods of Payment - Approved TA:** One or more of the following methods of payment will form part of the approved TA:

For a Firm Price TA:

(a) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

(b) **Milestone Payment:** Canada will pay the Contractor on a milestone basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete claim for payment and any other document required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all required certificates have been signed by the respective authorized representatives; all work associated with the milestone and as applicable any deliverable required has been completed and accepted by Canada.

For the Work specified in an approved TA subject to a cost reimbursable to a limitation of expenditure or ceiling price:

(c) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

(d) **Monthly Payment:** Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
ii. all such documents have been verified by Canada;
iii. the Work performed has been accepted by Canada.

d. **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contract must repay any overpayment, at Canada's request.

e. **Payment Credits**

i. **Failure to Provide Resource:**

A. If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of *10 days*.

B. **Corrective Measures:** If credits are payable under this Article for *two consecutive months* or for *three months in any twelve-month period*, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and *20 working days* to rectify the underlying problem.

C. **Termination for Failure to Meet Minimum Availability Level:** In addition to any other rights it has under the Contract, Canada may terminate the Contract for default by giving the Contractor *3 months'* written notice of its intent, if any of the following apply :

1. the total amount of credits for a given monthly billing cycle reach a level of *10%* of the total billing for that month; or
2. the corrective measures required of the Contractor described above are not met.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

ii. **Credits Apply during Entire Contract Period:** The Parties agree that the credits apply throughout the Contract Period.

iii. **Credits represent Liquidated Damages:** The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

iv. **Canada's Right to Obtain Payment:** The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

v. **Canada's Rights & Remedies not Limited:** The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

vi. **Audit Rights:** The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

f. **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

i. Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

ii. If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

7.10 INVOICING INSTRUCTIONS

a. The Contractor must submit invoices in accordance with the information required in the General Conditions.

b. The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

c. By submitting invoices the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

d. The Contractor will submit invoices on its own form, which will include:

   (i) the date;
   (ii) the Contractor name and address;
   (iii) the Destination
   (iv) Standing Offer/Supply Arrangement number;
   (v) Contract serial number;
   (vi) Financial codes, including GST or HST (as applicable) registration number;
   (vii) Description of the Work
   (viii) Category(ies) of Personnel and number of days worked;
   (ix) Firm Per Diem Rate on which the total dollar amount of the invoice is based;
   (x) the amount invoiced (exclusive of the Goods and Services Tax (GST) or Harmonized Sales Tax (HST) as appropriate) and the amount of GST or HST, as appropriate, shown separately;
   (xi) Client Reference Number (CRN);
   (xii) Business Number (BN); and
   (xiii) Total value billed to date and the dollar amount remaining in the Contract to date.

e. The Contractor must send the original and one copy of the invoice to the Technical Authority`s paying office (CBSA Finance) at the following location on a monthly basis:

All invoices must be submitted using the following method (**only one copy of the invoice should be sent to the Agency**):

Email: Only legible electronic (PDF, Word, Excel) files will be accepted; all others will be returned.

vendors-fournisseurs@cbsa-asfc.gc.ca

This email address is to be used for submitting invoices and for payment status inquiries.

Direct Deposit:
The Government of Canada will soon be phasing out federal government cheques; we strongly encourage Businesses that supply goods and services to the Government of Canada to enrol in direct deposit for account payable.

Please contact ca-ci@cbsa-asfc.gc.ca to obtain additional information, to confirm direct deposit enrolment process and the steps to be followed.

***IMPORTANT NOTE:* If a supplier omits any required information pertaining to payment processing from the invoice, the invoice will be returned at the discretion of the CBSA and will not be paid until valid payment referencing is provided.**

7.11 CERTIFICATIONS

a. Compliance with the certifications provided by the Contractor in its bid or any TA quotation is a condition of the Contract and subject to verification by Canada during the entire Contract Period. If the Contractor does not comply with any certification or it is determined that any certification made by the Contractor is untrue, whether made knowingly or unknowingly, Canada has the right, under the default provision of the Contract, to terminate the Contract for default.

b. **SACC Manual Clauses:**

A3010T (2010-08-16), Education and Experience:

The Bidder certifies that all the information provided in the résumés and supporting material submitted with its bid, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Bidder to be true and accurate. Furthermore, the Bidder warrants that every individual proposed by the Bidder for the requirement is capable of performing the Work described in the resulting contract.

7.12 FEDERAL CONTRACTORS PROGRAM FOR EMPLOYMENT EQUITY - DEFAULT BY CONTRACTOR

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and HRSDC-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by HRSDC will constitute the Contractor in default as per the terms of the Contract.

7.13 APPLICABLE LAWS

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in the province Ontario.

7.14 PRIORITY OF DOCUMENTS

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

a. these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;
b. General Conditions 2035 (2016-04-04);
c. Annex A, Statement of Work;
    i. Appendix A to Annex A - Task Authorization (TA) Form;
d. Annex C, Basis of Payment;
e. Annex B, Security Requirements Check List;
    i. Attachment 1 to Annex B – Security Guide
f. the signed Task Authorizations including any required Certifications;
g. Supply Arrangement Number EN578-170432/297/EI (the "**Supply Arrangement**")
h. the Contractor's bid dated April 26th, 2017.

7.15 FOREIGN NATIONALS (CANADIAN CONTRACTOR)

The Contractor must comply with Canadian immigration requirements applicable to foreign nationals entering Canada to work temporarily in fulfillment of the Contract. If the Contractor wishes to hire a foreign national to work in Canada to fulfill the Contract, the Contractor should immediately contact the nearest Service Canada regional office to enquire about Citizenship and Immigration Canada's requirements to issue a temporary work permit to a foreign national. The Contractor is responsible for all costs incurred as a result of non-compliance with immigration requirements.

7.16 INSURANCE REQUIREMENTS

A. Compliance with Insurance Requirements

1. The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.
2. The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.
3. The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

B. Commercial General Liability Insurance

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

2. The Commercial General Liability policy must include the following:

    a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

    b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

    c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

    d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

    e. Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

    f. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

    g. Employees and, if applicable, Volunteers must be included as Additional Insured.

    h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

j. Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

l. Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

m. Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

C. Errors and Omissions Liability Insurance

1. The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

2. If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

3. The following endorsement must be included:

   Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

7.17 LIMITATION OF LIABILITY - INFORMATION MANAGEMENT/INFORMATION TECHNOLOGY

a. This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

b. **First Party Liability** :
   i. The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to :
      A. any infringement of intellectual property rights to the extent the Contractor breaches the section of the general conditions entitled "Intellectual Property Infringement and Royalties";
      B. physical injury, including death.
   ii. The Contractor is liable for all direct damages affecting real or tangible personal property owned, possessed, or occupied by Canada.
   iii. Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.
   iv. The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i.A) above.
   v. The Contractor is also liable for any other direct damages to Canada caused by the Contractor in any way relating to the Contract, including :

A. any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

B. any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of [.75] times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under paragraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00 , whichever is more.

vi. If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent backup kept by Canada. Canada is responsible for maintaining an adequate backup of its records and data.

c. **Third Party Claims :**

i. Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

ii. If Canada is required, as a result of joint and several liability, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite paragraph (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

iii. The Parties are only liable to one another for damages to third parties to the extent described in this paragraph c.

7.18 PROFESSIONAL SERVICES - GENERAL

a. The Contractor must provide professional services on request as specified in this contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, and language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

b. If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

c. In General Conditions 2035, the Section titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

1. If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:
    a. the name, qualifications and experience of a proposed replacement immediately available for Work; and
    b. security information on the proposed replacement as specified by Canada, if applicable.

    The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

2. Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:
    a. exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract for default under Section titled "Default of the Contractor", or
    b. assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that meet or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this subarticle (c).
3. Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Section. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that a resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order that a resource stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.
4. The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

7.19 SAFEGUARDING ELECTRONIC MEDIA

a. Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.
b. If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

7.20 REPORTING REQUIREMENTS

The Contractor must provide reports identified in the Task Authorization or the Statement of Work, if any, to the Technical Authority and or the Contracting Authority.

7.21 REPRESENTATIONS AND WARRANTIES

The Contractor made statements regarding its own and its proposed resources experience and expertise in its bid that resulted in the award of the Contract and issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

7.22 ACCESS TO CANADA'S PROPERTY AND FACILITIES

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

7.23 GOVERNMENT PROPERTY

Canada agrees to supply the Contractor with the items listed in the statement of work (the "**Government Property**"). The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

7.24 TRANSITION SERVICES AT END OF CONTRACT PERIOD

The Contractor agrees that, in the period leading up to the end of the Contract Period and for up to three months afterwards, it will make all reasonable efforts to assist Canada in the transition from the Contract to a new contract with another supplier. The Contractor agrees that there will be no charge for these services.

7.25 IDENTIFICATION PROTOCOL RESPONSIBILITIES

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

a. Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify if an individual is not a permanent employee of the Contractor prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not a Contractor permanent employee;
b. During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and
c. If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.
d. If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.
e. In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

7.26 NON-DISCLOSURE AGREEMENT

The Contractor must obtain from its employee(s) or subcontractor(s) the completed and signed non-disclosure agreement, which can be found in Annex "D", and provide it to the Contracting Authority before they are given access to information by or on behalf of Canada in connection with the Work.

ANNEX A - STATEMENT OF WORK

TITLE

CBSA requires as and when requested services of two (2) Enterprise Architect Level 3 to work and assist in the deliverables in support of the Enterprise Business Architecture team

BACKGROUND

CBSA was created in 2003 as part of major restructuring of the public safety portfolio in response to the events of 9/11 2001. In its first five years, CBSA's focus was on the transitioning and integration of the selected portfolios from Canada Customs and Revenue Agency, Citizenship and Immigration Canada, and the Food Inspection Agency. During the transition, CBSA maintained the services and service levels that were provided by the three legacy organizations while initiating incremental changes to the CBSA service delivery.

In fiscal 2008-09, CBSA initiated a change agenda with the goal of achieving greater efficiency, increase emphasis on public safety while facilitating the flow of legitimate goods and people across the Canadian border. As part of the change agenda, a cross-agency team was formed to support the development and analysis of business models with the goal of creating a transformation strategy and a maintainable asset. This team created an initial set of models that describe (at a high-level) what CBSA does.

In fiscal years 2009-10 and 2010-11, the initial work of the cross-agency team was leveraged to build a consolidated and integrated set of business models that reflect what CBSA does to deliver its legislated mandate and to create a business architecture capability to manage and apply the business models to the Agency. During this period, the business architecture capability has been applied to strategic planning, performance measurement, service strategy and business requirements management for eManifest and major projects.

OBJECTIVE

The objective is to acquire resources that have the expertise in Enterprise and Business architecture area to guide and support program areas and IT architecture to advance the Travellers and Commercial projects at the CBSA.

SCOPE

The focus of this statement of work is to build upon the work of the past four years and fully integrate the business architecture capability with the enterprise architecture program with the goal of improving the integration of the business of CBSA with its core capabilities including information and other technologies. Success of the continued work will require the ability to integrate the business architecture capability with TOGAF® 9 and the demand driven service oriented approaches to business architecture articulated in the Government Strategic Reference Model (GSRM) and the related methods described by the Treasury Board Secretariat's Business Transformation Enablement Program (BTEP). Also key to success is the ability to maintain the results of this work in an integrated repository.

The work on the project will include but not limited to the following:

4.1.1 The development of business architecture artifacts as they relate to TOGAF® and the GSRM;
4.1.2 The harvesting/development of logical business models to show both the "as is" and "to be" states of service processes related to specific CBSA programs;
4.1.3 Facilitate meetings with key staff assigned to this effort in order to define, test, and agree upon information collection, modeling and analytical approaches;
4.1.4 Facilitate meetings with stakeholders within CBSA;
4.1.5 Participate in the planning, design, and conduct of meetings with external stakeholders;
4.1.6 Provide mentoring and ad hoc training to the working group members; and
4.1.7 Provide other advice on enterprise business architecture as required.

TASKS AND ACTIVITIES

The Enterprise Architect, Level 3 will be working with the following:

- TOGAF® 9;
- Governments of Canada Strategic Reference Model (GSRM);
- The CBSA Agency Business Model Framework
- The integration of GSRM and TOGAF® 9;
- The integration of business architecture within the context of an overall Enterprise Architecture program;
- The integration of enterprise architecture with strategic planning;
- The application of business architecture to business requirements management; and
- Risk management and public safety community.

The Enterprise Architect Level 3 will be responsible for, but not limited to doing the following:

5.1.1 Using the CBSA's Agency Business Model Framework facilitate the extension and maintenance of the Enterprise Business Architecture, and the Enterprise Architecture Program;
5.1.2 Provide customized training and mentoring to staff on the application of CBSA's Agency Business Model Framework and its integration within the project management and enterprise architecture processes;
5.1.3 Develop guidance on the application of business architecture within CBSA;
5.1.4 Lead staff assigned to this effort in the identification opportunities for consolidation of common processes and common information systems;
5.1.5 Lead staff assigned to this effort in the identification of activities which are candidates for process improvement;
5.1.6 Facilitate meetings and workshops;
5.1.7 Develop business models and process models as required;
5.1.8 Create presentations and present to various stakeholders, and facilitate meetings and discussions; and,
5.1.9 Review all work products for consistency and correctness.

DELIVERABLES AND ASSOCIATED SCHEDULE

Each Task Authorization will specify the deliverables to be produced as well as the associated schedule. Work is ongoing and based on project plans and schedules. Schedules will be determined as far as in advance as possible based on monthly status reports from key stakeholders.

The Enterprise Architect Level 3 may be required to deliver, but not limited to, the following:

- 7.1.1 Maintain the Agency Business Model Framework ensuring that the framework and guidance reflects the practices as implemented;
- 7.1.2 Manage the development and implementation of an architectural improvement plan;
- 7.1.3 Coach, mentor and train the organization to perform enterprise business architecture using TOGAF® and GSRM-BTEP methods;
- 7.1.4 Participate in the development of the business models and process models as required;
- 7.1.5 Create and deliver presentations to various stakeholders, and facilitate meetings and discussions to support the use of GSRM and BTEP;
- 7.1.6 Using the BTEP-GSRM methodologies, customize an approach to creating the business models;
- 7.1.7 Coach, mentor and train the organization to perform enterprise business architecture using GSRM-BTEP methods; and,
- 7.1.8 Create and deliver presentations to various stakeholders, and facilitate meetings and discussions.

Technical Documentation will be created using Microsoft Word, Excel, PowerPoint, Project and Visio, with templates provided, unless otherwise directed by the Project Authority.

CONSTRAINTS

At no time and in no way is CBSA data to be removed from CBSA sites, nor will access to or from the Contractor's IT systems through the use of a session or ling (e.g. VPN) be permitted. The contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

The CBSA's working hours are between 08:00 to 18:00 Monday through Friday, except for Statutory Holidays where Government Offices are closed. These are core hours and are not representative of the duration of a Contractor's work

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

day. The hours that the Contractor will work will be specified in the TA and are expected to be 7.5 hours daily, within the core hours. All proposed personnel must be available to work outside normal office hours during the duration of the Contract. The Technical/Project Authority will advise the Contractor as soon as possible of any required work outside standard working hours.

METHOD AND SOURCE OF ACCEPTANCE

All services rendered under the Contract/TAs are subject to inspection by the Project Authority.

LANGUAGE

The proposed Resource will be required to perform the work in English. Every individual proposed in its bid will be fluent in English. The individual proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

REPORTING REQUIREMENTS

If a TA has been authorized, the resource must provide a weekly status report in MS Word electronically to the Project Authority outlining what work was undertaken during the reporting period, what work is still outstanding, and any issues or concerns that the resource wants to identify to the attention of the Project Authority. The status reports must also be supported by a monthly detailed time sheet mapped to deliverables, using standard template.

LOCATION OF WORK

The work is expected to be performed on CBSA premises located at 333 North River Road, Ottawa, Ontario, K1A 0L8 or an alternative CBSA location in the National Capital Region.

There is no travel requirement under this Contract.

CLIENT SUPPORT

The Project Authority will ensure that the Contractor's resource is provided with:

- Security access to the building;
- Workstation and network access; and
- Access to relevant project/architecture documentation.

APPENDIX A TO ANNEX A - TASK AUTHORIZATION (TA) FORM

TASK AUTHORIZATION

Contractor:	**Contract Number:**
Task Number:	**Date:**
Amendment Number:	**Date:**

1. **TA Request**
(For completion by Technical Authority)

Background/Objective:

This section should provide context for the work and a high level outcome. For example: This is the 1st phase of the project so the focus is only on certain aspects of the work. This will assist the procurement officer in their review and will distinguish from previous or subsequent TAs.

Tasks:

This section lists the detailed and specific tasks the resource is required to perform to achieve the outcome.

Deliverables and Associated Schedule:

This section lists the detailed deliverables the resource must produce along with the due dates of when they must submit them. The description of the deliverables should make it clear to the supplier and their resource what constitutes an acceptable deliverable so there is no ambiguity in terms of the quality we expect. If we do not provide this, we have little to no recourse for poor performance.

Format of Deliverables:

2. PERIOD OF SERVICES	**From:** ____________	**To:** _______________
3. Work Location		
4. Other Conditions /Restraints	[ ] Yes [ ] No **Specify:**	
5. Travel	[ ] Yes [ ] No **Specify:**	
6. Basis of Payment	**Limitation of Expenditure [ ]** **Firm Price [ ]**	**Ceiling Price [ ]**

7. METHOD OF PAYMENT:

☐ Single ☐ Monthly ☐ Milestones

8. LEVEL OF SECURITY CLEARANCE REQUIRED FOR THE CONTRACTOR'S PERSONNEL

[ ] Reliability Status [ ] Confidential [ ] Secret [ ] Not Applicable

9. BILINGUALISM (if applicable)

[ ] English and French [ ] French [ ] English

TA Proposal
[For completion by Contractor]

10. Estimated Cost Contract

Category of Proposed Resource	Firm Per Diem Rate	Estimated # of Days	Total cost

		Sub-total Professional Fees:	$
		HST:	$
		Total:	$
TA Approval			

11. Signing Authorities		
	Signatures of Authorized Representatives	Date
Name & Title of Individual Authorized to Sign on Behalf of Contractor:		
Name & Title of Individual Authorized to Sign Pursuant to sub-section 32(1) of the *Financial Administration Act*:		
Name & Title of Contracting Authority:		

12. Invoicing

Payment to be made based on receipt of detailed invoices for services rendered, subject to full acceptance by the Project Authority. Total of payments not to exceed the grand total.

The supplier should invoice in ¼, ½, ¾ or whole day increments. For example 1.00, 1.25, 1.50 or 1.75 days.

Invoices must be sent electronically via email to:

ANNEX C - BASIS OF PAYMENT

A. CONTRACT PERIOD

During the period of the contract, the Contractor will be paid as specified below for work performed in accordance with the contract.

1.0 LABOR

The Contractor will be paid as specified below for work performed in accordance with the Contract.

Category of personnel and level	Firm all-inclusive per diem rate (GST/HST extra)
P.2 Enterprise Architect	

1.1 Definition of a Day/Proration:

A day is defined as 7.5 hours exclusive of meal breaks. Payment will be for days actually worked with no provision for annual leave, statutory holidays and sick leave. Time worked which is more or less than a day will be prorated to reflect actual time worked in accordance with the following formula:

$$\frac{\text{Hours worked X applicable firm per diem rate}}{\text{7.5 hours}}$$

(i) All proposed personnel must be available to work outside normal office hours during the duration of the Contract.

(iii) No overtime charges will be authorized under the Contract. All time worked will be compensated according to terms of payment.

1.2 GST/HST

(a) All prices and amounts of money in the contract are exclusive of Goods and Services Tax (GST) or Harmonized Sales Tax (HST), as applicable, unless otherwise indicated. The GST or HST, whichever is applicable, is extra to the price herein and will be paid by Canada.

(b) The estimated HST is included in the total estimated cost shown on page 1 of this Contract. The estimated HST to the extent applicable will be incorporated into all invoices and progress claims and shown as a separate item on invoices and progress claims. All items that are zero-rated, exempt, or to which the HST does not apply, are to be identified as such on all invoices. The Contractor agrees to remit to Canada Revenue Agency (CRA) any amounts of HST paid or due.

(c) All deliverables are F.O.B. Destination, and Canadian Customs Duty included, where applicable.

(d) The Crown will not accept any travel and living expenses incurred by the Contractor as a consequence of any relocation required to satisfy the terms of the Contract.

All estimates contained in the Contract relating to travel, optional items or as and when requested goods or services are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to exercise such options or purchase such services.

2.0 TRAVEL AND LIVING EXPENSES

Total Estimated Cost of Travel and Living Expenses: **$0.00**

ANNEX D - NON-DISCLOSURE AGREEMENT

The successful resource(s) will be required to sign the agreement prior to commence any work under this contract. The document will be completed at contract award.

I, ____, recognize that in the course of my work as an employee or subcontractor of ___________________________________, I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. ________________ between Her Majesty the Queen in right of Canada, represented by Canada Border Services Agency and ___________________________________, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.
I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: ________________.

AMENDMENT 004

This amendment is hereby raised to make the following changes to the Contract:

1. At Page 1 of the Contract, Total Estimated Cost:

DELETE: $3,591,436.20

INSERT: $5,116,540.44

2. At Article **6. Contract Period,** delete in its entirety.

Insert:

6. Contract Period

(a) Contract Period: The "Contract Period" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "Initial Contract Period", which begins on September 4, 2018 and ends September 3, 2021; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) Option to Extend the Contract:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to two additional one-year periods under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN UNCHANGED.

List of Annexes:

Annex A - Statement of Work

Appendix A to Annex A - Tasking Assessment Procedure
Appendix B to Annex A - Task Authorization (TA) Form
Appendix C to Annex A - Resources Assessment Criteria and Response Table
Appendix D to Annex A - Certifications at the TA stage

Annex B – Basis of Payment
Annex C - Security Requirements Check List

1. Requirement

(a) S.i. Systems Ltd. (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client**: Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

2. Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

(b) **Allocation of Task Authorizations**: More than one contract has been awarded for this requirement. As a result, the Task Authorizations issued under this series of contracts will be allocated in accordance with the following:

- (i) At the time this series of contracts was awarded, each contractor was allocated an amount of funding as specified in the Limitation of Expenditure based on the evaluation process described in the bid solicitation that resulted in the award of this series of contracts.
- (ii) When a Task Authorization is issued, Canada will use a rotational method to allocate the draft Task Authorizations where the rotation is based on the ranking obtained by the Contractor during the Bid Solicitation.
- (iii) Canada will send the first TA to the first ranked Contractor and the second TA to the second ranked Contractor. This rotational process will be repeated for each subsequent series of TAs issued by Canada.
- (iv) The contractor sent a draft TA will have the time set out further below under the sub-paragraph entitled "Contractor's Response to Draft Task Authorization" to respond to the Contracting Authority.
- (v) If the Contractor to whom the draft TA is first sent either fails to respond on time or confirms in writing that it refuses to perform the task, the draft TA will then be forwarded to the next-ranked Contractor. In the event that Canada determines the proposed

resource(s) does not meet the minimum experience or other requirements of the categories identified in the draft TA, Canada may, at its entire discretion request that the Contractor propose another resource and the Contractor will have the time set out in the subparagraph "Contractor's Response to Draft Task Authorization" to respond. If the Contractor fails to respond on time or Canada determines that the proposed resource(s) does not meet the minimum experience or other requirements of the categories identified in the draft TA, the draft TA will be forwarded to the next-ranked Contractor.

(vi) If the Contractor refuses a TA or fails to submit a valid response, the dollar value of the TA may be subtracted from the dollar value of the Contractor's Contract and may be re-allocated, at the Contracting Authority's sole discretion, in whole or in part, to the other contractors in that same Workstream.

(vii) The process of sending out a draft TA will continue until Canada either cancels the requirement for the task or it has been validly issued to one of the contractors. If none of the contractors can perform the task (in accordance with all the terms and conditions of this series of contracts), Canada may acquire the required Work by other means.

(viii) Any of the contractors may advise the Technical Authority and the Contracting Authority in writing that it is unable to carry out additional tasks as a result of previous commitments under one or more TAs issued under this series of contracts, and no draft TA will be sent to that contractor until that contractor has given notice in writing to the Technical Authority and the Contracting Authority that it is again available to perform additional tasks.

(ix) If it is found that the allocation process described at part (ii) above has resulted in the award of a disproportionate dollar value of work between the Contractors, the Contractors agree that Canada, in its sole discretion, may deviate from the allocation process and issue TAs in the manner required to re-establish a proportional allocation.

(c) **Assessment of Resources Proposed at TA Stage**: Processes for issuing, responding to and assessing Task Authorizations are further detailed in Appendices A, B, C and D of Annex A.

(d) **Form and Content of draft Task Authorization**:

(i) The Technical Authority will provide the Contractor with a description of the task in a draft Task Authorization using the form specified in Annex A.

(ii) The draft Task Authorization will contain the details of the activities to be performed, and must also contain the following information:

(A) the task number;

(B) The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);

(C) the categories of resources and the number required;

(D) a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);

(E) the start and completion dates;

(F) milestone dates for deliverables and payments (if applicable);

(G) the number of person-days of effort required;

(H) whether the work requires on-site activities and the location;

(I) the language profile of the resources required;

(J) the level of security clearance required of resources;

(K) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be

determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

(L) any other constraints that might affect the completion of the task.

(e) **Contractor's Response to Draft Task Authorization**: The Contractor must provide to the Technical Authority, within 5 working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), a quotation with the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract, as well as its corresponding proposed resource(s) in accordance with Appendix A to Annex A of the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

(f) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to $250,000 (excluding Applicable Taxes), the TA must be signed by:

(A) the Technical Authority; and

(B) a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA.

(ii) for any TA with a value greater than this amount, a TA must be signed by:

(A) the Technical Authority;

(B) a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA; and

(C) the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

(g) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under Task Authorizations validly issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below. If some data is not available, the reason must be indicated. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The data must be submitted on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

(A) 1st quarter: April 1 to June 30;

(B) 2nd quarter: July 1 to September 30;

(C) 3rd quarter: October 1 to December 31; and

(D) 4th quarter: January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended):

(A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;

(B) a title or a brief description of each authorized task;

(C) the name, Resource category and level of each resource involved in performing the TA, as applicable;

(D) the total estimated cost specified in the validly issued TA of each task, exclusive of Applicable Taxes;

(E) the total amount, exclusive of Applicable Taxes, expended to date against each authorized task;

(F) the start and completion date for each authorized task; and

(G) the active status of each authorized task, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TA's (as amended):

(A) the amount, exclusive of Applicable Taxes, specified in the Contract (as last amended, as applicable) as Canada's total liability to the Contractor for all validly issued TA's; and

(B) the total amount, exclusive of Applicable Taxes, expended to date against all validly issued TA's.

(h) **Refusal of Task Authorizations or Submission of a Response which is not Valid**: The Contractor is not required to submit a response to every draft TA sent to it by Canada. However, in addition to Canada's other rights to terminate the Contract, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions if the Contractor in at least three instances has either not responded or has not submitted a valid response when sent a draft TA. For greater clarity, each draft TA, which is identifiable by its task number, will only count as one instance. A valid response is one that is submitted within the required time period and meets all requirements of the draft TA issued, including proposing the required number of resources who each meet the minimum experience and other requirements of the categories identified in the draft TA at pricing not exceeding the rates set out in Annex B.

(i) **Consolidation of TA's for Administrative Purposes**: The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TA's for administrative purposes.

3. Minimum Work Guarantee

(a) In this clause,

(i) "**Maximum Contract Value**" means the amount specified in the "**Limitation of Expenditure**" clause set out in the Contract; and

(ii) "**Minimum Contract Value**" means $20,000.00.

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

(i) for default;

(ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or

(iii) for convenience within ten business days of Contract award.

4. Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

(a) **General Conditions**:

(i) 2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

With respect to Section 30 - Termination for Convenience, of General Conditions 2035, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:

   (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Work Guarantee, or due to the Contractor as of the date of termination, or

   (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions**:

The following Supplemental General Conditions:

(i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

(ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

apply to and form part of the Contract.

5. Security Requirement

The following security requirements (Common PS SRCL#19 and related clauses provided by the Contract Security Program) as set out under Annex "B" to the Supply Arrangement, applies to and forms part of the Contract.

(a) The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of SECRET, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).

(b) The Contractor personnel requiring access to PROTECTED/CLASSIFIED information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of SECRET, granted or approved by CISD/PWGSC.

(c) The Contractor MUST NOT remove any PROTECTED/CLASSIFIED information from the identified work site(s), and the Contractor must ensure that its personnel are made aware of and comply with this restriction.

(d) Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.

(e) The Contractor must comply with the provisions of the:

  (i) Security Requirements Check List and security guide (if applicable), attached at Annex C;

  (ii) Industrial Security Manual (Latest Edition).

(f) Additional Security Requirement

  (i) The CBSA, will conduct its own personnel Reliability Status assessment of the Contractor (specifically the Contractor personnel), which is allowed under the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard. Reliability Status assessment conducted by the CBSA will include a credit check.

  (ii) If the Contractor (specifically the Contractor personnel), has already been screened under the TBS Policy on Government Security - Personnel Security Standard, the Contractor (specifically the Contractor personnel), will still undergo a security screening process to be conducted by the CBSA.

  (iii) The credit check and fingerprinting*, if required, will be performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian and International Industrial Security Directorate" (CIISD).

  (iv) Until the credit check, fingerprinting* (if required) and all other security screening processes required have been completed and the Contractor (specifically the Contractor personnel) is deemed suitable by the CBSA, the Contractor (specifically the Contractor personnel) will not be permitted access to Protected / Classified information or assets, and further, will not be permitted to enter sites where such information or assets are kept.

*Fees are applicable. Fingerprinting, if required, will be at the Bidder's cost.

6. Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

  (i) The "**Initial Contract Period**", which begins on September 4, 2018 and ends two years later; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to three additional one-year periods under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

7. Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Francis Lapalme
Title: A/Supply Team Leader
Organization: Public Works and Government Services Canada
Acquisitions Branch
Directorate: Informatics and Telecommunications Systems Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec, K1A 0S5
Telephone: 613-858-9912
E-mail address: francis.lapalme@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Louis Albert
Title: A/Director, Open Government and Data Analytics Division
Organization: Canada Border Services Agency
Address: 333 North River Rd, Ottawa, ON K1A 0L8
Telephone: 343-291-6207
Facsimile: 343-291-7381
E-mail address: louis.albert@cbsa-asfc.gc.ca

In his absence, the Technical Authority for the Contract is:

Name: Ali Sheikh
Title: A/Manager, Business Analytics Competency Centre
Organization: Canada Border Services Agency
Address: 333 North River Rd, Ottawa, ON K1A 0L8
Telephone: 343-291-5590
Facsimile: 343-291-7381
E-mail address: ali.sheikh@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

(c) **Contractor's Representative**

Name:
Title: Vice-President, Public Sector
Organization: S.i. Systems Ltd.
Address: 300-170 Laurier Avenue West, Ottawa, ON K1P 5V5
Telephone:
Facsimile:
E-mail address:

8. Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

9. Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex B, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

(ii) **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex B), Applicable Taxes extra.

(iii) **Travel and Living Expenses – National Joint Council Travel Directive:** The Contractor will be reimbursed its authorized travel and living expenses reasonably and properly incurred in the performance of the Work, at cost, without any allowance for profit and/or administrative overhead, in accordance with the meal and private vehicle expenses provided in Appendices B, C and D of the *National Joint Council Travel Directive* and with the other provisions of the directive referring to "travellers", rather than those referring to "employees". All travel must have the prior authorization of the Technical Authority. Travel requests will only be considered for a work location which is located more than 100 kilometers from the National Capital Region. The Contractor will be paid for actual time spent travelling at half the hourly rate. The hourly rate will be determined by dividing the firm per diem rate set out in Annex B by 7.5 hours. All payments are subject to government audit.

(iv) **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

(v) **Contractor's Firm Per Diem Rates**: The Contractor agrees that the rates set out in Annex B remain firm throughout the Contract Period, except as may be provided for in the express terms of the contract. In reference to Article 18(1) of SACC General Conditions 2035, the Contractor acknowledges that its obligation to provide services in accordance with the firm rates set out in Annex B is unaffected by the application of any existing law or any new law which may come into effect during the Contract Period.

(vi) **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract within the time described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole or in part or chooses to exercise any of the rights provided to it under the general conditions, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Corrective Measure Policy (or equivalent) then in effect, which measures may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

(b) **Limitation of Expenditure – Cumulative Total of all Task Authorizations**

(i) Canada's total liability to the Contractor under the Contract for all validly issued Task Authorizations (TAs), inclusive of any revisions, must not exceed the amount set out on page 1 of the Contract, less any Applicable taxes. With respect to the amount set out on page 1 of the Contract, Customs duties are excluded and Applicable Taxes are included

(ii) No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

(iii) The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

(A) when it is 75 percent committed, or

(B) 4 months before the contract expiry date, or

(C) As soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

(i) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) **Method of Payment for Task Authorizations with a Maximum Price**: For each Task Authorization validly issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) **Method of Payment for Task Authorizations with a Firm Price - Lump Sum Payment on Completion**: Canada will pay the Contractor upon completion and delivery of all the Work associated with the validly issued Task Authorization in accordance with the payment provisions of the Contract if:

(i) an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

(ii) all such documents have been verified by Canada; and

(iii) the Work delivered has been accepted by Canada.

(e) **Electronic Payment of Invoices – Contract**

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

(i) Visa Acquisition Card;

(ii) MasterCard Acquisition Card;

(iii) Direct Deposit (Domestic and International);

(f) **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

(g) **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises

10. Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

(c) By submitting invoices, the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

(d) The Contractor must provide the original of each invoice to the Technical Authority, and a copy to the Contracting Authority.

11. Certifications and Additional Information

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, any TA quotation and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire Contract Period.

12. Federal Contractors Program for Employment Equity - Default by Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

13. Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

14. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;

(b) Supplemental General Conditions, in the following order:

  (i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

  (ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

(c) General Conditions 2035 (2016-04-04), Higher Complexity - Services;

(d) Annex A, Statement of Work – Annex A including its Appendices as follows;

  (i) Appendix A to Annex A - Tasking Assessment Procedure;

  (ii) Appendix B to Annex A - Task Authorization (TA) Form;

  (iii) Appendix C to Annex A - Resource Assessment Criteria and Response Table;

  (iv) Appendix D to Annex A - Certifications at the TA stage;

(e) Annex B, Basis of Payment;

(f) Annex C, Security Requirements Check List;

(g) the validly issued Task Authorizations and any required certifications (including all of their annexes, if any); and

(h) the Contractor's bid dated June 19, 2018.

15. Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

16. Insurance Requirements

(a) Compliance with Insurance Requirements

  (i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

  (ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

  (iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) **Commercial General Liability Insurance**

(i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

(ii) The Commercial General Liability policy must include the following:

(A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

(B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

(C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

(D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

(J) Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(K) If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(L) Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

17. Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

18. Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

19. Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

20. Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

21. Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

22. Government Property

Canada agrees to supply the Contractor with the items listed at Article 5. Client Support of Annex A – Statement of Work. The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

23. Transition Services

The Contractor agrees to execute the transition tasks identified within the Task Authorizations (if applicable) and it will make all reasonable efforts to assist Canada in the transition from the incumbent to the Contractor and from the Contractor to a new contract with another supplier.

24. Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

ANNEX A

STATEMENT OF WORK

(SEE ATTACHED DOCUMENT)

APPENDIX A TO ANNEX A

TASKING ASSESSMENT PROCEDURE

1. Where a requirement for a specific task is identified, a draft Task Authorization Form (TA Form) as attached at Appendix B to Annex A will be provided to the Contractor in accordance with the allocation methodology stated in the Contract Article titled "Allocation of Task Authorizations". Once a draft TA Form is received, the Contractor must submit to the Technical Authority a quotation of rates to supply the requested Resource Categories based on the information identified in the TA Form. The quotation must be signed and submitted to Canada within the time for response identified in the TA Form. The Contractor will be given a minimum of 5 business days turnaround time to submit a quotation.

2. With each quotation the Contractor must propose the required number of resources and for each proposed resource the Contractor must supply a résumé, the requested security clearance information and must complete the Response Tables at Appendix C of Annex A applicable to the Resource Categories identified in the draft TA. The same individual must not be proposed for more than one Resource Category. The résumés must demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to the proposed resources:

   (i) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (Refer to Appendix D to Annex A, Certifications).

   (ii) For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource before the date the draft TA was first issued to the Contractor.

   (iii) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of draft TA issuance and must continue, where applicable, to be a member in good standing of the profession or membership throughout the assessment period and Contract Period. Where the designation or membership must be demonstrated through a certification, diploma or degree, such document must be current, valid and issued by the entity specified in this Contract or if the entity is not specified, the issuer must have been an accredited or otherwise recognized body, institution or entity at the time the document was issued.

   (iv) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

   (v) For any requirements that specify a particular time period (e.g., 2 years) of work experience, Canada will disregard any information about experience if the résumé does not include the relevant dates (month and year) for the experience claimed (i.e., the start date and end date). Canada will evaluate only the duration that the resource actually worked on a project or projects (from his or her start date to end date), instead of the overall start and end date of a project or a combination of projects in which a resource has participated.

   (vi) A résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirement, or reusing the same wording as the TA Form, will not be considered "demonstrated" for the purposes of the assessment. The Contractor should provide complete details as to where, when, month and year, and how, through which

activities/responsibilities, the stated qualifications / experience were obtained. In situations in which a proposed resource worked at the same time on more than one project, the duration of any overlapping time period will be counted only once toward any requirements that relate to the individual's length of experience.

3. The qualifications and experience of the proposed resources will be assessed against the requirements set out in Appendix C to Annex A to determine each proposed resource's compliance with the mandatory and rated criteria. Canada may request proof of successful completion of formal training, as well as reference information. Canada may conduct reference checks to verify the accuracy of the information provided. If reference checks are done, they will be conducted in writing by e-mail (unless the contact at the reference is only available by telephone). Canada will not assess any points or consider a mandatory criterion met unless the response is received within 5 working days. On the third working day after sending out the e-mails, if Canada has not received a response, Canada will notify the Contractor by e-mail, to allow the Contractor to contact its reference directly to ensure that it responds to Canada within 5 working days. Wherever information provided by a reference differs from the information supplied by the Contractor, the information supplied by the reference will be the information assessed. Points will not be allocated or a mandatory criteria considered as met if the reference customer is not a customer of the Contractor itself (for example, the customer cannot be the customer of an affiliate of the Contractor). Nor will points be allocated or a mandatory criteria considered as met if the customer is itself an affiliate or other entity that does not deal at arm's length with the Contractor. Crown references will be accepted.

4. During the assessment of the resources proposed, should the references for two or more resources required under that TA either be unavailable or fail to substantiate the required qualifications of the proposed resources to perform the required services, the Contracting Authority may find the quotation to be non-responsive.

5. Only quotations that meet all of the mandatory criteria will be considered for assessment of the point rated criteria. Each resource proposed must attain the required minimum score for the point rated criteria for the applicable Resource Category. If the minimum score for any proposed resource is less than what is required, the Contractor's quotation will be found to be non-responsive.

6. Once the quotation has been accepted by the Technical Authority, the TA Form will be signed by Canada and provided to the Contractor for signature. The TA Form must be appropriately signed by Canada prior to commencement of any work. The Contractor must not commence work until a validly issued TA Form (the Task Authorization) has been received, and any work performed in its absence is done at the Contractor's own risk.

APPENDIX D TO ANNEX A

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the Contractor's quotation when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all the information provided in the résumés and supporting material proposed for completing the subject work, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Contractor to be true and accurate. Furthermore, the Contractor warrants that every individual proposed by the Contractor for the requirement is capable of performing the Work described in the Task Authorization.

Print name of authorized individual & sign above

Date

2. CERTIFICATION OF AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under this Task Authorization, the persons proposed in the quotation will be available to commence performance of the work within a reasonable time from the date of issuance of the valid Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

Print name of authorized individual & sign above

Date

3. CERTIFICATION OF STATUS OF PERSONNEL

If the Contractor has proposed any individual who is not an employee of the Contractor, the Contractor certifies that it has permission from that individual to propose his/her services in relation to the Work to be performed under this TA and to submit his/her résumé to Canada. At any time during the Contract Period the Contractor must, upon request from the Contracting Authority, provide the written confirmation, signed by the individual, of the permission that was given to the Contractor of his/her availability. Failure to comply with the request may result in a default under the Contract in accordance with the General Conditions.

Print name of authorized individual & sign above

Date

4. CERTIFICATION OF LANGUAGE - English

The Contractor certifies that the proposed resource(s) in response to this draft Task Authorization is/are fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

5. NON-DISCLOSURE AGREEMENT

I, ____________________ (name of proposed resource), recognize that in the course of my work as an employee or subcontractor of ________________ (name of contractor), I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. _____________ between Her Majesty the Queen in right of Canada, represented by the Minister of Public Works and Government Services and Canada Border Services Agency, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: ________________.

GLOSSARY 17

1. BACKGROUND

CBSA Information, Science and Technology Branch (ISTB) has identified the need to establish a strategic IT Professional Services Supply Chain to support the Agency's Enterprise Architecture, Information Management & Common Services division's IT requirement relating to Open Government and Data Analytics in the following functional areas:

- Business Analytics Competency Centre (BACC)
- Business Intelligence and Analytics Service (BIAS)
- Business Reporting Support
- Data Services Portfolio Manager.

2. SCOPE OF WORK

The contractor will provide IT professional services resources to supplement and support the staff currently in place on various CBSA initiatives, and work on high performance, high availability, and mission critical national systems, built on the IT Environment identified in Section 4 below. The scope of work is in support of the following CBSA initiatives and systems:

1. Initiatives within the Agency's Enterprise Architecture, Information Management & Common Services division's mandate include but are not limited to:
    a. Commercial Business Intelligence and Analytics
    b. Travellers Business Intelligence and Analytics
    c. Corporate Business Intelligence and Analytics.

2. CBSA Systems include but are not limited to:
    a. Consolidated Management Reporting System (CMRS)
    b. Rapid Stats
    c. Data warehouse
    d. Master Data Management.

The work to be performed will be on an "as and when requested" basis as initiated through the issuance of Task Authorizations. Task Authorizations may be issued for any of the following resource categories:

Resource Category	Level
Enterprise Resource Planning (ERP) Functional Analyst	2 and 3
Test Coordinator	2 and 3
Tester	3
Data Conversion Specialist	2 and 3
Database Modeller / IM Modeller	3
IM Architect	3
Technology Architect	3
Enterprise Architect	3

Business Analyst	2 and 3
Technical Writer	2 and 3
Project Executive	3
Project Coordinator	3
Project Manager	2 and 3

3. TASKS

3.1 Enterprise Resource Planning (ERP) Functional Analyst (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and document ERP functional, business, or system requirements specifications.
2. Develop functional, business, or system interface or capability interaction.
3. Gather and analyze information to establish the functional needs of a system or project.

Additional Tasks could include but are not limited to:

4. Design methods and procedures for computer systems, and sub-systems of larger systems.
5. Develop, test and implement small computer systems, and sub-systems of larger systems.
6. Document forms, manuals, programs, data files, and procedures.

3.2 Enterprise Resource Planning (ERP) Functional Analyst (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and document ERP functional, business, or system requirements specifications.
2. Develop functional, business, or system interface or capability interaction.
3. Gather and analyze information to establish the functional needs of a system or project.
4. Feasibility assessment of ERP solutions for Data Analytics.

Additional Tasks could include but are not limited to:

5. Design methods and procedures for computer systems, and sub-systems of larger systems.
6. Develop, test and implement small computer systems, and sub-systems of larger systems.
7. Document forms, manuals, programs, data files, and procedures.
8. Status reporting.
9. Process improvement, coaching, and mentoring teams’ members and users on best practices and provide knowledge transfer.

3.3 Test Coordinator (level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Provide advice, guidance and coordination efforts for test strategies and plans related to the Business Intelligence (BI) Reporting or Data Analytics solutions, selection of automated testing tools, and identification of resources required for the BI Reporting or Data Analytics testing.
2. Plan, organize, and schedule testing efforts for the BI reporting solutions, including the execution of user acceptance testing and functional testing in the various BI environments.

Additional Tasks could include but are not limited to:

3. Create and update test strategies and plans related to the BI reporting solutions.
4. Management and monitoring of test plans for all levels of testing of the BI reporting solutions.
5. Status reporting.

3.4 Test Coordinator (level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Provide advice, guidance and coordination efforts for test strategies and plans related to the reporting or Data Analytics solutions, selection of automated testing tools, and identification of resources required for the Business Intelligence (BI) testing.
2. Prioritize testing efforts for the BI reporting solutions, including the execution of user acceptance testing and functional testing in the various BI environments.

Additional Tasks could include but are not limited to:

3. Create and update test strategies and plans related to the BI reporting or Data Analytics solutions.
4. Management and monitoring of test plans for all levels of testing of the BI reporting or Data Analytics solutions.
5. Supervision of testing in accordance with the plan.
6. Management of walkthroughs and reviews related to testing and implementation readiness.
7. Establishing testing procedures for BI reporting or Data Analytics solutions, integration testing and regression testing with emphasis on automating the testing procedures when possible.
8. Process improvement, coaching, and mentoring teams' members and users on best practices and provide knowledge transfer.
9. Status reporting.

3.5 Tester (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

Baseline Tasks:

1. Test planning and coordination related to the Business Intelligence (BI) reporting or Data Analytics solutions.
2. Execution of user acceptance testing and functional testing in the various BI environments.
3. Management and monitoring of test plans for all levels of testing related to the BI reporting or Data Analytics solutions.
4. Status reporting.
5. Coach and mentor test teams, or developers on testing methods, best practices and testing tools for BI reporting or Data Analytics solutions.

Additional Tasks could include but are not limited to:

6. Supervision of testing in accordance with the plan.
7. Management of walkthroughs and reviews related to testing and implementation readiness.
8. Development of test scenarios and test scripts.
9. Establishing testing procedures for BI reporting or Data Analytics solutions, integration testing and regression testing with emphasis on automating the testing procedures when possible.
10. Establishing a validation and verification capability which assumes functional and performance compliance of the BI reporting or Data Analytics solutions.
11. Reviewing source application and documentation such as business, data and system requirements and models and project planning documents.
12. Participate in workshops and client meetings.

3.6 Data Conversion Specialist (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and implement procedures that will ensure the accuracy, completeness, and timeliness of data stored in the Integrated Data Warehouse reporting environment.
2. Analyze and coordinate source database(s) into the Integrated Data Warehouse reporting environment.
3. Complete mapping, interfaces, mock conversion work, enhancements, and verify completeness and accuracy of converted data.

Additional Tasks could include but are not limited to:

4. Finalize conversion strategy.
5. Assess data dictionaries.
6. Advise programmers, analysts, and users about the efficient use of data.
7. Work closely with the source system designers or developers to coordinate the source system data extraction processes.
8. Work closely with the data warehouse and data marts modellers and administrators to coordinate data into the Integrated Data Warehouse reporting environment.
9. Identify opportunities for data quality improvement.

3.7 Data Conversion Specialist (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and implement procedures that will ensure the accuracy, completeness, and timeliness of data stored in the Integrated Data Warehouse reporting environment.
2. Analyze and coordinate source database(s) into the Integrated Data Warehouse reporting environment.
3. Develop and implement security procedures for the database, including access and user account management.
4. Complete mapping, interfaces, mock conversion work, enhancements, and verify completeness and accuracy of converted data.

Additional Tasks could include but are not limited to:

5. Finalize conversion strategy.
6. Assess data dictionaries.
7. Advise programmers, analysts, and users about the efficient use of data.
8. Work closely with the source system designers or developers to coordinate the source system data extraction processes.
9. Work closely with the data warehouse and data marts modellers and administrators to coordinate data into the Integrated Data Warehouse reporting environment.
10. Identify opportunities for data quality improvement.
11. Status reporting.
12. Process improvement, coaching, and mentoring teams' members and users on best practices and provide knowledge transfer.

3.8 Database Modeller / IM Modeller (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and maintain the Architecture and Data Models for corporate and project specific initiatives, including the identification of data most valuable to the department, the integration of this data, and the development of core relating data models. The resulting data models will be based on data architecture and modeling design principles and tenets.
2. Development of data modeling and metadata policies and procedures in support of enterprise and Integrated Data Warehouse.
3. Analyze and evaluate alternative data architecture solutions to meet business requirements to be incorporated into the corporate data architecture.
4. Development of Business Intelligence, Integrated Data Warehouse data models for the purposes of BI, client Self-Serve BI and Data Analytics.

Additional Tasks could include but are not limited to:

5. Design, develop and maintain Data Models.

6. Analyze proposed changes to databases from the context of the Data Model.
7. Provide technical expertise in the use and optimization of data modeling techniques to team members.
8. Provide technical assistance, guidance and direction in terms of data analysis and modeling to team members.
9. Provide assistance to project team and business users relating to data issues and data analysis concepts.
10. Data analysis as a result of new or updated technical and business requirements.
11. Apply approved changes to Data Models.
12. Conform to corporate data architectures, World Customs Organization data standards, strategies and frameworks, including enterprise data warehouse activities.
13. Review corporate architecture strategies and directions, data requirements, and business information needs and devise data structures to support them.
14. Improve modeling efficiency through tools and technologies and process recommendations to better utilize current metadata repositories.
15. Conform to corporate repository metadata standards and directions.
16. Provide input to refinement of data architectures.
17. Participate in data architecture refinement.
18. Define access strategies.
19. Construct, monitor and report on work plans and schedules.

3.9 IM Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze existing capabilities and requirements, develop redesigned frameworks and recommend areas to meet business and technical requirements for improved capability and integration in Business Intelligence (BI) reporting or Data Analytics environments.
2. Evaluate existing procedures and methods, identify and document database content, structure, and application subsystems, and develop data dictionary for BI reporting or Data Analytics solutions.
3. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing BI reporting or Data Analytics systems.
4. Development of Information Architecture for the purposes of BI, client Self-Serve BI and Analytics, for platform inter-operability between data and technology, and conformity with world customs organizational standards and practices.

Additional Tasks could include but are not limited to:

5. Develop and document detailed statements of requirements for business intelligence or Data Analytics solutions.
6. Provide support in the development of data governance artefacts.
7. Prototype potential solutions, provide tradeoff information and suggest recommended courses of action in support of enterprise and Integrated Data Warehouse.

8. Perform information modelling in support of Business Process Reengineering (BPR) implementations of Business Intelligence or Data Analytics solutions.
9. Maintain, and evolve data and technology roadmaps for planned evolution, compatibility and interoperability of Business Intelligence and Data Analytics capabilities.
10. Perform cost/benefit analysis of implementing new processes and solutions in a BI reporting, or Data Analytics environment.
11. Provide advice in developing and integrating process and information models between business processes to eliminate information and process redundancies in a BI reporting or Data Analytics environment.
12. Provide advice in defining new requirements and opportunities for applying efficient and effective solutions; identify and provide preliminary costs of potential options for BI reporting and Data Analytics solutions.

3.10 Technology Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements.
2. Identify the policies and requirements that drive out a particular solution in support of enterprise and Integrated Data Warehouse.
3. Review application and program design or technical infrastructure design to ensure adherence to standards and to recommend performance improvements.
4. Development of Technology Architecture for the purposes of BI, client Self-Serve BI and Analytics.
5. Adoption strategies and migration path to cloud solutions, technology change management, business continuity planning of business intelligence and Data Analytics services.

Additional Tasks could include but are not limited to:

6. Analyze and evaluate alternative technology solutions to meet business problems.
7. Ensures the integration of all aspects of technology solutions.
8. Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
9. Provide information, direction and support for emerging technologies.
10. Perform impact analysis of technology changes.
11. Provide support to applications or technical support teams in the proper application of existing infrastructure.

3.11 Enterprise Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Evaluate the enterprise's business, Information and Communications Technology (ICT) architecture, determine its consistency and integration with the organization's business, ICT strategies, assess the degree of its alignment with Treasury Board Chief Information Officer (CIO) Business Transformation Enablement Program (BTEP) and Federated Architecture Program (FAP) and recommend changes to the business, ICT architecture to improve its alignment with these external factors.
2. Identify future business, ICT requirements against the current enterprise architecture, perform gaps analyses, develop requirements for Information Technology Architectures and prepare migration strategies.
3. Assess the feasibility of migrating from the current state to the target business architecture and enabling technologies and identify the risks associated with migrating to the target business architecture and technologies and make recommendations for risk mitigation.
4. Development of Enterprise Architecture for data and technology, for the purposes of BI, client Self-Serve BI and Data Analytics, with focus on data and technology inter-operability, compatibility with world customs organizations.

Additional Tasks could include but are not limited to:

5. Identify the policies and requirements that drive out a particular solution in support of enterprise and Integrated Data Warehouse.
6. Identify business and technology trends that create opportunities for business improvement, advise business and ICT Senior Executives on ICT trends and emerging technologies and the impact on the organization's and government ICT architectures and business strategies, model "What if" scenarios and recommend appropriate changes to the existing architecture and ICT infrastructure, and recommend alternative solutions, methodologies and strategies.
7. Produce an architectural evolution plan, recommend prioritization of architecture evolution initiatives, and develop or implement an architecture evolution plan.
8. Manage the development and implementation of an architectural improvement plan.
9. Coach, mentor, train and knowledge transfer to facilitate organizational onboarding of architecture designs and solutions.

3.12 Business Analyst (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Perform business analyses of functional requirements to identify information, procedures, and decision flows for Business Intelligence (BI) reporting or Data Analytics solutions.
2. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems BI reporting and Data Analytics solutions.
3. Consulting and collaborating with various stakeholders.
4. Development of Business Analysis for the purposes of BI, client Self-Serve BI and Analytics.

Additional Tasks could include but are not limited to:

5. Support in defining input and output sources, including detailed plan for technical design phase, and obtain approval of the BI reporting or Data Analytics system proposal.
6. Developing BI reporting application requirements for an Integrated Data Warehouse.
7. Develop and document statements of requirements for considered BI reporting or Data Analytics alternatives.
8. Evaluate existing procedures and methods, identify and document items such as database content, structure and application subsystems for BI reporting or Data Analytics solutions.
9. Define and document various user support artifacts for BI reporting or Data Analytics solutions.
10. Establish acceptance test criteria with client for BI reporting or Data Analytics initiatives.
11. Support and use the selected departmental methodologies.
12. Interpreting commercial and traveler government policy legislation and regulation.
13. Interpreting immigration and enforcement government policy legislation and regulation.
14. Interpreting financial government policy legislation and regulation.

3.13 Business Analyst (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Perform business analyses of functional requirements to identify information, procedures, and decision flows for Business Intelligence (BI) reporting or Data Analytics solutions.
2. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems BI reporting and Data Analytics solutions.
3. Consulting and collaborating with various stakeholders.
4. Status reporting.
5. Process improvement, coaching, and mentoring teams' members and users on best practices and provide knowledge transfer.
6. Development of Business Analysis for the purposes of BI, client Self-Serve BI and Analytics.

Additional Tasks could include but are not limited to:

7. Recommend industry trends to ensure that BI reporting or Data Analytics solutions fit with government and industry directions for technology.
8. Support in defining input and output sources, including detailed plan for technical design phase, and obtain approval of the BI reporting or Data Analytics system proposal.
9. Developing BI Reporting Application Requirements for an Integrated Data Warehouse.
10. Develop and document statements of requirements for considered BI reporting or Data Analytics alternatives.
11. Evaluate existing procedures and methods, identify and document items such as database content, structure, and application subsystems for BI reporting or Data Analytics solutions.
12. Define and document various user support artifacts for BI reporting or Data Analytics solutions.
13. Establish acceptance test criteria with client for BI reporting or Data Analytics initiatives.
14. Support and use the selected departmental methodologies.
15. Interpreting commercial and traveler government policy legislation and regulation.
16. Interpreting immigration and enforcement government policy legislation and regulation.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

17. Interpreting financial government policy legislation and regulation.

3.14 Technical Writer (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Document help text, user manuals, technical documentation, web page content, etc.
2. Investigate the accuracy of the information collected by making direct use of the material being documented.
3. Modify, validate and compile technical documents such as technical publications in general and system data lists and drawings.

Additional Tasks could include but are not limited to:

4. Gather information concerning the features and functions provided by the developers.
5. Assess the audience for the documents or manuals which are required and prepare a statement of purpose and scope for each.
6. Design the layout of the documents or manuals.
7. Plan, research and write technical architecture artifacts, and specifications.
8. Assist and participate in meetings; this includes writing meeting minutes.
9. Review documents, drawings and associated data for conformance to established standards.

3.15 Technical Writer (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Document help text, user manuals, technical documentation, web page content, etc.
2. Investigate the accuracy of the information collected by making direct use of the material being documented.
3. Modify, validate and compile technical documents such as technical publications in general and system data lists and drawings.

Additional Tasks could include but are not limited to:

4. Determine documentation requirements and makes plans for meeting them.
5. Gather information concerning the features and functions provided by the developers.
6. Assess the audience for the documents or manuals which are required and prepare a statement of purpose and scope for each.
7. Design the layout of the documents or manuals.
8. Plan, research and write technical architecture artifacts, and specifications.
9. Assist and participate in meetings; this includes writing meeting minutes.
10. Review documents, drawings and associated data for conformance to established standards
11. Status reporting.
12. Process improvement, coaching, and mentoring teams' members and users on best practices and provide knowledge transfer.

3.16 Project Executive (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Define and confirm the objectives for the project, determine budgetary requirements, the composition, roles and responsibilities and terms of reference for the project team.
2. Develop or review or analyze Project Charters, Business Cases, detailed project plans, Memorandums to Cabinet, or Treasury Board submissions.
3. Lead the development of briefings, solutions and status reports for presentation to executive management.
4. Develop and deliver presentations to senior management and stakeholder groups as required, including the preparation of plans, charts, tables and diagrams to assist in analyzing or displaying problems.
5. Provide leadership and oversight for the design activities, including usage of deliverables necessary to satisfy the methodology, including, but not limited to:
   - Strategic Business Objectives and Critical Success Factors.
   - Definition of business competencies, capabilities, value drivers, outcomes and measures.
   - Definition of target business model, operating model, and target service model.
   - Definition and development of strategy and value components such as strategy maps, competency maps, value maps, value clusters, goal chains and value chain diagrams.
   - Identification and analysis of pain points, pain clusters and pain chains.
6. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.

Additional Tasks could include but are not limited to:

7. Oversee and provide guidance to several Project Managers, each responsible for an element of the project and its associated project team.
8. Provide requirements management and control throughout the project.
9. Provide advice to ensure business strategies are developed and implemented; project schedules are developed, maintained and respected; risks and issues are managed; and change request procedures are followed.
10. Provide guidance and recommendations for the design, development, test, and implementation.
11. Meet with other organizational executives to ensure all internal and external stakeholders are committed and moving forward on project and organizational goals.
12. Manage internal and external stakeholder relations.
13. Lead working groups and consultations and obtain consensus and reach decisions with respect to recommendations and strategic options pertaining to the project.
14. Coordinate the efforts of multiple stakeholders to support delivering a portfolio approach to project management.
15. Provide expert solution and business transformation leadership for the project with all stakeholders.
16. Ensure compliance with portfolio-wide standards for architecture, engineering and business transformation.

17. Support release planning from an architecture perspective, including requirements, and associated planning and execution of work to support identified requirements.
18. Provide solution and transformation alignment leadership from a project planning perspective.
19. Support the development of the transformation roadmap and transition plan.
20. Report progress of the project on an ongoing basis and at scheduled points in the life cycle.
21. Review and comment on all project deliverables from initiation to project completion.
22. Manage scope, context and business requirements, working with departmental leads and key clients.
23. Provide project oversight during the development, implementation and operations start-up to ensure that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters.
24. Public Safety sector stakeholder coordination.

3.17 Project Coordinator (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Provide administrative and technical support of a clerical nature as required to a project team.
2. Monitoring, control and maintenance of project documentation and application libraries.
3. Communications management with project management, IT delivery teams and end users on administrative matters related to the project.
4. Project coordination of initiatives with specific emphasis on BI, client Self-Serve BI and Analytics projects, and change initiatives.

Additional Tasks could include but are not limited to:

5. Monitoring and control of project execution, IT delivery teams and end users in project coordination and synchronization tasks.
6. Participate at project meetings to capture outcomes and action items.
7. Track project change requests.
8. Maintain and updates relevant project information in manual or electronic files; project information might include such things as project activity schedule, status reports, correspondence.
9. Use computer tools, aids, system control languages on PCs, minis, or mainframes to perform work.

3.18 Project Manager (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Manage Business Intelligence (BI) or Data Analytics projects during the development, implementation and operations startup by ensuring that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters.

2. Prepare plans, charts, tables and diagrams to assist in analyzing or displaying progress, issues, risks, or problems; work with a variety of project management tools.
3. Maintain process improvement including lessons learned, communication and change management throughout the full lifecycle of BI or Data Analytics project delivery.
4. Project management of initiatives in support of BI, client Self-Serve BI and Analytics.

Additional Tasks could include but are not limited to:

5. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.
6. Report progress of BI or Data Analytics projects on an ongoing basis and at scheduled points in the life cycle.
7. Meet in conference with stakeholders and other project managers and states problems in a form capable of being solved.
8. Develop presentations and reports to communicate progress of projects within the assigned portfolio.
9. Public Safety sector stakeholder coordination.

3.19 Project Manager (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Manage Business intelligence or Data Analytics projects during the development, implementation and operations startup by ensuring that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters.
2. Prepare and validate TBS grade dashboards, plans, charts, tables and diagrams to assist in analyzing or displaying problems; work with a variety of project management tools. Includes managing risk and issue logs in support of project communications management, governance and change management.
3. Maintain process improvement including lessons learned, communication and change management throughout the full lifecycle of the Business Intelligence (BI) or Data Analytics project delivery.
4. Project management of initiatives in support of BI, client Self-Serve BI and Analytics.

Additional Tasks could include but are not limited to:

5. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.
6. Define and document the objectives for BI or Data Analytics projects, including project charters, plans, financial management, risk and issue management, projected and actual expenditures financial monitoring.
7. Report progress of BI or Data Analytics projects on an ongoing basis and at scheduled points in the life cycle.

8. Meet in conference with stakeholders and other project managers and states problems in a form capable of being solved.
9. Coaching, and mentoring teams' members and users on best practices and provide knowledge transfer.
10. Develop presentations and reports to communicate progress of projects within the assigned portfolio.
11. Public Safety sector stakeholder coordination.

4. TECHNICAL ENVIRONMENT

1. IBM DB2 on UNIX
2. IBM PureData
3. IBM Infosphere Suite
4. IBM InfoSphere Change Data Capture
5. IBM Infosphere Data Architect
6. IBM SPSS
7. IBM SPSS Modeler Server
8. IBM Cognos Framework Manager
9. IBM Cognos Business Intelligence Transformer
10. IBM Cognos Administration
11. IBM Cognos PowerPlay Studio
12. IBM Cognos Software Development Kit
13. SQL
14. Sybase
15. XML
16. R
17. Python
18. ArcGIS
19. MS Office.

5. CLIENT SUPPORT

The CBSA Data Management team will provide an appropriate workspace with access to the appropriate tools for the resources to carry out the expectations set out in this SOW.

The contractor will be provided with a CBSA user ID, password, workstation or laptop, email address, and other materials (supporting documentation) as required in order to process, store, or transmit CBSA data on the CBSA network during the contract. The use of contractor IT systems is not permitted.

6. DELIVERABLES

The Contractor will provide various reports, plans, analysis and other related documents as specified in the applicable Task Authorization. All deliverables are to be submitted in English and as described in each Task Authorization.

7. CONSTRAINTS

At no time and in no way is CBSA data to be removed from CBSA sites, nor will access to or from the contractor's IT systems through the use of a session (e.g VPN) be permitted.

The Contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

8. REPORTING REQUIREMENTS

Timesheets are to be provided monthly depicting hours worked on a daily basis.

9. WORK LOCATION

All work will be performed in the National Capital Region on-site at CBSA offices.

The current Primary Office location is 333 North River Rd Ottawa, Ontario.

GLOSSARY

Acronym or Term	Definition
Business Cases	A presentation or a proposal to an authority by an organization seeking funding, approval, or both for an activity, initiative, or project. A business case puts a proposed investment decision into a strategic context and provides the information necessary to make an informed decision about whether to proceed with the investment and in what form.
Business Intelligence	The strategies and technologies used by enterprises for the data analysis of business information. BI technologies provide historical, current and predictive views of business operations.
Business Process Reengineering	A business management strategy focusing on the analysis and design of workflows and business processes within an organization.
Business Transformation Enablement Program	A set of tools which have been developed to provide an integrated approach for strategic management and alignment, and business transformation.
Critical Success Factors	A management term for an element that is necessary for an organization or project to achieve its mission.
Data Analytics	The process of examining data sets in order to draw conclusions about the information they contain.
Architecture and Data Model	An abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities.
Data Policy	A set of measurable rules for a set of data elements, in the context of an organizational scope, for the benefit of a business process, irrespective of where the data is stored and the party that provides the data.
Data Base Management System	A software package designed to define, manipulate, retrieve and manage data in a database.
Extract, Load, Transform	A data integration process for transferring raw data from source systems to a target database and then preparing the information for downstream uses.
Federated Architecture Program	A pattern in enterprise architecture that allows interoperability and information sharing between semi-autonomous de-centrally organized lines of business (LOBs), information technology systems and applications.
Guiding Principles	Principles or precepts that guide an organization throughout its life in all circumstances, irrespective of changes in its goals, strategies, type of work, or the top management.
Information and Communications Technology	A term for information technology (IT) which stresses the role of unified communications[1] and the integration of telecommunications (telephone lines and wireless signals), computers as well as necessary enterprise software, middleware, storage, and audio-visual systems, which enable users to access, store, transmit, and manipulate information.
Information Architecture	The structural design of shared information environments; the art and science of organizing and labelling websites, intranets, online communities and software to support usability and findability; and an emerging

	community of practice focused on bringing principles of design and architecture to the digital landscape.
Information Technology Architectures	The process of development of methodical information technology specifications, models and guidelines, using a variety of Information Technology notations, for example UML, within a coherent Information Technology architecture framework, following formal and informal Information Technology solution, enterprise, and infrastructure architecture processes.
Integrated Data Warehouse	A unified database that holds all the business information of an organization and makes it accessible all across the organization.
Memorandum to Cabinet	A minister's vehicle for proposing and explaining a proposed measure to the Cabinet and for obtaining its approval.
Metadata Repository	A database created to store metadata. Metadata is information about the structures that contain the actual data. Metadata is often said to be "data about data", but this is misleading. Data profiles are an example of actual "data about data". Metadata is one layer of abstraction removed from this – it is data about the structures that contain data. Metadata may describe the structure of any data, of any subject, stored in any format.
Project Charters	A statement of the scope, objectives, and participants in a project. It provides a preliminary delineation of roles and responsibilities, outlines the project objectives, identifies the main stakeholders, and defines the authority of the project manager.
Prototypes	An original or first model from which other forms are copied or developed.
Self-Serve BI and Analytics	An approach to data analytics that enables business users to access and work with corporate data even though they do not have a background in statistical analysis, business intelligence (BI) or data mining. Self-Service Analytics is an approach to advanced analytics that allows business users to manipulate data to spot business opportunities, without requiring them to have a background in statistics or technology.
Strategic Business Objectives	Goals deemed most important to the current and future health of an organization.
Technology Architecture	The process of development of methodical information technology specifications, models and guidelines, using a variety of Information Technology notations, for example UML, within a coherent Information Technology architecture framework, following formal and informal Information Technology solution, enterprise, and infrastructure architecture processes.
World Customs Organization	The World Customs Organization (WCO), established in 1952 as the Customs Co-operation Council (CCC) is an independent intergovernmental body whose mission is to enhance the effectiveness and efficiency of Customs administrations. http://www.wcoomd.org/

APPENDIX C TO ANNEX A
RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Appendix. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page or project number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

The following provides a guide as to how to complete this Appendix:

This Appendix is structured into 4 components:
1. Resource Technology and Certification Requirements;
2. Resource Mandatory Criteria;
3. Resource Point-Rated Criteria; and
4. Evaluation Grid and Weights (for Resource Point-Rated Criteria).

Draft TA preparation by CBSA:
Prior to issuing a draft TA, CBSA will complete the following elements.
1. Resource Technology and Certification Requirements, CBSA will identify:
    a. The resource category and level.
    b. Applicable technologies: these can be Essential (E) or Desirable (D). An “E” or “D” must be inserted next to the applicable technology(ies).
    c. Applicable certifications, if any: these can be Desirable (D) only. Where a certification(s) is(are) applicable, a “D” must be inserted next to the applicable Certification(s).
2. Resource Point-Rated Criteria: CBSA will identify the Rated requirements (R1-R4) applicable to the draft TA.
3. Evaluation Grid and Weights: CBSA will complete the applicable grid elements and weights.

Key boundaries:
a. Up to the maximum number of technologies identified as Essential in the table below can be requested in a draft TA; and
b. No more than 50% of overall weight per Rated Requirement.

Response by the Contractor:
In response, the Contractor must complete the following:
1. Resource name;
2. Responses to M1 and M2; and
3. Responses to applicable R1-R4.

Evaluation:
An example of evaluation is provided under the table below.

Resource Category	Level	Total # of Technologies	Total # of Certifications*	Maximum # Technologies as Essential
Workstream 1				
Enterprise Resource Planning (ERP) Functional Analyst	L2,L3	7	1	5
Test Coordinator	L2,L3	19	0	3
Tester	L3	19	0	3
Data Conversion Specialist	L2,L3	10	3	2
Database Modeller / IM Modeller	L3	10	3	2
IM Architect	L3	19	2	2
Technology Architect	L3	15	4	2
Enterprise Architect	L3	15	4	2
Business Analyst	L2,L3	6	2	2
Technical Writer	L2,L3	2	0	1
Project Executive	L3	3	4	2
Project Coordinator	L3	3	1	2
Project Manager	L2,L3	3	4	2
Workstream 2				
GIS Application Architect	L2,L3	4	1	2
GIS Data Architect	L2,L3	4	1	2
GIS System Architect	L2,L3	4	1	2
PIA Specialist	L2,L3	2	3	1

***All Certifications must be Desirable only.**

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

EXAMPLE - EVALUATION

For this scenario, CBSA wants to request a Data Conversion Specialist - Level 2, with the following Technology and Certification requirements:

- Essential Technology Requirements (no more than 2 for this category):

(1) MS Office Suite (Word, Excel, PowerPoint)

(2) IBM Infosphere Data Architect

- Desirable Technology Requirements:

(1) IBM PureData

(2) IBM DB2 V9+

- Desirable Certification Requirement:

(1) ITIL V3 Certification

The proposed resource has 75 months experience within the past 7 years of the draft TA issuance date executing at least 60% of the tasks enumerated at Article 3 of Annex A for a Data Conversion Specialist - Level 2.

Based on the experience submitted under M1, the proposed resource has 30 months within the past 48 months of the draft TA issuance date using IBM Infosphere Data Architect.

Based on the experience submitted under M1, the proposed resource has 44 months within the past 48 months of the draft TA issuance date using MS Office Suite (Word, Excel, Powerpoint).

The proposed resource has 18 months experience using IBM PureData.

The proposed resource has 18 months experience using IBM DB2 V9+.

The proposed resource holds the Certification ITIL V3 Certification.

For this scenario and based on the evaluation weight per criterion determined by the Client, the resource proposed by ABC Inc. would achieve a score of 76.50% and be deemed responsive.

****

3. RESOURCE POINT-RATED CRITERIA

ID	Applicable or not? *(Client to insert "X" in boxes for the criteria that apply)*	Point Rated Criteria	Max Points	Point Allocation Grid	Bidder's response
					Demonstrated Experience (Bidders to insert cross reference to assigned resource project reference number(s))
R1	☐	Points will be awarded for experience over and above the required in M1.	**10**	**For Level 2 Resource:** 5+ to 6 years = 5 points 6+ years = 10 points **For Level 3 Resource:** 10+ to 11 years = 2 points 11+ to 12 years = 4 points 12+ to 13 years = 6 points 13 + to 14 years = 8 points 14+ years = 10 points	
R2	☐	Points will be awarded for experience over and above the required in M2.	**10 per element***	**For each Element:** **For Level 2 Resource:** 2+ to 3 years = 5 points 3+ years = 10 points **For Level 3 Resource:** 4+ to 5 years =3 points 5+ to 6 years = 7 points 6+ years = 10 points	
R3	☐	The Contractor should demonstrate that the proposed resource has experience in each of the Technology (Element) identified as Desirable ("D").	**10 per element***	**For each Element:** 0 to 1 year = 0 points 1+ to 2 years = 2 points 2+ to 3 years = 4 points 3+ to 4 years = 6 points 4+ to 5 years = 8 points 5+ years = 10 points	

[illegible] - Released under the Access to Information Act
[illegible] - Divulgué en vertu de la Loi sur l'accès à l'information

R4		The Contractor should demonstrate that the proposed resource holds the Certification(s) (Element) identified as Desirable ("D").	**10 per element***	The proposed resource is a holder of the certification = 10 points	

*Evaluation Weights (for R1 to R4) are identified at time of issuance of a draft TA and accompanies each TA:

4. EVALUATION GRID AND WEIGHTS

ID		**Max Points**	**Points Achieved by Contractor (A)**	**Evaluation Weight (B)** ***(to be completed at tasking time)***	**Weighted Result (A x B)**
R1		10			0
R2	***(to be completed at tasking time)***				
	Element 1	10			0
	Element 2	10			0
	Etc.	10			0
R3	***(to be completed at tasking time)***				
	Element 1	10			0
	Etc.	10			0
R4	***(to be completed at tasking time)***				
	Element 1	10			0
	Etc.	10			0
Total Weight ***(must equal 100%)*** :				0%	
Total Score:**					0%

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

**Each proposed resource must meet the minimum pass mark of 70% to be deemed responsive.

AMENDMENT 006

This amendment 006 is issued to:

- Exercise Option Period 2;
- Increase the Total Estimated Cost;
- Extend the Contract Period; and
- Change the Technical Authority of the Contract.

---

1. This amendment is hereby raised to make the following changes to the Contract:

1. At Page 1 of the Contract, Total Estimated Cost:

DELETE: $5,116,540.44

INSERT: $6,404,358.54

2. At Article **6. Contract Period,** delete in its entirety.

Insert:

6. Contract Period

(a) Contract Period: The "Contract Period" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "Initial Contract Period", which begins on September 4, 2018 and ends September 3, 2022; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) Option to Extend the Contract:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to one additional one-year period under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

3. At Article **7. Authorities, amend as follows:**

DELETE clause (b) Technical Authority in its entirety.

INSERT:

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Jeff Carr

Title: Executive Director, Chief Data Office
Strategic Policy Branch
Organization: Canada Border Services Agency
Telephone: 613-290-5069
E-mail address: jeff.carr@cbsa-asfc.gc.ca

In her absence, the Technical Authority is:

Name: Michel Villeneuve
Title: Manager, Data Strategic, Chief Data Office
Policy Branch
Organization: Canada Border Services Agency
Telephone: 819-360-6548
E-mail address: michel.villeneuve@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN UNCHANGED.

[illegible] - Released under the Access to Information Act
AIPRP - Divulgué en vertu de la Loi sur l'accès à l'information.

AMENDMENT 001

This Contract Amendment is issued to change the Contractor's legal name.

---

1. At Article 1. Requirement of the Contract, amend as follows:

DELETE subarticle (a) in its entirety.

INSERT:

(a) S.I. Systems ULC (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN UNCHANGED.

APPENDIX C TO ANNEX A
RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Appendix. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page or project number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

The following provides a guide as to how to complete this Appendix:

This Appendix is structured into 4 components:
1. Resource Technology and Certification Requirements;
2. Resource Mandatory Criteria;
3. Resource Point-Rated Criteria; and
4. Evaluation Grid and Weights (for Resource Point-Rated Criteria).

Draft TA preparation by CBSA:
Prior to issuing a draft TA, CBSA will complete the following elements.
1. Resource Technology and Certification Requirements, CBSA will identify:
    a. The resource category and level.
    b. Applicable technologies: these can be Essential (E) or Desirable (D). An “E” or “D” must be inserted next to the applicable technology(ies).
    c. Applicable certifications, if any: these can be Desirable (D) only. Where a certification(s) is(are) applicable, a “D” must be inserted next to the applicable Certification(s).
2. Resource Point-Rated Criteria: CBSA will identify the Rated requirements (R1-R4) applicable to the draft TA.
3. Evaluation Grid and Weights: CBSA will complete the applicable grid elements and weights.

Key boundaries:
    a. Up to the maximum number of technologies identified as Essential in the table below can be requested in a draft TA; and
    b. No more than 50% of overall weight per Rated Requirement.

Response by the Contractor:
In response, the Contractor must complete the following:
1. Resource name;
2. Responses to M1 and M2; and
3. Responses to applicable R1-R4.

Evaluation:
An example of evaluation is provided under the table below.

Resource Category	Level	Total # of Technologies	Total # of Certifications*	Maximum # Technologies as Essential

***All Certifications must be Desirable only.**

EXAMPLE - EVALUATION

For this scenario, CBSA wants to request a Data Conversion Specialist - Level 2, with the following Technology and Certification requirements:

- Essential Technology Requirements (no more than 2 for this category):
  - (1) MS Office Suite (Word, Excel, PowerPoint)
  - (2) IBM Infosphere Data Architect
- Desirable Technology Requirements:
  - (1) IBM PureData
  - (2) IBM DB2 V9+
- Desirable Certification Requirement:
  - (1) ITIL V3 Certification

The proposed resource has 75 months experience within the past 7 years of the draft TA issuance date executing at least 60% of the tasks enumerated at Article 3 of Annex A for a Data Conversion Specialist - Level 2.

Based on the experience submitted under M1, the proposed resource has 30 months within the past 48 months of the draft TA issuance date using IBM Infosphere Data Architect.

Based on the experience submitted under M1, the proposed resource has 44 months within the past 48 months of the draft TA issuance date using MS Office Suite (Word, Excel, Powerpoint).

The proposed resource has 18 months experience using IBM PureData.

The proposed resource has 18 months experience using IBM DB2 V9+.

The proposed resource holds the Certification ITIL V3 Certification.

For this scenario and based on the evaluation weight per criterion determined by the Client, the resource proposed by ABC Inc. would achieve a score of 76.50% and be deemed responsive.

****

Data Conversion Specialist

APPENDIX C TO ANNEX A
RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Appendix. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page or project number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

The following provides a guide as to how to complete this Appendix:

This Appendix is structured into 4 components:
1. Resource Technology and Certification Requirements;
2. Resource Mandatory Criteria;
3. Resource Point-Rated Criteria; and
4. Evaluation Grid and Weights (for Resource Point-Rated Criteria).

Draft TA preparation by CBSA:
Prior to issuing a draft TA, CBSA will complete the following elements.
1. Resource Technology and Certification Requirements, CBSA will identify:
    a. The resource category and level.
    b. Applicable technologies: these can be Essential (E) or Desirable (D). An “E” or “D” must be inserted next to the applicable technology(ies).
    c. Applicable certifications, if any: these can be Desirable (D) only. Where a certification(s) is(are) applicable, a “D” must be inserted next to the applicable Certification(s).
2. Resource Point-Rated Criteria: CBSA will identify the Rated requirements (R1-R4) applicable to the draft TA.
3. Evaluation Grid and Weights: CBSA will complete the applicable grid elements and weights.

Key boundaries:
    a. Up to the maximum number of technologies identified as Essential in the table below can be requested in a draft TA; and
    b. No more than 50% of overall weight per Rated Requirement.

Response by the Contractor:
In response, the Contractor must complete the following:
1. Resource name;
2. Responses to M1 and M2; and
3. Responses to applicable R1-R4.

Evaluation:
An example of evaluation is provided under the table below.

Resource Category	Level	Total # of Technologies	Total # of Certifications*	Maximum # Technologies as Essential
Workstream 1				
Enterprise Resource Planning (ERP) Functional Analyst	L2,L3	7	1	5
Test Coordinator	L2,L3	19	0	3
Tester	L3	19	0	3
Data Conversion Specialist	L2,L3	10	3	2
Database Modeller / IM Modeller	L3	10	3	2
IM Architect	L3	19	2	2
Technology Architect	L3	15	4	2
Enterprise Architect	L3	15	4	2
Business Analyst	L2,L3	6	2	2
Technical Writer	L2,L3	2	0	1
Project Executive	L3	3	4	2
Project Coordinator	L3	3	1	2
Project Manager	L2,L3	3	4	2
Workstream 2				
GIS Application Architect	L2,L3	4	1	2
GIS Data Architect	L2,L3	4	1	2
GIS System Architect	L2,L3	4	1	2
PIA Specialist	L2,L3	2	3	1

***All Certifications must be Desirable only.**

EXAMPLE - EVALUATION

For this scenario, CBSA wants to request a Data Conversion Specialist - Level 2, with the following Technology and Certification requirements:

- Essential Technology Requirements (no more than 2 for this category):

(1) MS Office Suite (Word, Excel, PowerPoint)

(2) IBM Infosphere Data Architect

- Desirable Technology Requirements:

(1) IBM PureData

(2) IBM DB2 V9+

- Desirable Certification Requirement:

(1) ITIL V3 Certification

The proposed resource has 75 months experience within the past 7 years of the draft TA issuance date executing at least 60% of the tasks enumerated at Article 3 of Annex A for a Data Conversion Specialist - Level 2.

Based on the experience submitted under M1, the proposed resource has 30 months within the past 48 months of the draft TA issuance date using IBM Infosphere Data Architect.

Based on the experience submitted under M1, the proposed resource has 44 months within the past 48 months of the draft TA issuance date using MS Office Suite (Word, Excel, Powerpoint).

The proposed resource has 18 months experience using IBM PureData.

The proposed resource has 18 months experience using IBM DB2 V9+.

The proposed resource holds the Certification ITIL V3 Certification.

For this scenario and based on the evaluation weight per criterion determined by the Client, the resource proposed by ABC Inc. would achieve a score of 76.50% and be deemed responsive.

APPENDIX C TO ANNEX A
RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Appendix. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page or project number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

The following provides a guide as to how to complete this Appendix:

This Appendix is structured into 4 components:
1. Resource Technology and Certification Requirements;
2. Resource Mandatory Criteria;
3. Resource Point-Rated Criteria; and
4. Evaluation Grid and Weights (for Resource Point-Rated Criteria).

Draft TA preparation by CBSA:
Prior to issuing a draft TA, CBSA will complete the following elements.
1. Resource Technology and Certification Requirements, CBSA will identify:
    a. The resource category and level.
    b. Applicable technologies: these can be Essential (E) or Desirable (D). An “E” or “D” must be inserted next to the applicable technology(ies).
    c. Applicable certifications, if any: these can be Desirable (D) only. Where a certification(s) is(are) applicable, a “D” must be inserted next to the applicable Certification(s).
2. Resource Point-Rated Criteria: CBSA will identify the Rated requirements (R1-R4) applicable to the draft TA.
3. Evaluation Grid and Weights: CBSA will complete the applicable grid elements and weights.

Key boundaries:
- a. Up to the maximum number of technologies identified as Essential in the table below can be requested in a draft TA; and
- b. No more than 50% of overall weight per Rated Requirement.

Response by the Contractor:
In response, the Contractor must complete the following:
1. Resource name;
2. Responses to M1 and M2; and
3. Responses to applicable R1-R4.

Evaluation:
An example of evaluation is provided under the table below.

Resource Category	Level	Total # of Technologies	Total # of Certifications*	Maximum # Technologies as Essential
Workstream 1				
Enterprise Resource Planning (ERP) Functional Analyst	L2,L3	7	1	5
Test Coordinator	L2,L3	19	0	3
Tester	L3	19	0	3
Data Conversion Specialist	L2,L3	10	3	2
Database Modeller / IM Modeller	L3	10	3	2
IM Architect	L3	19	2	2
Technology Architect	L3	15	4	2
Enterprise Architect	L3	15	4	2
Business Analyst	L2,L3	6	2	2
Technical Writer	L2,L3	2	0	1
Project Executive	L3	3	4	2
Project Coordinator	L3	3	1	2
Project Manager	L2,L3	3	4	2
Workstream 2				
GIS Application Architect	L2,L3	4	1	2
GIS Data Architect	L2,L3	4	1	2
GIS System Architect	L2,L3	4	1	2
PIA Specialist	L2,L3	2	3	1

***All Certifications must be Desirable only.**

EXAMPLE - EVALUATION

For this scenario, CBSA wants to request a Data Conversion Specialist - Level 2, with the following Technology and Certification requirements:

- Essential Technology Requirements (no more than 2 for this category):

(1) MS Office Suite (Word, Excel, PowerPoint)
(2) IBM Infosphere Data Architect

- Desirable Technology Requirements:

(1) IBM PureData
(2) IBM DB2 V9+

- Desirable Certification Requirement:

(1) ITIL V3 Certification

The proposed resource has 75 months experience within the past 7 years of the draft TA issuance date executing at least 60% of the tasks enumerated at Article 3 of Annex A for a Data Conversion Specialist - Level 2.

Based on the experience submitted under M1, the proposed resource has 30 months within the past 48 months of the draft TA issuance date using IBM Infosphere Data Architect.

Based on the experience submitted under M1, the proposed resource has 44 months within the past 48 months of the draft TA issuance date using MS Office Suite (Word, Excel, Powerpoint).

The proposed resource has 18 months experience using IBM PureData.

The proposed resource has 18 months experience using IBM DB2 V9+.

The proposed resource holds the Certification ITIL V3 Certification.

For this scenario and based on the evaluation weight per criterion determined by the Client, the resource proposed by ABC Inc. would achieve a score of 76.50% and be deemed responsive.

****

Data Conversion Specialist

TA #: __X__

Contractor Name: **ABC Inc.** Proposed Resource Name: **John Doe**

Level:
☑ 2

This Contract Amendment is raised to extend the period of the contract by exercising option period 001 and 002.

Modification to article 6. Contract Period, as follows:

DELETE article 6. in its entirety; and

REPLACE with the following:

6. Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

  (i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends on January 20, 2019; and

  (ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

  (i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to three additional one-year periods under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

  (ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN THE SAME

Canada

This Contract Amendment is raised in order to 1) modify article 7. Authorities for Canada; 2) to replace 2035 - General Conditions - Higher Complexity – Services to comply with PWGSC's new Code of Conduct for Integrity measures; and 3) to modify the Task Authorization (TA) Form.

1. Modification to Article 7 (Authorities), as follows:

DELETE: Article 7. in its entirety; and

INSERT: Article 7. Authorities; as follows:

7. AUTHORITIES
(a) Contracting Authority: The Contracting Authority is the individual identified below and is responsible for the management of the Contract. Any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor is not to perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from any government personnel other than the aforementioned officer.

Name: Nabil Ghaddab
Supply Specialist
STAMS / ITSPD / EL Division
Public Works and Government Services Canada
Address: 11 Laurier Street,
Portage III, 4C2,
Gatineau, QC K1A 0S5
Telephone: 873.469.4984
Facsimile: (819) 956-5925
Email: nabil.ghaddab@tpsgc-pwgsc.gc.ca

(b) Technical Authority
The Technical Authority for the Contract is:
Cedric Pilon
Manager
Telephone: 613-617-1021
Cedric.Pilon@cbsa-asfc.gc.ca

In his absence, the Technical Authority is one of the following:

Erin Lapensée
Team Leader
Telephone: 343-291-6223
Erin.Lapensee@cbsa-asfc.gc.ca

Robert Penwarden
Senior Procurement Officer
Telephone: 343-291-5669

Robert.Penwarden@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority. By notice from the Contracting Authority, a temporary Technical Authority may be designated in the Contract.

(c) Contractor's Representative
Name:
Title: Director of Sales
Organization: Veritaaq
Address: 2327 St. Laurent Blvd Suite 100 Ottawa ON K1G 4J8
Telephone

This amendment is hereby raised to make the following changes:

1. extend the period of the contract by exercising option period 003, 004 and 005;
2. Increase the limitation of expenditure; and
3. modify article 7. Authorities.

1. At Article 6. Contract Period:

Delete: in its entirety

Insert:

(a) **Contract Period:** The "Contract Period" is the entire period of time during which the Contractor is obliged to perform the Work, which begins on the date the Contract is awarded and ends on January 20, 2022.

2. At Revised Estimated Cost value found on page 1 of the Contract, as follows:

Delete: $9,967,617.00

(b) **Replace with the following:** $19,935,234.00; and

3. At Article 7. Authorities

Delete: in its entirety

Insert:

Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Sylvie Morin
Title: Supply Specialist
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Professional Services Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec K1A 0S5
Telephone: 613-859-0761
E-mail address: Sylvie.morin@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Robert Penwarden
Title: Senior Procurement and Contracting Officer
Organization: Canada Border Services Agency
Address: 355 North River Road, Tower B, 17th Floor
Ottawa, Ontario K1A 0L8

Telephone: 343-291-5669
E-mail address: Robert.Penwarden@cbsa-asfc.gc.ca

Name: Matthew Woods
Title: Senior Procurement and Contracting Officer
Organization: Canada Border Services Agency
Address: 355 North River Road, Tower B, 17th Floor
Ottawa, Ontario K1A 0L8
Telephone: 343-291-5726
E-mail address: Matthew.Woods@cbsa-asfc.gc.ca

In these person's absence, the Technical Authority is:

Name: Michel Derouin
Title: Senior Procurement and Contracting Officer
Organization: Canada Border Services Agency
Address: 355 North River Road, Tower B, 17th Floor
Ottawa, Ontario K1A 0L8
Telephone: 343-291-5668
E-mail address: Michel.Derouin@cbsa-asfc.gc.ca

Name: Erin Lapensee
Title: Manager
Organization: Canada Border Services Agency
Address: 355 North River Road, Tower B, 17th Floor
Ottawa, Ontario K1A 0L8
Telephone: 613-218-8521
E-mail address: erin.lapensee@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

(c) Contractor's Representative

CONTRACT CLAUSES

1. Requirement

(a) Veritaaq Technology House Inc. (the "**Contractor**") agrees to supply to the Client with the Services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services, as and when requested by Canada to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client:** Under the Contract, the "**Client**" is the Canada Border Services Agency (CBSA).

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract.

2. Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract.

(b) **Allocation of Task Authorizations**: More than one contract has been awarded for this requirement. As a result, the Task Authorizations issued under this series of contracts will be allocated in accordance with the following:

(i) At the time this series of contracts was awarded, each contractor was allocated an amount of funding as specified in the Limitation of Expenditure in respect of Task Authorizations based on the evaluation process described in the bid solicitation that resulted in the award of this series of contracts.

(ii) Canada will use a rotational method to allocate the Task Authorizations, where the rotation is based on the amount of funding remaining under each of the respective contracts.

(iii) Canada will send the first draft Task Authorization to the contractor with the greatest value of funding under its contract. If more than one contractor has the same value, it will be assigned to the contractor ranked first as determined under the evaluation process in the bid solicitation that resulted in the award of this series of contracts.

(iv) The contractor sent a draft TA will have the time set out further below under the sub-paragraph entitled "Contractor's Response to Draft Task Authorization" to respond to the Contracting Authority.

(v) If the contractor to whom the draft TA is first sent either fails to respond on time or confirms in writing that it refuses to perform the task, the draft TA will then be forwarded to the contractor with the next-greatest balance remaining of allocated funds.

(vi) The process of sending out a draft TA to the contractor with the greatest balance remaining of will continue until Canada either cancels the requirement for the task or it has been issued to one of the contractors. If none of the contractors can perform the task (in accordance with all the terms and conditions of this series of contracts), Canada may acquire the required Work by other means.

(vii) Once the Task Authorization is issued, the value of that Task Authorization (and the value of any subsequent amendment increasing or decreasing the value) will be subtracted from the funding allocated to that contractor.

(viii) When the next requirement to perform a task is identified, it will be sent to the contractor with the greatest balance remaining of allocated funds. If more than one contractor has the greatest balance remaining of allocated funds (i.e., several contractors have equal amounts of allocated funds), the draft TA will be sent to the contractor among them that ranked highest under the bid solicitation evaluation process. If any contract in this series of contracts is amended to add funding for Task Authorizations, all the remaining contracts (i.e., all contracts that have not previously been terminated) will be amended to add funding in amounts proportionate to the funding initially provided under each contract for Task Authorizations (e.g., if three contracts were awarded with $2M, $1M and $750,000 in funding for Task Authorizations respectively, and $200,000 is added to the first contract, then $100,000 will be added to the second contract and $75,000 will be added to the third).

(c) **Process of Issuing a TA**: The processes for issuing, responding to, assessing and approving Task Authorizations are stated in Appendices A, B, C and D of Annex B.

(d) **Authority to Issue a TA**: Any TA with a value less than or equal to $1,200,000.00 (including GST/HST) may be issued by the Technical Authority. Any TA with a value greater than this amount must be issued directly by the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Technical Authority's authority to issue TAs at any time.

(e) **Charges for Work under a TA**: The Contractor must not charge Canada anything more than the price set out in the Task Authorization unless Canada has issued a TA amendment authorizing the increased expenditure. Canada will not pay the Contractor for any design changes, modifications or interpretations of the Work unless they have been approved, in writing, by the Contracting Authority before being incorporated into the Work.

(f) **Consolidation of TAs for Administrative Purposes**: The Contract may be amended from time to time to reflect all Task Authorizations issued and approved by the Contracting Authority to date, to document the Work performed under those TAs for administrative purposes.

(g) **Period of Services:** No Task Authorizations may be entered into after the expiry date of the Contract.

(h) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under authorized TAs issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

below. If any required information is not available, the Contractor must indicate the reason. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The Contractor must submit the periodic usage reports on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

(A) April 1 to June 30;

(B) July 1 to September 30;

(C) October 1 to December 31; and

(D) January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 20 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended):

(A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;

(B) a title or a brief description of the task;

(C) the name and Category of Personnel of each resource involved in performing the TA, as applicable;

(D) the total estimated cost specified in the TA (GST or HST extra);

(E) the total amount (GST or HST extra) expended to date;

(F) the start and completion date; and

(G) the active status, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TAs (as amended) :

(A) the amount (GST or HST extra) specified in the contract (as last amended, if applicable) as Canada's total liability to the contractor for all authorized TAs; and

(B) the total amount, GST or HST extra, expended to date against all validly issued tasks.

(i) On a specific Task Authorization, Canada may include one or both of the following conditions in the TA form in Appendix B or Annex B at article 6, as well as other conditions specified as required by CBSA:

(1) In the performance of this Task Authorization the Contractor may have access to information and material which may result in placing it in a real or perceived conflict of interest or confer an unfair advantage upon it in respect of its participation in future solicitations. By providing a quotation, the Contractor acknowledges such participation may, at the sole discretion of the Crown, disqualify the Contractor, its affiliated entities, employees, agents or subcontractors from participating in such contracts or solicitations.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

(2) The Contractor must obtain from each proposed resource a completed and signed non-disclosure agreement, in the form below, and provide them with their quotation in order for it to be considered responsive.

Non-Disclosure Agreement

I, (name of proposed resource)____________, recognize that in the course of my work as an employee or subcontractor of (Name of Contractor)_____________, I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No 47060-136911 between Her Majesty the Queen in Right of Canada, represented by the Minister of Public Works and Government Services and Canada Border Services Agency, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract. I agree that I will not reproduce, copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No: 47060-136911.

__________________ __________________
Signature Date

(j) Additional Reporting Requirements

(i) Reporting requirements will be stipulated within any issued TA, and may include, but are not limited to, any combination of the following:

(A) Timesheets or other related timekeeping reports;
(B) Invoicing;
(C) Written progress and/or status reports relating to the delivery of specific services and completion of assigned tasks; and
(D) Other related reporting.

(ii) Copies of signed timesheets for all assigned resources indicating actual hours worked detailing the work done related to each element of the TA. CBSA will only accept costs for work actually performed, and in accordance with signed time sheets.

(iii) The Contractor must provide other ad hoc written or oral status updates as requested from the Technical Authority in relation to any and all TAs.

(iv) It is the responsibility of the Contractor to facilitate and maintain regular communication with the Technical Authority. In addition, the Contractor must immediately notify the Technical Authority of any issues, problems, or areas of concern in relation to any work completed under any resultant TA(s) as they arise.

3. Minimum Work Guarantee

(a) In this clause,

(i) "Maximum Contract Value" means the amount specified in the "Limitation of Expenditure" clause set out in the Contract (excluding GST/HST); and

(ii) "**Minimum Contract Value**" means 1% of the Maximum Contract Value on the date the Contract is first issued.

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c) subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the period of the Contract, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

(i) for default;

(ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or

(iii) for convenience within sixty business days of Contract award.

4. Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (http://sacc.pwgsc.gc.ca/sacc/index-e.jsp) issued by Public Works and Government Services Canada.

(a) **General Conditions:**

(i) 2035 (2012-11-19), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

(b) **Supplemental General Conditions:**

The following Supplemental General Conditions:

(i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

(ii) 4006 (2010-08-16), Supplemental General Conditions - Contractor to Own Intellectual Property Rights in Foreground Information;

5. Security Requirement

All Contractor personnel proposed in response to a Task Authorization Form will be assessed for Reliability Status by CBSA in accordance with the procedures in Appendix A of Annex B.

The following Security Requirement (SRCL and related clausing), as set out under Annex "A" to Part B to the Supply Arrangement also applies to the Contract.

(a) The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of SECRET, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).

(b) The Contractor personnel requiring access to PROTECTED/CLASSIFIED information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of RELIABILITY STATUS, CONFIDENTIAL or SECRET as required, granted or approved by CISD/PWGSC.

(c) The Contractor MUST NOT remove any PROTECTED/CLASSIFIED information from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.

(d) Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CIISD/PWGSC.

(e) The Contractor must comply with the provisions of the:

   (i) Security Requirements Check List EN578-055605/B, described in Annex C;

   (ii) *Industrial Security Manual* (Latest Edition).

6. Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

   (i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends on January 20, 2017; and

   (ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

   (i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to five additional one-year periods under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

   (ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

7. Authorities

(a) **Contracting Authority**

The Contracting Authority for the Contract is:

Name: Nabil Ghaddab
Title: Supply Specialist
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Informatics and Telecommunications Systems Procurement Directorate
Address: 11 Laurier St., Gatineau, Québec
Telephone: 819-956-5419
E-mail address: nabil.ghaddab@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) **Technical Authority**

The Technical Authority for the Contract is:

Name: Rachelle McGregor
Title: Acting Team Leader, IT Professional Services
Organization: Canada Border Services Agency (CBSA)
Address: 355 North River Road;Tower B, 17th Floor; Ottawa, ON, K1A 0L8
Telephone: 343-291-5668
Email: Rachelle.McGregor@cbsa-asfc.gc.ca

In her absence, the Technical Authority is one of the following:

Name: Kevin Hailemariam
Title: Senior Procurement Officer, IT Professional Services
Organization: Canada Border Services Agency (CBSA)
Address: 355 North River Road;Tower B, 17th Floor; Ottawa, ON, K1A 0L8
Telephone: 343-291-5721

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority. By notice from the Contracting Authority, a temporary Technical Authority may be designated in the Contract.

8. Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For Services requested by Canada (including work outside the Standard Workday and On-Call work), in accordance with an approved Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked plus any applicable minimum On-Call Charge and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex A, Basis of Payment, GST/HST extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

(ii) Where this Contract includes requirements for which there are no separate line items in Annex A Basis of Payment, the prices for those requirements are included in the per diem rates payable under the TA or TAs related to such work.

(iii) **Pre-Authorized Travel and Living Expenses**: Canada will not pay any travel or living expenses associated with performing the Work.

(iv) **Competitive Award:** The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

(v) **Professional Services Rates**: In Canada's experience, Bidders from time to time propose rates at the time of bidding for one or more categories of resources that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses, or is unable, to provide an individual with the qualifications described in the Contract within the time described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole or in part, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Corrective Measures Policy (or equivalent) then in effect, which measures may include prohibiting the Contractor from bidding on future requirements that include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment for the Contractor from bidding on future requirements.

(vi) **Purpose of Estimates**: All estimated costs contained in the Contract are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to purchase goods or services in these amounts. Any commitment to purchase specific amounts or values of goods or services are described elsewhere in the Contract.

(b) Limitation of Expenditure

(i) Canada's total liability to the Contractor under the Contract must not exceed the amount set out on page 1 of the Contract, less any applicable GST or HST. With respect to the amount set out on page 1 of the Contract, Customs duties are included and Goods and Services Tax or Harmonized Sales Tax is included, if applicable. Any commitments to purchase specific amounts or values of goods or services are described elsewhere in the Contract.

(ii) No increase in the total liability of Canada or in the price of the Work resulting from any design changes, modifications or interpretations of the Work, will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been approved, in writing, by the Contracting Authority before their incorporation into the Work. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceed before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum when:

(A) it is 75 percent committed, or

(B) 4 months before the Contract expiry date, or

(C) as soon as the Contractor considers that the contract funds provided are inadequate for the completion of the Work,

whichever comes first.

(iii) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) Method of Payment for Firm Per Diem Rate Task Authorizations with a Maximum Price: For each Task Authorization issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) Time Verification

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

(e) Payment Credits

(i) If the Contractor does not provide a required resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5 hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of 10 days.

(ii) **Corrective Measures**: If credits are payable under this Article for two consecutive months or for three months in any 12-month period, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and 20 working days to rectify the underlying problem.

(iii) **Termination for Failure to Meet This Availability Level**: In addition to any other rights it has under the Contract, Canada may terminate the Contract for default, in accordance with the General Conditions, by giving the Contractor three months' written notice of its intent, if:

(A) the total amount of credits for any given monthly billing cycle reach a level of 10% of the total billing for that month; or

(B) the corrective measures required of the Contractor described above are not met.

(iv) **Credits Apply during Entire Contract Period**: The Parties agree that the credits apply throughout the Contract Period, including during implementation.

(v) **Credits represent Liquidated Damages**: The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

(vi) **Canada's Right to Obtain Payment**: The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

(vii) **Canada's Rights & Remedies not Limited**: The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

(viii) **Audit Rights**: The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

(f) No Responsibility to Pay for Work not performed due to Closure of Government Offices

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

9. Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision.

(c) By submitting invoices the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

(d) The Contractor must provide the original of each invoice to the Technical Authority, and a copy to the Contracting Authority.

10. Certifications

Compliance with the certifications provided by the Contractor in its bid is a condition of the Contract or TA and subject to verification by Canada during the entire Contract Period. If the Contractor does not comply with any certification or it is determined that any certification made by the Contractor in its bid is untrue, whether made knowingly or unknowingly, Canada has the right, under the default provision of the Contract, to terminate the Contract for default.

11. Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

12. Copyright in Material

(a) In this section, “Material” means anything that is created by the Contractor as part of the Work under the Contract, that is required by the Contract to be delivered to Canada and in which copyright subsists, excluding any computer software code and all documentation manuals or guides intended to assist end users or technicians in respect of that codes. “Material” does not include anything by the Contractor before the date of the Contract.

(b) Copyright in the Material belongs to Canada and the Contractor must include the copyright symbol and either of the following notice on the Material: © Her Majesty the Queen in right of Canada (year) or © Sa majesté la Reine du chef du Canada (année).

(c) The Contractor must not use, copy, divulge or publish any Material except as is necessary to perform the Contract. The Contractor must execute any conveyance and other documents relating to copyright in the Material as Canada may require.

(d) The Contractor must provide at the request of Canada a written permanent waiver of moral rights, in a form acceptable to Canada, from every author that contributed to the Material. If the

CBSA - Disclosed under the Access to Information Act
ASFC - Divulgation en vertu de la Loi sur l'Accès à l'information.

Contractor is the author of the Material, the Contractor permanently waives its moral rights in the Material.

13. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;

(b) supplemental general conditions 4002 (2010-08-16);

(c) supplemental general conditions 4006 (2010-08-16);

(d) General Conditions 2035 (2012-11-19), Higher Complexity - Services;

(e) Annex B, Statement of Work (SOW) including its appendices in the order they appear;

(f) Annex A, Basis of Payment;

(g) Annex C, Security Requirements Check List;

(h) the signed Task Authorizations including required Certifications;

(i) Supply Arrangement Number EN578-055605/348/EL (the “Supply Arrangement”); and

(j) The Contractor's bid dated March 08, 2013.

14. Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

15. Insurance Requirements

(a) It shall be the sole responsibility of the Contractor to decide whether or not any additional insurance coverage is necessary for its own protection or to fulfil it's obligations under the Contract. Any such insurance shall be provided and maintained by the Contractor at its own expense.

(b) The following insurance provisions shall not limit any insurance required by federal, provincial or municipal law.

(c) The Contracting Authority may request at any time, evidence that the insurance requirements stipulated in the contract are met.

(d) The evidence of insurance, if requested, is to be provided in the following manner:

  (i) The Certificate(s) of insurance signed by the insurer's underwriter containing reasonable detail of the insurance coverage, exclusions, deductibles and conditions applying to such policies and confirming that the insurance is in force to meet these requirements; or

  (ii) A certified true copy of the policy

(e) **Commercial General Liability (CGL):** Commercial General Liability insurance will be effected by the Contractor and maintained in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but, in any case, for a limit of liability NOT LESS THAN $2,000,000.00 per accident or occurrence and in the annual aggregate.

(f) **CGL Endorsements:** The following endorsements must be incorporated into the conditions of the Contractor's Commercial General Liability insurance policy:

(i) Additional Insured Endorsement: Canada is included as an additional insured, but only with respect to liabilities that may arise from the contractor's own negligence, in the performance of the contract.

(ii) Notice of Cancellation Endorsement: The Insurer agrees to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(iii) Cross Liability Endorsement: Without increasing the limit of liability, the policy will protect all insured parties to the full extent of coverage provided. Further, the policy will apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(iv) Joint and Several Liability Endorsement: The policy will respond to liability arising from negligence of the insured contractor, any Insured, or joint negligence of Insured parties.

(v) Contractual Liability Endorsement: The policy will, on a blanket basis or by specific reference to this contract, extend to assumed liabilities with respect to contractual insurance provisions.

(vi) Contingent Employer's Liability Endorsement": To protect the contractor for liabilities arising in the management and administration of statutory and contractual entitlements of their employees.

(vii) Voluntary Medical Payments, $5,000 per person, $25,000 per accident: To provide, without contestation, for expenses incurred in instances of minor accidental bodily injuries.

(viii) Products and Completed Operations Broad Form (24 months): While not limited to this, the endorsement should include service, assembly and repair activities as well as material, parts or equipment furnished in connection with the work performed by the Contractor or on it's behalf.

(ix) Independent Contractors Liability Endorsement (if any): Unless otherwise insured elsewhere, and evidence thereof is secured by the Contractor, all subcontractors are included as Insured by the policy.

(x) Non-Owned Automobile Endorsement: To protect the contractor for liabilities arising by their use of vehicles owned by other parties including Canada.

(g) **Errors and Omissions insurance:** Errors and Omissions Liability insurance will be effected by the Contractor and maintained in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but, in any case, for a limit of liability NOT LESS THAN $2,000,000.00 per loss and in the annual aggregate, inclusive of defence costs. If this is a claims made policy and the duration of the contract exceeds the policy term, in the event of cancellation or non-renewal of the policy, an Extended Claims Reporting Endorsement, minimum twelve (12) months, must be secured by the Contractor.

(h) **Errors and Omissions Endorsements**: The following clauses must be incorporated into the conditions of the Contractor's Errors and Omissions Liability coverage:

(i) Notice of Cancellation Endorsement: The Insurer agrees to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

16. Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from any breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of any unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor in any way relating to the Contract, including:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

17. Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, Article 08 is deleted and the following applies instead:

(i) If a specific individual is identified in the Contract to perform the Work, the Contractor must provide his or her services within ten working days of the issuance of the Contract or Task Authorization (whichever first contains instructions for that individual to commence Work) unless the Contractor is unable to do so due to the sickness, death, extended leave (including parental leave or disability leave), retirement, resignation or dismissal for cause of the individual.

(ii) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, within five working days of the departure of an existing resource (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) the Contractor must provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for work; and

(B) proof that the proposed replacement has the required security clearance granted by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed the score obtained for the original resource.

(iii) Where Canada becomes aware that an individual identified under the Contract to provide the services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract for default, or

(B) require the Contractor propose a replacement acceptable to Canada to be rated by the Techncial Authority. The replacement must have qualifications and experience that meet or exceed the score obtained for the original resource.

(iv) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that a replacement stop performing the Work. In such a case, the Contractor must immediately comply with the order and secure a further replacement in accordance with subsection 2. The fact that the Contracting Authority does not order that a replacement stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(v) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

18. Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

19. Representations and Warranties

The Contractor made statements regarding its and its own proposed resources' experience and expertise in its bid that resulted in the award of the Contract and issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

20. Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

21. Contractor's Identification Protocol Responsibility

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as the Contractor Representatives) complies with the following self identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting whether internal or external to Canada's offices must identify if an individual is not a permanent employee of the Contractor prior to the commencement of the meeting to ensure that each meeting participant is aware of the fact that the individual is not a Contractor permanent employee;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If the Contractor is, in Canada's determination, in breach of any obligation stated in this Article, upon written notice from Canada, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and 20 working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

22. Transition Services at the end of Contract Period

The Contractor agrees that, in the period leading up to the end of the Contract Period and for up to three months afterwards, it will make all reasonable efforts to assist Canada in the transition from the Contract to a new contract with another supplier. The Contractor agrees that there will be no charge for these services.

23. Termination for Convenience

With respect to Article 30 of General Conditions 2035, if applicable, or Article 32 of 2030, if applicable, subarticle 4 is deleted and replaced with the following subsections 4, 5 and 6:

> 4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.
>
> 5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of
>
> (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or
>
> (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.
>
> 6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

24. Handling of Personal Information

(a) The Contractor acknowledges that Canada is bound by the Privacy Act, R.S., 1985, c. P-21, with respect to the protection of personal information as defined in the Act and will comply with any requirement established by the Contracting Authority that is reasonably required to ensure that Canada meets its obligations under that Act. The Contractor must keep private and confidential any such personal information collected, created or handled by the Contractor under the Contract, and must not use, copy, disclose, dispose of or destroy such personal information except in accordance with this clause and the delivery provisions of the Contract.

(b) All such personal information is the property of Canada, and the Contractor has no right in or to that information. The Contractor must deliver to Canada all such personal information in whatever form, including all working papers, notes, memoranda, reports, data in machine-readable format or otherwise, and documentation which have been made or obtained in relation to the Contract, upon the completion or termination of the Contract, or at such earlier time as Canada may request. Upon delivery of the personal information to Canada, the Contractor will have no right to retain that information in any form and must ensure that no record of the personal information remains in the Contractor's possession.

ANNEX A

BASIS OF PAYMENT

1. Professional Services

In accordance with the contract, the Contractor will be paid the following firm all-inclusive per diem rates for work performed pursuant to this Contract, GST/HST extra.

STREAM 1

FOR THE INITIAL CONTRACT PERIOD (2 YEARS)

Category of Personnel	Level	Firm Per Diem Rate
Application/Software Architect	3	
Systems Analyst	3	
Web Architect	3

(See attached hereto)

ANNEX C

SECURITY REQUIREMENTS CHECK LIST (SRCL)

(See attached hereto)

ANNEX B - STATEMENT OF WORK

1.0 TITLE

1.1 Canada Border Services Agency (CBSA) – IT Services Supply Chain.

2.0 BACKGROUND

2.1 CBSA is responsible for providing integrated border services that support national security and public safety priorities and facilitate the free flow of persons and goods, including animals and plants that meet all requirements under its legislation. Under this mandate, CBSA enables effective and efficient border management through the design, development, implementation, delivery and operation of innovative solutions, science and technology for the major issues facing border management today and in the future.

2.2 CBSA provides effective management of Canada's border through the strategic development, application and oversight of Information Technology and Information Management services. Integrated IT services are administered across Canada, including headquarters and seven regional locations - Atlantic, Quebec, Greater Toronto Area, Northern Ontario, Southern Ontario, Prairie and Pacific.

To optimally manage border programs, corporate maturity and operational excellence, the Information, Science and Technology Branch (ISTB) of CBSA provides technical expertise to advance information management; enterprise architecture; IT infrastructure and solutions; and planning and portfolio management. Among other aspects, the ISTB provides technology leadership for a sustainable portfolio of business applications in support of CBSA's strategic priorities. It ensures effective delivery of technology products, applications and services to meet business needs, while ensuring integrity and availability of all technology infrastructure.

2.3 On February 4, 2011, the Prime Minister of Canada and the President of the United States issued a declaration called "Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness", also called the "Declaration". The Declaration established a new long-term partnership built upon a perimeter approach to security and economic competitiveness. This means working together, not just at the border, but also beyond the border to enhance our security and accelerate the legitimate flow of people, goods and services. Leaders called for the development of a joint action plan to realize this goal.

2.4 CBSA has a requirement for informatics professional support specialist services and the deliverables associated with them; such services (and Deliverables as listed in 6.0 below) taken together referred to as Services. The Services will support projects and program initiatives that relate to the Declaration including those listed at 5.0 below.

3.0 OBJECTIVE

3.1 The Contractor must provide the Services to support the CBSA's business and technology requirements under the CBSA mandate by ensuring that operational demands are maintained and internally available resources and skill sets are supplemented. Technical advancements are required to manage activities such as risk assessment and intelligence, trusted programs, port of entry operations, criminal investigations and immigration enforcement, trade and recourse. As a result, CBSA requires the Services for up to seven work streams at various levels to supplement internal capacity.

3.2 The Services are required to support the CBSA's strategic priorities, technology requirements and ensure forward momentum for effective border management. As a multi-disciplinary organization, technology changes have significant impacts on programs, projects and other operations. The Contractor must be equipped to provide technical expertise to support not only existing initiatives, but also future undertakings and transitions.

4.0 BUSINESS AND TECHNICAL ENVIRONMENT

4.1 Business Environment

4.1.1 CBSA's regular working hours are Monday to Friday, between 7 a.m. to 6 p.m. Eastern Time (Standard Workday).

4.1.2 The Contractor must provide the Services within the Standard Workday of CBSA, as identified above, with the occasional requirement to provide Services outside the Standard Workday, as specified in any resultant Task Authorization (TA).

4.1.3 **Work Outside Standard Workday Hours**

(a) All proposed personnel must be available to work outside normal office hours during the duration of the Contract.

(b) The Technical Authority will advise the Contractor as soon as possible of any overtime requirements. All overtime must be pre-approved by the Technical Authority.

(c) The per diem rates paid for work outside Standard Workday Hours will be the same as the per diem rates indicated in Annex A.

(d) Under some special circumstances, the Contractor's resources must be available (On-Call) to be called back to work, outside the Standard Workday, at the regular per diem rate, as established in the Contract.

(e) The Technical Authority will advise the Contractor as soon as possible of any On-Call requirements and their duration. All On-Call must be pre-approved by the Technical Authority.

(f) The per diem rates paid for actual hours of On-Call Work performed will be the same as the per diem rates indicated in Annex A. The Contractor will not be paid for the actual hours of the On-Call standby period (wait time), but will be paid an initial 3 hours minimum charge for On-Call Work approved by the Technical Authority.

4.2 Technical Environment

4.2.1 The Contractor will provide the Services in conformance with CBSA's standard desktop operating software, currently, Microsoft Office Suite (including Word, Excel, and PowerPoint).

4.2.2 All Deliverables provided by the Contractor will become integrated within CBSA's technical and operational environment as specified by CBSA.

4.2.3 The technical environment at CBSA is comprised of several technologies including but not limited to:

- JAVA on IBM Z O/S, SUN Solaris Server, or Microsoft Server
- COBOL on IBM Z O/S Mainframe
- DB2 and Sybase RDBMS/ IBM DB2 on z/OS (version 8 or more), Sybase on RDMS
- IBM Rational Software Architect
- WebSphere
- IBM Websphere Application Server on zOS (version 6 or more)
- IBM Websphere Test Environment (version 6 or more)
- IBM Websphere MQ on zOS (version 6 or more)
- CVS NT
- IBM Plugin for HTTP
- HTTPS (SSL)
- Wily Introscope
- Oracle WebLogic
- JAVA policy files
- ACSII to EBCDIC (code pages)
- CA Siteminder
- CTG (CICS Transaction Gateway)
- Microsoft C++
- RESTFUL Web Services
- Electronic Data Interchange (EDI) - MQ Series
- SAP ECC 6.0
- SAP Convergent Invoicing
- SAP NetWeaver Portal
- Financial Sector Collection and Disbursement
- Public Sector Records Management
- Public Sector Collection Disbursement (PSCD)
- External Community Members
- Debt Recovery Management
- SAP Convergent Invoicing
- Debt Recovery Management
- Business Rule Framework (BRF) and SAP NetWeaver Business
- Management SAP NetWeaver BRM for ABAP
- Rules Financial Accounting (FI)
- Controlling (CO)
- Sales and Distribution (SD)
- Smart Form
- JavaScript
- XML
- Microsoft Office Suite
- Professional ADOBE Acrobat

- Solution Manager
- CRM user (Marketing, Sales and Service, Interaction Centre Processing)
- Property Tax
- FSCM (Biller Direct, Dispute and Credit Management)
- TPOS – Taxpayer Online Services
- ERP 6.0 + current enhancement package
- Impromptu
- Oracle
- Visio
- PBWin
- Oracle CASE
- Rational Rose
- RUP
- IBM DB2
- ERWin Data Modelling tool
- Strong 2-factor security/authentication
- Microsoft TSP using Citrix extensions
- Smartcard hardware drivers
- Entrust migrations EDS (Entrust Desktop Security) and ESP (Entrust Service Provider)
- Latency
- Card migration, certificates
- Card usage using old and new software versions
- Authentication for application access
- Encryption and decryption functions
- ICA client
- Workstation “start” menu
- Virtual desktop
- Virtual environment
- Virtual serial channels
- Locally-connected devices and peripherals, including drivers
- CAPI stores and remote cache
- DNS and network routing
- Secure Remote Access
- Active Directory/Group Policy Object
- Oracle Solaris
- Microsoft PowerPoint, Visio, Word, Excel, Internet Explorer, Windows 2000 and XP, Microsoft Terminal Services Platform, Citrix Extensions
- HP Quick Test Professional.
- HP Quality Center
- US and UN API EDIFACT Message Formats that pertain to the Airline
- HTML
- IBM DB2
- J2EE
- Java
- MS Access
- MS SQL
- Message Queue (formerly MQ Series)
- Mobile Platform application Development.NET
- Netron/CAP

- PNR – Passenger Name Record formats that pertain to Airline Industry
- PowerBuilder Rational Rose
- RSA (Rational Software Architect)
- XML
- WSAD (WebSphere Studio Application Development)
- MIL-STD-498
- Transaction Processing Systems
- Risk Assessment Systems
- Portal Systems
- Web Services

4.2.4 The future technical environment at CBSA may be comprised of the following additional technologies:

a) Web Access Manager (WAM) and associated integrated technologies
b) Java on UNIX with Servlets; Oracle Portal on UNIX with JSR168 compliant portlets
c) COBOL on IBM Z O/S Mainframe
d) Data Acquisition Custom off the Shelf (COTS) software products for such items as data translation and data quality
e) Client Support COTS software products
f) Various other COTS products such as Business Rules Engine, Integrated Voice Recognition and Transponder Technology.

5.0 SCOPE OF WORK

5.1 The Contractor must, on an "as and when requested" basis and as described in any fully executed TA form(s), provide the Services to CBSA's satisfaction. Resources may be called upon to satisfy any combination of the tasks identified in 5.3 below.

The Contractor's Services to support program initiatives and projects related to the Declaration will include technological support to sustain operational requirements, human resource management activities, corporate affairs, comptrollership activities, CBSA programs, and project development.

The Contractor must store all technical or research documentation gathered or produced during the provision of the Services in CBSA's repository.

5.2 Key program initiatives to be supported include but are not limited to eManifest, Beyond the Border, Postal Modernization, CBSA Assessment and Revenue Management (CARM), Refugee Reform, Accounts Receivable Ledger and OGD Single Window.

In addition to these specific program initiatives, program initiatives that may be related to the declaration include but are not limited to:

- ▷ Database and data administration and management
- ▷ Research and development for new computer hardware and software
- ▷ Release and change management for IT applications and infrastructure
- ▷ Client desktop support
- ▷ Production support
- ▷ Maintenance and system enhancement
- ▷ Application and system testing
- ▷ Computer science program initiatives
- ▷ Business Intelligence program initiatives

- Data warehouse program initiatives
- Design and implementation of solutions
- Systems integration, development, maintenance and implementation
- E-business Integration and eportal Solutions
- Enterprise, Business, Solutions, Information and Security Architecture
- Information and Records Management
- Quality Management
- Infrastructure change and management
- Configuration Management
- Deployment and site management
- LAN Services and secure Network development
- Legacy Systems management
- Managing and delivering projects
- Capacity management
- Just in time data transmission initiatives
- System outage fixes
- Enterprise-wide capability initiative

CBSA's projects which may support the Declaration include but are not limited to:

Single Window Initiative	Abbotsford-Huntingdon (AH)	Cornwall Relocated Temporary Port of Entry	Tariff and Risk Assessment for HST
Advance Passenger Information/Passage Name Record (API/PNR)	Manitoba Small Ports Project	National Targeting Implementation Program (NTIP)	Shift Planning
Emanifest	Pacific Highway	Data Centre Recovery (DCR)	Arming
Postal Modernization Initiative	Beaver Creek	IT-Prerequisites	CBSA Assessment and Revenue Management (CARM)
Temporary Resident Biometrics Project (TRBP)	Lacolle	Incident Management Reporting System (IMRS)	Beyond the Border
Refugee Reform	Rigaud	Correspondence Tracking	
Automated Border Clearance (ABC)	Prescott	Recourse Content Management System (RCMS)	
Secure Communications	Accounts Receivable Ledger (ARL)	Secure Systems Transition Project	
Trusted Travelers Kiosk Replacement	Doubling Up	Information Management Program	
Kingsgate	Job Hazard Analysis Three	Environmental Information Management System (EIMS)	

5.2 In supplying resources, the Contractor must supply:
a) A single resource to work independently; or
b) A single resource as part of, or to lead, a team; or
c) A group of resources to act as a team; or
d) A group of resources to supplement a team; or
e) Multiple resources to act in any combination of the above.

5.3 Resource Categories and Tasks

STREAM 1 – Project Architecture

5.3.1 The Application/Software Architect - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.1.1 Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements;

5.3.1.2 Analyze and evaluate alternative technology solutions to meet business problems;

5.3.1.3 Ensures the integration of all aspects of technology solutions.

5.3.1.4 Analyze functional requirements to identify information, procedures and decision flows;

5.3.1.5 Evaluate existing procedures and methods, identify and document database content, structure, and application sub-systems, and develop data dictionary;

5.3.1.6 Define and document interfaces of manual to automated operations within application sub-systems, to external systems and between new and existing systems;

5.3.1.7 Define input and output sources, including detailed plan for technical design phase, and obtain approval of the system proposal;

5.3.1.8 Provide analysis to define system functionality using the Unified Modeling Language (UML);

5.3.1.9 Analyze and support development in an integrated enforcement, enrolment of risk assessment functionality;

5.3.1.10 Interact and coordinate activities with other team to ensure a successful delivery of the expected results;

5.3.1.11 Leading and facilitating Joint Application Architecture and Design sessions.

5.3.2 The System Analyst - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.2.1 Develop requirements, feasibility, cost, design, and specification documents for systems;

5.3.2.2 Implement systems to support projects, departments, organizations or businesses;

5.3.2.3 Translate business requirements into systems design and specifications;

5.3.2.4 Analyze and recommend alternatives and options for solutions;

5.3.2.5 Develop technical specifications for systems development, design and implementation.

5.3.3 The Web Architect (Usability Researcher) - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.3.1 Unit test the code prior to releasing it for integration testing;
5.3.3.2 Monitor the need for architectural changes as the project progresses;
5.3.3.3 Develop test plans for testing the system;
5.3.3.4 Ensure functionalities have been implemented according to specifications;
5.3.3.5 Develop post-implementation plan for monitoring/tracking architecture stability;
5.3.3.6 Experimental design;
5.3.3.7 Responsible for the collection, examination, summarization, manipulation, and interpretation of quantitative data to discover its underlining causes, Patterns, relationship, and trends;
5.3.3.8 User profiling; Capture the needs, goals, values, expectations and habits of users and forming well defined users groups;
5.3.3.9 Perform Audience analysis; this would include the understanding of the user group for which the design is targeted. This would include the audiences, demographics, physical location, amount of time available to view the design and interest in the subject matter;
5.3.3.10 Perform task analysis: What a user is required to do in terms of actions and/or cognitive processes to achieve a task;
5.3.3.11 Prepare scenarios built around defined user profiles and personas and include descriptions of common user tasks.

5.3.4 The Business Architect - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.4.1 Develop policies and rules that allow an organization to carry out its mandate and functional responsibilities, and that govern the organization's actual and planned capabilities in terms of computers, data, information, human resources, communication facilities, software and management responsibilities;
5.3.4.2 Develop the specifications for where, how and why the various organizational components fit together as they do, and how they support the organization's mandate.

5.3.5 The Information Management Architect - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.5.1 Analyse existing capabilities and requirements, develop redesigned frameworks and recommend areas for improved capability and integration;

5.3.5.2 Develop and document detailed statements of requirements;

5.3.5.3 Evaluate existing procedures and methods, identify and document database content, structure, and application subsystems, and develop data dictionary;

5.3.5.4 Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems;

5.3.5.5 Prototype potential solutions, provide tradeoff information and suggest recommended courses of action;

5.3.5.6 Perform information modeling in support of BPR implementation;

5.3.5.7 Provide advice in developing and integrating process and information models between business processes to eliminate information and process redundancies;

5.3.5.8 Provide advice in defining new requirements and opportunities for applying efficient and effective solutions;

5.3.5.9 Identify and provide preliminary costs of potential options.

5.3.6 The Technology Architect - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.6.1 Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements;

5.3.6.2 Ensures the integration of all aspects of technology solutions;

5.3.6.3 Monitor industry trends to ensure that solutions fit with government and industry directions for technology;

5.3.6.4 Perform impact analysis of technology changes;

5.3.6.5 Provide support to applications and technical support teams in the proper application of existing infrastructure;

5.3.6.6 Coach, mentor and train the organization to perform any of the above.

5.3.7 The Enterprise Architect - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.7.1 Evaluate the enterprise's business and Information and Communication Technologies (ICT) architecture, determine its consistency and integration with the organization's business and ICT strategies, assess the degree of its alignment with Treasury Board CIO Business Transformation Enablement Program (BTEP) and Federated Architecture Program (FAP) and recommend changes to the business and ICT architecture to improve its alignment with these external factors;

5.3.7.2 Assess the feasibility of migrating from the current state to the target business architecture and enabling technologies and identify the risks associated with migrating to the target business architecture and technologies and make recommendations for risk mitigation;

5.3.7.3 Identify business and technology trends that create opportunities for business improvement, advise business and ICT Senior Executives on ICT trends and emerging technologies and the impact on the organization's and government ICT architectures and business strategies, model "What if" scenarios and recommend appropriate changes to the existing architecture and ICT infrastructure, and recommend alternative solutions, methodologies and strategies;

5.3.7.4 Produce an architectural evolution plan, recommend prioritization of architecture evolution initiatives, and develop and implement an architecture evolution plan;

5.3.7.5 Manage the development and implementation of an architectural improvement plan;

5.3.7.6 Coach, mentor and train the organization to perform any of the above.

5.3.8 The Technical Writer will be responsible for, but not be limited to, doing the following:

5.3.8.1 Planning, researching and writing technical architecture artifacts, and specifications;

5.3.8.2 Analyzing material, such as notes and drawings, and writing architecture artifacts, and other documents to explain clearly and concisely the architecture end state;

5.3.8.3 Modifying, validating and compiling technical documents such as technical publications in general and system data lists and drawings;

5.3.8.4 Assisting and participating in meetings; this includes writing meeting minutes;

5.3.8.5 Reviewing documents, drawings and associated data for conformance to established standards.

5.3.9 The Web Architect (Usability Designer) - Level 3 will be responsible for, but not be limited to, doing the following:

5.3.9.1 Perform architectural modeling to ensure consistency of the design with existing work;

5.3.9.2 Develop code based upon design and requirements documents;

5.3.9.3 Ensure functionalities have been implemented according to specifications;

5.3.9.4 Create web pages including multi-media design;

5.3.9.5 Develop flowcharts depicting navigation and basic content;

5.3.9.6 Develop line drawings or block diagrams illustrating the priority of information, links and space requirements;

5.3.9.7 Develop content diagrams showing the interactive connection between pages;

5.3.9.8 Develop interactive prototypes showing basic form and functionality used for both usability testing and presentations;

5.3.9.9 Design and conduct user needs analysis and experimental design;

5.3.9.10 Research analysis in problem definition.

6.0 DELIVERABLES

6.1 Deliverables will be identified within TAs issued under the Contract as specified in Appendix A of Annex B, Article 1. The Contractor must ensure that all Deliverables submitted are in conformity with the instructions issued by the Technical Authority as specified in the TA. The scope of work attached to each TA will identify the particular deliverable(s), tasks, and other relevant areas of consideration, e.g. language of deliverables that are required to be implemented by the Contractor in the provision of Services.

6.1.1 Deliverables may include, but will not be limited to the following:

- Project plans;
- Analysis documents;
- Requirements studies;
- Use cases;
- Test plans and scripts;
- Architecture Variance;
- Business Context Models such as Business Use Case (BUC) Models;
- Preliminary Options Analysis (POA);
- Conceptual System Design (CSD);
- Technical Design Document (TDD);
- Consultation Documentation;
- Initial Project Plans (IPP) technical content;
- Development Strategy;
- Context Models;
- Usability Engagement Plan;
- Usability Value and Risk Assessment;
- Business User Model;
- Critical Success Factors;
- Documentation according to CBSA's set of best practices, standards and methodologies;
- Development of technical documentation and procedures;
- Complete analysis of current environments and recommendations for increasing and optimizing performance;
- Perform monitoring of query usage and recommend ways to modify tables for increased performance (e.g., adding indices, joining tables, adding foreign keys, etc;
- Costing/Financial reports

6.1.2 Resources will be required to produce the Deliverables in various formats. These include, but are not limited to:

- Microsoft Word
- Microsoft Excel
- Microsoft PowerPoint
- Adobe Acrobat

6.2 The Contractor must submit all Deliverables to the Technical Authority in accordance with the timing as set out in each TA. All text Deliverables shall be delivered in both hard and electronic copy or to the specifications of CBSA. All Deliverables must be accurate, truthful and in accordance with the specifications required by the Contract.

7.0 GREEN PROCUREMENT AND SERVICES

7.1 The Contractor must ensure, where possible, that all materials employed and work methods used by both the Contractor and its deployed personnel and resources will comply with CBSA's and the Government of Canada's Green Procurement Strategy.

APPENDIX A OF ANNEX B

TASKING PROCEDURE

1. Task Authorization (TA) Initiation

Where a requirement for a specific task has been identified, a TA will be provided to the Contractor in accordance with the allocation methodology stated in the Contract Article titled "Task Authorization". A Task Authorization Form (TA Form) as attached at Appendix B of Annex B will be prepared by the Technical Authority and sent to the Contractor. The TA Form will contain the following information, if applicable:

(i) a task number;
(ii) the date by which the Contractor's quotation must be received by the Technical Authority;
(iii) the Categories of Resources and the number required;
(iv) a detailed Statement of Work (SOW) for the task outlining the work activities to be performed and describing the Deliverables (such as reports) to be submitted, including the required format and media;
(v) the required start and completion dates (if any);
(vi) a schedule of milestone completion dates for major work activities, deliverables and payments (if applicable);
(vii) the number of person-days of effort required;
(viii) whether the work performance will require on-site activities at a given location;
(ix) a description of any travel requirement, including the content and format of any required travel report;
(x) the level of security clearance required of the Contractor's personnel;
(xi) the language profile required of the Contractor's personnel;
(xii) any funding sources against which the task will be tracked;
(xiii) The maximum TA price payable to the Contractor for performing the task, indicating how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and
(xiv) any other constraints that might affect the completion of the task.

2. The Contractor's TA Quotation

2.1 If a requirement for a specific task is identified, a draft "statement of task" will be prepared by the Technical Authority and sent to the Contractor. Once it receives the statement of task, the Contractor must submit a quotation to the authority identified in the TA detailing the cost and time to complete the task. No rates applicable to resources contracted for under another contract may be provided for assessment. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for providing the quotation or for providing other information required to prepare and issue the TA. The Contractor must provide any information requested by Canada in relation to the preparation of a TA within 2 working days of the request.

2.2 For each proposed resource the Contractor must supply a resume, the requested security clearance information and must complete the Response Tables at Appendix C of this Annex B applicable to the Categories of Resources identified in the TA. The resumes should demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to résumés and resources:

(A) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (refer to Appendix D to Annex "A", Certifications). For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource by the time of issuance of the draft "statement of task".

(B) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of the quotation and must continue, where applicable, to be a member in good standing of the profession's governing body throughout the Contract Period.

(C) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

(D) For any requirements that specify a particular time period (e.g., two years) of work experience, Canada will disregard any information about experience if the individual's résumé does not include the relevant dates for the experience claimed (i.e., the start date and end date). Canada will assess only the duration that the resource actually worked on the project or projects (from his or her start date to end date, in stead of the overall start and end date of a project or a combination of projects in which a resource has participated).

(E) For work experience to be considered, a résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirement, or reusing the same wording as the TA Form, will not be considered "demonstrated" for the purposes of the assessment. The Contractor should provide complete details as to where, when, month and year, and how, through which activities/responsibilities, the stated qualifications / experience were obtained. In situations in which a proposed resource worked at the same time on more than one project, only one project will be counted toward any requirements that relate to the individual's length of experience.

2.3 The quotation must be signed and submitted to the Technical Authority within the time for response identified in the TA Form. The Contractor will be given a minimum of 48 hours turnaround time to submit a quotation.

2.4 As part of the provision of Services, the Contractor may be required as part of the TA work to submit to the Technical Authority, a service delivery plan, within ten (10) business days of a TA being issued by CBSA. This plan must identify team structure, detailed work schedule, quality assurance mechanisms, and any other information identified in the TA, needed in order to present the Contractor's intended strategy to fulfill requirements stipulated in the TA form authorized by the Technical Authority.

2.5 The Contractor must submit with its quotation for each proposed resource:

(i) the level of security clearance granted or approved by CISD/PWGSC; and

(ii) a completed signed TBS 330-23 Form – Personnel Screening Consent and Authorization (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf).

CBSA will conduct a personnel Reliability Status assessment on the proposed resources, which may include a credit check. In the event a resource does not pass the assessment, the Contractor's quotation will be found to be non-responsive.

3. Assessment

3.1 The qualifications and experience of the proposed resources will be assessed against the requirements set out in the TA Form to determine each proposed resource's compliance with the criteria identified in Appendix C to this Annex B.

3.2 If reference checks are requested, Canada will conduct the reference check in writing by e-mail (unless the contact at the reference is only available by telephone). A Bidder will not be responsive to a mandatory technical criterion nor will it be awarded any points for a point-rated technical criterion unless the response is received to an e-mail reference check request within 5 working days. On the third working day after sending out the e-mails, if Canada has not received a response, Canada will notify the Bidder by e-mail, to allow the Bidder to contact its reference directly to ensure that it responds to Canada within 5 working days. Wherever information provided by a reference differs from the information supplied by the Bidder, the information supplied by the reference will be the information evaluated. The mandatory technical criteria will not be considered met nor will points be awarded for point-rated technical criteria if the reference customer is not a customer of the Bidder itself (for example, the customer cannot be the customer of an affiliate of the Bidder). Nor will the mandatory technical criteria be met or points for point-rated technical criteria be awarded if the customer is itself an affiliate or other entity that does not deal at arm's length with the Bidder. Canada references will be accepted.

3.3 During the assessment of the resources proposed, should the references for two or more resources required under that TA either be unavailable or fail to substantiate the required qualifications of the proposed resources to perform the required services, the Contracting Authority may find the quotation to be non-responsive.

3.4 Only quotations that meet all of the mandatory criteria will be considered for assessment of the point rated criteria. Each resource proposed must attain the minimum threshold score for the point rated criteria for the applicable resource category. If the minimum threshold score for any proposed resource is less than what is required, the Contractor's quotation will be found to be non-responsive.

4 Acceptance

4.1 Once the Technical Authority has accepted the quotation, the TA Form will be signed by Canada and provided to the Contractor for signature. All TA Forms estimated at $1,200,000 or less will be approved and signed by the Technical Authority who will send a copy of the signed TA to the Contracting Authority. All TA Forms estimated at over $1,200,000 will be signed by the Technical Authority and the Contracting Authority.

4.2 The TA Form must be appropriately signed by Canada prior to commencement of any work. The Contractor must not commence work until a fully signed TA Form (the Task Authorization) has been received, and any work performed in its absence is done at the Contractor's own risk.

APPENDIX B OF ANNEX B

TASK AUTHORIZATION FORM

(SEE ATTACHED HERETO)

APPENDIX C OF ANNEX B

RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLES

(TO BE USED WHEN THE CONTRACT IS AWARDED)

(SEE ATTACHED HERETO)

APPENDIX D OF ANNEX B

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the TA Form when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all statements made with regard to the education and the experience of individuals proposed for completing the subject work are accurate and factual, and we are aware that the Department of Public Works and Government Services reserves the right to verify any information provided in this regard and that untrue statements may result in the TA response being declared non-responsive or in other action which the Minister may consider appropriate.

____________________________________	__________________
Print name of authorized individual & sign above	Date

2. CERTIFICATION OF AVAILABILITY AND STATUS OF PERSONNEL

AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under any Task Authorization resulting from this Contract, the persons proposed in the TA response will be available to commence performance of the work within a reasonable time from the date of acceptance of the Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

____________________________________	__________________
Print name of authorized individual & sign above	Date

3. STATUS OF PERSONNEL

If the Contractor has proposed any person in fulfillment of this requirement who is not an employee of the Contractor, the Contractor hereby certifies that it has written permission from such person (or the employer of such person) to propose the services of such person in relation to the work to be performed in fulfillment of this requirement and to submit such person's resume to the Contracting Authority. As well, the Contractor hereby certifies that the proposed person is aware that overtime may be required and is willing to comply.

4. CERTIFICATION OF LANGUAGE – ENGLISH OR FRENCH OR BILINGUAL

The language of work and correspondence for the Contract is English or French or both, should there be a specific language requirement for a given task, it will be specified in the Tasking Request. The options are as follows:

The Contractor certifies that the proposed resources in response to this Task Authorization are

Option 1 - Unilingual English fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

Option 2 - Unilingual French fluent in French. The individual(s) proposed must be able to communicate orally and in writing in French without any assistance and with minimal errors.

Option 3 - Bilingual fluent in both official languages of Canada (French and English). The individual(s) proposed must be able to communicate orally and in writing in Fench and English without any assistance and with minimal errors.

APPENDIX C OF ANNEX B

RESOURCE ASSESSMENT CRITERIA AND RESPONSE TABLES

STREAM 1 – PROJECT ARCHITECTURE

Mandatory Criteria for the Application/Software Architect - Level 3

		CONTRACTOR'S RESPONSE	
ITEM #	**MANDATORY CRITERIA**	**DEMONSTRATED EXPERIENCE (CONTRACTOR TO INSERT DATA)**	**INSERT PAGE # OF RESUME**
M1	The Contractor must demonstrate that the proposed resource has a minimum of five years' experience, within the last ten years, in designing High Availability Systems* with a design towards Disaster Recovery**. *High Availability System is defined as a system available 24 hours a day, seven days a week, with only scheduled outages. **Disaster Recovery is defined as restoring operation after a failure, outage disaster, or restoring an alternative service when necessary; in the shortest possible time.		
M2	The Contractor must demonstrate that the proposed resource has a minimum of three years' experience, within		

	the last seven years, in providing analysis to define system functionality using Unified Modeling Language (UML).		
M3	The contractor must demonstrate that the proposed resource has a minimum of three years' experience, within the last seven years, in analyzing and supporting development in an Integrated Enforcement Enrolment* or Risk Assessment Functionality**. *Integrated Enforcement Enrolment is defined has the repository for all enforcement-related information. This includes records of seizures and other enforcement actions, lookouts, intelligence and investigations cases and information from external sources relating to enforcement. **The Risk Assessment Functionality is defined as the analysis of the available information in order to determine the risk associated with a traveller or a commercial good.		
M4	The Contractor must demonstrate that the proposed resource has a minimum of three years' experience, within the last seven years, working on projects that required interaction and coordination with other teams in order to deliver the desired result.		

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

Point Rated Criteria for the Application/Software Architect - Level 3

			CONTRACTOR'S RESPONSE		
ITEM #	**POINT RATED CRITERIA**	**MAX POINTS**	**EVALUATION CRITERIA**	**DEMONSTRATED EXPERIENCE (CONTRACTOR TO INSERT DATA)**	**INSERT PAGE # OF RESUME**
R1	The Contractor should demonstrate that the proposed resource has additional experience, in excess of mandatory criteria M3, in analyzing and supporting development in an Integrated Enforcement Enrolment* and Risk Assessment Functionality**. *Integrated Enforcement Enrolment is defined has the repository for all enforcement-related information. This includes records of seizures and other enforcement actions, lookouts, intelligence and investigations cases and information from external sources relating to enforcement. ** The Risk Assessment Functionality is defined as the analysis of the available information in order to determine the risk associated with a traveller or a commercial good.	20	3 years or less = 0 points More than 3 years to 4 years = 5 points More than 4 years to 5 years = 10 points More than 5 years to 6 years = 15 points More than 6 years = 20 points		

	The additional experience does not have to be within the last seven years.				
R2	The Contractor should demonstrate that the proposed resource has experience designing Complex Systems* in a geographically distributed environment which also contains shared database subsystems. *Complex Systems is defined as a group of interacting, interrelated systems that must provide immediate access and response (real time) to users performing time sensitive tasks where accuracy of data is critical.	10	1 year or less = 0 points More than 1 year to 2 years = 1 point More than 2 years to 3 years = 3 points More than 3 years to 4 years = 5 points More than 4 years to 5 years = 7 points More than 5 years = 10 points		
R3	The Contractor should demonstrate that the proposed resource has experience using	10	1 year or less = 0 points		

CBSA - Released under the Access to Information Act
ASFC - Divulgé en vertu de la Loi sur l'accès à l'information

	IBM Rational Rose software and the Rational Unified Process Methodology.		More than 1 year to 2 years = 1 point More than 2 years to 3 years = 3 points More than 3 years to 4 years = 5 points More than 4 years to 5 years = 7 points More than 5 years = 10 points		
R4	The Contractor should demonstrate that the proposed resource has experience identifying and developing application architectures, framework and strategies to meet the business and application requirements of an organization or application area.	20	1 year or less = 0 points More than 1 year to 2 years = 3 points More than 2 years to 3 years = 5		

			points More than 3 years to 4 years = 10 points More than 4 years to 5 years = 15 points More than 5 years = 20 points		
R5	The Contractor should demonstrate that the proposed resource has experience performing all of the tasks detailed in section 5.3.1 of Annex A (SOW) in a Federal Government department or agency.	5	1 year or less = 0 points More than 1 year to 2 years = 1 point More than 2 years to 3 years = 2 points More than 3 years to 4 years = 3 points		

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

			More than 4 years to 5 years = 4 points More than 5 years = 5 points		
R6	The Contractor should demonstrate that the proposed resource has received training or a certification or both in The Open Group Architecture Framework (TOGAF)*. To obtain points a copy of the certification is to be included with the proposed resource's résumé. * The Open Group Architecture Framework (TOGAF) is defined as the methods and tools for assisting in the acceptance, production, use, and maintenance of enterprise architecture. It is based on an iterative process model supported by best practices and re-usable set of existing architecture asset.	10	Training only in TOGAF = 5 points Copy of Certification in TOGAF included = 10 points		

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

- Appendix B to Annex A - Task Authorization (TA) Form
- Appendix C to Annex A - Resources Assessment Criteria and Response Table
- Appendix D to Annex A - Certifications at the TA stage

Annex B – Basis of Payment
Annex C - Security Requirements Check List

1.0 Requirement

(a) Adirondack in Joint Venture with Amita Corporation, Artemp Personnel Services, The AIM Group Inc. (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client**: Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

2.0 Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

(b) **Allocation of Task Authorizations**: More than one contract has been awarded for this requirement. As a result, the Task Authorizations issued under this series of contracts will be allocated in accordance with the following:

  (i) At the time this series of contracts was awarded, each contractor was allocated an amount of funding as specified in the Limitation of Expenditure in respect of Task Authorizations based on the evaluation process described in the bid solicitation that resulted in the award of this series of contracts.

  (i) Canada will use a rotational method to allocate the draft Task Authorizations, where the rotation is based on the amount of funding remaining under each of the respective contracts.

  (ii) Canada will send the first draft Task Authorization to the contractor with the greatest value of funding under its contract. If more than one contractor has the same value, it will be assigned to the contractor ranked first as determined under the evaluation process in the bid solicitation that resulted in the award of this series of contracts.

  (iii) The contractor sent a draft TA will have the time set out further below under the sub-paragraph entitled "Contractor's Response to Draft Task Authorization" to respond to the Contracting Authority.

  (iv) If the contractor to whom the draft TA is first sent either fails to respond on time or confirms in writing that it refuses to perform the task, the draft TA will then be forwarded to the contractor with the next-greatest balance remaining of allocated funding. In the event that Canada determines the proposed resource(s) does not meet the minimum experience or other requirements of the categories identified in the draft TA, Canada will send the draft TA to the contractor with the next greatest balance remaining of allocation funding.

(v) The process of sending out a draft TA to the contractor with the greatest balance remaining will continue until Canada either cancels the requirement for the task or it has been validly issued to one of the contractors. If none of the contractors can perform the task (in accordance with all the terms and conditions of this series of contracts), Canada may acquire the required Work by other means.

(vi) Once the Task Authorization is issued, for the purposes of calculations for the allocation of Task Authorizations, the value of that Task Authorization, including any applicable options under that TA (and the value of any subsequent amendment to that TA) will be subtracted from the funding allocated to that contractor.

(vii) When the next requirement to perform a task is identified, it will be sent to the contractor with the greatest balance remaining of allocated funding. If more than one contractor has the greatest balance remaining of allocated funds (i.e., several contractors have equal amounts of allocated funding), the draft TA will be sent to the contractor among them that ranked highest under the bid solicitation evaluation process. If any contract in this series of contracts is amended to add funding for Task Authorizations, all the remaining contracts (i.e., all contracts that have not previously been terminated) will be amended to add funding in amounts proportionate to the funding initially provided under each contract for Task Authorizations (e.g., if three contracts were awarded with $2M, $1M and $750,000 in funding for Task Authorizations respectively, and $200,000 is added to the first contract, then $100,000 will be added to the second contract and $75,000 will be added to the third).

(c) **Assessment of Resources Proposed at TA Stage**: Processes for issuing, responding to and assessing Task Authorizations are further detailed in Appendices A, B, C and D of Annex A.

(d) **Form and Content of draft Task Authorization**:

(i) The Technical Authority will provide the Contractor with a description of the task in a draft Task Authorization using the form specified in Annex A.

(ii) The draft Task Authorization will contain the details of the activities to be performed, and must also contain the following information:

(A) the task number;

(B) The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);

(C) the categories of resources and the number required;

(D) a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);

(E) the start and completion dates;

(F) milestone dates for deliverables and payments (if applicable);

(G) the number of person-days of effort required;

(H) whether the work requires on-site activities and the location;

(I) the language profile of the resources required;

(J) the level of security clearance required of resources;

(K) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be

determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

(L) any other constraints that might affect the completion of the task.

(e) **Contractor's Response to Draft Task Authorization**: The Contractor must provide to the Technical Authority, within five (5) working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), a quotation with the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract, as well as its corresponding proposed resource(s) in accordance with Appendix A to Annex A of the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

(f) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to $300,000.00 (excluding Applicable Taxes), the TA must be signed by:

   a. the Technical Authority; and

   b. a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA.

(ii) for any TA with a value greater than this amount, a TA must be signed by:

   a. the Technical Authority;

   b. a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA; and

   c. the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

(g) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under Task Authorizations validly issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below. If some data is not available, the reason must be indicated. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The data must be submitted on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

   (A) 1st quarter: April 1 to June 30;

   (B) 2nd quarter: July 1 to September 30;

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'Accès à l'information.

(C) 3rd quarter: October 1 to December 31; and

(D) 4th quarter: January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended)

(A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;

(B) a title or a brief description of each authorized task;

(C) the name, Resource category and level of each resource involved in performing the TA, as applicable;

(D) the total estimated cost specified in the validly issued TA of each task, exclusive of Applicable Taxes;

(E) the total amount, exclusive of Applicable Taxes, expended to date against each authorized task;

(F) the start and completion date for each authorized task; and

(G) the active status of each authorized task, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TA's (as amended) :

(A) the amount, exclusive of Applicable Taxes, specified in the Contract (as last amended, as applicable) as Canada's total liability to the Contractor for all validly issued TA's; and

(B) the total amount, exclusive of Applicable Taxes, expended to date against all validly issued TA's.

(h) **Refusal of Task Authorizations or Submission of a Response which is not Valid**: The Contractor is not required to submit a response to every draft TA sent to it by Canada. However, in addition to Canada's other rights to terminate the Contract, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions if the Contractor in at least three instances has either not responded or has not submitted a valid response when sent a draft TA. For greater clarity, each draft TA, which is identifiable by its task number, will only count as one instance. A valid response is one that is submitted within the required time period and meets all requirements of the draft TA issued, including proposing the required number of resources who each meet the minimum experience and other requirements of the categories identified in the draft TA at pricing not exceeding the rates set out in Annex B.

(i) **Consolidation of TA's for Administrative Purposes**: The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TA's for administrative purposes.

3.0 Minimum Work Guarantee

(a) In this clause,

(i) "**Maximum Contract Value**" means the amount specified in the "**Limitation of Expenditure**" clause set out in the Contract; and

(ii) "**Minimum Contract Value**" means $20,000.00 (excluding Applicable Taxes).

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

  (i) for default;

  (ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or

  (iii) for convenience within ten business days of Contract award.

4.0 Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

(a) **General Conditions**:

  (i) 2035 (2020-05-28), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

  With respect to Section 30 - Termination for Convenience, of General Conditions 2035, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

  4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

  5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:

    (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Work Guarantee, or due to the Contractor as of the date of termination, or

    (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

  6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions**:

  The following Supplemental General Conditions:

  (i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

(ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

apply to and form part of the Contract.

5.0 Security Requirement

The following security requirements (SRCL #19 and related clauses provided by the Contract Security Program) as set out under Annex "B" to the Supply Arrangement, applies to and forms part of the Contract.

1. The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of Secret, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC)
2. The Contractor personnel requiring access to protected/classified information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **Secret** as required, granted or approved by CISD/PWGSC
3. The Contractor must not remove any protected/classified information from the identified work site(s), and the Contractor must ensure that its personnel are made aware of and comply with this restriction
4. Subcontracts which contain security requirements are not to be awarded without the prior written permission of CISD/PWGSC
5. The Contractor must comply with the provisions of the:

    (i) Security Requirements Check List and security guide (if applicable), attached at Annex C; and

    (ii) Industrial Security Manual (Latest Edition)

6. ADDITIONAL SECURITY REQUIREMENT:

    (i) The Canada Border Services Agency will conduct its own personnel Reliability Status assessment on the recommended Contractor and its personnel as per the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard, irrespective of whether such assessment has already been conducted under any such policies. The Reliability Status assessment conducted by the CBSA will include a credit check performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian Industrial Security Directorate" (CISD) and the "International Industrial Security Directorate" (IISD).
    (ii) For each proposed resource, the recommended Contractor must submit a completed signed original TBS 330-23 Form – Personnel Screening Consent and Authorization (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf) upon request of the Contracting Authority prior to Contract Award.
    (iii) Until the credit check and all other security screening processes required by this Request for Proposal have been completed and the recommended Contractor and its personnel is considered suitable by the CBSA, no contract will be awarded and the recommended Contractor (specifically the Contractor personnel) shall not be permitted access to Protected / Classified information or assets, and further, shall not be permitted to enter sites where such information or assets are kept.

(iv) In the event the recommended Contractor (specifically the Contractor personnel) does not pass the security screening process required by the CBSA, the said Contractor's proposal will be considered non-responsive and the next ranked bidder will be contacted. If only one bid was obtained and the proposed bidder does not meet the security requirement, then, the contracting officer will determine the next steps in order to ensure all requirements are met

(v) Contractor personnel can include in some instances landlords, property management employees and principles of companies when the latter have access to the premises where the CBSA designated or classified information\assets are kept.

6.0 Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends two (2) years later; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to **two (2) additional two (2) year** period under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

7.0 Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Daniel Michaud
Title: Supply Team Leader
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Informatics and Telecommunications Systems Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec
Telephone: (613) 858-8483
E-mail address: daniel.michaud@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Jeff Carr
Title: Executive director, Data Strategy

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

Directorate: Chief Data Office, Strategic Policy Branch, CBSA
Address: 333 North River Road, Ottawa, ON, K1A 0L8
Telephone: 613 290 5069
E-mail address: jeff.carr@cbsa-asfc.gc.ca

In his absence, the Technical Authority for the Contract is:

Name: Bogdan Buduru
Title: A/Manager, Analytics Programs Management Unit
Directorate: Chief Data Office, Strategic Policy Branch, CBSA
Address: 333 North River Road, Ottawa, ON, K1A 0L8
Telephone: 343 553 1881
E-mail address: bogdan.buduru@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority

(c) Contractor's Representative

8.0 Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

9.0 Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex B, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

(ii) **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex B), Applicable Taxes extra.

(iii) **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

(iv) **Contractor's Firm Per Diem Rates**: The Contractor agrees that the rates set out in Annex B remain firm throughout the Contract Period, except as may be provided for in the express terms of the contract. In reference to Article 18(1) of SACC General Conditions 2035, the Contractor acknowledges that its obligation to provide services in accordance with the firm rates set out in Annex B is unaffected by the application of any existing law or any new law which may come into effect during the Contract Period.

(v) **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract within the time described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole or in part or chooses to exercise any of the rights provided to it under the general conditions, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Corrective Measure Policy (or equivalent) then in effect, which measures may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

(b) **Limitation of Expenditure – Cumulative Total of all Task Authorizations**

(i) Canada's total liability to the Contractor under the Contract for all validly issued Task Authorizations (TAs), inclusive of any revisions, must not exceed the amount set out on page 1 of the Contract, less any Applicable taxes. With respect to the amount set out on page 1 of the Contract, Customs duties are excluded and Applicable Taxes are included

(ii) No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

(iii) The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

(A) when it is 75 percent committed, or

(B) 4 months before the contract expiry date, or

(C) As soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

(i) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) **Method of Payment for Task Authorizations with a Maximum Price**: For each Task Authorization validly issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) **Method of Payment for Task Authorizations with a Firm Price - Lump Sum Payment on Completion**: Canada will pay the Contractor upon completion and delivery of all the Work associated with the validly issued Task Authorization in accordance with the payment provisions of the Contract if:

(i) an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

(ii) all such documents have been verified by Canada; and

(iii) the Work delivered has been accepted by Canada.

(e) **Electronic Payment of Invoices – Contract**

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

[To be determined]

(i) Visa Acquisition Card;

(ii) MasterCard Acquisition Card;

(iii) Direct Deposit (Domestic and International);

(iv) Electronic Data Interchange (EDI);

(v) Wire Transfer (International Only);

(vi) Large Value Transfer System (LVTS) (Over $25M)

(f) **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

(g) **Payment Credits**

(i) **Failure to Provide Resource**:

(A) If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of 10 days.

(B) **Corrective Measures**: If credits are payable under this Article for two consecutive months or for three months in any 12-month period, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and 20 working days to rectify the underlying problem.

(C) **Termination for Failure to Meet Availability Level**: In addition to any other rights it has under the Contract, Canada may terminate the Contract for default in accordance with the General Conditions by giving the Contractor three months' written notice of its intent, if any of the following apply:

(1) the total amount of credits for a given monthly billing cycle reach a level of 10% of the total billing for that month; or

(2) the corrective measures required of the Contractor described above are not met.

ATIP - Release under the Access to Information Act
AIPRP - Divulgation en vertu de la Loi sur l'Accès à l'information.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

(ii) **Credits Apply during Entire Contract Period**: The Parties agree that the credits apply throughout the Contract Period.

(iii) **Credits represent Liquidated Damages**: The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

(iv) **Canada's Right to Obtain Payment**: The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

(v) **Canada's Rights & Remedies not Limited**: The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

(vi) **Audit Rights**: The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

(h) **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

10.0 Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

(c) By submitting invoices, the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

CBSA - Disclosed under the Access to Information Act
ASFC - Divulgation en vertu de la Loi sur l'Accès à l'information.

(d) The Contractor must provide the original of each invoice to the Technical Authority, and a copy to the Contracting Authority.

11.0 Certifications and Additional Information

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, any TA quotation and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire Contract Period.

12.0 Federal Contractors Program for Employment Equity - Default by Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

13.0 Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

14.0 Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;

(b) Supplemental General Conditions, in the following order:

  (i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

  (ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

(c) General Conditions 2035 (2020-05-28), Higher Complexity - Services;

(d) Annex A, Statement of Work – Annex A including its Appendices as follows;

  (i) Appendix A to Annex A - Tasking Assessment Procedure;

  (ii) Appendix B to Annex A - Task Authorization (TA) Form;

  (iii) Appendix C to Annex A - Resource Assessment Criteria and Response Table;

  (iv) Appendix D to Annex A - Certifications at the TA stage;

(e) Annex B, Basis of Payment;

(f) Annex C, Security Requirements Check List;

(g) the validly issued Task Authorizations and any required certifications (including all of their annexes, if any); and

(h) the Contractor's bid dated September 25th, 2020.

15.0 Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

ATIA - Disclosed under the Access to Information Act
LAI - Divulgation en vertu de la Loi sur l'Accès à l'information.

16.0 Insurance Requirements

(a) Compliance with Insurance Requirements

(i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

(ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

(iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) Commercial General Liability Insurance

(i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

(ii) The Commercial General Liability policy must include the following:

(A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

(B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

(C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

(D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

[illegible] under the Access to Information Act
[illegible] Divulgation en vertu de la loi sur l'Accès à l'information.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

(J) Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(K) If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(L) Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

17.0 Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third

[illegible] the Access to Information Act
[illegible] Divulgation en vertu de la loi sur l'Accès à l'information.

party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

18.0 Joint Venture Contractor

The Contractor confirms that the name of the joint venture is Adirondack Information Management Inc., Amita Corporation, Artemp Personnel Services Inc., The AIM Group Inc. in Joint Venture.

(a) and that it is comprised of the following members:

1. Amita Corporation
2. Artemp Personnel Services Inc.
3. The AIM Group Inc

(b) With respect to the relationship among the members of the joint venture Contractor, each member agrees, represents and warrants (as applicable) that:

(i) has been appointed as the "representative member" of the joint venture Contractor and has fully authority to act as agent for each member regarding all matters relating to the Contract;

(ii) by giving notice to the representative member, Canada will be considered to have given notice to all the members of the joint venture Contractor; and

(iii) all payments made by Canada to the representative member will act as a release by all the members.

(c) All the members agree that Canada may terminate the Contract in its discretion if there is a dispute among the members that, in Canada's opinion, affects the performance of the Work in any way.

(d) All the members are jointly and severally or solidarily liable for the performance of the entire Contract.

(e) The Contractor acknowledges that any change in the membership of the joint venture (i.e., a change in the number of members or the substitution of another legal entity for an existing member) constitutes an assignment and is subject to the assignment provisions of the General Conditions.

(f) The Contractor acknowledges that all security and controlled goods requirements in the Contract, if any, apply to each member of the joint venture Contractor.

19.0 Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

20.0 Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

21.0 Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

22.0 Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

23.0 Government Property

Canada agrees to supply the Contractor with the items listed at Article 5. Client Support of Annex A – Statement of Work. The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

24.0 Transition Services at End of Contract Period

The Contractor agrees to execute the transition tasks identified within the Task Authorizations (if applicable) and it will make all reasonable efforts to assist Canada in the transition from the incumbent to the Contractor and from the Contractor to a new contract with another supplier.

25.0 Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

26.0 Dispute Resolution

(a) The parties agree to maintain open and honest communication about the Work throughout and after the performance of the contract.

(b) The parties agree to consult and co-operate with each other in the furtherance of the contract and promptly notify the other party or parties and attempt to resolve problems or differences that may arise.

(c) If the parties cannot resolve a dispute through consultation and cooperation, the parties agree to consult a neutral third party offering alternative dispute resolution services to attempt to address the dispute.

(d) Options of alternative dispute resolution services can be found on Canada's Buy and Sell website under the heading "Dispute Resolution".

ANNEX A

STATEMENT OF WORK

SW1 BACKGROUND

The Canada Border Service Agency (CBSA) has a mandate to provide integrated border services that support national security and public safety priorities, while facilitating the free flow of legitimate trade and travel. The Agency is committed to protecting the safety and security of Canadian communities, as well as the stability and prosperity of our economy.

In support of its mandate, the CBSA has embarked on Agency-wide modernization efforts to strengthen its management foundation and enhance its capabilities to respond effectively to the evolving border continuum. With the exponential growth of data produced by the CBSA and its partners, the CBSA is seeking opportunities to increase its Analytics footprint by fostering people, process, data and technology in order to guide strategic, operational and tactical decision-making along its business lines.

In order to support the advancements of the CBSA's Analytics investment, the Agency needs to secure an agile, connected and high-performing workforce skilled on the use of modern techniques and tools.

CBSA Information, Science and Technology Branch (ISTB) will require resources to supplement and support the staff currently in place and work on high performance, high availability, and mission critical national systems, built on the IT Environment identified in Section 4 below.

SW2 SCOPE OF WORK

Resource categories as listed below:

2.1 Business Stream Workstream 2

TBIPS Category	TBIPS Level
B.1. Business Analyst	2 and 3
B.1 Business Analyst (Data Analyst/Data Quality Analyst)	2 and 3
B.2. Business Architect	2 and 3
B.3. Business Consultant	2 and 3
B.5. Business Process Re-engineering (BPR) Consultant	3
B.11 Instructor, Information Technology	3
P.1. Change Management Consultant	3
P.5 Project Executive	3
P.9. Project Manager	2 and 3
P.12 Risk Management Specialist	3

SW3 TASKS AND DELIVERABLES

3.1 Business Stream Workstream 2

3.1.1 B.1. Business Analyst (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze functional requirements to identify information, procedures and decision flows.
2. Evaluate existing procedures and methods, identify and document items such as database content, structure, application subsystems.
3. Define and document various user support artifacts.
4. Develop, document and provide support of data governance artefacts.
5. Elicit Business Requirements.

Additional Tasks could include but are not limited to:

6. Recommend industry trends to ensure that solutions fit with government and industry directions for technology.
7. Support in defining input / output sources, including detailed plan for technical design phase, and obtain approval of the system proposal.
8. Develop and document statements of requirements for considered alternatives.
9. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems.
10. Establish acceptance test criteria with client.
11. Support and use the selected departmental methodologies.
12. Interpret commercial and traveler government policy legislation and regulation.
13. Interpret immigration and enforcement government policy legislation and regulation.
14. Interpret financial government policy legislation and regulation.
15. Consult and collaborate with various stakeholders.

3.1.2 B.1. Business Analyst (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze functional requirements to identify information, procedures and decision flows.
2. Evaluate existing procedures and methods, identify and document items such as database content, structure, application subsystems.
3. Define and document various user support artifacts.
4. Develop and document statements of requirements for considered alternatives.
5. Elicit Business Requirements.
6. Coach and mentor teams members and users on best practices and provide knowledge transfer.
7. Support in defining input / output sources, including detailed plan for technical design phase, and obtain approval of the system proposal.

Additional Tasks could include but are not limited to:

8. Recommend industry trends to ensure that solutions fit with government and industry directions for technology.
9. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems.
10. Establish acceptance test criteria with client.
11. Support and use the selected departmental methodologies.
12. Interpret commercial and traveler government policy legislation and regulation.
13. Interpret immigration and enforcement government policy legislation and regulation.
14. Interpret financial government policy legislation and regulation.
15. Consult and collaborate with various stakeholders.
16. Develop, document and provide support of data governance artefacts.

3.1.3 B.1. Business Analyst (Data Analyst/Data Quality Analyst) (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Consult and collaborate with the business to define/develop and document statements of data requirements.
2. Develop, build and maintain queries and/or write programs/scripts to extract and compile data from SQL repositories to merge and analyze data from various sources in order to conduct an analysis.
3. Develop, build and maintain queries and/or write programs/scripts to extract and compile data in a hybrid cloud computing environment.
4. Perform data quality analysis and testing by matching or comparing data to appropriate data sources, validating accuracy, identifying, analyzing and investigating root causes to data issues or problems.
5. Interpret, analyze data results using statistical techniques and develop data visualization presentations to present findings.

Additional Tasks could include but are not limited to:

6. Research opportunities for data acquisition and new uses for exiting data by interpreting data for validity to the business and its appropriateness to meet the needs and requirements of the client.
7. Develop and create data reports to provide management with supporting material to aid in fact based decision making.
8. Define uses of data and translate into data diagrams, requirements documents, technical design and actionable project plans.
9. Develop, create and produce comprehensive ad hoc and regular reports in response to data requests from clients.
10. Define and document metadata for business values; defining, developing and documenting business rules and definitions of data attributes/elements, including and not limited to the development and updating of data dictionary.
11. Perform data profiling of existing data and source-to-target mapping in order to ensure data integrity and quality.
12. Establish and generate data quality metrics to support reporting, monitoring and dashboard requirements.
13. Develop and maintain comprehensive end user documentation and reference materials/guides in the data repository and ensure it is current and accurate including initiating appropriate updates of definitions.

14. Develop and maintain effective working relationships with the business to discuss and resolve issues, understand current state and business processes, identify future needs and opportunities to fully support business data needs.
15. Participate in projects, forums and working groups varying in scope and complexity including the development of work plans and completing progress reports.

3.1.4 B.1. Business Analyst (Data Analyst/Data Quality Analyst) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Consult and collaborate with the business to define/develop and document statements of data requirements.
2. Develop, build and maintain queries and/or write programs/scripts to extract and compile data from SQL repositories to merge and analyze data from various sources in order to conduct an analysis.
3. Develop, build and maintain queries and/or write programs/scripts to extract and compile data in a hybrid cloud computing environment.
4. Perform data quality analysis and testing by matching or comparing data to appropriate data sources, validating accuracy, identifying, analyzing and investigating root causes to data issues or problems.
5. Interpret, analyze data results using statistical techniques and develop data visualization presentations to present findings.
6. Analyze and mine data to identify patterns, trends, anomalies and correlations among the various data points.
7. Define and document metadata for business values; defining, developing and documenting business rules and definitions of data attributes/elements, including and not limited to the development and updating of data dictionary.

Additional Tasks could include but are not limited to:

8. Research opportunities for data acquisition and new uses for exiting data by interpreting data for validity to the business and its appropriateness to meet the needs and requirements of the client.
9. Develop and create data reports to provide management with supporting material to aid in fact based decision making.
10. Define uses of data and translate into data diagrams, requirements documents, technical design and actionable project plans.
11. Develop, create and produce comprehensive ad hoc and regular reports in response to data requests from clients.
12. Perform data profiling of existing data and source-to-target mapping in order to ensure data integrity and quality.
13. Establish and generate data quality metrics to support reporting, monitoring and dashboard requirements.
14. Provide client education and end user support by identifying training needs, participating in developing and delivering training/information sessions to increase client awareness and understanding of data and data extraction mining tools.
15. Develop and maintain comprehensive end user documentation and reference materials/guides in the data repository and ensure it is current and accurate including initiating appropriate updates of definitions.
16. Develop and maintain effective working relationships with the business to discuss and resolve issues, understand current state and business processes, identify future needs and opportunities to fully support business data needs.

17. Participate in projects, forums and working groups varying in scope and complexity including the development of work plans and completing progress reports.

3.1.5 B.2. Business Architect (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop policies and rules that allow an organization to carry out its mandate and functional responsibilities, and that govern the organization's actual and planned capabilities in terms of computers, data, information, human resources, communication facilities, software and management responsibilities.
2. Develop the specifications for where, how and why the various organizational components fit together as they do, and how they support the organization's mandate.
3. Conduct an assessment of the organizations current project's business architecture, process and performances.

Additional Tasks could include but are not limited to:

4. Recommend changes to improve operational performance.
5. Ensure consistency and integration with the organization's and government architectures and business strategies.
6. Evaluate the feasibility of the architecture and technologies related to a business change;
7. Identify risks associated with the architecture and technologies and recommending risk mitigation.
8. Advise Senior Management on trends and emerging technologies and their impact on the organization's architectures and business strategies.
9. Manage the development and implementation of an architectural improvement plan
10. Define standard common business vocabulary.
11. Develop high level integrated designs to meet requirements to align with enterprise strategy.

3.1.6 B.2. Business Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop policies and rules that allow an organization to carry out its mandate and functional responsibilities, and that govern the organization's actual and planned capabilities in terms of computers, data, information, human resources, communication facilities, software and management responsibilities.
2. Develop the specifications for where, how and why the various organizational components fit together as they do, and how they support the organization's mandate.
3. Conduct an assessment of the organizations current project's business architecture, process and performances.
4. Advise Senior Management on trends and emerging technologies and their impact on the organization's architectures and business strategies.

Additional Tasks could include but are not limited to:

5. Recommend changes to improve operational performance.
6. Ensure consistency and integration with the organization's and government architectures and business strategies.
7. Evaluate the feasibility of the architecture and technologies related to a business change;

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'Accès à l'information.

8. Identify risks associated with the architecture and technologies and recommending risk mitigation.
9. Manage the development and implementation of an architectural improvement plan
10. Define standard common business vocabulary.
11. Develop high level integrated designs to meet requirements to align with enterprise strategy.

3.1.7 B.3. Business Consultant (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze, evaluate, develop business processes (financial, operational, systems, etc.).
2. Identify organizational and/or project business opportunities for improvement and streamlining of business processes.
3. Perform business analyses of functional requirements to identify information, procedures, and decision flows.

Additional Tasks could include but are not limited to:

4. Identify and evaluate critical success parameters, factors and performance measurements.
5. Assist stakeholders in development and implementation of business improvement processes and programs.
6. Develop and document statements of requirements for considered alternatives.
7. Prepare briefings, position papers, presentations and other documentation upon request and maintain accurate and complete records of decisions for all stages of the Project.
8. Organize and oversee weekly project team meetings, as well as facilitating status review meetings among project teams' members.

3.1.8 B.3. Business Consultant (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze, evaluate, develop business processes (financial, operational, systems, etc.).
2. Identify organizational and/or project business opportunities for improvement and streamlining of business processes.
3. Perform business analyses of functional requirements to identify information, procedures, and decision flows.
4. Identify and evaluate critical success parameters, factors and performance measurements.
5. Assist stakeholders in development and implementation of business improvement processes and programs.
6. Prepare briefings, position papers, presentations and other documentation upon request and maintain accurate and complete records of decisions for all stages of the Project.
7. Organize and oversee weekly project team meetings, as well as facilitating status review meetings among project teams' members.

Additional Tasks could include but are not limited to:

8. Develop and document statements of requirements for considered alternatives.

3.1.9 B.5. Business Process Re-engineering (BPR) Consultant (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze business functional requirements to identify information, procedures and decision flows.
2. Identify candidate processes for re-design; prototype potential solutions, provide trade-off information and suggest a recommended course of action. Identify the modifications to the automated processes.
3. Provide expert advice in defining new requirements and opportunities for applying efficient and effective solutions; identify and provide preliminary costs of potential options.
4. Prepare a detailed statements of requirements on data analytics and business intelligence.
5. Provide expert advice on and/or assist in implementing new processes and organizational changes.

Additional Tasks could include but are not limited to:

6. Review existing work processes and organizational structure.
7. Provide expert advice in developing and integrating process and information models between processes to eliminate information and process redundancies.
8. Document workflows.
9. Use business, workflow and organizational modeling software tools.
10. Develop, document and provide support of data governance artefacts.
11. Document and describe existing organizational practices and procedures related to the business intelligence and data analytics.
12. Analyze and develop GC Information Management Policies.

3.1.10 B.11 Instructor, Information Technology (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop a training strategy that can be applied to the Business Intelligence environment.
2. Create a training program roadmap for the Business Intelligence program delivery, including and not limited to a catalogue of required training materials.

Additional Tasks could include but are not limited to:

3. Assess the relevant characteristics of a target audience.
4. Provide recommendations on different roles of a target audience.
5. Assess the relevant training program material required to define the transition of the training program from current Cognos software version to the next software version.
6. Develop a transition plan to transition the training program from the current Cognos software version to the next software version.
7. Develop a catalogue of training materials required to be developed.
8. Develop the training program course material.
9. Prepare end-users for implementation of courseware materials in a Business Intelligence environment.
10. Conduct knowledge sharing sessions to employees.
11. Conduct training courses.
12. Communicate effectively by visual, oral, and written form with individuals, small groups, and in front of large audiences.
13. Prepare work plan updates and status reports.

3.1.11 P.1. Change Management Consultant (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Evaluate the enterprise's business/Information and Communications Technology (ICT) architecture, determine its consistency and integration with the organization's business/ICT strategies, assess the degree of its alignment with Treasury Board CIO Business Transformation Enablement Program (BTEP) and Federated Architecture Program (FAP) and recommend changes to the business/ICT architecture to improve its alignment with these external factors.
2. Identify future business/ICT requirements against the current enterprise architecture, perform gaps analyses, develop Requirements for Technology Architectures (RTA), and prepare migration strategies.
3. Assess the feasibility of migrating from the current state to the target business architecture and enabling technologies and identify the risks associated with migrating to the target business architecture and technologies and make recommendations for risk mitigation.
4. Provide advice and guidance on implementing the CBSA IM/IT Strategic Plan and Implementation Roadmap that includes the multi-year transformation journey to realize the vision and describes the key phases of transformation and major initiatives on the journey path aligned with Program Branch priorities.

Additional Tasks could include but are not limited to:

5. Identify business and technology trends that create opportunities for business improvement, advise business and Senior Executives on trends and emerging technologies and the impact on the organization's and government Information and Communications Technology (ICT) architectures and business strategies, model "What if" scenarios and recommend appropriate changes to the existing architecture and infrastructure, and recommend alternative solutions, methodologies and strategies.
6. Produce an architectural evolution plan, recommend prioritization of architecture evolution initiatives, and develop and/or implement an architecture evolution plan.
7. Manage the development and implementation of an architectural improvement plan.
8. Coach, mentor and train the organization to perform any of the above.
9. Modernize and develop new agency systems and capabilities to meet current and future business needs via strong management practices including financial and human resources.

3.1.12 P.5 Project Executive (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Define and confirm the objectives for the project, determine budgetary requirements, the composition, roles and responsibilities and terms of reference for the project team.
2. Develop and/or review Project Charters, Business Cases, detailed project plans, Memorandums to Cabinet, and/or Treasury Board submissions.
3. Lead the development of briefings, solutions and status reports for presentation to executive management.
4. Develop and deliver presentations to senior management and stakeholder groups as required, including the preparation of plans, charts, tables and diagrams to assist in analyzing or displaying problems.

5. Provide leadership and oversight for the design activities, including usage of deliverables necessary to satisfy the methodology, including, but not limited to:

   - Strategic Business Objectives and Critical Success factors.
   - Definition of business competencies, capabilities, value drivers, outcomes and measures.
   - Definition of target business model, operating model, and target service model.
   - Definition and development of strategy and value components such as strategy maps, competency maps, value maps, value clusters, goal chains and value chain diagrams.
   - Identification and analysis of pain points, pain clusters and pain chains.

6. Provide advice to ensure business strategies are developed and implemented; project schedules are developed, maintained and respected; risks and issues are managed; and change request procedures are followed.
7. Manage scope, context and business requirements, working with departmental leads and key clients.

Additional Tasks could include but are not limited to:

8. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.
9. Oversee and provide guidance to several Project Managers, each responsible for an element of the project and its associated project team.
10. Provide Requirements Management and Project Control throughout the project.
11. Provide guidance and recommendations for the design, development, test and

3.1.13 P.9. Project Manager (Level 2)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Manage the project during the development, implementation and operations startup by ensuring that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters.
2. Prepare plans, charts, tables and diagrams to assist in analyzing or displaying problems; work with a variety of project management tools.
3. Maintain process improvement, communication and change management throughout the full lifecycle of the project delivery.

Additional Tasks could include but are not limited to:

4. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.
5. Define and document the objectives for the project.
6. Report progress of the project on an ongoing basis and at scheduled points in the life cycle.
7. Meets in conference with stakeholders and other project managers and states problems in a form capable of being solved.
8. Develop presentations and reports to communicate progress of projects within the assigned portfolio.

3.1.14 P.9. Project Manager (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Manage the project during the development, implementation and operations startup by ensuring that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters.
2. Prepare plans, charts, tables and diagrams to assist in analyzing or displaying problems; work with a variety of project management tools.
3. Maintain process improvement, communication and change management throughout the full lifecycle of the project delivery.
4. Manage risk and issue logs in support of project communications management.
5. Formulate statements of problems; establishes procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtains approval thereof.
6. Report progress of the project on an ongoing basis and at scheduled points in the life cycle.
7. Develop presentations and reports to communicate progress of projects within the assigned portfolio.

Additional Tasks could include but are not limited to:

8. Define and document the objectives for the project.
9. Meets in conference with stakeholders and other project managers and states problems in a form capable of being solved.

10. Coach, and mentor teams' members and users on best practices and provide knowledge transfer.

3.1.15 P.12 Risk Management Specialist (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and manage the implementation of Risk Management Plans to identify, analyze, plan, track, evaluate and control project risks on a continuous basis throughout the project life cycle.
2. Conduct risk assessments and evaluate potential risk and losses.
3. Identify project and procurement risks.
4. Recommend alternative solutions, methodologies and strategies for risk mitigation and management.
5. Assist in the development and/or implementation of Risk Management Plans.
6. Assist in prioritization and assignment of risks.
7. Identify, confirm and document the risk tolerance for the process, project, program, or strategic risk and using this tolerance to guide all analysis, assessment and recommendations undertaken or produced.
8. Identify relevant risks and opportunities (including, but not limited to, economic, political, operational, legal, reputation, technical, organizational, accounting, banking and social risks) that threaten the objectives and priorities.

Additional Tasks could include but are not limited to:

9. Coach, mentor and train project teams in risk mitigation techniques.
10. Develop and implement business continuity plans.
11. Provide leadership and support to the design, implementation and evaluation of clients products/services performance measures, risk management and risk mitigation strategies.
12. Liaise with and interview stakeholders, as required, to obtain, clarify and exchange information, in-order to co-ordinate and manage the Risk Assessment Process.
13. Assist with the on-going monitoring of risk and assist with the implementation of risk response and mitigation strategies.
14. Recommend and document suggested Risk Responses necessary to manage the likelihood and/or impact of the identified risks.
15. Prepare draft and finalized risk assessments, briefing notes, presentations and papers related to risk management, and develop and update risk management plans.

SW5 GOVERNMENT FURNISHED EQUIPMENT/INFORMATION

5.1 The CBSA Data Management team will provide an appropriate workspace with access to the appropriate tools for the resources to carry out the expectations set out in this SOW.

5.2 The Contractor will be provided with a CBSA user ID, password, workstation or laptop, email address, and other materials (supporting documentation) as required in order to process, store, and/or transmit CBSA data on the CBSA network during the contract. The use of contractor IT systems is not permitted.

SW6 ACCEPTANCE CRITERIA

All work and services are to be provided to the entire satisfaction and approval of the Project Authority.

SW7 DELIVERABLES

The Contractor will provide various reports, plans, analysis and other related documents as specified in the applicable Task Authorization.

SW8 CONSTRAINTS

At no time and in no way is CBSA data to be removed from CBSA sites, nor will access to or from the contractor's IT systems through the use of a session (e.g VPN) be permitted.

The contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

SW9 REPORTING REQUIREMENTS

Timesheets are to be provided on a monthly depicting hours worked on a daily basis.

SW10 WORK LOCATION

All work will be performed in the National Capital Region on-site at CBSA offices.

The current Primary Office location is 333 North River Rd Ottawa, Ontario.

Appendix A – Glossary

Acronym or Term	Definition
Architecture and Data Model	An abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities.
Business Cases	A presentation or a proposal to an authority by an organization seeking funding, approval, or both for an activity, initiative, or project. A business case puts a proposed investment decision into a strategic context and provides the information necessary to make an informed decision about whether to proceed with the investment and in what form.
Business Intelligence	The strategies and technologies used by enterprises for the data analysis of business information. BI technologies provide historical, current and predictive views of business operations.
Business Process Reengineering	A business management strategy focusing on the analysis and design of workflows and business processes within an organization.
Business Transformation Enablement Program	A set of tools which have been developed to provide an integrated approach for strategic management and alignment, and business transformation.
Cloud First	Adoption strategy in which cloud is the preferred option for delivering IT services and public cloud is the preferred option for cloud deployment.
Complex SQL	Is the use of SQL queries which go beyond the standard SQL of using the SELECT and WHERE commands. Complex SQL often involves using complex joins and sub-queries, where queries are nested in WHERE clauses. Complex queries frequently involve heavy use of AND and OR clauses.
Critical Success Factors	A management term for an element that is necessary for an organization or project to achieve its mission.
Data Analytics	The process of examining data sets in order to draw conclusions about the information they contain.
Data Policy	A set of measurable rules for a set of data elements, in the context of an organizational scope, for the benefit of a business process, irrespective of where the data is stored and the party that provides the data.
Data Base Management System	A software package designed to define, manipulate, retrieve and manage data in a database.
Enterprise Data Warehouse	An Enterprise Data Warehouse (EDW) is a collection of corporate information and data derived from operational systems and external data sources. An EDW is designed to support business decisions by allowing data consolidation, analysis and reporting at different aggregate levels
Federated Architecture Program	A pattern in enterprise architecture that allows interoperability and information sharing between semi-autonomous de-centrally organized lines of business (LOBs), information technology systems and applications.
GC Information Management Policies	Government of Canada's policy to achieve efficient and effective information management to support program and service delivery; foster informed decision making, facilitate accountability transparency and collaboration; and preserve and ensure access to information and records for the benefit of present and future generations.
Highly Scalable	is the capability to add more capacity when required to handle the increased workload

CBSA - Disclosed under the Access to Information Act
ASFC - Divulgation en vertu de la Loi sur l'Accès à l'information.

Information and Communications Technology	A term for information technology (IT) which stresses the role of unified communications[1] and the integration of telecommunications (telephone lines and wireless signals), computers as well as necessary enterprise software, middleware, storage, and audio-visual systems, which enable users to access, store, transmit, and manipulate information.
Logical Data Model	Is the description of the data in as much detail as possible, without regard to how they will be physical implemented in the database.
Memorandum to Cabinet	A minister's vehicle for proposing and explaining a proposed measure to the Cabinet and for obtaining its approval.
Project Charters	A statement of the scope, objectives, and participants in a project. It provides a preliminary delineation of roles and responsibilities, outlines the project objectives, identifies the main stakeholders, and defines the authority of the project manager.
Project Controls	The data gathering, data management and analytical processes used to predict, understand and constructively influence the time and cost outcomes of a project or program; through the communication of information in formats that assist effective management and decision making.
Requirements Management	The process of documenting, analyzing, tracing, prioritizing and agreeing on requirements and then controlling change and communicating to relevant stakeholders.
Risk Assessment Process	The process of assessing risks and their inherent risk associated with a particular project scope and its expected benefits.
Risk Management Plans	The document which is prepared to foresee risks, estimate impacts, and define responses.
Risk Responses	The process of documenting for each risk, a risk response in the risk register. Aiming to eliminating the risk, lowing the probability of risk occurrence and lowering the impact of the risk on the project objectives.
Strategic Business Objectives	Goals deemed most important to the current and future health of an organization.
Technology Architecture	The process of development of methodical information technology specifications, models and guidelines, using a variety of Information Technology notations, for example UML, within a coherent Information Technology architecture framework, following formal and informal Information Technology solution, enterprise, and infrastructure architecture processes.
World Customs Organization	The World Customs Organization (WCO), established in 1952 as the Customs Co-operation Council (CCC) is an independent intergovernmental body whose mission is to enhance the effectiveness and efficiency of Customs administrations. http://www.wcoomd.org/

[illegible] the Access to Information Act
AIPRP - Divulgation en vertu de la loi sur l'Accès à l'information.

APPENDIX A TO ANNEX A
TASKING ASSESSMENT PROCEDURE

1. Where a requirement for a specific task is identified, a draft Task Authorization Form (TA Form) as attached at Appendix B to Annex A will be provided to the Contractor in accordance with the allocation methodology stated in the Contract Article titled "Allocation of Task Authorizations". Once a draft TA Form is received, the Contractor must submit to the Technical Authority a quotation of rates to supply the requested Resource Categories based on the information identified in the TA Form. The quotation must be signed and submitted to Canada within the time for response identified in the TA Form. The Contractor will be given a minimum of 48 hours turnaround time to submit a quotation.

2. With each quotation the Contractor must propose the required number of resources and for each proposed resource the Contractor must supply a résumé, the requested security clearance information and must complete the Response Tables at Appendix C of Annex A applicable to the Resource Categories identified in the draft TA. The same individual must not be proposed for more than one Resource Category. The résumés must demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to the proposed resources:

   (i) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (Refer to Appendix D to Annex A, Certifications).

   (ii) For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource before the date the draft TA was first issued to the Contractor.

   (iii) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of draft TA issuance and must continue, where applicable, to be a member in good standing of the profession or membership throughout the assessment period and Contract Period. Where the designation or membership must be demonstrated through a certification, diploma or degree, such document must be current, valid and issued by the entity specified in this Contract or if the entity is not specified, the issuer must have been an accredited or otherwise recognized body, institution or entity at the time the document was issued.

   (iv) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

   (v) For any requirements that specify a particular time period (e.g., 2 years) of work experience, Canada will disregard any information about experience if the résumé does not include the relevant dates (month and year) for the experience claimed (i.e., the start date and end date). Canada will evaluate only the duration that the resource actually worked on a project or projects (from his or her start date to end date), instead of the overall start and end date of a project or a combination of projects in which a resource has participated.

   (vi) A résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and

TASK AUTHORIZATION FORM

(SEE DOCUMENT ATTACHED)

APPENDIX C TO ANNEX A

RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Annex. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

(SEE DOCUMENT ATTACHED)

ATIA - Released under the Access to Information Act
AIPRP - Divulgué en vertu de la Loi sur l'accès à l'information.

APPENDIX D TO ANNEX A

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the Contractor's quotation when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all the information provided in the résumés and supporting material proposed for completing the subject work, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Contractor to be true and accurate. Furthermore, the Contractor warrants that every individual proposed by the Contractor for the requirement is capable of performing the Work described in the Task Authorization.

_______________________________________ _______________________

Print name of authorized individual & sign above Date

2. CERTIFICATION OF AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under this Task Authorization, the persons proposed in the quotation will be available to commence performance of the work within a reasonable time from the date of issuance of the valid Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

_______________________________________ _______________________

Print name of authorized individual & sign above Date

3. CERTIFICATION OF STATUS OF PERSONNEL

If the Contractor has proposed any individual who is not an employee of the Contractor, the Contractor certifies that it has permission from that individual to propose his/her services in relation to the Work to be performed under this TA and to submit his/her résumé to Canada. At any time during the Contract Period the Contractor must, upon request from the Contracting Authority, provide the written confirmation, signed by the individual, of the permission that was given to the Contractor of his/her availability. Failure to comply with the request may result in a default under the Contract in accordance with the General Conditions.

_______________________________________ _______________________

Print name of authorized individual & sign above Date

4. CERTIFICATION OF LANGUAGE - English

The Contractor certifies that the proposed resource(s) in response to this draft Task Authorization is/are fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

____________________________________ __________________

Print name of authorized individual & sign above Date

5. NON-DISCLOSURE AGREEMENT

I, ____________________ (name of proposed resource), recognize that in the course of my work as an employee or subcontractor of ________________ (name of contractor), I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. _____________ between Her Majesty the Queen in right of Canada, represented by the Minister of Public Works and Government Services and Canada Border Services Agency, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: _______________.

12. a) Is the description of the work contained within this SRCL PROTECTED and/or CLASSIFIED?
La description du travail visé par la présente LVERS est-elle de nature PROTÉGÉE et/ou CLASSIFIÉE?

☑ No / Non ☐ Yes / Oui

If Yes, classify this form by annotating the top and bottom in the area entitled "Security Classification".
Dans l'affirmative, classifier le présent formulaire en indiquant le niveau de sécurité dans la case intitulée « Classification de sécurité » au haut et au bas du formulaire.

12. b) Will the documentation attached to this SRCL be PROTECTED and/or CLASSIFIED?
La documentation associée à la présente LVERS sera-t-elle PROTÉGÉE et/ou CLASSIFIÉE?

☑ No / Non ☐ Yes / Oui

If Yes, classify this form by annotating the top and bottom in the area entitled "Security Classification" and indicate with attachments (e.g. SECRET with Attachments).
Dans l'affirmative, classifier le présent formulaire en indiquant le niveau de sécurité dans la case intitulée « Classification de sécurité » au haut et au bas du formulaire et indiquer qu'il y a des pièces jointes (p. ex. SECRET avec des pièces jointes).

List of Annexes to the Resulting Contract:
Annex A Statement of Work
Annex B Basis of Payment
Annex C Security Requirements Check List

1. Requirement

(a) TEKsystems Canada Corporation (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client**: Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

2. Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

(b) **Assessment of Resources Proposed at TA Stage**: Processes for issuing, responding to and assessing Task Authorizations are further detailed in Appendices A, B, C and D of Annex A.

(c) **Form and Content of draft Task Authorization**:

(i) The Technical Authority will provide the Contractor with a description of the task in a draft Task Authorization using the form specified in Appendix B to Annex A.

(ii) The draft Task Authorization will contain the details of the activities to be performed, and must also contain the following information:

(A) the contract number;

(B) the task number;

(C) the date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);

(D) the categories of resources and the number required;

(E) a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'Accès à l'information.

(F) the start and completion dates;

(G) any option(s) to extend initial end date (if applicable);

(H) milestone dates for deliverables and payments (if applicable);

(I) the number of person-days of effort required;

(J) whether the work requires on-site activities and the location;

(K) the language profile of the resources required;

(L) the level of security clearance required of resources;

(M) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

(N) any other constraints that might affect the completion of the task.

(d) **Contractor's Response to Draft Task Authorization**: The Contractor must provide to the Technical Authority, within two working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), a quotation with the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract, as well as its corresponding proposed resource(s) in accordance with Appendix C to Annex A of the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

(e) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to $300,000.00 (excluding Applicable Taxes), the TA must be signed by the Technical Authority and the Contractor; and

(ii) for any TA with a value greater than this amount, a TA must be signed by the Technical Authority, the Contracting Authority and the Contractor.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

(f) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under Task Authorizations validly issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below. If some data is not available, the reason must be indicated.

If services are not provided during a given period, the Contractor must still provide a "**NIL**" report. The data must be submitted on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

- (A) 1st quarter: April 1 to June 30;
- (B) 2nd quarter: July 1 to September 30;
- (C) 3rd quarter: October 1 to December 31; and
- (D) 4th quarter: January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended):

- (A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;
- (B) a title or a brief description of each authorized task;
- (C) the name, Resource category and level of each resource involved in performing the TA, as applicable;
- (D) the total estimated cost specified in the validly issued TA of each task, exclusive of Applicable Taxes;
- (E) the total amount, exclusive of Applicable Taxes, expended to date against each authorized task;
- (F) the start and completion date for each authorized task; and
- (G) the active status of each authorized task, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TA's (as amended):

- (A) the amount, exclusive of Applicable Taxes, specified in the Contract (as last amended, as applicable) as Canada's total liability to the Contractor for all validly issued TA's; and
- (B) the total amount, exclusive of Applicable Taxes, expended to date against all validly issued TA's.

(g) **Consolidation of TA's for Administrative Purposes**: The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TA's for administrative purposes.

3. Minimum Work Guarantee

(a) In this clause,

- (i) "**Maximum Contract Value**" means the amount specified in the "**Limitation of Expenditure**" clause set out in the Contract; and
- (ii) "**Minimum Contract Value**" means $20,000.00 (excluding Applicable Taxes).

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

  (i) for default;

  (ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or

  (iii) for convenience within ten business days of Contract award.

4. Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

(a) **General Conditions**:

  (i) 2035 (2018-06-21), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

  With respect to Section 30 - Termination for Convenience, of General Conditions 2035, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

  4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

  5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:

    (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Work Guarantee, or due to the Contractor as of the date of termination, or

    (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

  6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions**:

  The following Supplemental General Conditions:

(i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

(ii) 4008 (2008-12-12), Supplemental General Conditions - Personal Information;

apply to and form part of the Contract.

5. Security Requirement

The following security requirements (SRCL Common #19 and related clauses provided by the Contract Security Program) as set out under Annex "B" to the Supply Arrangement, applies to and forms part of the Contract.

1. The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of Secret, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC)

2. The Contractor personnel requiring access to protected/classified information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **Reliability Status, Confidential** or **Secret** as required, granted or approved by CISD/PWGSC

3. The Contractor must not remove any protected/classified information from the identified work site(s), and the Contractor must ensure that its personnel are made aware of and comply with this restriction

4. Subcontracts which contain security requirements are not to be awarded without the prior written permission of CISD/PWGSC

5. The Contractor must comply with the provisions of the:

    1. Security Requirements Check List and security guide (if applicable), attached at Annex C
    2. Industrial Security Manual (Latest Edition)

(a) Additionally, resources may be assessed for Reliability Status or Secret by the Technical Authority prior to commencing the Work, and from time to time throughout the Contract Period. The assessment may include a credit check. Upon request of the Technical Authority, in respect of any given resource, the Contractor must submit:

(i) the current level of security clearance granted or approved by CISD/PWGSC; and

(ii) a completed signed TBS 330-23 Form - Personnel Screening, Consent and Authorization Form (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf).

(b) In the event a resource does not pass the Technical Authority's assessment, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions.

6. Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "**Initial Contract Period**", which begins on August 4, 2020 and ends three years later on August 3, 2023; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to two additional one-year period(s) under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

7. Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Silvana Mansour
Title: Supply Team Leader
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Professional Services Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec
Telephone: (613) 858-9935
E-mail address: Silvana.b.mansour@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Antonio Utano
Title: Executive Director
Organization: Information, Science and Technology Branch (ISTB)
Address: 333 North River Road, Tower B
Telephone: 343-291-5129
E-mail address: Antonio.utano@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

In his absence, the Technical Authority for the Contract is:

Name: Cameron MacDonald
Title: Director General
Organization: Information, Science and Technology Branch (ISTB)
Address: 333 North River Road, Tower B

Telephone: 343-291-6018 / 613-899-7421
E-mail address: Cameron.macdonald@cbsa-asfc.gc.ca

(c) **Contractor's Representative**

Name:
Title: Account Manager
Address: 123 Slater Street, Suite 1000
Ottawa. ON K1P 5H2
Telephone:
Facsimile:
E-mail address:

8. Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

9. Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex B, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

(ii) **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex B), Applicable Taxes extra.

(iii) **Travel and Living Expenses – National Joint Council Travel Directive**: The Contractor will be reimbursed its authorized travel and living expenses reasonably and properly incurred in the performance of the Work, at cost, without any allowance for profit and/or administrative overhead, in accordance with the meal and private vehicle expenses provided in Appendices B, C and D of the *National Joint Council Travel Directive* and with the other provisions of the directive referring to "travellers", rather than those referring to "employees". All travel must have the prior authorization of the Technical Authority. Travel requests will only be considered for a work location which is located more than 100 kilometers from the National Capital Region. The Contractor will be paid for actual time spent travelling in accordance with the firm per diem rate set out in Annex B which per diem is based on a 7.5-hour workday. All payments are subject to government audit.

(iv) **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

(v) **Contractor's Firm Per Diem Rates**: The Contractor agrees that the rates set out in Annex B remain firm throughout the Contract Period, except as may be provided for in the express terms of the contract. In reference to Article 18 (1) of SACC General Conditions 2035, the Contractor acknowledges that its obligation to provide services in accordance with the firm rates set out in Annex B is unaffected by the application of any existing law or any new law which may come into effect during the Contract Period.

(vi) **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract within the time described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole or in part or chooses to exercise any of the rights provided to it under the general conditions, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Corrective Measure Policy (or equivalent) then in effect, which measures may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

(b) **Limitation of Expenditure – Cumulative Total of all Task Authorizations**

(i) Canada's total liability to the Contractor under the Contract for all validly issued Task Authorizations (TAs), inclusive of any revisions, must not exceed the amount set out on page 1 of the Contract, less any Applicable taxes. With respect to the amount set out on page 1 of the Contract, Customs duties are excluded and Applicable Taxes are included

(ii) No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

(iii) The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

(A) when it is 75 percent committed, or

(B) 4 months before the contract expiry date, or

(C) As soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

(i) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) **Method of Payment for Task Authorizations with a Maximum Price**: For each Task Authorization validly issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) **Method of Payment for Task Authorizations with a Firm Price - Lump Sum Payment on Completion**: Canada will pay the Contractor upon completion and delivery of all the Work associated with the validly issued Task Authorization in accordance with the payment provisions of the Contract if:

(i) an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

(ii) all such documents have been verified by Canada; and

(iii) the Work delivered has been accepted by Canada.

(e) **Electronic Payment of Invoices – Contract**

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

(i) Direct Deposit (Domestic and International);

(f) **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

(g) **Payment Credits**

(i) **Failure to Provide Resource**:

(A) If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of 10 days.

(B) **Corrective Measures**: If credits are payable under this Article for two consecutive months or for three months in any 12-month period, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and 20 working days to rectify the underlying problem.

(C) **Termination for Failure to Meet Availability Level**: In addition to any other rights it has under the Contract, Canada may terminate the Contract for default in accordance with the General Conditions by giving the Contractor three months' written notice of its intent, if any of the following apply:

(1) the total amount of credits for a given monthly billing cycle reach a level of 10% of the total billing for that month; or

(2) the corrective measures required of the Contractor described above are not met.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

(ii) **Credits Apply during Entire Contract Period**: The Parties agree that the credits apply throughout the Contract Period.

(iii) **Credits represent Liquidated Damages**: The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

(iv) **Canada's Right to Obtain Payment**: The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

(v) **Canada's Rights & Remedies not Limited**: The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

(vi) **Audit Rights**: The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

(h) **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises

10. Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

(c) By submitting invoices, the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

(d) The Contractor must provide the original of each invoice to the Technical Authority, and a copy to the Contracting Authority.

11. Certifications and Additional Information

(a) Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, any TA quotation and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire Contract Period.

12. Federal Contractors Program for Employment Equity - Default by Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the [illegible]

(h) the Contractor's bid dated May 8, 2020.

15. Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

16. Insurance Requirements

(a) **Compliance with Insurance Requirements**

- (i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.
- (ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.
- (iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) **Commercial General Liability Insurance**

- (i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.
- (ii) The Commercial General Liability policy must include the following:
  - (A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.
  - (B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.
  - (C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.
  - (D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

(J) Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(K) If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(L) Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

17. Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

18. Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

19. Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

20. Reporting Requirements

The Contractor must provide the following reports to the Contracting Authority at the following times:

- Quarterly Task Authorization Usage Report

In addition, the Contractor must provide the following reports to the Technical Authority:

- Defects, change requests and outstanding items tracking status reports;
- Monthly project progress reports;
- Guides, manuals, reports to be disseminated to various stakeholders as required;
- Synthesis report of facilitated meetings;
- Activity reports; and

[illegible] - Released under the Access to Information Act
[illegible] - Divulgué en vertu de la Loi sur l'Accès à l'information.

- Conversation notes, design documentation, change management documentation, site inspection reports and other reports requested under the Task Authorization.

21. Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

22. Implementation

(a) **Implementation of Professional Services**: If similar professional services are currently being provided by another supplier or by Canada's own personnel, the Contractor is responsible for ensuring that the transition to the professional services it provides under the Contract is completed in a way that does not disrupt Canada's operations or users, and does not result in any interim degradation to the timeliness or quality of service. The Contractor is solely responsible for any additional training required by its resources to perform the Work, and time spent by resources on that training or becoming familiar with the Client's environment must not be charged to Canada. The transition will be considered complete once the Contractor has demonstrated, to the satisfaction of the Technical Authority, that it is ready and able to carry out the Work. All costs associated with establishing itself to provide the professional services are the responsibility of the Contractor.

23. Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

24. Use of individual protective equipment and Occupational Health and Safety (OHS) guidelines

a. The Contractor must comply with Government of Canada onsite requirements in respect of individual Protective Pieces of Equipment (PPE) and adhere to Occupational Health and Safety (OHS) guidelines in force in the workplace.

b. The Contractor will provide its resources the following individual PPE for working on site: prescribed face covering mask, gloves, and anything else that is required as a pre-requisite to entry and to work on Government of Canada premises. Canada reserves the right to modify the list of PPE and OHS guidelines, if required, to include any future recommendations proposed by the Public Health Agencies.

c. The Contractor warrants that its resources will wear the PPE mentioned above when onsite and follow at all times the Occupational Health and Safety (OHS) guidelines in force in the workplace during the contract period. If resources are not wearing the prescribed PPE and/or are not following the Occupational Health and Safety (OHS) guidelines in force in the workplace, they will not be permitted access to government of Canada sites.

25. Dispute Resolution

25.1 The parties agree to maintain open and honest communication about the Work throughout and after the performance of the contract.

25.2 The parties agree to consult and co-operate with each other in the furtherance of the contract and promptly notify the other party or parties and attempt to resolve problems or differences that may arise.

25.3 If the parties cannot resolve a dispute through consultation and cooperation, the parties agree to consult a neutral third party offering alternative dispute resolution services to attempt to address the dispute.

25.4 Options of alternative dispute resolution services can be found on Canada's Buy and Sell website under the heading "Dispute Resolution".

ANNEX A

STATEMENT OF WORK

1.0 Title

Informatics Professional Services for Canada Border Services Agency
Protected B Cloud Engineering - National Capital Region (NCR)

2.0 Objective

The Information, Science and Technology Branch (ISTB) of the Canada Border Services Agency (CBSA) requires the services of senior Informatics Professional resources with knowledge and experience supporting and assisting with Protected B compliant Cloud Engineering, Architecture, Deployment, Security and System Administration, in accordance with the Government of Canada Security Control Profile for Cloud-based GC Services (https://www.canada.ca/en/government/system/digital-government/modern-emerging-technologies/cloud-services/government-canada-security-control-profile-cloud-based-it-services.html#toc4).

The purpose of these services is to augment and advise departmental resources in the execution of departmental IM/IT cloud initiatives managed by the Information, Science and Technology Branch (ISTB) team.

3.0 Background

CBSA is responsible for providing integrated services supporting national security and public safety priorities while facilitating the free flow of people and goods. Information technology is key to meeting the Agency's obligation to administer over 90 acts, regulations and international agreements, as well as deliver on the CBSA's commitments to modernization and renewal within its CBSA Renewal Agenda.

ISTB provides delivery of technology products, applications and services to meet business needs while investing in modern IT infrastructure to maintain, build on and innovate current and future IM/IT Agency initiatives.

One initiative led by the Information Services and Technology Branch (ISTB) under the Renewal umbrella includes reducing outages and disruptions, streamlining the number of applications and systems we use, replacing or upgrading aging equipment, and reducing maintenance and costs. Another significant aspect of CBSA Renewal includes building innovation capacity. In partnership with the Chief Transformation Officer Branch and business line branches, the ISTB will play a major role in executing rapid innovation in Border technology.

The Agency has over 180 national applications primarily hosted on SSC-managed IT infrastructure. An important quantity of those applications use dated technology, including mainframe and specialized COTS, and are affected by SSC's Workload Migration initiative to consolidate and modernize their Data Centers.

As part of an initiative entitled Application Modernization, to reduce dependencies on SSC-managed IT infrastructure in addition to renewing or refreshing its critical national applications, ISTB is currently working on a phased approach to leverage innovative technologies and initiate the migration of its applications to a modern hosting environment based in the cloud. Due to the quantities of personal and other sensitive data collected and used by CBSA to achieve its mandate, security and protection are an important concern.

In the Summer of 2019, CBSA approved its Cloud Strategy under the Application Modernization initiative (see Figure 1). Phase 0 of this Strategy is currently underway and involves the establishment of a cloud 'landing zone', planning for subsequent phases and a pilot of a non-production migration activity. This is expected to be completed by March 2020. Phase 1 will build on the work of Phase 0, ensure the completion, integrity and security of the infrastructure, establish toolsets, processes and procedures and conduct the work to architect and migrate applications and data to the production Protected B compliant cloud.

A target of twenty-five percent of CBSA's existing national applications must be migrated to the cloud by the end of March 2022. Modernizing CBSA applications and moving them to the cloud will deliver numerous benefits to the Agency and for the security of the country, including:

- Reducing the risk and lower the cost/level of effort of migrating CBSA's systems to Enterprise Data Centres as part of SSC's Workload Migration project
- Modernizing legacy applications will allow the Agency to reduce its risk of exposure to unsupported technology for which finding expertise is extremely challenging (reduces technical debt)
- Attracting talent to the Agency and enabling our workforce to work smarter
- Optimizing our processes and tools

4.0 Scope of the Work

The Contractor must provide informatics professional services on an as and when required basis in the National Capital Region (NCR) as initiated through Task Authorizations. Projects may be in any of the following stages: inception, identification, in the midst of work, or delivery.

The Contractor is required to assist CBSA in deploying and maintaining a comprehensive application development and hosting environment in the Public Cloud meeting Protected B security requirements as per Treasury Board Guidelines available at https://www.canada.ca/en/government/system/digital-government/modern-emerging-technologies/cloud-services/government-canada-security-control-profile-cloud-based-it-services.html.

The Contractor will facilitate and perform the following cloud-based activities:

- install and configure virtual private clouds, virtual networks, firewalls, application gateways, load balancers, security groups and other network infrastructure as required;
- deploy and operate compute, storage, and other computing infrastructure;
- establish toolsets and processes supporting cloud development and operations;
- prepare and maintain platform and software-based services to allow the development, testing and migration of applications in the departmental cloud environment;
- analyze, classify, architect (or re-architect) and integrate the solutions and services required;
- ensure the security of the infrastructure, platform(s), services, applications and data;
- ensure the security and integrity of identity and authorization credentials;
- facilitate the selection, preparation and migration of legacy applications and data (as required) to the cloud environment; and
- support the transition of cloud applications into an operational state and provide guidance and mentoring to CBSA staff within their areas of expertise.

5.0 Resource-Specific Tasks

Tasks will include, but are not limited to the following:

5.0.1 I.6. Network Analyst

- Prepare implementation plans for cloud technologies;
- Document cloud network configurations and settings;
- Prepare and analyze the detailed network system requirements including identification and sizing of resources, technical dependencies, support software/tools, interfaces, peak and normal performance metrics, redundancy, etc.;
- Contribute to the development of network architectures models; layer-2, layer-3 and layer-4;
- Install and configure ***Next Generation* firewalls*** in the provisioned cloud execution environments;
- Create networking/routing configuration and intrusion detection/prevention;
- Establish the protected B compliant networking foundation for a successful production workload migration to the cloud with connectivity to on-premises data centres;
- Utilize network monitoring tools; firewall, anti-malware and packet analyzers to support a secure Agency posture in the cloud, in accordance with Treasury Board's guidelines;
- Implement and support virtual environments;
- Troubleshoot network problem determination and resolution;
- Assist in interactive security debugging, testing and analysis of security attacks and system failures;
- Facilitate and guide the Agency in the planning, design and deployment of networking infrastructure, perimeter security and other services required to migrate, test and activate applications in the cloud;
- Employ Infrastructure as Code approaches to automate and deploy the provisioning and management of infrastructure resources;
- Monitor and stabilize particular facets of cloud platforms technology;
- Configure and optimize technical cloud platforms installations;
- Troubleshoot and respond to user problems;
- Perform impact analysis on cloud technology changes;
- Prepare and conduct testing strategies, scripts and prepare reports;
- Enforce and monitor security; and
- Develop scripts and templates to reflect current network configuration and topology to allow for the automated redeployment and repair of network infrastructure.

5.0.2 I.7 Platform Analyst

- Identify cloud adoption approaches;
- Develop and document detailed assessments and configurations for identity management platforms that function compatibly both with the cloud service provider platform and CBSA's on-premises technologies, including mainframe and active directory;
- Analyze functional requirements to identify procedures and decision flows when it comes to identity management and federation in the cloud;
- Prepare and analyze the detailed application system requirements including identification and sizing of resources, virtualization, technical dependencies, interfaces, loads, peak and normal performance metrics, software, storage, redundancy etc.;
- Implement the latest security and identity management standards supporting a secure cloud implementation;
- Conduct design and application development work as required;
- Deploy biometric security models and multi-factor authentication and secure enclave processing;
- Develop security and identity management systems and methods for:
    - generating passwords using key inputs and contextual inputs;

    - authenticating a security device;
    - establishing trusted communication using a security device
- Define input/output sources, including detailed plan for technical design phase, and obtain approval for system proposals;
- Design cloud data structures and files, sub-systems and modules, programs, workloads, server-less apps, batch, on line, and production monitoring procedures;
- Develop testing strategies, scripts and testing reports;
- Document cloud system design, concepts and facilities, present and obtain approval of detailed system designs;
- Produce operational cloud identity management applications and documentation including all forms, manuals, programs, data files and procedures;
- Develop and prepare development environments including CI/CD pipelines;
- Perform solution integration activities supporting multi-cloud and hybrid solutions;
- Prepare and test implementation plans for cloud technologies, workloads and services;
- Install, monitor and stabilize particular facets of cloud platforms technology;
- Configure and optimize technical cloud platforms installations;
- Work with the System Administrator to develop and test automated rebuild procedures; and
- Identify typical ongoing operational support requirements following migration – day-to-day operations processes, integration and migration of additional workloads, data, maintenance, security procedures, compliance monitoring, inventory auditing, change management, account auditing and review, automated resource discovery, and system hardening etc.

5.0.3 I.9 System Administrator

- Prepare and analyze detailed computing infrastructure system requirements including identification and sizing of resources, virtualization, technical dependencies, interfaces, loads, peak and normal performance metrics, software, storage, redundancy, system logs, security etc.;
- Install, monitor and stabilize particular facets of cloud platforms technology;
- Configure and optimize technical cloud platforms installations;
- Perform general administration duties including permissions, upgrades, and patches on provisioned cloud systems;
- Work with the Platform Analyst to develop and test automated rebuild procedures;
- Test and implement backup and restore services and procedures;
- Test and implement failover services for high availability workloads;
- Perform system monitoring, analysis, and performance tuning in the cloud;
- Guide and support various teams with onboarding, troubleshooting and resolution of implementation issues;
- Collaborate as necessary, research and resolve security issues and system failures;
- Script and automate administrative tasks, resources and services in the cloud or hybrid service environments;
- Define and implement policies for cloud-based systems;
- Identify opportunities to reduce costs of cloud provisioned resources and services;
- Collaborate with Cloud Architects and others, providing feedback and implementing their conceptual, logical or physical designs or architectures;
- Mentor support and technical staff on the provisioning, administration and maintenance plans for both production and other cloud environments;
- Develop and execute quality assurance, performance, recoverability and failover tests on newly provisioned cloud environments and report the results;
- Design the structure of build books that are to contain a detailed and current configuration of

the environment, history of changes, operations schedule, rebuild and resource provisioning procedures;

- Maintain build books to ensure they reflect the current and complete configuration of the environment;
- Create and maintain play books containing scripts and templates to automate recovery, updates, rollbacks, etc.;
- Periodically perform spot-checks to validate that provisioned resources align with build books;
- Coordinate system service schedule with other lines of support and produce schedule for software, firmware updates, upgrades and or replacement of virtual hosting instances in the cloud;
- Enforce and monitor security;
- Maintain and administer service desk problem ticketing system;
- Monitor Cloud environment security posture;
- Monitor environment and application performance, generate metrics, and create dashboards;
- Prepare environment cost models and reports;
- Conduct compliance monitoring, inventory auditing, change management, account auditing and review, automated resource discovery, system hardening;
- Administer Operating System (OS) and application patching procedures; and
- Identify typical ongoing operational support requirements– day-to-day operations and troubleshooting processes, provisioning, maintenance, and security procedures, etc.

5.0.4 I.10 Technical Architect (Cloud Security)

- Capture and analyze Business Security Requirements;
- Define Technical and Functional requirements;
- Develop technical security architectures, frameworks and strategies to meet the business and application requirements;
- Identify security policies and requirements that drive out a particular solution;
- Analyze and evaluate alternative technology solutions to meet business problems and reduce risk with a particular focus on cloud technologies;
- Evaluate hardware and software relative to their ability to support specified requirements;
- Review computer software systems, security controls and data requirements;
- Conduct security architecture and design reviews and provide advice;
- Participate in security code reviews and penetration testing;
- Prepare Threat & Risk Assessments and other certifications and/or assessments as required; and
- Prepare and review other security documentation as required.

5.0.5 I.11 Technology Architect

- Conduct inventory of current CBSA environment, including workloads, services, data, network and infrastructure deployed;
- Conduct cloud assessments and analysis of workloads and services to determine which workloads are good candidates for migration;
- Map source environment resources/services to target cloud resource/service;
- Define and design appropriate to-be application, platforms, and hosting architectures in public clouds with connectivity to on-premises data centres;
- Conduct sizing activities;

- Design cloud architecture that meets key non-functional requirements (security, compliance, performance, resiliency, and availability);
- Oversee the migration of workloads and capabilities (e.g. Disaster recovery, archiving and backup) to cloud;
- Leverage cloud specific services (e.g. Web Application PaaS, Resource Manager, etc.) to implement desired cloud operating models and enable DevOps capabilities;
- Develop and document the proposed short and medium term cloud strategy for the selective migration to cloud services or alternative IT service delivery platforms;
- Ensure the integration of all aspects of cloud technology solutions;
- Provide support to applications and technical support teams in the proper application of existing infrastructure;
- Identify key issues that can be addressed and benefits that could be achieved with a selective migration to cloud services or alternative IT service delivery platforms;
- Design, document, and automate security and vulnerability incident response procedures;
- Design, document, and automate vulnerability assessment procedures; and
- Design, document, and automate OS and application patching and update procedures.

5.0.6 B.2 Business Architect

- Develop policies and rules that allow CBSA to carry out its mandate and functional responsibilities, and that govern its actual and planned capabilities in terms of computers, data, information, human resources, communication facilities, software and management responsibilities relative to Cloud computing;
- Develop the specifications for where, how and why the various organizational components fit together as they do, and how they support the CBSA's mandate;
- Lead day-to-day activities of transformation initiatives;
- Assess transformation initiative impacts on job roles and organization structures; and
- Make recommendations as to the best use of public funds

5.0.7 A.1 Application/Software Architect (Cloud Solutions)

- Create the conceptual, logical and physical designs for application architectures and their interoperability when hosted in a public cloud environment;
- Research, analyze, recommend and select technical approaches to address challenging development and integration problems with application architectures hosted within the public cloud environment;
- Develop implementation plans for the deployment of application architectures within the public cloud environment;
- Develop deployment strategies for architectures in the cloud that include secure remote access such as VPN gateways (client to gateway, gateway to gateway);
- Develop deployment strategies for cloud application architectures that include load balancing to ensure scalable performance;
- Develop deployment strategies for cloud architectures that include private networks for the storage and processing of more sensitive data;
- Develop deployment strategies for architectures of re-usable environments designed to test new data operations without affecting production usage;
- Provide guidance on how to limit the cost to the organization of cloud operations (scalability, filtering data before transmit etc.);
- Incorporate serverless design in application architectures;

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

- Design High Availability (accessible most of the time 99% 7/24 365 days per year) elastic cloud services and applications using infrastructure as code;
- Design database-as-a-service solutions;
- Design scaling sets of virtual machines to keep costs low while still providing acceptable response times during peak usage;
- Design cloud-based authentication solutions allowing for single sign-on (SSO) among applications; and
- Design cloud-based authentication solutions that implement multi-factor authentication.

5.0.8 A.7 Programmer/Analyst

- Create the conceptual, logical and physical designs for applications and their interoperability when hosted in a public cloud environment;
- Research, analyze, recommend and select technical approaches to address challenging development and integration problems with application architectures hosted within the public cloud environment;
- Provide guidance on how to limit the cost to the organization of cloud operations (scalability, filtering data before transmit etc.);
- Incorporate serverless design in application architectures;
- Design, develop and deploy highly available, elastic cloud services and applications using infrastructure as code;
- Design, develop and deploy database-as-a-service solutions;
- Review and analyze traffic flows and design and implement scaling parameters of infrastructure resources to keep costs low while still providing acceptable response times during peak usage;
- Design, develop and deploy cloud-based solutions that implement multi-factor authentication; and
- Develop testing scenarios, scripts and participate in testing, as required, to ensure quality, performance and security.

5.0.9 I.1 Data Conversion Specialist (Cloud Data Scientist)

- Research, analyze, recommend and select advanced technical and scientific data approaches to address challenging business issues;
- Collaborate on the development of implementation plans for the migration and deployment of appropriate solutions for accessing legacy data in the public cloud environment;
- Collaborate on the development of deployment strategies for architectures of re-usable environments designed to test new data operations without affecting production usage;
- Perform data cleansing, exploratory data analysis, trend analysis, develop predictive models and test their algorithms, conduct rapid prototyping and present creative ideas to exploit data to drive deeper insights and business value;
- Identify areas for improvement and optimization with the goal of increasing value, developing knowledge and insight into and derived from Big Data used by the organization;
- Translate departmental issues and business needs into reporting and/or application requirements in order to develop and design solutions;
- Analyze large structured and unstructured datasets involving a wide range of systems across multiple disparate data sets;
- Develop data analytic / visualization plans to support high-quality, fact-based business decisions;
- Develop models that can be used in analytic pipelines to make predictions for use in risk assessment;

- Complete mapping, interfaces, mock conversion work, enhancements, actual conversion, and verify completeness and accuracy of converted data;
- Establish a strong working relationship with all clients, interact effectively with all levels of client personnel, and provide conversion support;
- Analyze and coordinate data file conversions; and
- Work to import files from heterogeneous platforms.

5.0.10 I.1 Data Conversion Specialist (Cloud Data Migration)

- Research, analyze, recommend and select technical approaches to address challenging application data issues for applications in the public cloud environment;
- Provide guidance on how to limit the cost to the organization of cloud operations (scalability, filtering data before transmit etc.);
- Collaborate on the development of implementation plans for appropriate solutions to the transformation and migration of or access to legacy data in the public cloud environment;
- Collaborate on the development of deployment strategies for cloud application architectures that include storage solutions and load balancing to ensure scalable performance;
- Develop innovative solutions to complex business and technology problems;
- Plan, develop and execute data migration strategies;
- Help design and implement cloud architectures and configurations;
- Collaborate with other architects to design and build solutions to migrate existing applications and their databases from an in-premise Data Center to a secure cloud environment;
- Analyze current Mainframe and UNIX/LINUX databases and their environments (DB2 and Sybase), evaluate and plan migrations to a cloud-based database platform and/or design hybrid distributed database solutions for reliability and cost containment;
- Work with large scale databases (250+ GB);
- Work with data migration tools and develop and enhance PL/SQL scripts to migrate from source database to target database;
- Identity workarounds for specific issues, discrepancies and other scenarios observed during migration;
- Automate solutions for repeatable operational activities and procedures;
- Develop test plan and test cases to demonstrate database readiness and synchronization post migration;
- Work closely with application teams to ensure business functionality and SLAs are met;
- Consult for optimal design of database environments, analyze complex distributed production deployments, and make recommendations to optimize performance and manage costs;
- Develop and conduct quality and integrity tests to validate all aspects of the data pre and post-migration; and
- Conduct technical sessions for internal teams.

5.0.11 C.11–Information Technology Security Vulnerability Analysis Specialist (Cloud)

- Use industry-standard IT Security risk assessment methodologies to evaluate proposed architecture;
- Work with architects, application developers, database professionals and others as necessary to design, test and deploy robust secure cloud applications;
- Participate in the evaluation, research and development of IT Cloud security risk assessments, security tools and implementation plans;
- Identify critical flaws in applications and systems that cyber attackers could exploit;
- Identify threats to, and technical vulnerabilities of networks and other infrastructure;

ATIA - Disclosed under the Access to Information Act
LAI - Divulgation en vertu de la loi sur l'Accès à l'information.

- Conduct vulnerability assessments for networks, applications, databases and operating systems in the cloud environment; and
- Document findings and provide advice relevant to improving the security and integrity of the applications.

5.1 Common Tasks for All Resource Categories

Other common tasks may include, but are not limited to the following:

- Review the most recent GC, Treasury Board Secretariat (TBS) and SSC cloud services guidelines relating to network security, and other related documents available at that time;
- Maintain up to date knowledge of particular technologies and products supporting cloud technology by keeping relevant cloud qualifications up to date when new products are deployed;
- Monitor industry trends to ensure that the departmental cloud implementation fit with government and industry directions for cloud technology;
- Plan and coordinate IM/IT project management activities for cloud adoption including all aspects of planning/coordination/guidance and process;
- Provide IM/IT documentation such as Statement of Requirements (SOR), project plans, feasibility reports, schedules, project management plans, risk management plans and lessons learned;
- Formulate and manage the IM/IT project plans by defining deliverables, identifying and providing resources, identifying key milestones, reviewing project progress against milestones, and engaging ongoing risk management;
- Develop and maintain systems for the management and control of IM/IT requirements on projects in a manner compatible with client standards and guidelines. This includes communications and consultations with various stakeholders in the process;
- Support the Technical Authority to oversee IM/IT cloud initiatives and various IM/IT initiatives;
- Support the Technical Authority to oversee the cloud change management process for IM/IT requirements;
- Provide monthly project progress reports;
- Coach and mentor teams' members and users on best practices and provide knowledge transfer;
- Conduct stakeholder meetings; and
- Prepare input to presentations and executive briefings.

6.0 Deliverables

The Contractor must provide the following deliverables as specified in the Task Authorization, which can include, but are not limited to:

- Metrics;
- Processes and procedures for systems and applications;
- Conceptual architecture design;
- Technical design documents;
- Networking configuration;
- Architecture design specification;
- System requirements;
- Build books;
- Data flow diagrams;
- System controls;
- Test strategies;
- Test plans;
- Defects, change requests and outstanding items tracking status reports;

- Standard operating procedures guides;
- Architectural diagrams;
- Frameworks;
- Impact analysis and strategies;
- Candidate design;
- Technical design document;
- Project plans;
- Analysis documents;
- Requirements studies;
- Options analysis;
- Conceptual system design;
- Technical design document;
- Strategy and roadmap for the departments migration to the recommended cloud services environments;
- Recommendations of short and medium term target environments for application systems and workloads;
- Protected B compliant network design and automated scripts;
- Operating System Hardening standards for Cloud;
- Deployment and configuration of infrastructure components facilitating production workload hosting in the Public Cloud accounts managed by the CBSA;
- Written and verbal advice;
- Knowledge transfer;
- Issues papers and Briefing Notes;
- Presentation decks and materials;
- Meeting facilitation and reports (e.g. monthly progress reports);
- Guides, manuals, reports to be disseminated to various stakeholders as required;
- Meeting agendas, schedules and minutes;
- Synthesis report of facilitated meetings;
- Activity reports;
- Conversation notes, design documentation, change management documentation, site inspection reports and other work requested under the Task Authorization; and
- Prototypes, scripts, templates and code.

Deliverables must be submitted in hard and soft copies in the appropriate formats (e.g. MS Project or MS Office Suite applications) as identified in the TA. All electronic deliverables must comply with departmental software standards, currently MS Office Suite latest version. Where required, CBSA will provide the Contractor with the required forms and templates to meet these standards.

All documents developed or updated by each of the Contractor's resources must be provided to the Project Authority for review, approval and signature (as required).

7.0 Constraints

The Contractor will be expected to maintain up to date knowledge of relevant technologies and products supporting cloud technology by keeping relevant cloud qualifications up to date when new products are deployed.

All aspects of the Cloud infrastructure, applications and services designed and implemented must meet the latest Government Protected B Medium Integrity, Medium Availability security profile requirements, and Treasury Board Secretariat (TBS) and SSC cloud services guidelines.

The Government of Canada strives to ensure that the goods and services it procures are inclusive by design and accessible by default, in accordance with the Accessible Canada Act, its associated regulations and standards, and Treasury Board Contracting Policy. The following accessibility standards are applicable to this requirement.

- Accessibility for Ontarians with Disabilities Act (AODA) - Accessible Customer Service Standard
- Town of East Gwillimbury - Accessibility Standards for Customer Service

8.0 Client Support

The Client will provide all documentation and information necessary for the Work.

9.0 Language Requirements

While proposed resources must be fluent in English, there may be a requirement for specific resources to be fluent in both official languages, which will be specified in the TA.

10.0 Work Location

The Contractor's resources will be required to work onsite at CBSA premises or project site locations in the NCR, which will be identified in the Task Authorization (TA).

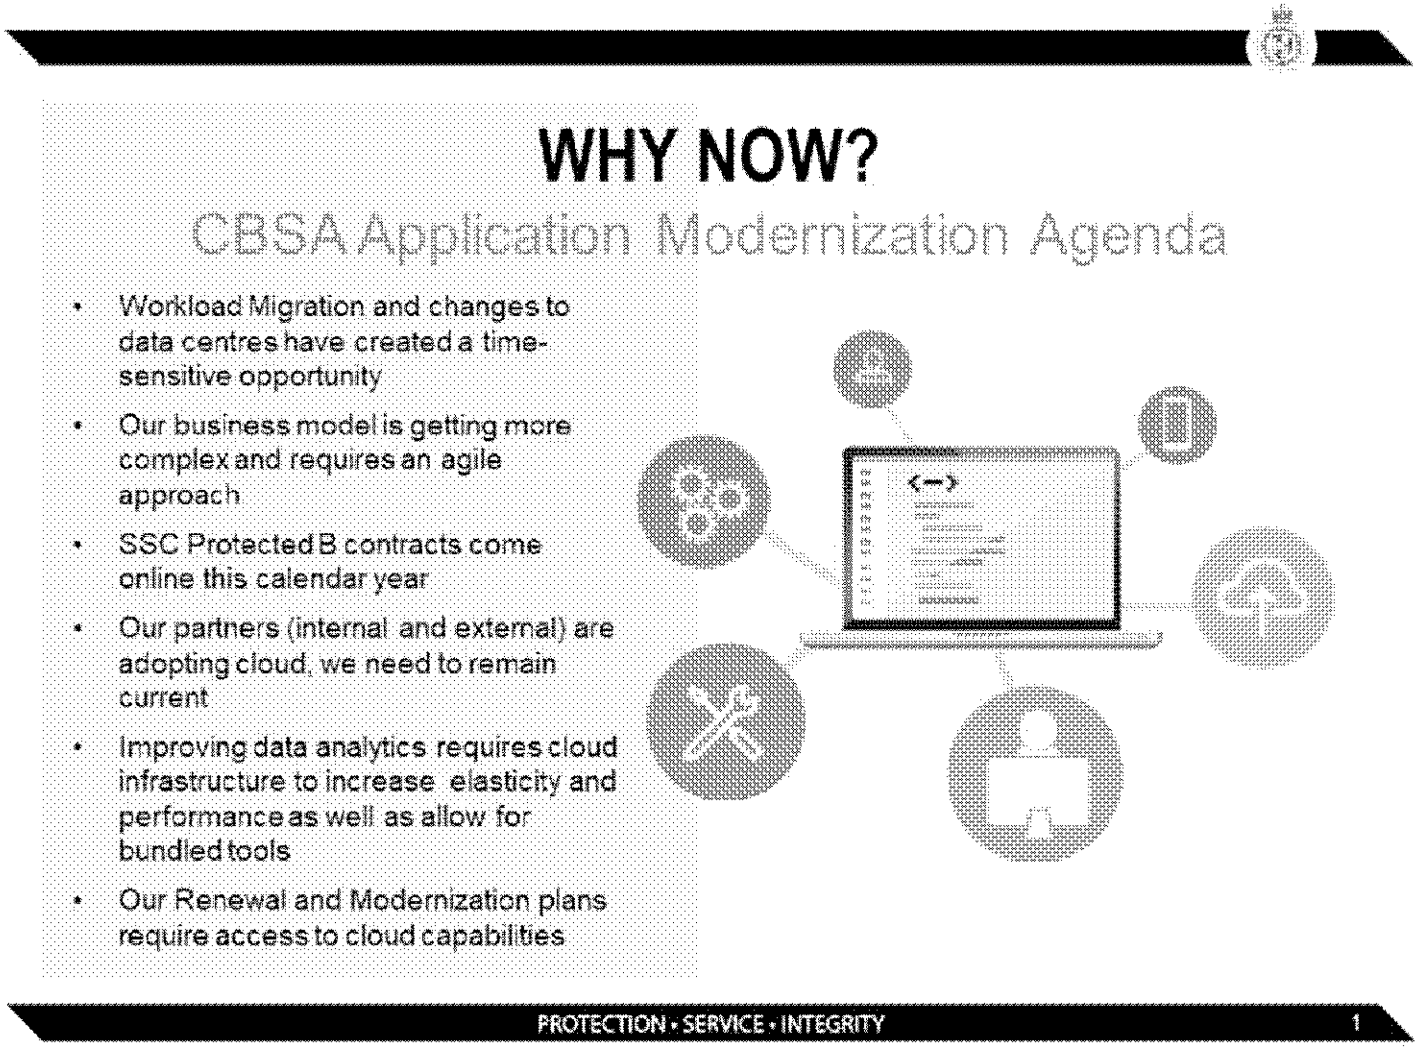
CBSA will provide, subject to security requirements, and only to the specified resource personnel, access to identified databases or applications residing on CBSA computers or networks for the sole purpose of executing tasks associated with this Contract. CBSA, at its sole discretion, will identify the nature and characteristics of such access.

11.0 Travel

The Contractor personnel may be required to travel outside the National Capital region to perform assigned work. All travel will require prior written approval of the Project Authority or the designated representative. The Contractor must ensure that travel is authorized in accordance with the current National Joint Council Travel Directive. Travel within the NCR is the responsibility of the Contractor.

Travel outside of Canada may also be involved, and a valid passport will be required.

CBSA - Released under the Access to Information Act
ASFC - Divulgé en vertu de la Loi sur l'accès à l'information



WHY NOW?

CBSA Application Modernization Agenda

- Workload Migration and changes to data centres have created a time-sensitive opportunity
- Our business model is getting more complex and requires an agile approach
- SSC Protected B contracts come online this calendar year
- Our partners (internal and external) are adopting cloud, we need to remain current
- Improving data analytics requires cloud infrastructure to increase elasticity and performance as well as allow for bundled tools
- Our Renewal and Modernization plans require access to cloud capabilities

PROTECTION • SERVICE • INTEGRITY

1

Figure 1: CBSA Application Modernization

APPENDIX A TO ANNEX A

TASKING ASSESSMENT PROCEDURE

1. Where a requirement for a specific task is identified, a draft Task Authorization Form (TA Form) as attached at Appendix B to Annex A will be provided to the Contractor. Once a draft TA Form is received, the Contractor must submit to the Technical Authority a quotation of rates to supply the requested Resource Categories based on the information identified in the TA Form, as well as its corresponding proposed resource(s). The quotation must be signed and submitted to Canada within the time for response identified in the TA Form. The Contractor will be given a minimum of 2 working days (or any longer time period specified in the draft TA) turnaround time to submit a quotation.

2. With each quotation the Contractor must propose the required number of resources and for each proposed resource the Contractor must supply a résumé, the requested security clearance information and must complete the Response Tables at Appendix C of Annex A applicable to the Resource Categories identified in the draft TA. The same individual must not be proposed for more than one Resource Category. The résumés must demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to the proposed resources:

    (i) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (Refer to Appendix D to Annex A, Certifications).

    (ii) For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource before the date the draft TA was first issued to the Contractor.

    (iii) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of draft TA issuance and must continue, where applicable, to be a member in good standing of the profession or membership throughout the assessment period and Contract Period. Where the designation or membership must be demonstrated through a certification, diploma or degree, such document must be current, valid and issued by the entity specified in this Contract or if the entity is not specified, the issuer must have been an accredited or otherwise recognized body, institution or entity at the time the document was issued.

    (iv) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

    (v) For any requirements that specify a particular time period (e.g., 2 years) of work experience, Canada will disregard any information about experience if the résumé does not include the relevant dates (month and year) for the experience claimed (i.e., the start date and end date). Canada will evaluate only the duration that the resource actually worked on a project or projects (from his or her start date to end date), instead of the overall start and end date of a project or a combination of projects in which a resource has participated.

    (vi) A résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirement, or reusing the same wording as the TA Form, will not be

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la loi sur l'Accès à l'information.

considered "demonstrated" for the purposes of the assessment. The Contractor should provide complete details as to where, when, month and year, and how, through which activities/responsibilities, the stated qualifications / experience were obtained. In situations in which a proposed resource worked at the same time on more than one project, the duration of any overlapping time period will be counted only once toward any requirements that relate to the individual's length of experience.

3. The qualifications and experience of the proposed resources will be assessed against the requirements set out in Appendix C to Annex A to determine each proposed resource's compliance with the mandatory and rated criteria. Canada may request proof of successful completion of formal training, as well as reference information. Canada may conduct reference checks to verify the accuracy of the information provided. If reference checks are done, they will be conducted in writing by e-mail (unless the contact at the reference is only available by telephone). Canada will not assess any points or consider a mandatory criterion met unless the response is received within 5 working days. On the third working day after sending out the e-mails, if Canada has not received a response, Canada will notify the Contractor by e-mail, to allow the Contractor to contact its reference directly to ensure that it responds to Canada within 5 working days. Wherever information provided by a reference differs from the information supplied by the Contractor, the information supplied by the reference will be the information assessed. Points will not be allocated or a mandatory criteria considered as met if the reference customer is not a customer of the Contractor itself (for example, the customer cannot be the customer of an affiliate of the Contractor). Nor will points be allocated or a mandatory criteria considered as met if the customer is itself an affiliate or other entity that does not deal at arm's length with the Contractor. Crown references will be accepted.

4. During the assessment of the resources proposed, should the references for two or more resources required under that TA either be unavailable or fail to substantiate the required qualifications of the proposed resources to perform the required services, the Contractor's quotation may be found to be non-responsive.

5. Only quotations that meet all of the mandatory criteria will be considered for assessment of the point rated criteria. Each resource proposed must attain the required minimum score for the point rated criteria for the applicable Resource Category. If the minimum score for any proposed resource is less than what is required, the Contractor's quotation will be found to be non-responsive.

6. Once the quotation has been accepted by the Technical Authority, the TA Form will be signed by Canada and provided to the Contractor for signature. The TA Form must be appropriately signed by Canada prior to commencement of any work. The Contractor must not commence work until a validly issued TA Form (the Task Authorization) has been received, and any work performed in its absence is done at the Contractor's own risk.

APPENDIX B TO ANNEX A

TASK AUTHORIZATION FORM

(Provided under separate cover)

APPENDIX C TO ANNEX A

RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, the Contractor must prepare and submit a response to a draft Task Authorization using the tables provided in this Annex. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

To demonstrate compliance with all criteria, the Contractor must include the following information:

- Project name;
- Client organization;
- Project start /end dates and duration;
- Project description;
- Description of role and tasks performed by the resource.

The Contractor must also include the following information for the most recent project referenced in response to any of the criteria:

- Contact information of client project representative

The Contractor must provide the following information for projects referenced (other than the most recent) in response to any of the criteria upon request from CBSA:

- Contact information of client project representative

1.0 Mandatory Resource Assessment Criteria:

NOTE TO CONTRACTOR: Where indicated by ***bold italics***, those terms are defined within the Glossary.

I.6 Network Analyst – Level 3

Resource Category: I.6 Network Analyst – Level 3 Name of Proposed Resource: ____________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M1.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of ten (10) years' experience within		

Resource Category: I.6 Network Analyst – Level 3

Name of Proposed Resource: ________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	the last fifteen (15) years working on ***Enterprise-Class IT*** systems performing **all** of the following tasks: • Documenting network ***configurations***[1] and settings; • Contributing to the development of OSI network architecture models; • Installing and configuring Next-Generation firewalls; • Performing networking/routing ***configuration***[2] and intrusion detection/prevention; • Utilizing network monitoring tools; firewall, anti-malware and packet analyzers; • Supporting converged infrastructure and virtual environments; • Automating network administration tasks via shell scripts; • Troubleshooting network problems, issue determination and resolution; and • Conducting and assisting in interactive security debugging, testing and analysis of security attacks and system failures. Note: To qualify, a project must have a minimum duration of six (6) months		
M1.2	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last eight (8) years designing and architecting Infrastructure solutions leveraging cloud technologies and services including **all** of the following: • ***Next Generation Firewalls*** • Virtual networks, subnets and User Defined Routing (UDR) • Multi-Protocol Label Switching • Security Groups • Application gateways and load balancing • Network failover • Containers • ***Elastic Computing*** • Storage and backup • Infrastructure as Code		

Resource Category: I.6 Network Analyst – Level 3 Name of Proposed Resource: ______________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	Note: To qualify, a project must have a minimum duration of six (6) months		
M1.3	The Contractor MUST demonstrate that the Proposed Resource has a minimum of eighteen (18) months experience within the past five (5) years deploying and configuring virtual networks, routing and ***Next Generation Firewalls*** supporting a Cloud environment designed to meet any of the following security control profiles: • the Government of Canada Protected B Medium integrity Medium availability (PBMM) Profile. • FEDRAMP Moderate or High Level • ISO 27001, ISO 27017 and ISO 27018		
M1.4	The Contractor MUST demonstrate that the Proposed Resource has one or more of the following certifications applicable to Infrastructure as a Service (IaaS) platforms from one or more Leaders in the Gartner 2019 Magic Quadrant for IaaS Cloud (i.e. AWS, Azure, or Google) • AWS Certified Advanced Networking Specialty • AWS Certified Solutions Architect Professional • Microsoft Certified: Azure Administrator Associate AND Azure Enterprise-Class Networking Workshop elective OR MCSE: Cloud Platforms and Infrastructure • Azure Solutions Architect Expert • Professional Cloud Network Engineer (GCP) • Professional Cloud Architect (GCP) A copy of the certification(s) must be provided with the bid.		

I.7 Platform Analyst – Level 3

Resource Category: I.7 Platform Analyst – Level 3 Name of proposed Resource: ______________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M2.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience as a Platform Analyst performing analysis, detailed design, implementation and support of platform technologies for a large user base*, of which: - 2 years involved critical* platform technologies; - 3 years involved cloud platform technologies. Note: Critical is defined as having ***High Availability*** (99%) service requirements. Large user base is defined as having 3000 or more active users. Note: To qualify, a project must have a minimum duration of six (6) months		
M2.2	The Contractor MUST demonstrate that the Proposed Resource has a minimum of twelve (12) months' experience within the last five (5) years designing, implementing, developing or supporting platforms complying with at least four of the following security standards/requirements: • OWASP Proactive Controls • FIPS 140-2 • FIPS 186-4 • SOC 2 controls • ISO 27001, ISO 27017 and ISO 27018 Note: To qualify, a project must have a minimum duration of six (6) months. The experience can be demonstrated in various combinations of the listed standards/requirements across different projects, however the minimum twelve (12) months experience must be demonstrated for EACH security standard/requirement. Overlapping periods will count only once for each standard/requirement.		
M2.3	The Contractor MUST demonstrate that the Proposed Resource has a minimum of twelve (12) months' experience		

Resource Category: I.7 Platform Analyst – Level 3

Name of proposed Resource: ___________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	within the last five (5) years working with **all** of the following identity federation standards: • OpenID Connect and OAuth 2.0 or later • SAML 2.0 or later Note: To qualify, a project must have a minimum duration of six (6) months. The experience can be demonstrated in various combinations across different projects, however the minimum twelve (12) months experience must be demonstrated for EACH. Overlapping periods will count only once for each standard.		
M2.4	The Contractor MUST demonstrate that the Proposed Resource has a minimum of twelve (12) months' experience within the last five (5) years implementing solutions involving Cloud-based identity access management, Multi-factor authentication AND one of the following; • Biometric security models • Secure enclave processing Note: To qualify, a project must have a minimum duration of six (6) months. The experience can be demonstrated in various combinations across different projects, however the minimum twelve (12) months experience must be demonstrated for EACH of the three requirements above. Overlapping periods will count only once for each standard/requirement.		
M2.5	The Contractor MUST demonstrate that the Proposed Resource has a minimum of twelve (12) months' experience within the last five (5) years deploying a Level of Assurance 4 identity authentication solution for an organization with a user base of 3000 or more active users. Note: To qualify, a project must have a minimum duration of six (6) months.		

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

I.9 System Administrator – Level 3

Resource Category: I.9 System Administrator – Level 3 Name of proposed Resource: ___________________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M3.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last ten (10) years provisioning, administering and supporting **all** of the below infrastructure and services hosted on a public or private cloud service: • ***Elastic Computing*** • Virtual Appliances • Storage • Backup solutions • User credentials • Secure Remote Access • Application gateways and load balancing Note: To qualify, a project must have a minimum duration of six (6) months. The experience can be demonstrated in various combinations across different projects, however the minimum five (5) years' experience must be demonstrated for EACH one of the infrastructure and services listed above. Overlapping periods will count only once for each infrastructure and service.		
M3.2	The Contractor MUST demonstrate that the Proposed Resource has a minimum of three (3) years' experience within the last ten (10) years performing **all** of the following tasks in a Cloud environment: • Performing general system administration duties including managing permissions, and installing upgrades and patches on public cloud systems; • Installing and configuring software, resources and services; • Performing system monitoring, analysis, and performance tuning; • Configuring and managing secure connections between the client in-premise environments and the cloud; • Investigating and resolving security issues;		

Resource Category: I.9 System Administrator – Level 3

Name of proposed Resource: ___________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	• Investigating and resolving application performance issues; and • Scripting and automating tasks to manage resources and services in the cloud environments. Note: To qualify, a project must have a minimum duration of six (6) months		
M3.3	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last ten (10) years performing all of the following tasks: • Collaborating with Cloud Architects, providing feedback and implementing conceptual, logical or physical designs or architectures; • Developing and executing Quality Assurance tests on newly provisioned environments and recording and communicating the results; • Performing system hardening on newly provisioned environments; • Conducting compliance monitoring and inventory auditing; and • Creating and maintaining structured and thorough Build Books that contain a detailed and current ***configuration***[1] of the environment, with validated Rebuild and Provisioning Procedures. Note: To qualify, a project must have a minimum duration of six (6) months		

I.10 Technical Architect (Cloud Security) – Level 3

Resource Category: I.10 Technical Architect (Cloud Security) – Level 3

Name of proposed Resource: ___________________________________

Criteria	Mandatory Requirement	Bidder's Response	
		Demonstrated experience (Bidders to insert data)	Insert page # of resume
M4.1	The Contractor MUST demonstrate that the Proposed Resource has three (3) years' experience leading the Security Assessment and Authorization efforts within a North American ***public sector organization*** for the successful authorization of government Protected B (or equivalent)** cloud deployments. * Successful has the following characteristics: The cloud deployment has been designed with specific controls and to meet specific security requirements, has undergone assessment according to a recognized Security Assessment & Authorization process and received an Authority to Operate from the appropriate responsibility area. ** "Protected B" data is defined as sensitive personally-identifiable private data which could be injurious to an individual or organization if compromised. Note: To qualify, a project must have a minimum duration of six (6) months		
M4.2	The Contractor MUST demonstrate that the Proposed Resource has five (5) years' experience, of which 3 years or more were within a Cloud environment, performing **ALL** of the following tasks: • Defining Technical and Functional security requirements; • Creating Security Architecture; • Participating in Infrastructure and Application Architecture Reviews; • Participating in Infrastructure and Application Design Reviews; and • Performing IT Certification or Assessment activities. Note: To qualify, a project must have a minimum duration of three (3) months		
M4.3	The Contractor MUST demonstrate that the proposed resource has any three (3) of the following certifications: • Certified Cloud Security Professional		

CHSA - Released under the Access to Information Act
AIPRP - Divulgué en vertu de la loi sur l'accès à l'information.

Resource Category: I.10 Technical Architect (Cloud Security) – Level 3 Name of proposed Resource: ______________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	• Certified Information System Security Professional (CISSP) • Certified ISO 27001 Lead Implementer • Certified Information Systems Auditor (CISA) • Certified Information Security Manager (CISM) • Certified in Risk and Information System Control (CRISC) • Cloud Security Alliance Cloud Security Knowledge (CCSK) • GIAC Industrial Cyber Security Professional (GICSP) • Payment Card Industry – Qualified Security Assessor (PCI-QSA) • System Security Certified Practitioner (SSCP) A Copy of the Certifications must be provided.		

I.11 Technology Architect – Level 3

Resource Category: I.11 Technology Architect – Level 3 Name of proposed Resource: ______________________			
Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M5.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of ten (10) years' experience within the last fifteen (15) years working on ***Enterprise-class*** IT systems performing a minimum of six of the following tasks: • Gathering and documenting business requirements; • Developing Systems Architecture; • Developing Logical and Physical cloud models; • Developing and Implementing architectural strategies and plans; • Contributing to overall project plans, testing strategies, security and infrastructure design;		

Resource Category: I.11 Technology Architect – Level 3

Name of proposed Resource: ________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	• Developing processes to enable the migration of data or workloads from source to destination systems; • Contributing expertise and resolving Issues related to architectural challenges; and • Reporting on progress to management using standard approaches and visualization (charts, etc.). Note: To qualify, a project must have a minimum duration of six (6) months		
M5.2	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last eight (8) years designing and architecting infrastructure services or applications leveraging a minimum of five of the following cloud technologies: • ***Elastic Computing*** • Cloud storage and backup • Networking (Firewalls, User Defined Routing) • Application gateways and load balancing • Database or DataWarehouse-as-a-Service • Identity, Credential and Access Management Note: To qualify, each project must have a minimum duration of six (6) months		
M5.3	The Contractor MUST demonstrate that the Proposed Resource has a minimum of eighteen (18) months' experience in the last five (5) years (as of solicitation issue date) architecting and executing a solution to migrate an existing ***Enterprise-class*** secure* application or service to the cloud. *Secure is defined as meeting one of the following security control profiles: o the Government of Canada Protected B Medium integrity Medium availability (PBMM). o FEDRAMP Moderate or High Level o ISO 27001, ISO 27017 and ISO 27018 Note: To qualify, a project must have a minimum duration of six (6) months		

Resource Category: I.11 Technology Architect – Level 3

Name of proposed Resource: ______________________________

Criteria	Mandatory Requirement	Bidder's Response	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M5.4	The Contractor MUST demonstrate that the Proposed Resource has a minimum of two (2) years' experience within the last ten (10) years (as of solicitation issue date) designing, developing (coding), testing, implementing and supporting application solutions. Note: To qualify, a project must have a minimum duration of six (6) months		
M5.5	The Contractor MUST demonstrate that the Proposed Resource has: One of the following certifications applicable to Infrastructure as a Service (IaaS) platforms from one or more Leaders in the Gartner 2019 Magic Quadrant for IaaS Cloud (i.e. AWS, Azure, or Google): • Azure Solutions Architect Expert • Amazon Solutions Architect Associate • Professional Cloud Architect (GCP) A copy of the certificate(s) must be provided with the bid.		

B.2 Business Architect – Level 3

Resource Category: B.2 Business Architect – Level 3

Name of proposed Resource: ______________________________

Criteria	Mandatory Requirement	Bidder's Response	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
M6.1	The Contractor MUST demonstrate that the proposed resource has a minimum of ten (10) years' experience within the last fifteen (15) years performing **all** of the following tasks and activities for Large* organizations;		

Resource Category: B.2 Business Architect – Level 3

Name of proposed Resource: ___________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	• Researching, defining and communicating the current business architecture for Information Technology service delivery using deliverables such as: Strategy Maps, Business Model Canvas, Value Chains, Business Capability Models, Business Process Models; • Reviewing, Analyzing and evaluating emerging technologies, trends, business models and best practices to identify new services and delivery models that would better serve the clients or customers of the organization; • Assessing an organizations' capacity and capability to undertake and deliver on an initiative or a change; and • Researching, defining and communicating the value and Return on Investment (ROI) of proposed services and transformation initiatives through: Business Cases, Logic Models, Outcomes Registers, Benefits Realization Plans, and Key Performance Indicators (KPIs). * Large organizations are defined as organizations having 2000 or more employees OR organizations having 1500 or more employees **and** multiple lines of business each with separate organization structures and strategic objectives Note: To qualify, a project must have a minimum duration of six (6) months		
M6.2	The Contractor MUST demonstrate that the proposed resource has worked on a minimum of two (2) projects in the last five (5) years : • Guiding and leading people, process and organizational change in response to disruptive forces or opportunities towards desired business outcomes by meeting with variety* of project stakeholders to help build awareness and secure buy-in for cross-organization initiatives and release readiness • Working with domain architects (information, data, application) and solution architects to align technical design decisions with business needs and goals *Variety is defined as at least 3 different stakeholder groups (internal and/or external)		

Resource Category: B.2 Business Architect – Level 3

Name of proposed Resource: ____________________________________

Criteria	**Mandatory Requirement**	**Bidder's Response**	
		Demonstrated experience (Bidders to insert data)	**Insert page # of resume**
	Note: To qualify, a project must have a minimum duration of six (6) months		

A.1 Application/Software Architect (Cloud Solutions) – Level 3

Resource Category: A.1 Application/Software Architect (Cloud Solutions) – Level 3

Name of proposed Resource: ____________________________________

Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
M7.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of ten (10) years' experience* within the last fifteen (15) years performing **all** of the following tasks: • Develop technical architectures, frameworks and strategies, to meet the business and application requirements; • Analyze and evaluate alternative technology solutions to meet business problems; • Ensure the integration of all aspects of technology solutions; • Evaluate existing procedures and methods, identify and document database content, structure, and application sub-systems, and develop data dictionary; • Define and document interfaces of manual to automated operations within application sub-systems, to external systems and between new and existing systems; and • Define input/output sources, including detailed plan for technical design phase, and obtain approval of the system proposal. Note: To qualify, a project must have a minimum duration of six (6) months		

Resource Category: A.1 Application/Software Architect (Cloud Solutions) – Level 3

Name of proposed Resource: ____________________________

Criteria	Mandatory Requirement	Contractor's Response	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
M7.2	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks: • Performing requirements analysis, data profiling, effort estimation for database design and documenting the results; • Translating complex technical terminology, concepts and issues in terms understandable to technical and nontechnical management and resources staff; • Developing and maintaining conceptual, logical, and physical diagrams of the applications, software, and database architectures for business critical applications; and • Ensuring projects adhered to client's application, data, and database standards and policies Note: To qualify, a project must have a minimum duration of six (6) months		
M7.3	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks within a public cloud environment: • Creating the conceptual, logical and physical designs for application architectures and their interoperability; • Researching, analyzing, recommending and selecting technical approaches to address challenging development and integration problems with application architectures; and • Developing implementation plans for the deployment of application architectures. Note: To qualify, a project must have a minimum duration of six (6) months		
M7.4	The Contractor MUST demonstrate that the Proposed Resource has a minimum of three (3) years' experience within the last eight		

[illegible] under the Access to Information Act
AIPRP - Divulgation en vertu de la loi sur l'Accès à l'information.

Resource Category: A.1 Application/Software Architect (Cloud Solutions) – Level 3 Name of proposed Resource: ____________________			
		Contractor's Response	
Criteria	**Mandatory Requirement**	**Demonstrated experience (Contractors to insert data)**	**Insert page # of resume**
	(8) years designing and implementing cloud solutions employing 5 or more of the following cloud technologies and services: - ***Elastic Computing*** - Cloud storage and backup - Automation - Network Virtual Appliances (Firewalls) - Application gateways and load balancing - Database-as-a-Service - Identity, Credential and Access Management Note: To qualify, a project must have a minimum duration of six (6) months		
M7.5	The Contractor MUST demonstrate that the proposed resource has a minimum of one (1) year experience designing and implementing cloud solutions for a ***public sector organization***. Note: To qualify, a project must have a minimum duration of six (6) months		
M7.6	The Contractor MUST demonstrate that the Proposed Resource has: One of the following certifications applicable to Infrastructure as a Service (IaaS) platforms from one or more Leaders in the Gartner 2019 Magic Quadrant for IaaS Cloud (i.e. AWS, Azure, or Google): - Azure Solutions Architect Expert - Amazon Solutions Architect Associate - Professional Cloud Architect (GCP) A copy of the certificate(s) must be provided.		

A.7 Programmer/Analyst (Cloud Solutions) – Level 3

Resource Category: A.7 Programmer/Analyst (Cloud Solutions) – Level 3

Name of proposed Resource: ___________________________________

Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
M8.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last ten (10) years designing, developing, testing and deploying code and software for a cloud computing environment. Note: To qualify, a project must have a minimum duration of six (6) months		
M8.2	The Contractor MUST demonstrate that the Proposed Resource has a minimum of seven (7) years' experience within the last ten (10) years designing, developing and implementing web-based applications using the following two languages: • Java • Node JS Note: The experience required is a combined total, however a minimum of 3 years must be demonstrated for EACH language. To qualify, a project must have a minimum duration of six (6) months.		
M8.3	The Contractor MUST demonstrate that the Proposed Resource has a minimum of two (2) years' experience within the last five (5) years' ***refactoring*** and deploying ***Enterprise-class*** solutions. Note: To qualify, a project must have a minimum duration of six (6) months.		
M8.4	The Contractor MUST demonstrate that the Proposed Resource has a minimum of twelve (12) months experience within the last five (5) years coding, testing and implementing solutions involving Cloud-based identity access management, Multi-factor authentication AND one of the following: • Biometric security models • Secure enclave processing		

[illegible] - Released under the Access to Information Act
ATIP - Divulgation en vertu de la Loi sur l'Accès à l'information.

Resource Category: A.7 Programmer/Analyst (Cloud Solutions) – Level 3 Name of proposed Resource: ____________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
	Note: To qualify, a project must have a minimum duration of six (6) months. The experience can be demonstrated in various combinations across different projects, however the minimum experience must be demonstrated for EACH one of the three bullets above. Note: To qualify, a project must have a minimum duration of six (6) months		

I.1 Data Conversion Specialist (Cloud Data Scientist)– Level 3

Resource Category: I.1 Data Conversion Specialist (Cloud Data Scientist) – Level 3 Name of proposed Resource: ____________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
M9.1	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks and responsibilities: • Using methodologies from Machine Learning, Deep Learning and Artificial Intelligence; • Applying Machine Learning using diverse types of data, diverse data sources and different types of learning models; • Developing queries to isolate data with high value within a Data Warehouse, Data Mart or Data Lake; • Performing exploratory data analysis, rapid prototyping and presenting creative ideas to exploit data to drive deeper insights and business value;		

Resource Category: I.1 Data Conversion Specialist (Cloud Data Scientist) – Level 3 Name of proposed Resource: ___________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
	• Providing proactive data analysis of large structured and unstructured datasets involving a wide range of systems across multiple disparate data sets; and • Developing data analytic and visualization plans to support high-quality, fact-based business decisions. Note: To qualify, a project must have a minimum duration of six (6) months		
M9.2	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing a minimum of five (5) of the following tasks and activities: • Working with scalable data platforms such as; Power BI, Hadoop, Spark, Redshift, NoSQL (dynamoDB / MongoDB); • Building the tools and supporting data structures needed to analyze data and perform data cleaning activities; • Determining problematic issues with data and proposing feasible resolutions; • Organizing, mapping, analyzing numerous data sets to incorporate them into one centralized data repository; • Performing exploration of data, including analysis, mining of correlations and result verification; • Developing and deploying solutions that addressed data aggregation challenges, including data being distributed across numerous databases or sources; and • Developing and implementing strategies for data enrichment. Note: To qualify, a project must have a minimum duration of six (6) months		
M9.3	The Contractor MUST demonstrate that the proposed resource has a minimum of three (3) years' experience within the last five (5) years performing a minimum of three (3) of the following tasks and activities;		

Resource Category: I.1 Data Conversion Specialist (Cloud Data Scientist) – Level 3 Name of proposed Resource: ___________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
	• Identifying opportunities for automation, knowledge discovery, decision-making, insights, optimization, and new capabilities; • Developing frameworks and best practices for analytic solutions at different maturity levels; • Preparing documentation, reports, and presentations that explain advanced analytics concepts, technology, and inner workings of solutions to broader teams, including non-technical audiences; and • Mentoring other data scientists in the design, implementation, testing, prototyping, and deploying of data analytic solutions. Note: To qualify, a project must have a minimum duration of six (6) months		
M9.4	The Contractor MUST demonstrate the proposed resource holds: A Masters' degree in a quantitative discipline such as applied mathematics, computer science, data science, statistics or econometrics, OR An equivalent ***Canadian academic credential assessment***, if obtained outside Canada. The Contractor must include a copy of the degree(s).		

I.1 Data Conversion Specialist (Cloud Data Migrations)– Level 3

Resource Category: I.1 Data Conversion Specialist (Cloud Data Migrations) – Level 3 Name of proposed Resource: ___________________________________			
		Contractor's Response	
Criteria	**Mandatory Requirement**	**Demonstrated experience (Contractors to insert data)**	**Insert page # of resume**
M10.1	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks: • Design, develop and administer significant (greater than 500 GB) DB2 databases; • Troubleshoot and optimize DB2 databases; and • Automate solutions for repeatable problems or maintenance activities. Note: To qualify, a project must have a minimum duration of six (6) months		
M10.2	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks: • Conduct exploratory data analysis on databases to understand and identify data quality issues prior to a significant upgrade or migration of database; • Determine problematic issues with data and data structures and present findings to stakeholders; and • Identify, test and develop solutions to data quality problems or database performance issues. Note: To qualify, a project must have a minimum duration of six (6) months		
M10.3	The Contractor MUST demonstrate that the proposed resource has a minimum of five (5) years' experience within the last ten (10) years performing **all** of the following tasks: • Developing and planning data migration strategies for secure application migrations to the cloud; • Designing and building solutions, and using appropriate tools to migrate existing applications and their databases from an in-premise database environment to a secure cloud environment;		

Resource Category: I.1 Data Conversion Specialist (Cloud Data Migrations) – Level 3

Name of proposed Resource: ___________________________________

Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
	• Developing data validation approach, test plan, scenarios and scripts, as necessary, to demonstrate completeness, integrity and security of the migrated data to the cloud; and • Performing post-migration activities. Note: To qualify, a project must have a minimum duration of six (6) months		
M10.4	The Contractor MUST demonstrate that the proposed resource has a minimum of two (2) years' experience within the last ten (10) years performing a minimum of four (4) of the following tasks: • Migrating mainframe databases to a UNIX or LINUX platform; • Designing, developing, or administering distributed databases; • Developing, testing and executing data cleansing solutions; • Developing scripts using bash, Perl and/or Python; and • Using ETL tools such as DataStage. Note: To qualify, a project must have a minimum duration of six (6) months		

C.11–Information Technology Security Vulnerability Analysis Specialist (Cloud) – Level 3

Resource Category: C.11 Information Technology Security Vulnerability Analysis Specialist (Cloud) – Level 3 Name of proposed Resource: ___________________________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
M11.1	The Contractor MUST demonstrate that the Proposed Resource has a minimum of five (5) years' experience within the last ten (10) years conducting IT Security vulnerability assessments.		
M11.2	The Contractor MUST demonstrate that the proposed resource possesses a current professional certification from any of the following: CISSP from (ISC) CISM from ISACA CRISC from ISACA GIAC / Any Int/Adv Cyber Security certification GIAC / Any Int/Adv Cyber Defense certification GIAC / Any Penetration Testing Certification CEH (Certified Ethical Hacker) GICSP GWAPT GWEB CISA A copy of the Certification must be provided with the bid.		
M11.3	The Contractor MUST demonstrate that the Proposed Resource has experience in the past two (2) years performing Vulnerability Assessments and Penetration Testing for secure* public Cloud-based environments, services or solutions for five (5) different clients (separate legal entities) including **all** of the following activities: • Conducting an assessment of the assets and data involved including the business value in addition to the technology/technical configuration involved; • Conducting thorough vulnerability scans and penetration testing to identify vulnerabilities that may leave the organization or data open to threats or theft; • Using automated vulnerability assessment tools; • Producing an actionable and prioritized list of deficiencies		

Resource Category: C.11 Information Technology Security Vulnerability Analysis Specialist (Cloud) – Level 3 Name of proposed Resource: ____________________________________			
Criteria	**Mandatory Requirement**	**Contractor's Response**	
		Demonstrated experience (Contractors to insert data)	**Insert page # of resume**
	with explanations and technical recommendations; and • Preparing a summary report for management. Note: To qualify, a project must have a minimum duration of 20 days. * Secure is defined as designed to meet one of the following security control profiles: ○ the Government of Canada Protected B Medium integrity Medium availability (PBMM). ○ FEDRAMP Moderate or High Level ○ ISO 27001, ISO 27017 and ISO 27018		

2.0 Point Rated Resource Assessment Criteria:

I.6 Network Analyst – Level 3

Resource Category: I.6 Network Analyst – Level 3

Name of proposed Resource: ____________________________________

#	Point-Rated Requirement	Points Max	Point Grid	Bidder's Response	
				Demonstrated Experience	**Insert Page # of Resume**
R1.1	The Contractor should demonstrate that the Proposed Resource has additional experience, in excess of the minimum M1.2 mandatory requirement of five (5) years, designing and architecting Infrastructure solutions leveraging cloud technologies and services including **all** the following: • ***Next Generation Firewalls*** • Virtual networks, subnets and User Defined Routing (UDR) • Multi-Protocol Label Switching • Security Groups • Application gateways and load balancing • Network failover • Containers • ***Elastic Computing*** • Storage and backup • Infrastructure as code Note: A qualifying project will have a minimum duration of six (6) months	**20**	5+ years up to 6 years = 5 points 6+ years up to 7 years = 10 points 7+ years up to 8 years = 15 points More than 8 years = 20 points Maximum 20 points		
R1.2	The Contractor should demonstrate that the Proposed Resource has additional experience in excess of the minimum M1.3 mandatory requirement of eighteen (18) months within the past five (5) years (prior	**15**	18+ months up to 2 years = 5 points 2+ years up to 3 years = 8 points 3+ years up to 4 years = 12 points		

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'accès à l'information.

Resource Category: I.6 Network Analyst – Level 3

	field in Information Technology, obtained through a recognized Canadian university or college; OR An equivalent ***Canadian academic credential assessment***, if obtained outside Canada. A copy of the university degree, college diploma or academic credential assessment WILL be included with the Contractor's response to the TA. The copy WILL be a readable copy in English or French.				
MAX. AVAILABLE POINTS		**80**			
MIN. POINTS REQUIRED		**52**			

APPENDIX D TO ANNEX A

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the Contractor's quotation when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all the information provided in the résumés and supporting material proposed for completing the subject work, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Contractor to be true and accurate. Furthermore, the Contractor warrants that every individual proposed by the Contractor for the requirement is capable of performing the Work described in the Task Authorization.

______________________________	______________
Print name of authorized individual & sign above	Date

2. CERTIFICATION OF AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under this Task Authorization, the persons proposed in the quotation will be available to commence performance of the work within a reasonable time from the date of issuance of the valid Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

______________________________	______________
Print name of authorized individual & sign above	Date

3. CERTIFICATION OF STATUS OF PERSONNEL

If the Contractor has proposed any individual who is not an employee of the Contractor, the Contractor certifies that it has permission from that individual to propose his/her services in relation to the Work to be performed under this TA and to submit his/her résumé to Canada. At any time during the Contract Period the Contractor must, upon request from the Contracting Authority, provide the written confirmation, signed by the individual, of the permission that was given to the Contractor of his/her availability. Failure to comply with the request may result in a default under the Contract in accordance with the General Conditions.

______________________________	______________
Print name of authorized individual & sign above	Date

4. CERTIFICATION OF LANGUAGE - [English or Bilingual or French]

The Contractor certifies that the proposed resource(s) in response to this draft Task Authorization is/are

[Option 1 - Unilingual English] fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

[Option 2 - Bilingual] fluent in both official languages of Canada (French and English). The individual(s) proposed must be able to communicate orally and in writing in French and English without any assistance and with minimal errors.

[Option 3 - Unilingual French] fluent in French. The individual(s) proposed must be able to communicate orally and in writing in French without any assistance and with minimal errors.

Print name of authorized individual & sign above

Date

APPENDIX E TO ANNEX A
GLOSSARY OF DEFINITIONS

Term	Context
Analytic Pipeline	An analytic pipeline is a tool for collecting data from applications and various other sources, could include a transformational or cleansing step, could include some further processing or matching and then subjecting the data to analysis in order to produce a result within a certain timeframe. This is done separately from the production applications in order to avoid degradation in performance.
AWS	Amazon Web Services Amazon Web Services is a subsidiary of Amazon that provides on-demand cloud computing platforms and APIs to individuals, companies, and governments, on a metered pay-as-you-go basis.
Border Gateway Protocol BGP	Border Gateway Protocol is a standardized exterior gateway protocol designed to exchange routing and reachability information among autonomous systems on the Internet. The protocol is classified as a path vector protocol. Source: Wikipedia
Canadian academic credentials assessment	An Educational Credential Assessment is a statement of the general comparability of international educational credentials to a completed Canadian educational credential. The Canadian Information Centre for International Credentials (CICIC) assists persons who wish to obtain an assessment of their educational, professional, and occupational credentials by referring them to the appropriate organizations.
Configuration[1]	Configuration is the arrangement, relationships and customizations of hardware and/or software components that make up a computer system to enable the system to perform its intended use based on given requirements.
Configuration[2]	Configuration is the activity of arranging and/or customizing the hardware and/or software components that make up a computer system to enable the system to perform its intended use based on given requirements.
Elastic Computing	Concept in cloud computing in which computing resources can be scaled up and down easily by the cloud service provider. Elastic computing is the ability of a cloud service provider to provision flexible computing power when and wherever required. The elasticity of these

Term	Context
	resources can be in terms of processing power, storage, bandwidth, etc. Source: Techopedia
Enterprise-Class	Enterprise-class refers to applications or infrastructure services that are designed to be robust and scalable across a large organization. Gartner defines Enterprise-class as the ability of a given tool or product to handle complex processes or services. Further characteristics include: Open and compatible with existing databases and tools; Powerful enough to scale up along with the needs of the business using it; Secure from outside threats and data leaks.
Enterprise Cloud Security Solution	An Enterprise Cloud Security Solution is a comprehensive and unified suite of third-party configurable tools and practices that secure cloud-based network infrastructure, applications, connectivity, communications and data through native integration, heterogeneous protection, automation and management (policies, controls and visibility). They are specifically designed for cloud deployment and provide maximum security with minimal overhead. They support various operating environments including High Availability and auto-scaling. They provide automated threat monitoring, recognition and response.
Enterprise Solution	Enterprise solutions are designed to integrate multiple facets of a company's business through the interchange of information from various business process areas and related databases. These solutions enable companies to retrieve and disseminate mission-critical data throughout the organization, providing managers with real-time operating information. Source: Gartner
GCP	Google Cloud Platform Google Cloud Platform is a suite of public cloud computing services offered by Google. The platform includes a range of hosted services for compute, storage and application development that run on Google hardware.
High Availability Highly Available	High availability (HA) is the ability of a system or system component to be continuously operational for a desirably long length of time.

Term	Context
(HA)	… Availability experts emphasize that, for any system to be highly available, the parts of a system should be well-designed and thoroughly tested before they are used. Since a computer system or a network consists of many parts in which all parts usually need to be present in order for the whole to be operational, much planning for High Availability centers around backup and failover processing and data storage and access. Source: TechTarget At CBSA, the operational measure for High Availability is 99% 24/7 365 days a year.
Hybrid Cloud	Hybrid cloud is a cloud computing environment that combines on-premises and public cloud infrastructures. There are multiple approaches to architecting a hybrid cloud. They include: • Hybrid cloud management software (centralized management of both on-premises and public cloud infrastructure and applications); • Vendor-native hybrid cloud – extending either the on-premises footprint to the public cloud or vice versa, and to connect public cloud resources with a data center. • Platform as a service (PaaS) – an application development platform for developers to write custom applications without provisioning the underlying infrastructure they need to run. Source: Networkworld.com
Implement Implementation	In computer science, an implementation is a realization of a technical specification or algorithm as a program, software component, or other computer system through computer programming and deployment. In this context, to *implement* is the employing of techniques such as installing/injecting, configuring and/or developing the requirement and also deploying it successfully (operating without defects) into Production use. Source: Wikipedia
"Lift-and-Shift" or Rehost/Rehosting	Cloud migration approach which involves taking the entire application from its old infrastructure and moving it to the Cloud, involving no change, or with only very minor changes, or adjustment to the code.

Term	Context
	Rehosting is also known as lift-and-shift: you lift the code out of an environment and shift it to another. Source: DZone.com
Next-Generation Firewall NextGen Firewall	Next-generation firewalls are a class of firewall that are implemented in either software or hardware and are capable of detecting and blocking complicated attacks by enforcing security measures at the protocol, port and application level. The difference between a standard firewall and next-generation firewalls is that the latter performs a more in-depth inspection and in smarter ways. Next-generation firewalls also provide additional features like active directory integration support, SSH and SSL inspection, and malware filtering based on reputation. Source: Techopedia
OWASP Top 10	The OWASP Top 10 is a powerful awareness document for web application security. It represents a broad consensus about the most critical security risks to web applications. Project members include a variety of security experts from around the world who have shared their expertise to produce this list. Source: OWASP
Public Sector Organization	For the purpose of this procurement, a ***public sector organization*** is defined as any Department, Agency or Crown Corporation of the Canadian or U.S. Federal Governments, Canadian Provincial or U.S. State Governments, Municipal governments (representing Pop. 1+ Million).
Refactor/Refactoring	Cloud migration approach which involves a complete re-architecting of the app to better suit the new cloud environment. This often involves modifying the app itself and a large chunk of its code to better take advantage of cloud-based features and the extra flexibility that comes with them. Refactoring is a complex and resource-intensive process which requires a lot of time to complete. Source: DZone.com
Replatform/Re-platforming	Cloud migration approach which is similar to re-hosting in that the code is not altered excessively. However, re-platforming involves some modification for the purpose of taking advantage of the new cloud infrastructure. Some modifications could include: modifying the way the app interacts with the database to benefit from automation and a more

Term	Context
	capable database infrastructure; adding new features to enable better scaling and allow the app to benefit from the reserved resources of your cloud environment; or integrating the app with native features of the Cloud while keeping code modifications at a minimum. Source: DZone.com
Reverse engineering	Reverse engineering is "the process of analyzing a subject system to identify the system's components and their interrelationships, and to create representations of the system in another form or at a higher level of abstraction", where the "subject system" is the end product of software development. Reverse engineering is a process of examination only. There are two components in reverse engineering: re-documentation and design recovery. Re-documentation is the creation of new representation of the computer code so that it is easier to understand. Meanwhile, design recovery is the use of deduction or reasoning from general knowledge or personal experience of the product in order to fully understand the product functionality. Source: Wikipedia

PART 3 - TA APPROVAL BY CANADA / PARTIE 3 - APPROBATION DE L'AT PAR LE CANADA

By signing this TA, the authorized client authority and/or the PWGSC Contracting Authority certify(ies) that the content of this TA is in accordance with the conditions of the Contract.

The client's authorization limit is $150,000. When the value of a TA and its amendments (excluding Applicable Taxes) is in excess of this limit, the TA must be signed by the authorized client and forwarded to the PWGSC Contracting Authority for authorization.

En apposant sa signature sur l'AT, le client autorisé et/ou l'autorité contractante de TPSGC atteste(nt) que le contenu de cette AT est conforme aux conditions du contrat.

La limite d'autorisation du client est 150,000 $. Lorsque la valeur de l'AT et ses modifications (excluant les taxes applicables) dépasse cette limite, l'AT doit être signée par le client autorisé et transmise à l'autorité contractante de TPSGC pour autorisation

7.1 Statement of Work

The Contractor must perform the Work in accordance with the Statement of Work in Annex A.

7.1.1 Optional Goods or Services, or both

The Contractor grants to Canada the irrevocable option to acquire the goods, services or both described at Annex A of the Contract under the same conditions and at the prices and/or rates stated in the Contract. The option may only be exercised by the Contracting Authority and will be evidenced, for administrative purposes only, through a contract amendment.

The Contracting Authority may exercise the option at any time before the expiry of the Contract by sending a written notice to the Contractor.

7.1.2 Additional Resources Process

1. The Project Authority will provide the Contractor with the request via email to acquire additional resource(s).
2. The request to acquire additional resource(s) will contain details such as, the number of required additional resource(s), the preferred start date and a description of the major tasks to be performed.
3. The Contractor must provide the Project Authority, within 5 calendar days of its receipt, the qualifications and experience of the proposed additional resource(s). Each additional resource(s) will be assessed against the flexible grid criteria and point rated criteria as applicable, at Appendix 1 of the Statement of Work in Annex A. If the required number of additional resource(s) cannot be fully met by the Contractor, the required resources will be procured using another method of procurement.

7.1.3 Task Authorization

A. Work described at Annex A, Statement of Work, will be performed under the Contract on an "as and when requested basis".

B. With respect to the Work mentioned under paragraph A of this clause,

1. an obligation will come into force only when the Contractor receives a Task Authorization (TA), inclusive of any revisions, authorized and issued in accordance with this clause, and only to the extent designated in the authorized TA;

2. the TA Authority and limit will be determined in accordance with paragraph C of this clause;

3. the Contractor must not commence work until a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract. The Contractor acknowledges that work performed before a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract will be done at the Contractor's own risk and expense;

4. the task description, inclusive of any revisions, included in an authorized TA must fall within the scope of the Statement of Work, in Annex A; and

5. the TA, inclusive of any revisions, will be authorized under the Contract through the use of Annex E Task Authorization Form. An authorized TA is a completed Annex E signed by the TA Authority.

C. TA Authority and Limit

[redacted]

H. Minimum Work Guarantee - All the Work - Authorized TAs

1. "Maximum Contract Value" means the sum specified in Contract clause 7.6.2 (Canada's Total Liability, Cumulative Total of all authorized TAs); and "Minimum Contract Value" means a fixed amount of $5,000.00.

2. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with paragraph I.3 of this clause. In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract period to perform the Work. Canada's maximum liability for Work requested in authorized TAs, performed by the Contractor and accepted by Canada must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

3. In the event that Canada does not request Work in the amount of the Minimum Contract Value during the period of the Contract, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work requested in authorized TAs, performed by the Contractor and accepted by Canada.

4. Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract in whole or in part for default.

I. Periodic Usage Reports - Contracts with TAs

1. The Contractor must compile and maintain detailed and current data on its performance of Work required and requested under TAs (inclusive of any revisions) authorized and issued under the Contract.

2. No later than 15 calendar days after the end of each of the reporting periods below, the Contractor must submit to the Contracting Authority and Project Authority a periodic usage report containing, in an electronic spreadsheet (such as MSOffice Excel), the data elements specified in paragraphs J.3 and J.4 of this clause in the order they are presented. Where at the end of a reporting period, no changes are required to be made to the data contained in the periodic usage report submitted for the previous period, the Contractor must submit a "NIL" report to the Contracting Authority and Project Authority.

The reporting periods are defined as follows:

1st quarter: April 1 to June 30;
2nd quarter: July 1 to September 30;
3rd quarter: October 1 to December 31; and
4th quarter: January 1 to March 31.

3. For each TA authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- the TA number appearing on the TA form;
- the date the task was authorized appearing on the TA form;
- the total estimated cost of the task (Applicable Taxes extra) before any revisions appearing on the TA form;
- the following information appearing on the TA form must be included for each authorized revision, starting with revision 1, than 2, etc:

- the TA revision number;
- the date the revision to the task was authorized;
- the authorized increase or decrease (Applicable Taxes extra);
- the total estimated cost of the task (Applicable Taxes extra) after authorization of the revision;
- the total cost incurred for the task (as last revised, as applicable), Applicable Taxes extra;
- the total cost incurred and invoiced for the task (as last revised, as applicable), Applicable Taxes extra;
- the total amount of Applicable Taxes invoiced;
- the total amount paid, Applicable Taxes included;
- the start and completion date of the task (as last revised, as applicable); and
- the active status (i.e., the percentage of the work completed) of the task (as last revised, as applicable) with an explanation (as applicable).

4. For all TAs authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- the sum (Applicable Taxes extra) specified in clause 7.6.2, Canada's Total Liability, Cumulative Total of all Authorized TAs, as last amended;
- the total cost incurred for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- the total cost incurred and invoiced for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- the total amount of Applicable Taxes invoiced for all authorized tasks inclusive of any revisions; and
- the total amount paid for all authorized tasks inclusive of any revisions, Applicable Taxes extra.

J. Administration of the TA Process – Canada Border Services Agency

The administration of the TA process will be carried out by CBSA. This process includes: monitoring, controlling and reporting on expenditures of the Contract to the Contracting Authority.

7.2 Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines /standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

7.2.1 General Conditions

2035 (2020-05-28), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

7.2.2 Inspection and Acceptance

The Project Authority is the Inspection Authority. All reports, deliverable items, documents, goods and all services rendered under the Contract are subject to inspection by the Inspection Authority or representative. Should any report, document, good or service not be in accordance with the requirements of the Statement of Work and to the satisfaction of the Inspection Authority, as submitted, the Inspection Authority will have the right to reject it or require its correction at the sole expense of the Contractor before recommending payment.

7.2.3 Non-Disclosure Agreement

The Contractor must obtain from its employee(s) or subcontractor(s) the completed and signed non-disclosure agreement, attached at Annex F, and provide it to the Project Authority before they are given access to information by or on behalf of Canada in connection with the Work.

7.3 Security Requirement

SECURITY REQUIREMENT FOR CANADIAN SUPPLIER: Common-PS-SRCL #19

7.3.1 The following security requirement (SRCL and related clauses provided by the Contract Security Program apply and form part of the Contract:

1. The Contractor/Offeror must, at all times during the performance of the Contract/Standing Offer/Supply Arrangement, hold a valid Facility Security Clearance at the level of Secret, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC)
2. The Contractor/Offeror personnel requiring access to protected/classified information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **Reliability Status, Confidential** or **Secret** as required, granted or approved by CISD/PWGSC
3. The Contractor/Offeror must not remove any protected/classified information from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction
4. Subcontracts which contain security requirements are not to be awarded without the prior written permission of CISD/PWGSC
5. The Contractor/Offeror must comply with the provisions of the:
    a. Security Requirements Check List and security guide (if applicable), attached at Annex
    b. Industrial Security Manual (Latest Edition)

7.4 Term of Contract

7.4.1 Period of the Contract

The period of the Contract is from September 11, 2020 to September 10, 2023.

7.4.2 Option to Extend the Contract

The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to two additional one year period(s) under the same conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions as set out in the Basis of Payment.

Canada may exercise this option at any time by sending a written notice to the Contractor at least 15 calendar days before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced for administrative purposes only, through a contract amendment.

7.4.3 Termination on Thirty Days Notice

Canada reserves the right to terminate the Contract at any time in whole or in part by giving thirty (30) calendar days written notice to the Contractor.

In the event of such termination, Canada will only pay for costs incurred for services rendered and accepted by Canada up to the date of the termination. Despite any other provision of the Contract, there will be no other costs that will be paid to the Contractor as a result of the termination.

7.5 Authorities

7.5.1 Contracting Authority

The Contracting Authority for the Contract is:
Name: Robin St-Louis
Title: Supply Specialist
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Professional Services Procurement Directorate
Address: 10 Wellington Street, 5th Floor
Phone: 613-858-6185
E-mail address: robin.st-louis@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

7.5.2 Project Authority

The Project Authority for the Contract is:
Name: Diane Daly
Title: Senior Officer
Canada Border Services Agency
Phone: 343-291-6461
E-mail address: diane.daly@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

7.5.3 Contractor's Representative

The Contractor's Representative for the Contract is:
Name:
BDO Canada LLP
Phone:
E-mail address:

7.6 Payment

7.6.1 Basis of Payment

7.6.1.1 Authorized TA

Firm Price TA

In consideration of the Contractor satisfactorily completing all of its obligations under the authorized TA, the Contractor will be paid the firm lot price specified in the authorized TA, determined in accordance with the basis of payment in Annex A. Customs duties are included and applicable taxes are extra.

Canada will not pay the Contractor for any design changes, modifications or interpretations of the Work specified in the authorized TA, unless they have been authorized, in writing, by the Contracting Authority before their incorporation into the Work specified in the authorized TA.

TA subject to a Limitation of Expenditure

The Contractor will be paid for its costs reasonably and properly incurred in the performance of the Work specified in the authorized TA in accordance with the basis of payment in Annex A to the limitation of expenditure specified in the authorized TA.

Canada's total liability to the Contractor under the authorized TA must not exceed the limitation of expenditure specified in the authorized TA. Customs duties are included and Applicable Taxes are extra.

No increase in the liability of Canada or in the price of the Work specified in the authorized TA resulting from any design changes, modifications or interpretations of the Work specified in the authorized TA will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been authorized, in writing, by the TA Authority before their incorporation into the Work specified in the authorized TA. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceeded before obtaining the written authorization of the TA Authority. The Contractor must notify the TA Authority in writing as to the adequacy of this sum:

(a) when it is 75 percent committed, or

(b) four (4) months before the final delivery date specified in the authorized TA, or

(c) as soon as the Contractor considers that the authorized TA funds are inadequate for the completion of the Work specified in the authorized TA,

whichever comes first.

If the notification is for inadequate authorized TA funds, the Contractor must provide to the TA Authority, a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

7.6.2 Canada's Total Liability

A. Canada's total liability to the Contractor under the Contract for all authorized TAs, inclusive of any revisions, must not exceed the sum of $13,050,000.00. Customs duties are included and the applicable taxes are extra.

Document released under the Access to Information Act
Document divulgué en vertu de la Loi sur l'accès à l'information.

B. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

C. The Contractor must notify the Contracting Authority, in writing, as to the adequacy of this sum:

1. when it is 75 percent committed, or
2. four (4) months before the Contract expiry date, or
3. as soon as the Contractor considers that the sum is inadequate for the completion of the Work requested in all authorized TAs inclusive of any revisions, the applicable basis of payment of which is limitation of expenditure contract clause 7.6.1, TA subject to a Limitation of Expenditure],

whichever comes first.

D. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

7.6.3 Method of Payment

The following methods of payment will form part of the authorized TA

Single Payment

Canada will pay the Contractor upon completion and delivery of the Work in accordance with the payment provisions of the Contract if:

a. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

b. all such documents have been verified by Canada;

c. the Work delivered has been accepted by Canada.

Monthly Payments

Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

a. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

b. all such documents have been verified by Canada;

c. the Work performed has been accepted by Canada.

7.6.4 SACC Manual Clauses

A9117C (2007-11-30), T1204 – Direct Request by Customer Department

7.6.5 Electronic Payment of Invoices - Contract

The Contractor accepts to be paid using any of the following Electronic Payment Instruments:

a. Direct Deposit (Domestic and International);

7.6.6 Discretionary Audit

C0705C (2010-01-11), Discretionary Audit

7.7 Invoicing Instructions

1. The Contractor must submit invoices in accordance with the section entitled "Invoice Submission" of the general conditions. Invoices cannot be submitted until all work identified in the invoice is completed.

   Each invoice must be supported by:

   a. a copy of time sheets to support the time claimed;

   b. a copy of the release document and any other documents as specified in the Contract;

   c. a copy of the invoices, receipts, vouchers for all direct expenses, and all travel and living expenses;

   d. a copy of the monthly progress report.

2. Invoices must be distributed as follows:

   a. The original and one (1) copy must be forwarded to the address shown on page 1 of the Contract for certification and payment.
   OR

   b. One (1) copy must be forwarded to the Contracting Authority identified under the section entitled "Authorities" of the Contract.

7.8 Certifications and Additional Information

7.8.1 Compliance

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire period of the Contract.

7.8.2 Federal Contractors Program for Employment Equity - Default by the Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the Federal Contractors Program (FCP) for employment equity

"FCP Limited Eligibility to Bid List" available at the bottom of the page of the Employment and Social Development Canada (ESDC) - Labour's website (https://www.canada.ca/en/employment-social-development/programs/employment-equity/federal-contractor-program.html#). The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

7.9 Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

7.10 Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the list, the wording of the document that first appears on the list has priority over the wording of any document that subsequently appears on the list.

(a) the Articles of Agreement;
(b) the general conditions 2035 (2020-05-28), General Conditions - Higher Complexity - Services;
(d) Annex A, Statement of Work;
(e) Annex B, Basis of Payment;
(f) Annex C, Security Requirements Check List;
(g) Annex D, Insurance Requirements;
(h) the signed Task Authorizations (including all of its annexes, if any); and
(i) the Contractor's bid dated July 21, 2020.

7.11 Insurance Requirements

The Contractor must comply with the insurance requirements specified in Annex D. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

The Contractor must forward to the Contracting Authority within ten (10) days after the date of award of the Contract, a Certificate of Insurance evidencing the insurance coverage and confirming that the insurance policy complying with the requirements is in force. Coverage must be placed with an Insurer licensed to carry out business in Canada. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

7.12 No Responsibility to Pay for Work not performed due to Closure of Government Offices

Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation, closure of government offices or there are enhanced measures to restrict access to government premises and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation, closure or restricted access.
If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

ANNEX A, STATEMENT OF WORK

1.0 Title: Business, Leadership and Change Management Professional Services for Canada Border Services Agency - National Capital Region (NCR)

2.0 Objective

The Information, Science and Technology Branch (ISTB) of the Canada Border Services Agency (CBSA) requires a variety of business consulting, risk management and project leader professional resource services. These professional services must facilitate Government of Canada business processes, strategic planning requirements, change management initiatives and benefits management opportunities to be integrated into ISTB's business and strategic planning requirements.

The purpose of these services is to augment capacity in the planning and execution of departmental Information Management/Information Technology (IM/IT) initiatives managed by the Information, Science and Technology Branch (ISTB) team on an as and when required basis. The specific work involves providing key support, knowledge, recommendations and strategic planning for senior leadership for new and ever evolving business requirements.

These professional services are required to provide expert level advice, support and thought leadership in specific programs interdepartmentally and with other stakeholders accountable for IM/IT initiatives. This includes, but is not limited to, implementation suggestions, identification of road maps for way forward, expertise/guidance on evolving mandates and risk initiatives, provide resource capacity measurement, business case development, project guidance, change management to support CBSA's renewal and professional services on critical business requirements on an as and when required basis. This will ensure a third party independent view required to provide feedback, monitoring and expertise/recommendations to ensure the strategic component of projects and business initiatives progresses as required.

3.0 Background

CBSA is responsible for providing integrated services supporting national security and public safety priorities while facilitating the free flow of people and goods. CBSA manages this priority through its design, development, implementation and ongoing support of IM/IT tools and systems at the Agency, while maintaining the integrity and availability of all technology infrastructures and applications.

ISTB provides delivery of technology products, applications and services to meet business needs while investing in modern IT infrastructure to maintain, build on and innovate current and future IM/IT Agency initiatives. Currently, CBSA, including CBSA is going through an agency wide reorganization. This requires extensive business and project management expertise. As the development of the branch begins, work on a client support model is just beginning. The evolution of this branch includes developing a new reorganization and change management model to be integrated with other divisions in the agency.

Working with various partners, e.g. Treasury Board Secretariat (TBS), Canada Revenue Agency CRA, and SSC, CBSA ensures all required IM/IT initiatives are strategically aligned with operational requirements and are delivered on time, on budget and in accordance with objectives. CBSA is seeking business professional services on an as and when required basis to provide critical key support for these initiatives.

4.0 Scope of the Work

The Contractor must provide risk management and business consulting professional services on an as and when required basis in the National Capital Region (NCR) as initiated through Task Authorizations. Projects may be in any of the following stages: inception, identification, in the midst of work, proof of concept, pilot, or delivery using traditional and agile methodologies.

The Requirement is for Business Consulting with experience in Government of Canada policies and directives, project management methodologies, processes and relevant frameworks. Business process re-engineering will move manual processes for each project to more standardized risk-based processes and project alignment. Identification, development and implementation of new frameworks, policies, standards and other business best practices will be required.

ISTB would like to integrate benefits management into its project management practices through frameworks, strategies and processes as appropriate. Benefits management is a practice used to track and manage the benefits identified through the delivery of projects, by defining the program and operational key performance indicators (KPI's), understanding and standardizing the data that drives the KPIs, learning from their evaluation and then optimizing the organization through change. The professional services required under this contract will include, but not be limited to the support and delivery of the changes required to enable the management of benefits in ISTB's project management environment including the monitoring of benefits.

The following resources are required for this contract.

Stream 2 – Business Consulting/Change Management Stream

2.1 – Business Analyst – Senior
2.3 – Business Consultant – Senior
2.8 – Business Architect - Senior

Stream 3 – Project Management Services Stream

3.2 – Project Manager - Senior
3.3 – Project Leader/Executive – Senior
3.6 – Risk Management Specialist – Senior

5.0 Tasks

The Contractor must provide support for business consulting, change management and project executive professional services on an as and when required basis as initiated through Task Authorizations (TAs).

Tasks will include, but not be limited to the following:

Business Analyst

The required services may include, but are not limited to the following:

- Advising Senior Management on a range of issues affecting the organization's ability to achieve the project's business objectives

- Assessing the organization's capacity/capability to undertake and successfully deliver t an initiative or a change
- Consulting stakeholders (individually or by means of facilitating group sessions) to identify comprehensive business requirements
- Documenting business requirements for all stakeholders
- Providing support in analyzing, evaluating and controlling risks, especially related to requirements
- Managing the implementation of an organizational improvement plan to identify, analyze, plan, track and control organizational improvements on a continuous basis; and
- Performing Strengths, Weaknesses, Opportunities and Threats (SWOT) Analysis when producing a business case to determine whether further investment in a project is warranted.

Business Consultant

The required services may include, but are not limited to the following:

- Specifying the organization's objectives, developing policies, standards and plans to achieve objectives
- Advising Senior Management on a range of issues affecting the organization's ability to achieve the business objectives
- Identifying opportunities for, assisting in the prioritization of, and assignment of organizational improvement
- Developing and/or managing the implementation of an organizational improvement plan to identify, analyze, plan, track and control organizational improvements on a continuous basis
- Making recommendations and providing advice for improvements and assisting in developing solutions and implementing recommendations
- Collecting and analyzing information and presenting findings on complex issues, carrying out or coordinating research as required and preparing reports
- Defining and producing business requirement document
- Coaching on business
- Assisting stakeholders with understanding their strategic goals

- Analyzing stakeholder's business objectives and recommending and developing solutions to address their business problem
- Implementing and evaluating cross-functional decisions that will enable an organization to achieve its objectives
- Assessing the organization's capacity/capability to undertake and successfully deliver an initiative or a change
- Defining, developing and implementing business strategies and plans
- Examining the link between the goals of the organization and how the work is performed to achieve those objectives at strategic and operational levels
- Processing problems into solutions or new opportunities/initiatives, identifying and researching best practices
- Performing Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis; and
- Developing Mission and Vision statements.

Business Architect

The required services may include, but are not limited to the following:

- Developing policies and rules that allow an organization to carry out its mandate and functional responsibilities, and that govern the organization's actual and planned capabilities in terms of data, human resources, communication facilities and management responsibilities
- Conducting an assessment of the project's business architecture, process and performances
- Recommending changes to improve operational performance
- Ensuring consistency and integration with the organization's and government architectures and business strategies
- Evaluating the feasibility of the architecture and technologies related to a business change
- Developing principles of operation and concept of operations
- Identifying risks associated with the architecture and technologies and recommending risk mitigation
- Advising Senior Management on trends and emerging technologies and their impact on the organization's and government architectures and business strategies
- Recommending alternative solutions, methodologies and strategies
- Assisting in the prioritization and assignment of architectural improvements
- Managing the development and implementation of an architectural improvement plan; and
- Coaching, mentoring and training the organization on business architecture.

Project Manager

The required services may include, but are not limited to the following:

- Planning and coordinating project management activities including financial, planning and contracting aspects
- Planning and organizing a project management office
- Giving briefings on progress and concerns of project
- Coordinating and preparing documentation in response to scheduled and unscheduled reports, returns and observations to update management on project progress
- Planning and coordinating the activities of project personnel, internal customers, contractors and other support providers
- Preparing formal work breakdown structure and compliance charts
- Producing draft plans and sections for incorporation into the Project Implementation Plan

[illegible] under the Access to Information Act
[illegible] Divulgation en vertu de la loi sur l'Accès à l'information.

- Preparing draft evaluation plans, criteria and evaluation schedules
- Developing, planning, analyzing, evaluating and prioritizing deliverables and requirements
- Defining and documenting development team objectives
- Determining and obtaining budgetary requirements, composition, roles, responsibilities and terms of reference for the team
- Planning, directing and controlling the activities of a project team within scheduled time and cost parameters
- Monitoring the design, implementation and operations start up of the project against established goals, objectives and milestones
- Reporting progress of the project on an ongoing basis and at scheduled points in the life cycle
- Meeting with stakeholders and other project managers and stating problems in a form capable of being solved
- Preparing plans, charts, tables and diagrams to assist in analyzing or displaying problems
- Working with a variety of project management tools
- Formulating and managing project plans by defining deliverables, identifying key milestones, reviewing project progress, and engaging in ongoing risk management
- Coordinating and directing project team(s) in order to meet project objectives for content, quality, costs, and schedules
- Ensuring management staff is provided with timely and accurate project information and status updates
- Developing project control and reporting procedures and managing changes in operational plan
- Conducting post project reviews/lessons learned
- Contributing to the organization's strategic and business planning initiatives (for example, identifying strategic goals and objectives and implementing initiatives to achieve them, Policy Development, Standards Development and Program Review)
- Assuming leadership at the appropriate phases of planning, action, and evaluation
- Recognizing and taking action on opportunities to combine professional resources through partnering arrangements (for example, multi-disciplinary practices)
- Contributing to development of organizational vision and mission; and
- Coordinates, drafts and prepares for signature formal project documents and reports.

Project Leader/Executive

The required services may include, but are not limited to the following:

- Assessing the organization's capacity/capability to undertake and successfully deliver a project in the context of the overall program or portfolio program or portfolio priorities through strategic planning
- Advising Senior Management on a range of issues affecting the organization's ability to achieve the project's business objectives
- Assisting in the prioritization and assignment of projects within the program/portfolio
- Managing several Senior Project Managers, each responsible for an element of the project/program/portfolio and its associated team (for example project and financial management)
- Meeting with organizational executives to ensure all organizational (internal and external) stakeholders are committed to moving forward on the project (for example opportunity evaluation)
- Formulating statements of problems; establishing procedures for the development and implementation of significant, new or modified project, program or portfolio elements to solve these problems, and obtaining approval thereof
- Managing the implementation of a project/program/portfolio to identify, analyze, plan, track and control progress on a continuous basis

[illegible] - Released under the Access to Information Act
[illegible] - Divulgué en vertu de la Loi sur l'Accès à l'information.

- Making recommendations and providing advice for improvements and assisting in developing solutions and implementing recommendations (for example policy development and standards development)
- Preparing and presenting findings, status and other relevant matters
- Overseeing the development of a Project Business Case (for example business planning and program review)
- Managing Program changes in accordance with the change management process
- Motivating the team to ensure commitment to the program's objectives specifying the general requirements of the project
- Developing project alternatives and identifying their administrative, economic, and technical feasibility and practicality associated policy and organizational change requirements
- Planning, directing, and controlling the activities of a project team within scheduled time and cost parameters
- Producing overall project plans and obtaining approval of preliminary analysis
- Updating and providing briefings to upper management on progress and concerns of the project.

Risk Management Specialist

The required services may include, but are not limited to the following:

- Conducting risk assessments and evaluating potential risk and losses
- Identifying project and procurement risks
- Reviewing and auditing claims
- Recommending alternative solutions, methodologies and strategies for risk mitigation and management
- Assisting in prioritization and assignment of risks
- Assisting in the development and/or implementation of Risk Management Plans
- Developing and managing the implementation of Risk Management Plans (safety programs) to identify, analyze, plan, track, evaluate and control project risks on a continuous basis throughout the project life cycle
- Coaching, mentoring and training project teams in risk mitigation techniques
- Developing and implementing business continuity plans
- Developing crisis and emergency communication and/or management planning strategies
- Reviewing the organization's insurance and risk management programs and making recommendations regarding coverage improvements, administration, loss control and financing mechanisms
- Providing leadership and support to the design, implementation and evaluation of clients products/services performance measures, risk management and risk mitigation strategies
- Documenting process improvements
- Preparing reports for internal or external publication (Corporate Services, Policy, Communications)
- Liaising with and interviewing stakeholders, as required, to obtain, clarify and exchange information, in-order to co-ordinate and manage the Risk Assessment Process
- Identifying, confirming and documenting the risk tolerance for the process, project, program, or strategic risk and using this tolerance to guide all analysis, assessment and recommendations undertaken or produced
- Identifying, confirming and documenting the objectives and priorities specific to the process, project, program or strategic direction being assessed, feasibility studies
- Identifying relevant risks and opportunities (including, but not limited to, economic, political, operational, legal, reputation, technical, organizational, accounting, banking and social risks) that threaten the objectives and priorities

- Utilizing both quantitative and qualitative techniques, as appropriate, to assess the likelihood that a risk event will occur; and/or the impact if the risk event occurs
- Recommending a ranked-order for risks and opportunities identified
- Recommending and documenting suggested Risk Responses necessary to manage the likelihood and/or impact of the identified risks
- Performing Control Risk Assessments and analysis, which may include statistical sampling and analysis of existing controls
- Assisting with the on-going monitoring of risk and assisting with the implementation of risk response/mitigation strategies
- Preparing draft and finalized risk assessments, briefing notes, presentations and papers related to risk management, and developing and updating risk management plans; and
- Providing advice with respect to risk management best practices and providing guidance and direction to assist in managing risk.

5.1 Common Tasks for All Work Streams

Other common tasks may include, but are not limited to the following:

- Define scope and metrics for dashboards and scorecards
- Support the design, build, and operationalization of dashboards and scorecards and also consider ability to automate by leveraging existing and new technologies
- Support engagement with other sectors and peers as to dashboard requirements
- Design processes to ensure the sustainability and evolution of dashboards and other management tools
- Develop a performance management framework and define associated standards and tools

And in addition for all categories the tasks will include, but not be limited to the following:

- Planning and coordinating project management activities including planning/coordination/guidance and process aspects;
- Working with a variety of stakeholders, provide expert best practice advice/solutions for PMSL projects;
- Provision of documentation such as Statement of Requirements (SOR), project plans, feasibility reports, schedules, project management plans, risk management plans and lessons learned;
- Formulating and managing the project plans by defining deliverables, identifying and providing resources, identifying key milestones, reviewing project progress against milestones, and engaging ongoing risk management;
- Developing and maintaining systems for the management and control of requirements on projects in a manner compatible with client standards and guidelines. This includes communications and consultations with various stakeholders in the process;
- Support of the Project Authority to oversee initiatives within CCSD and on various IM/IT initiatives;
- Support of the Project Authority to oversee the change management process for requirements;
- Provide monthly project progress reports;
- Conducting stakeholder meetings; and
- Working with project teams and other stakeholders, manage the requirements on projects.

On an as- and when-required basis, the key activities to be performed within any work stream may include:

1. Reviewing strategic documents and making necessary adjustments to target pain points and reduce barriers and challenges;

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

2. Identifying potential changes in the technology service delivery environment, including partnership opportunities both within and outside ISTB;
3. Researching relevant organizations to identify leading practices and lessons learned related to modern border management;
4. Developing appropriate strategies, plans, recommendations, considerations, and tools and templates to improve service delivery;
5. Reviewing and aligning the necessary governance, processes, and procedures for effective service delivery – such as providing alignment to CBSA/ISTB Priorities, Integrated Business Plan (IBP), Investment Technology Plan (ITP),CBSA Operational Plan and DPR's.
6. Develop governance processes
7. Developing a roadmap for the future and documenting high-level implementation considerations and timeframe; and
8. Providing analysis and advice in the execution of activities.

6.0 Deliverables

The Contractor must provide the following deliverables as specified in the Task Authorization issued, which can include, but are not limited to:

- Benefits management strategy
- Benefits management performance monitoring strategy
- Cost Optimization Report
- End User Device Rationalization Implementation Plan
- Benefits management implementation plan
- TBS submissions
- Directives, templates, tools and other document necessary to perform benefits management
- Training and training material
- Senior Executive Reporting (such as Dashboards)/Scorecards
- Funding Tracking – Management Reports (Projects, funding and programs)
- Capacity planning report
- Risk assessment report
- Pilot and pilot report
- Completed templates/tools to be used as example
- Presentations and/or other communication products
- Guidance, advice and knowledge transfer reports and papers
- Significant accomplishments Report showing all activities completed during the previous period.
- Planned Activities Report showing all activities planned for the next period.
- Unplanned Activities showing all activities completed which were not planned for the period.
- Risks, Issues and Mitigation Report identifying all risks and issues, with probability of occurrence, impact, and measures applied to mitigate the risks.
- Monthly status report
- Business Cases
- Treasury Board Submissions
- Outcomes / Benefit Management Plans
- Independent Third Party Reviews
- Organizational Project Management Capacity Assessments
- Logic Model
- Performance Measurement Strategies

Project **gating deliverables** should adhere to the following standards:
https://www.canada.ca/en/treasury-board-secretariat/services/information-technology-project-management/project-management/guide-project-gating-it-enabled-projects.html

NOTE: Project Reviews should be in accordance with the TBS Handbook on Project Management Reviews at:
https://www.canada.ca/en/treasury-board-secretariat/services/information-technology-project-management/project-management/independent-reviewers-handbook.html

Deliverables must be submitted in hard and soft copies in the appropriate formats (e.g. MS Project or MS Office Suite applications) or Adobe PDF as identified in the TA. All electronic deliverables must comply with departmental software standards, currently MS Office Suite or Adobe PDF latest version. Where required, CBSA will provide the Contractor with the required forms and templates to meet these standards.

All documents developed and/or updated by each of the Contractor's resources must be provided to the Project Authority for review, approval and signature (as required).

7.0 Client Support

The Client will provide all documentation and information necessary for the Work.

8.0 Language Requirements

While proposed resources must be fluent in English, there may be a requirement for specific resources to be fluent in both official languages, which will be specified in the TA.

9.0 Work Location

The Contractor's resources will be required to work onsite at CBSA site offices or offsite in the National Capital Region (NCR), which will be identified in the Task Authorization.

CBSA will provide, subject to security requirements, and only to the specified resource personnel, access to identified databases or applications residing on CBSA computers or networks for the sole purpose of executing tasks associated with this Contract. CBSA, at its sole discretion, will identify the nature and characteristics of such access.

ANNEX B, BASIS OF PAYMENT

A- Contract Period (From September 11, 2020 to September 10, 2023)

During the period of the Contract, for Work performed in accordance with the Contract, the Contractor will be paid as specified below.

1.0 Professional Fees

The Contractor will be paid all inclusive fixed time rates as follows:

	TSPS Stream and Category	All-Inclusive Firm Per Diem Rate (In CAD $)
Contract Period 1: From September 11, 2020 to September 10, 2021		
1a	2.1 Business Analyst - Senior	[redacted]
1b	2.4 Business Consultant – Senior	[redacted]
1c	2.8 Business Architect – Senior	[redacted]
1d	3.2 Project Manager - Senior	[redacted]
1e	3.3 Project Leader/Executive - Senior	[redacted]
1f	3.6 Risk Management Specialist - Senior	[redacted]

	TSPS Stream and Category	All-Inclusive Firm Per Diem Rate (In CAD $)
Contract Period 2: From September 11, 2021 to September 10, 2022		
2a	2.1 Business Analyst - Senior	[redacted]
2b	2.4 Business Consultant – Senior	[redacted]
2c	2.8 Business Architect – Senior	[redacted]
2d	3.2 Project Manager - Senior	[redacted]
2e	3.3 Project Leader/Executive - Senior	[redacted]
2f	3.6 Risk Management Specialist - Senior	[redacted]

	TSPS Stream and Category	All-Inclusive Firm Per Diem Rate (In CAD $)
Contract Period 3: From September 11. 2022 to September 10, 2023		
3a	2.1 Business Analyst - Senior	[redacted]
3b	2.4 Business Consultant – Senior	[redacted]
3c	2.8 Business Architect – Senior	[redacted]
3d	3.2 Project Manager - Senior	[redacted]
3e	3.3 Project Leader/Executive - Senior	[redacted]
3f	3.6 Risk Management Specialist - Senior	[redacted]

For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and sick leave. If time worked is more or less than a day, the all-inclusive fixed daily rate must be prorated to reflect the actual time worked.

Total Estimated Cost of Professional Fees: $13,050,000.00

B- Option to Extend the Term of the Contract

This section is only applicable if the option to extend the Contract is exercised by Canada.

During the extended period of the Contract specified below, the Contractor will be paid as specified below to perform all the Work in relation to the Contract extension.

B-1 Extended Contract Period (From _____ to _______)

	TSPS Stream and Category	All-Inclusive Firm Per Diem Rate (In CAD $)
4	**Option Period 1: From expiry of Contract Period 3 to one year later**	
4a	2.1 Business Analyst - Senior	
4b	2.4 Business Consultant – Senior	
4c	2.8 Business Architect – Senior	
4d	3.2 Project Manager - Senior	
4e	3.3 Project Leader/Executive - Senior	
4f	3.6 Risk Management Specialist - Senior	

	TSPS Stream and Category	All-Inclusive Firm Per Diem Rate (In CAD $)
5	**Option Period 2: From expiry of Option Period 1 to one year later**	
5a	2.1 Business Analyst - Senior	
5b	2.4 Business Consultant – Senior	
5c	2.8 Business Architect – Senior	
5d	3.2 Project Manager - Senior	
5e	3.3 Project Leader/Executive - Senior	
5f	3.6 Risk Management Specialist - Senior	

For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and sick leave. If time worked is more or less than a day, the all-inclusive fixed daily rate must be prorated to reflect the actual time worked.

ANNEX D, INSURANCE REQUIREMENTS

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

2.The Commercial General Liability policy must include the following:

a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.
b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.
c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.
d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.
e. Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.
f. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.
g. Employees and, if applicable, Volunteers must be included as Additional Insured.
h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)
i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.
j. Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.
k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.
l. Litigation Rights: Pursuant to subsection 5(d) of the Department of Justice Act, S.C. 1993, c. J-2, s.1, if a suit is instituted for or against Canada which the Insurer would, but for this clause, have the right to pursue or defend on behalf of Canada as an Additional Named Insured under the insurance policy, the Insurer must promptly contact the Attorney General of Canada to agree on the legal strategies by sending a letter, by registered mail or by courier, with an acknowledgement of receipt.

For the province of Quebec, send to:

Director Business Law Directorate,
Quebec Regional Office (Ottawa),
Department of Justice,
284 Wellington Street, Room SAT-6042,
Ottawa, Ontario, K1A 0H8

For other provinces and territories, send to:

Senior General Counsel,
Civil Litigation Section,
Department of Justice

234 Wellington Street, East Tower
Ottawa, Ontario K1A 0H8

A copy of the letter must be sent to the Contracting Authority. Canada reserves the right to co-defend any action brought against Canada. All expenses incurred by Canada to co-defend such actions will be at Canada's expense. If Canada decides to co-defend any action brought against it, and Canada does not agree to a proposed settlement agreed to by the Contractor's insurer and the plaintiff(s) that would result in the settlement or dismissal of the action against Canada, then Canada will be responsible to the Contractor's insurer for any difference between the proposed settlement amount and the amount finally awarded or paid to the plaintiffs (inclusive of costs and interest) on behalf of Canada.

3.The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

4.If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

5.The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

ANNEX E, TASK AUTHORIZATION FORM

Contract Number	At STEP 1 a: enter the PWGSC resulting contract number
Task Authorization (TA) Number	Instructions to the TA Authority: Enter the number here.

Contractor's Name and Address

Instructions to the TA Authority: Enter the name and address here.

Total Estimated Cost of Task (Applicable Taxes extra) before any revisions:	$__________ Instructions to the TA Authority: Enter the amount here.

TA Revisions Previously Authorized

Instructions to the TA Authority: the information for the previously authorized revisions must be presented in ascending order of assigned revision numbers (the first revision must be identified as No. 1, the second as No. 2, etc). If no increase or decrease was authorized, enter $0.00. Add rows, as needed

TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.

New TA Revision

Instructions to the TA Authority: the first revision must be identified as No. 1, the second as No. 2, etc. If no increase or decrease is authorized, enter $0.00.

TA Revision Number: __________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $__________ Instructions to the TA Authority: Enter the amount here, as applicable.
Total Estimated Cost of Task (Applicable Taxes extra) after this revision:	$__________ Instructions to the TA Authority: Enter the amount here, as applicable.

Contract Security Requirements (as applicable)

This task includes security requirements. At STEP 1 a): check the applicable boxes.

☐ No

☐ Yes. Refer to the Security Requirements Checklist (SRCL) annex of the Contract.

Remarks: At STEP 1 a), 2a) or 3. enter the remarks, if any, or enter : "N/A".

Required Work

Instructions to the TA Authority: The content of sections A, B, C and D below must be in accordance with the Contract. To view the instructions for Section A, click on the hyperlink.

SECTION A – Task Description of the Work Required Instructions for Section A

SECTION B – Applicable Basis of Payment Instructions for Section B

SECTION C - Cost Breakdown of Task Instructions for Section C

SECTION D- Applicable Method of Payment Instructions for Section D

Authorization - Authorization

By signing this TA, the Project Authority or the PWGSC Contracting Authority or both, as applicable, certify (ies) that the content of this TA is in accordance with the Contract.

En apposant sa signature sur cette AT, le chargé de projet ou l'autorité contractante de TPSGC ou, s'il y a lieu, les deux atteste(nt) que le contenu de cette AT respecte les conditions du contrat.

ANNEX F, NON-DISCLOSURE AGREEMENT

I, ___________ , recognize that in the course of my work as an employee or subcontractor of ___________ , I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. _______ between Her Majesty the Queen in right of Canada, represented by the Minister of Public Works and Government Services and ________ , including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce, copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: ________________

For the Minister - Pour le Ministre

Canada

This amendment is raised to make some administrative changes as follows:

Under Article 2 - Task Authorization

DELETE

(f) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to $300,000.00 (excluding Applicable Taxes), the TA must be signed by the SPMMD Representative; and

(ii) for any TA with a value greater than this amount, a TA must be signed by the SPMMD Representative and the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

INSERT:

(f) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(iii) for any TA, inclusive of revisions, with a value less than or equal to $300,000.00 (excluding Applicable Taxes), the TA must be signed by the Technical Authority and SPMMD Representative; and

(iv) for any TA with a value greater than this amount, a TA must be signed by the Technical Authority, SPMMD Representative and the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

Under Article 7 - Authorities

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Eric Carrière
Title: Manager, Application Development
Common and Corporate Systems Division
Organization: Canada Boarder Services Agency
Address: 333 North River Road, Ottawa, ON K1A 0L8
Telephone: 343-291-5329
E-mail address: Eric.Carriere@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

ADD:

In his absence, the Technical Authority is:

Name: Sylvie Gingras
Title: Director, Common and Corporate Systems Division
Organization: Canada Boarder Services Agency
Address: 355 North River Road, Ottawa, ON K1A 0L8
Telephone: 343-291-5315
E-mail address: Sylvie.Gingras@cbsa-asfc.gc.ca

Canada

The following clauses and conditions apply to and form part of the contract.

1.1 Statement of Work

The Contractor must perform the Work in accordance with the Statement of Work in Annex A.

1.1.1 Task Authorization

A. Work described at Annex A, Statement of Work will be performed under the Contract on an "as and when requested basis".

B. With respect to the Work mentioned under paragraph A of this clause,

1. an obligation will come into force only when the Contractor receives a Task Authorization (TA), inclusive of any revisions, authorized and issued in accordance with this clause, and only to the extent designated in the authorized TA;
2. the TA Authority and limit will be determined in accordance with paragraph C of this clause;
3. the Contractor must not commence work until a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract. The Contractor acknowledges that work performed before a TA, inclusive of any revisions, has been authorized and issued in accordance with the Contract will be done at the Contractor's own risk and expense;
4. the task description, inclusive of any revisions, included in an authorized TA must fall within the scope of the Statement of Work, in Annex A; and
5. the TA, inclusive of any revisions, will be authorized under the Contract through the use of Annex E Task Authorization Form. An authorized TA is a completed Annex E signed by the TA Authority.

C. TA Authority and Limit

The CBSA Authority may recommend individual TAs, inclusive of any revisions. CBSA Authority may approve the recommended TAs of which is Limitation of Expenditure up to a limit of $1,000,000.00, applicable Taxes included. Any TA the total value of which would exceed that limit or any revision to a previously authorized TA that would increase the TA total value above that limit, or any revisions to any previously authorized TA the applicable Contract basis of payment of which is firm lot price must be authorized by the PSPC Contracting Authority before issuance to the Contractor.

D. The authority specified under paragraph C of this clause is granted subject to the sum specified in the Contract under clause 7.6.2 (Canada's Total Liability, Cumulative Total of all authorized TAs) not being exceeded.

E. Multiple contracts

As more than one contract has been awarded for this requirement of Work specified in the Statement of Work, in Annex A, a request to perform a task will be sent in accordance with paragraph F of this clause to the first ranked contractor in the Contractors' order of ranking listed below. in If that contractor confirms in writing that it is unable to perform the task as a result of previous commitments under one or more than one authorized TA, the request to perform a task will be forwarded to the next highest ranked contractor in the Contractors' order of ranking until another contractor in the ranking can perform the task. If no contractor in the ranking can perform the task, Canada reserves the right to acquire the required Work by other means. A contractor in the ranking may advise the Project Authority and the Contracting Authority in writing that it is unable to carry out additional tasks as a result of previous commitments under one or more than one authorized TA and no request to perform a task will be sent to that contractor until that contractor has given notice in writing to the Project Authority and the Contracting Authority that it is available to perform additional tasks.

F. Task Authorization (TA) Process

For each task or revision of a previously authorized task, the Project Authority will provide the Contractor with a request to perform a task prepared using Annex E Task Authorization Form containing as a minimum:

- the task or revised task description of the Work required, including:
  - the details of the activities or revised activities to be performed;
  - a description of the deliverables or revised deliverables to be submitted; and
  - a schedule or revised schedule indicating completion dates for the major activities or submission dates for the deliverables, or both, as applicable;
- the Contract security requirements applicable to the task or revised task;
- the Contract basis (bases) of payment applicable to the task or revised task; and
- the Contract method(s) of payment applicable to the task or revised task and, as applicable, the associated schedule of milestones.

G. Within 7 business days of its receipt of the request, the Contractor must provide the Project Authority with a signed and dated response prepared and submitted using the TA form received from the Project Authority, containing as a minimum:

1. the total estimated cost proposed for performing the task or, as applicable, revised task;
2. a breakdown of that cost in accordance with Annex B, to be provided, as applicable, per milestone contained in the Schedule of Milestones; and
3. for each resource proposed by the Contractor for the performance of the Work required who is not identified under the Specific Person (s) clause of the Contract:

    - the name of the proposed resource(s);
    - the resume of the proposed resource(s); and
    - A completed Mandatory and Point Rated Evaluation Grid demonstrating that the proposed resource(s) meet(s):
      - the Contract security requirements;
      - all the mandatory evaluation criteria in Attachment 2 of the Statement of Work; and
      - the required minimum number of points for the point rated technical criteria in Attachment 2 of the Statement of Work.

H. Valid Response to a TA

A valid TA response is one that is submitted within the required time period and meets all requirements of the draft TA issued, including proposing the required number of resources who each meet the all of the Mandatory Criteria and achieve or exceed the minimum score for the Point Rated Criteria (as per Appendix C to Annex A - Mandatory and Point Rated Evaluation Criteria) of the categories identified in the draft TA.

I. Three (3) Strike Rule

A "strike" is defined as any of the following:

1. The Contractor does not submit a valid response to a Task Authorization as per G and H above.
2. The Contractor's proposed resource is selected for TA award but is not available to accept the TA within 10 business days of TA Award. (Note: In the event that CBSA takes longer than 15 business days to complete the evaluation and the CBSA security clearance, this will not constitute a strike.)
3. A resource is terminated for cause by the Project Authority for non-performance during the performance of a TA.

In the event that a resource submits notice that they will be leaving the project, the request for the Contractor to submit a suitable replacement within 5 business days as per G above will be treated like a new TA request and will be subject to strike rules 1 and 2 above (i.e. I. bullets 1 and 2).

For every instance identified above for a specific category/level, the Contractor will accumulate a "strike" with respect to that category/level. For greater clarity, only 1 strike can be issued against each TA, which is identifiable by its task number, regardless of how many resources were being requested as part of that TA. When a Contractor is assessed a strike with respect to a TA, then the next ranked Company will be given the opportunity to fill that TA request.

In the event that a contractor accumulates three strikes as defined in the above paragraphs in a category/level in the same quarter, Canada may immediately notify the contractor that they will be suspended from bidding on this category/level for the balance of the current quarter and the following 3 month quarter.

At the end of the following 3 month quarter, the Contractor will be re-instated for that category/level. If, following reinstatement the Contractor accumulates 3 strikes within the quarter immediately following reinstatement, the Contractor may be permanently suspended from that category/level for the remainder of the contract period and any subsequent option periods. If a Contractor is permanently suspended from a category/level, that Contractor will be permanently removed from the ranking for that category/level.

J. Corporate Incentive

In the event that the same Contractor's resource remains in the position for the full term of the TA assignment (for all TAs in excess of a 6 month period), the Contractor will be provided an incentive amount based on the following formula:

Incentive amount = (TA duration (in number of working days) * Learning Period (20%) * Per Diem of the ressource * Productivity Loss (50%)) * Vendor share (50%)

(E.G. A Task Authorization has been issued to a Contractor for a resource having a firm period in excess of 6 months. Should that resource remain in place for the full duration of the TA, the Contractor would be paid a lump sum incentive, the amount to be calculated against the total cost of that resource's TA value at completion of the TA period as per the above formula.)

Please note that when a TA includes multiple resources, all resources must remain in their position for the full term as defined for the respective resources within the TA, in order for the incentive to be paid for that TA.

K. Periodic Usage Reports - Contracts with TAs

1. The Contractor must compile and maintain detailed and current data on its performance of Work required and requested under TAs (inclusive of any revisions) authorized and issued under the Contract.

2. No later than 15 calendar days after the end of each of the reporting periods below, the Contractor must submit to the Contracting Authority and Project Authority a periodic usage report containing, in an electronic spreadsheet (such as MSOffice Excel), the data elements specified in paragraphs J.3 and J.4 of this clause in the order they are presented. Where at the end of a reporting period, no changes are required to be made to the data contained in the periodic usage report submitted for the previous period, the Contractor must submit a "NIL" report to the Contracting Authority and Project Authority.

The reporting periods are defined as follows:

1st quarter: April 1 to June 30;
2nd quarter: July 1 to September 30;
3rd quarter: October 1 to December 31; and
4th quarter: January 1 to March 31.

3. For each TA authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- the TA number appearing on the TA form;
- the date the task was authorized appearing on the TA form;
- the total estimated cost of the task (Applicable Taxes extra) before any revisions appearing on the TA form;
- the following information appearing on the TA form must be included for each authorized revision, starting with revision 1, then 2, etc:
  - the TA revision number;
  - the date the revision to the task was authorized;
  - the authorized increase or decrease (Applicable Taxes extra);
  - the total estimated cost of the task (Applicable Taxes extra) after authorization of the revision;
  - the total cost incurred for the task (as last revised, as applicable), Applicable Taxes extra;
  - the total cost incurred and invoiced for the task (as last revised,as applicable), Applicable Taxes extra;
- the total amount of Applicable Taxes invoiced;
- the total amount paid, Applicable Taxes included;
- the start and completion date of the task (as last revised, as applicable); and
- the active status (i.e., the percentage of the work completed) of the task (as last revised, as applicable) with an explanation (as applicable).

4. For all TAs authorized and issued under the Contract, the data must contain the following data elements in the order presented:

- the sum (Applicable Taxes extra) specified in clause 7.6.2, Canada's Total Liability, Cumulative Total of all Authorized TAs, as last amended;
- the total cost incurred for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- the total cost incurred and invoiced for all authorized tasks inclusive of any revisions, Applicable Taxes extra;
- the total amount of Applicable Taxes invoiced for all authorized tasks inclusive of any revisions; and
- the total amount paid for all authorized tasks inclusive of any revisions, Applicable Taxes extra.

1.2 Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines /standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

1.2.1 General Conditions

2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

The conditions of any contract awarded under this Supply Arrangement will be in accordance with: 2035 (Client enters date) General Conditions - Higher Complexity – Services, with the following replacements:

Section 08 – Replacement of Specific Individuals, of 2035 (Client enters date) General Conditions – Higher Complexity – Services is deleted and replaced with the following:

1. *if the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:*

   a) *the name, qualifications and experience of a proposed replacement immediately available for Work; and*
   b) *security information on the proposed replacement as specified by Canada*, if applicable.

   Any assessment of the information provided will occur as per 2 (b) below.

2. Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

   a) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract for default under Article titled "Default of the Contractor"; or
   b) assess the information provided under 1 (a) and (b) above or, if it has not yet been provided, require the Contractor propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that meet or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in 2 (a) above, or require the Contractor to propose another replacement within five working days' notice.

3. Where an Excusable Delay applies, Canada may require 2 (b) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

4. The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that a resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

does not order that a resource stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

5. The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

Section 17 - Interest on Overdue Accounts, of 2035 (Client enters date) General Conditions - Higher Complexity - Services - will not apply to payments made by credit cards.

With respect to Section 30 - Termination for Convenience, of 2035 (Client enters date) General Conditions - Higher Complexity - Services, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

04) The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

05) Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:

(a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination; or
(b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

06) The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

2. Professional Services

a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described

in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

b) If the Contractor fails to deliver any deliverable or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the

Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

3. Reorganization of Client

The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

4. No Responsibility to Pay for Work not performed due to Closure of Government Offices

a) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

b) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

5. Time Verification

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

6. Joint Venture Contractor

Not applicable.

7. Inspection and Acceptance

The Project Authority is the Inspection Authority. All reports, deliverable items, documents, goods and all services rendered under the Contract are subject to inspection by the Inspection Authority or representative. Should any report, document, good or service not be in accordance with the requirements of the Statement of Work and to the satisfaction of the Inspection Authority, as submitted, the Inspection Authority will have the right to reject it or require its correction at the sole expense of the Contractor before recommending payment.

8. Security Requirement

7.3.1 The following security requirement (SRCL and related clauses) applies and form part of the Contract:

1. The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of SECRET, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

2. The Contractor personnel requiring access to PROTECTED/CLASSIFIED information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **SECRET** as required, granted or approved by CISD/PWGSC.
3. The Contractor MUST NOT remove any PROTECTED/CLASSIFIED information from the identified work site(s), and the Contractor must ensure that its personnel are made aware of and comply with this restriction.
4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.
5. The Contractor must comply with the provisions of the:
    a. Security Requirements Check List and security guide (if applicable), attached at Annex
    b. Industrial Security Manual (Latest Edition).

9. Additional Security Requirement

Canada Border Services Agency (CBSA) will conduct its own personnel security assessment on the proposed Offeror and its personnel as per the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard, irrespective of whether such assessment has already been conducted under any such policies. The security assessment conducted by the CBSA will include a credit check performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian Industrial Security Directorate" (CISD) and the "International Industrial Security Directorate" (IISD).

For each proposed resource, the Offeror must submit a completed signed original TBS 330-23 Form – Personnel Screening Consent and Authorization (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf).

Until the credit check and all other security screening processes required by this Contract have been completed and the Offeror's personnel is considered suitable by the CBSA, the Offeror personnel shall not commence work on this contract and/or be permitted access to Protected / Classified information or assets, and further, shall not be permitted to enter sites where such information or assets are kept.

10. Term of Contract

10.1 Period of the Contract

The period of the Contract is from date of Contract award and ends two (2) years later.

10.2 Option to Extend the Contract

The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to 3 additional one year period under the same conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions as set out in the Basis of Payment.

Canada may exercise this option at any time by sending a written notice to the Contractor at least 30 calendar days before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced for administrative purposes only, through a contract amendment.

11 Authorities

11.1 PSPC Contracting Authority

The Contracting Authority for the Contract is:
Name: Steven Lussier
Title: Supply Team Leader
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Professional Services Procurement Directorate
Address: 11 Laurier Street, Gatineau Québec, K1A 0S5
Telephone: 873-469-4827
E-mail address: steven.j.lussier@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

11.2 Project Authority

The Project Authority for the Contract is:
Name: Jo-Anne Moore
Title: Manager
Organization: Canada Border Services Agency
Address: 355 North River Road, Tower B, 19th Floor, 19001
Telephone: 343-291-5189
E-mail address: Jo-Ann.Moore@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

11.2.1 Contractor's Representative

The Contractor's Representative for the Contract is:
Name:
Title: Director of Professional Services
Phone:
Fax
Email:
Organization: MGIS Inc.
Address: 23 Ballyboy Street, Stittsville, Ontario, K2S 2H1

12 Payment

12.1 Basis of Payment

12.1.1 Authorized TA

Firm Lot Price TA

When the applicable basis of payment specified in a TA authorized and issued under the Contract is firm lot price, in consideration of the Contractor satisfactorily completing all of its obligations under the authorized TA, the Contractor will be paid the firm lot price stipulated in the authorized TA, as determined in accordance with the basis of payment cost elements in Annex B. Customs duties are included and Applicable Taxes are extra.

TA subject to a Limitation of Expenditure

When the basis of payment specified in a TA authorized and issued under the Contract is limitation of expenditure, the Contractor will be reimbursed for the costs reasonably and properly incurred in the performance of the Work specified in the authorized TA, as determined in accordance with the basis of payment cost elements, in Annex B, to the limitation of expenditure specified in the authorized TA.

Canada's total liability to the Contractor under the authorized TA must not exceed the limitation of expenditure specified in the authorized TA. Customs duties are included and Applicable Taxes are extra.

No increase in the liability of Canada or in the price of the Work specified in the authorized TA resulting from any design changes, modifications or interpretations of the Work specified in the authorized TA will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been authorized, in writing, by the TA Authority before their incorporation into the Work specified in the authorized TA. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceeded before obtaining the written authorization of the TA Authority. The Contractor must notify the TA Authority in writing as to the adequacy of this sum:

(a) when it is 75 percent committed, or

(b) four (4) months before the final delivery date specified in the authorized TA, or

(c) as soon as the Contractor considers that the authorized TA funds are inadequate for the completion of the Work specified in the authorized TA,

whichever comes first.

If the notification is for inadequate authorized TA funds, the Contractor must provide to the TA Authority, a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

12.2 Canada's Total Liability

Limitation of Expenditure - Cumulative Total of all Task Authorizations

A. Canada's total liability to the Contractor under the Contract for all authorized TAs, inclusive of any revisions, must not exceed the sum of $5 million, customs duties and the Applicable Taxes are included.

B. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

C. The Contractor must notify the Contracting Authority, in writing, as to the adequacy of this sum:

   1. when it is 75 percent committed, or

   2. four (4) months before the Contract expiry date, or

3. as soon as the Contractor considers that the sum is inadequate for the completion of the Work required and requested in all authorized TAs, inclusive of any revisions, the applicable basis of payment of which is limitation of expenditure contract clause 7.6.1.1, TA subject to a Limitation of Expenditure,

whichever comes first.

D. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

13. Method of Payment

The following methods of payment will form part of the authorized TA:

For the Work specified in an authorized subject to a limitation of expenditures and authorized subject firm lot price TA:

Single Payment

Canada will pay the Contractor upon completion and delivery of the Work in accordance with the payment provisions of the Contract if:

a. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
b. all such documents have been verified by Canada;
c. the Work delivered has been accepted by Canada.

Milestone Payments - Not subject to holdback

Canada will make milestone payments in accordance with the Schedule of Milestones detailed in the Task Authorization Form and the payment provisions of the Contract if:

a. an accurate and complete claim for payment using PWGSC-TPSGC 1111, Claim for Progress Payment, and any other document required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
b. all the certificates appearing on form PWGSC-TPSGC 1111 have been signed by the respective authorized representatives;
c. all work associated with the milestone and as applicable any deliverable required has been completed and accepted by Canada.

Monthly Payment

Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

a. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
b. all such documents have been verified by Canada;
c. the Work performed has been accepted by Canada.

14. SACC Manual Clauses

A9117C (2007-11-30) T1204 - Direct Request by Customer Department
C0305C (2014-06-26) Cost Submission - Limitation of Expenditure or Ceiling Price

15. Electronic Payment of Invoices - Contract

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

a. Direct Deposit (Domestic and International);
b. Electronic Data Interchange (EDI);
c. Wire Transfer (International Only);
d. Large Value Transfer System (LVTS) (Over $25M)

16. Discretionary Audit

C0705C (2010-01-11), Discretionary Audit

17. Invoicing Instructions

17.1 Invoicing Instructions

The Contractor must submit a claim for payment using form PWGSC-TPSGC 1111, Milestone Payment.

Each claim must show:
a.all information required on form PWGSC-TPSGC 1111;
b.all applicable information detailed under the section entitled "Invoice Submission" of the general conditions;
c.the description and value of the milestone claimed as detailed in the Contract.

Each claim must be supported by:
a.a copy of time sheets to support the time claimed;
b.a copy of the monthly progress report.

Applicable Taxes must be calculated on the total amount of the claim before the holdback is applied. At the time the holdback is claimed, there will be no Applicable Taxes payable as it was claimed and payable under the previous claims for progress payments.

The Contractor must prepare and certify one electronic copy of the claim on form PWGSC-TPSGC 1111, and forward it to:

vendors-fournisseurs@cbsa-asfc.gc.ca

or

Mail
Canada Border Services Agency
NIRU
105 McGill Street, Piece 260-01, 2nd floor
Montreal, QC H2Y 2E7

Only legible electronic (PDF, Word, Excel) files will be accepted; all others will be returned.

The Project Authority will then forward one electronic copy of the claim to the Contracting Authority for certification and onward submission to the Payment Office for the remaining certification and payment action.

The Contractor must not submit claims until all work identified in the claim is completed.

18. Certifications and Additional Information

18.1 Compliance

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire period of the Contract.

18.2 Federal Contractors Program for Employment Equity - Default by the Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list available at the bottom of the page of the Employment and Social Development Canada (ESDC) - Labour's website (http://www.esdc.gc.ca/en/jobs/workplace/humanrights/employmentequity/federalcontractorprogram.page?&_ga=1.229006812.1158694905.1413548969#afed). The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

19. Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

20. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the list, the wording of the document that first appears on the list has priority over the wording of any document that subsequently appears on the list.

(a) the Articles of Agreement;
(b) the general conditions 2035 (2016-04-04), General Conditions - Higher Complexity - Services;
(c) Annex A, Statement of Work;
(d) Annex B, Basis of Payment;
(e) Annex C, Security Requirements Check List;
(f) Annex D), Insurance Requirements;
(g) the signed Task Authorizations (including all of its annexes, if any);
(h) Supply Arrangement Number E60ZN-15TSPS (the "Supply Arrangement"); and
(i) the Contractor's bid dated April 19, 2017.

21. Foreign Nationals

SACC Manual clause A2001C (2006-06-16), Foreign Nationals (Foreign Contractor)
SACC Manual clause A2000C (2006-06-16), Foreign Nationals (Canadian Contractor)

22. Insurance Requirements

The Contractor must comply with the insurance requirements specified in Annex D. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

The Contractor must forward to the Contracting Authority within ten (10) days after the date of award of the Contract, a Certificate of Insurance evidencing the insurance coverage and confirming that the insurance policy complying with the requirements is in force. Coverage must be placed with an Insurer licensed to carry out business in Canada. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

ANNEX A

STATEMENT OF WORK

1. TITLE:

Acquisition of Professional Services for the Travellers Project Portfolio Directorate (TPPD) of Canada Border Services for the Delivery and Management of Mission Critical Systems

2. BACKGROUND

Canada Border Services Agency (CBSA) is responsible for providing integrated border services that support national security and public safety priorities and facilitate the free flow of persons and goods, including animals and plants that meet all requirements under its legislation. Under this mandate, CBSA enables effective and efficient border management through the design, development, implementation, delivery and operation of innovative solutions, science and technology for the major issues facing border management today and in the future.

CBSA provides effective management of Canada's border through the strategic development, application and oversight of Information Technology and Information Management services. Integrated IT services are administered across Canada, including headquarters and seven regional locations - Atlantic, Quebec, Greater Toronto Area, Northern Ontario, Southern Ontario, Prairie and Pacific.

On February 4, 2011, the Prime Minister of Canada and the President of the United States issued a declaration called "Beyond the Border: A Shared Vision for Perimeter Security and Economic Competitiveness", also called the "Declaration". The Declaration established a new long-term partnership built upon a perimeter approach to security and economic competitiveness. This means working together, not just at the border, but also beyond the border to enhance our security and accelerate the legitimate flow of persons, goods and services. Leaders called for the development of a joint action plan to realize this goal.

To optimally manage border programs, corporate maturity and operational excellence, the Information, Science and Technology Branch (ISTB) of CBSA provides technical expertise to advance information management; enterprise architecture; IT infrastructure and solutions; and planning and portfolio management. Among other aspects, the ISTB provides technology leadership for a sustainable portfolio of business applications in support of CBSA's strategic priorities. It ensures effective delivery of technology products, applications and services to meet business needs, while ensuring integrity and availability of all technology infrastructures.

The Travellers Project Portfolio Directorate (TPPD) is responsible for the delivery and management of 25 mission critical systems to manage the flow of persons and goods at border entry points.

3. REQUIREMENT

The TPPD requires the services of Contractor resources in several resource categories for the implementation of TPPD projects as identified herein. These professional services will be provided under the Task and Solutions Professional Services (TSPS) Supply Arrangement (SA), and will be initiated through Task Authorizations (TAs) on an "as-and-when-requested" basis

4. SCOPE OF WORK

(a) Summary of the Work

The Contractor must provide resources on an "as-and-when requested" basis to deliver new capabilities and service to develop and manage the TPPD's projects such as Primary Inspection Kiosk (PIK), Biometrics Expansion, Entry-Exit, Integrated Advance Passenger Information, Small and Remote Ports of Entry, Immigration Information Sharing and Scenario Based Targeting Projects.

CBSA - Released under the Access to Information Act
ASFC - Divulgé en vertu de la Loi sur l'accès à l'information.

The detailed tasks for each resource category are described in Appendix A to this Annex A.

(b) Resource Categories

Item	TSPS Category	TSPS RESOURCE CATEGORIES	TSPS EXPERIENCE LEVEL
1.1	3.8	Financial Specialist	Senior and Intermediate
1.2	2.13	Performance Measurement Consultant	Senior and Intermediate
1.3	3.11	Communications Consultant	Senior and Intermediate
1.4	3.10	Technical Writer	Senior and Intermediate
1.5	1.8	Staffing Consultant	Senior and Intermediate
1.6	2.14	Subject Matter Expert (Service Management)	Senior and Intermediate
1.7	2.14	Subject Matter Expert (Project Support)	Senior and Intermediate
1.8	2.6	Change Management Consultant	Senior and Intermediate
1.9	3.1	Project Administrator	Senior, Intermediate and Junior
1.10	3.6	Risk Management Specialist	Senior and Intermediate
1.11	2.1	Business Analyst	Senior and Intermediate
1.12	2.8	Business Architect	Senior
1.13	2.5	Business Process Consultant	Senior and Intermediate
1.14	3.2	Project Manager	Senior and Intermediate
1.15	3.3	Project Leader/Executive	Senior

5. DELIVERABLES

For each TA that is issued against this Contract, the Contractor will be required to provide various Deliverables and other related documents as specified in the respective TA. Deliverables are specified in each individual resource category identified in Appendix A to Annex A.

6. REPORTING AND COMMUNICATION

(a) The Contractor's representative must meet with the CBSA Project Authority or their representative on a priority basis or as requested to discuss any issues associated with the provision of the required services during the entire period of the Contract. These meetings will be at no additional cost.
(b) Status Reports are to be provided and as detailed within the TA.

7. CLIENT SUPPORT

The CBSA will provide a workstation, email, system access and telephone capability.

8. LANGUAGE REQUIREMENTS

The Contractor's resources must be able to communicate orally and in writing in English without any assistance and with minimal errors. . However, there may be a requirement from time to time for a resource to conduct business in the French language. Language requirements will be identified in each TA.

9. CONSTRAINTS

(a) The Work must be performed within CBSA's normal working hours of 7:00 AM to 6:00 PM.

(b) The Contractor may be required to attend meetings at CBSA and at Key GC Stakeholders within the National Capital Region.

10. WORK LOCATION

It is anticipated that the Work associated with each TA will be carried out on-site at CBSA premises in the National Capital Region (NCR).

11. TRAVEL REQUIREMENTS

There is no travel requirement expected outside the NCR. If travel is required outside the NCR, it will be identified in the TA.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

APPENDIX A TO ANNEX A

RESOURCE CATEGORY TASKS AND DELIVERABLES

The content of this Appendix A to Annex A details the required tasks and Deliverables associated with each resource category. Tasks and Deliverables will be further specified in each validly issued Task Authorization.

1.1.1 FINANCIAL SPECIALIST (*Senior and Intermediate Levels*)

1.1.1 TASKS: The services include, but are not limited to the following:

a) Providing planning, expenditures analysis and advice on resource utilization;
b) Preparing variance analysis, expenditure forecasts and special reports on project costs,;
c) Developing reports to meet the needs of managers and clients directorates for budgetary operating and capital expenditures, full time employee (FTE) utilization information and other requirements;
d) Reviewing and analyzing expenditures and budgets, identifying and addressing anomalies, preparing summary financial reports and proposing recommendations,;
e) Providing advice and guidance to management on all matters pertaining to financial management, accounting, financial reporting and financial control;
f) Contributing to, and assisting in the maintenance of, IT project dashboards.
g) Attending meetings as directed by the Project Authority. These meetings may include, but are not limited to: meetings with other lines of business staff, executives, consultants, etc.;
h) Providing subject matter expertise and knowledge transfer to employees;
i) Conducting costing and budgeting exercises and developing related reports;
j) Assisting in the development of content for reporting IT project financial performance (briefings and presentations) to senior management and Treasury Board Secretariat;
k) Assisting in the development of strategies and other documents and reports on an as-required-basis;
l) Planning and coordinating financial management activities including financial estimates and business requirements;
m) Evaluating financial management procedures;
n) Contributing to cost benefit analysis and life cycle costing (Cost and estimate Management);
o) Developing models to carry out cost analysis of the resources required to perform specific inspections related to a project (Project Management);
p) Performing risk analysis;
q) Determining the resources required for implementation of projects such as acquisition costs, operation and maintenance costs and both recurring and non-recurring costs;
r) Assisting in developing costs for specific activities such as: direct project costs, project support overhead, portfolio-project and administrative (C&A) overhead, costs of products and services, and other related costs (Financial accounting);
s) Planning, acquiring, and controlling the use of funds so as to meet the portfolio / project goals and maximizing its value (Procurement integration in Project Management, contract process management);
t) Developing and modifying business cases and financial plans for the future.
u) Providing the full range of IT portfolio-project financial planning, analysis, reporting and monitoring services in support of senior management.
v) Providing advice and expertise in the financial management area
w) Directing all activities related to the preparation, coordination and delivery of all departmental financial plans including Annual Reference Level Update (ARLU), Main Estimates, Supplementary Estimates, and related presentations to the Branch Resource Review Committee and Treasury Board.

x) Directing the establishment, coordination and monitoring of the departmental budgeting process.
y) Ensuring the provision of in-depth, comprehensive and up-to-date financial analyses on all business proposals.
z) Creating and directing special projects on an ad hoc basis to analyze and assess a wide range of financial and business related proposals, partnerships and alternative service delivery proposals.
aa) Directing the review, challenge and preparation of recommendations with respect to financial plans.
bb) Directing the preparation of departmental management reports indicating performance against plans.

1.1.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Variance analysis at various levels of budget allocation and utilization;
b) Reports on expenditure and budget analysis, including preparation of trend analysis;
c) Documentation relating to costing, budgeting and reporting; and
d) Presentations, reports, and correspondence.

1.2 PERFORMANCE MEASUREMENT CONSULTANT *(Senior and Intermediate Levels)*

1.2.1 TASKS: The services include, but are not limited to the following:

a) Ensuring that benefits management practices follow the Benefits Management frameworks in support of departmental Strategic Outcomes and Program Activity Architectures or performance measurement strategies, including identifying associated performance measures in accordance with Treasury Board policies and Treasury Board Secretariat guidance and directives.

f) Establishing and providing the ongoing benefits realization and performance measurement support function for the Directorate on behalf of all existing and emerging projects.
g) Liaising and interfacing with staff in each of the project areas to identify project benefits and recommending appropriate performance measurement and benefits management advice and guidance.
h) Liaising with the Corporate Governance and Accountability Directorate and the Project Management Office on benefits management and portfolio benefits management
i) Developing benefits realization strategies and plans
j) Assessing the impact of project change requests on benefits realization outcomes to support strategic decision making
k) Defining and maintaining project reporting with respect to benefits realization, as well as providing input to the benefit plans, investment logic map templates, benefits registers, benefits profiles and management reporting functions.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

l) Overseeing and making recommendations to the portfolio benefits realization process to ensure that it is effective, efficient and coordinated such that it provides added-value to the outputs of the Directorate.
m) Assisting and providing guidance with transfer of knowledge and staff.

1.2.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Written status reports in English on a bi-weekly basis to coincide with scheduled project control meetings, documenting the progress of the work described in the TA including issues, risks, and challenges, which may affect overall schedule and planned tasks for the next reporting period.
b) Development and/or maintenance of a Travellers Portfolio Benefits Management Framework to align with the Agency Benefits Management Framework.
c) Performance measurement indicators / measures / benchmarks and tools and instruments for projects and Portfolio assessments.
d) The resource must provide benefits realization strategies and plans in support of the Travellers Portfolio and the People Project Directorate's objectives.
e) Benefits management advice to the Project Authority, Project Managers, and others.
f) Benefits Management Analysis and documentation.
g) Presentation materials for project control meetings.
h) Close-out report which includes a final evaluation and lessons learned to transfer functional and technical knowledge to the project team and/or client staff through individual and group training and demonstrations and written instructions and documents.

1.3 COMMUNICATIONS CONSULTANT (*Senior and Intermediate Levels*)

1.3.1 TASKS: The services include, but are not limited to the following:

a) Planning, researching, modifying, assisting, writing and/or reviewing memos, scripts, plays, essays, speeches, manuals and other non-journalistic articles with conformance to established standards;
b) Developing and implementing strategic communication plans in geographically dispersed organizations going through an organizational transformation (change management);
c) Providing communications consultation advice to support strategic communications initiatives and strategies;
d) Creating communications support materials;
e) Developing and implementing creative communication and information products using a variety of tools, techniques and media and selecting an appropriate medium to convey information, ideas, and results;
f) Developing and implementing communication strategies and plans;
g) Expressing and exchanging information in a clear and concise manner;
h) Ensuring information is communicated to the appropriate people in a timely manner;
i) Preparing reports for specific purposes using clear, communicative, and professional language *(e.g., audit reports, management letters, consulting reports, financial reports)*;
j) Ensuring communications are clearly understood by encouraging and listening to feedback both internally and externally in the organization;
k) Structuring external communications to project an appropriate corporate image;
l) Ensuring confidentiality with respect to organizational or client information and data.
m) Determining target audiences in order to better develop messages;
n) Identifying and determining communications impediments and barriers;
o) Providing advice on matters relating to policy/program development approaches or options and communications planning alternatives (internal or external);
p) Researching, developing and implementing communications strategies involving social media and related content (i.e. blogs, microblogs, wikis, crowdsourcing, content communities, social networks, etc.);

q) Providing support and assisting communicators in using social media channels to complement traditional channels; and
r) Providing suggestions on cost-cutting measures in the communications process.

1.3.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) **Project presentation decks and artifacts**
b) Portfolio communications plans
c) **Reports, presentations,** etc.

1.4 TECHNICAL WRITER *(Senior and Intermediate Levels)*

1.4.1 TASKS: The services include, but are not limited to the following:

a) Analyzing material, such as specifications (technical Statement of Work/Requirement), notes, drawings, writing manuals, user guides and other documents to explain the requirement clearly and concisely;
b) Modifying, validating and compiling documents such as technical publications in general, specifications, equipment and system data lists, drawings etc.;
c) Gathering information, analyzing the subject and the audience, and producing clear documentation;
d) Studying existing material and interviewing Stakeholders;
e) Creating accurate, complete and concise documentation to communicate the needs of the requirement;
f) Assimilating and conveying technical material in a concise, effective manner;
g) Following governmental publishing guidelines;
h) Reviewing documents, drawings and associated data for conformance to established standards by leading or participating in the drafting of project documents such as Project Charters, Project Management Plans, Treasury Board submissions and Memoranda to Cabinet;
i) Planning, researching and writing manuals, specifications and other non-journalistic articles;
j) Designing the layout of the documents/manuals; and
k) Using word-processing, desk-top publishing and graphics software packages to produce final camera ready copy.

1.4.3 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) User Training Materials
b) Standard Operation Procedures
c) Technical Publications
d) Presentations
e) Manuals, specifications and other non-journalistic articles
I) Project Charters, Project Management Plans, Treasury Board submissions and Memoranda to Cabinet;
f) User guides and other documents

1.5 STAFFING CONSULTANT *(Senior and Intermediate Levels)*

1.5.1 TASKS: The services include, but are not limited to the following:

a) Developing staffing and resourcing strategies;
b) Developing monitoring framework and implement and conduct monitoring;
c) Providing manager with demographic information and assisting in developing strategies to meet HR needs;
d) Providing advice and guidance on different types of merit criteria/qualifications;

e) Providing advice on workforce and process pros and cons;
f) Identifying links with departmental Human Resources/Employment Equity/Business plans;
g) Providing advice on effectiveness of assessment instruments and assisting in development or choice of proper instruments;
h) Advising manager of organizational policy;
i) Assisting manager in appropriate sequencing and application of merit criteria;
j) Providing advice, guidance, and assistance on review of decision and impact of change, if any;
k) Creating departmental staffing report(s) including preparation, data gathering, interviews, and monitoring staffing report and various activities;
l) Performing activities including recourse, appeals, early intervention process, and alternative dispute resolutions for staffing purposes;
m) Developing or assisting in developing strategies and plans (i.e. staffing or resourcing);
n) Developing monitoring framework and implementing and conducting monitoring;
o) Developing and reviewing appointment sub-delegation instruments, the sub-delegation process and the supporting tools (i.e. tables, sub-delegation certificates);
p) Conducting environmental and statistical reviews;
q) Reviewing organizational needs and business needs to assist in the identification of the appropriate staffing strategy or plans (including links to other plans such as the Employment Equity and Diversity Plan and the Official Languages Plan);
r) Providing advice and recommendations with regard to addressing staffing and recruitment challenges considering organizational strategies and plans;
s) Developing and implementing recruitment and employment strategies;
t) Providing advice and recommendations in selecting the choice of appointment process;
u) Preparing and conducting recruitment and staffing processes on behalf of management. This may include any or any grouping of the following activities:
    I. Making recommendations on the staffing process type to be undertaken;
    II. Drafting and finalizing the statement of merit criteria;
    III. Developing and preparing the assessment guide, tools and process;
    IV. Drafting and finalizing the advertisements;
    V. Coordinating and participating in the assessment of priorities, and the screening and assessments of candidates;
    VI. Coordinating and administrating tests, interviews; coordinating and completing the reference check etc;
    VII. Compiling and preparing the final board reports and finalizing the results of the processes (such as establishing pools of candidates).
v) Planning, developing, coordinating and administrating various staffing and staffing related initiatives such as job fairs, collective staffing and targeted Recruitment initiatives;
w) Providing operational staffing services to a group of client managers;
x) Providing advice and guidance to managers on staffing investigations, audits and Public Service Staffing Tribunal Complaints;
y) Developing staffing policies, guidelines, procedures, and tool;
z) Providing monitoring and reporting activities with respect to staffing within the organization or for central agencies;
aa) Drafting staffing report(s) including the preparation, data and information gathering, interviews, drafting of documentation;
bb) Developing information and learning sessions or events for managers, employees or staffing experts;
cc) Reviewing employees' or candidates' qualifications to address redeployment or placement of personnel;
dd) Developing a framework or process for pool management and coordinate the management of a pool;
ee) Advising managers and employees on staffing policies and procedures; and
ff) Providing mentoring, tutoring or coaching assistance.

1.5.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Resourcing strategies,
b) Strategic direction
c) HR plans
d) HR models
e) Policies, programs and procedures reports
f) New programs for employees to retain career mobility;
g) Evaluate personnel
h) Compensation and benefit programs
i) Collective agreements;
j) Training and information sessions.
k) Knowledge Transfer

1.6 SUBJECT MATTER EXPERT (SERVICE MANAGEMENT) *(Senior and Intermediate Levels)*

    III. Designing and conducting a change readiness assessment in order to plan and carry out a change management strategy;
    IV. Integrating performance monitoring disciplines in a stakeholder's development or change management plan;
    V. Meeting with other organizational executives to ensure all organizational (internal and external) stakeholders are committed and moving forward on project change strategy and plan.
    VI. Monitoring (internal and external) stakeholder change strategies and plans.

- VII. Leading working groups and consultations and obtain consensus and/or reach decisions with respect to recommendations and strategic options pertaining to the change initiative.

j) Overseeing and providing guidance to stakeholders to ensure timely completion of Deliverables.
k) **Providing expertise, advice, guidance and coaching on implementing the Service Management practice within the Directorate.**
l) **Providing advice and guidance on the Client's various Service Management Methods (Service Engineering Method (SEM), Service Operations Method - SOM, Configuration Management Method (CMM), On Boarding Method (OBM) and Security Management Control Method (SMCM)) and their applicability to the various Travelers' systems.**
m) **Defining competency, responsibility and training requirement for the Service Manager of the Portfolio's systems. May include conducting training for key stakeholders**
n) Meeting with other organization (internal and external) to ensure stakeholders accept moving forward on service management capabilities to be implemented and the understanding of their role
o) **Implementing key elements of certain service management capabilities required for operational readiness (e.g. Service Level Management, Business Relationship Management)**
p) Developing and delivering presentations to senior management and / or stakeholder groups in Word, PowerPoint and Excel as required
q) Documenting the interrelationship (dependencies) required for Operational Readiness of Directorate systems as they go live with other entities and suppliers (e.g. Shared Services Canada (SSC), Citizenship and Immigration Canada (CIC), Canada Border Services Agency (CBSA))
r) Reporting progress of the initiative on an ongoing basis and at scheduled points in the life cycle.

1.6.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) **Directorate People Management Strategy – 3 year plan**
b) **Project presentation decks and artifacts**
c) Portfolio communications plans
d) **Reports, presentations,** etc.
e) Other Deliverables as required by the DGO.

1.7 SUBJECT MATTER EXPERT (Project Support) (*Senior and Intermediate Levels*)

1.7.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Advising on the capacities, skills and resources needed in the Portfolio to create, implement and maintain on-going project support system (in the directorate);
b) Advising on methodological approaches and designs for project support of and evaluation of projects, programs, services, policies and initiatives;
c) Providing field-specific performance measurement advice (e.g. support managers to identify, track and report on results throughout the life cycle of projects, programs, services, policies or initiatives), including providing training or information sessions to build capacity within organization and assist program management with the collection and interpretation of performance measurement data;
d) Analyzing and/or interpreting performance data and preparing performance reports;
e) Conducting comparative analysis and advising on best practices, including benchmarking performance, international comparisons and case studies;
f) Providing subject-matter advice to assist in the:
   - I. Assessment of the readiness of a policy, program or initiative to be evaluated;
   - II. Scoping and planning of specific evaluations or related studies of individual programs, policies or initiatives;

[illegible] - Disclosed under the Access to Information Act
AIPRP - Divulgation en vertu de la Loi sur l'Accès à l'information.

- III. Constructing of work plans, including evaluation planning reports and/or associated methodologies;
- IV. Collection and analysis of relevant information;
- V. Assessment of relevance and performance, including impacts, efficiency and cost-effectiveness of programs, policies or initiatives;
- VI. Assessment of program governance and management (including assessing risk management and controls, decision-making, planning, development and implementation, transparency and accountability);
- VII. Developing evaluation reports containing findings, conclusions and recommendations, and undertake report validation and consultations where appropriate and requested;
- VIII. Compilation, analysis and dissemination of findings, lessons learned and best practices;
- IX. Briefing of program and senior management on major results and findings, including preparation of presentations;
- X. Development of other materials, documents, tools and instruments related to the work; and
- XI. Review of the components of evaluations such as primary and secondary data collection activities, surveys, special studies, literature or document reviews, applied statistical analysis and the development of background or analytical discussion papers on program theory and/or alternatives.

g) Validating evaluation approaches, methodologies, findings, conclusions and recommendations, using methods such as (but not limited to) validation from a technical expert standpoint;
h) Participating on peer review or similar panels for evaluations or act as an third- party reviewer of draft evaluation products;
i) Advising on sensitivities in their specific fields (e.g. on working with groups of "at-risk" stakeholders) and issues related to ethics and values related to performance measurement and evaluation; and
j) Facilitating connection to other key experts in the field as required for project support or evaluation purposes.

1.7.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Project Status reports
b) Project presentations
c) Earned Value reports
d) Root cause analysis reports
e) Business Impact assessments
f) Project Dashboards

1.8 CHANGE MANAGEMENT CONSULTANT (Senior & Intermediate Levels)

1.8.1 TASKS: Responsibilities could include but are not limited to:

a) Analysis and development of business “critical success factors”.
b) Analysis and development of architecture requirements design, process development, process mapping and training.
c) Implement change management plans
d) Resolve change management resistance issues
e) Responsible for leading other functional staff to define business strategy and processes in support of transformation and change management activities.
f) Participating in change impact analysis and change management activities.
g) Participating in organizational realignment (job re-design organizational re-structuring).

h) Coordinating development of training and coordination with other stakeholders.
i) Creating presentations and present to various stakeholders, and facilitate meetings and discussions.

1.8.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Critical success factor reports
b) Architecture requirements
c) Business strategy and processes
d) Change impact analysis and change management.
e) Organizational realignment
f) Training
g) Presentations to various stakeholders
h) Meeting Results and Consensus and
i) Knowledge Transfer

1.9 PROJECT ADMINISTRATOR (*Senior, Intermediate and Junior Levels*)

1.9.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Assist project management in project coordination and synchronization tasks;
b) Provide administrative and technical support of a clerical nature as required;
c) Assist in maintaining project and portfolio documentation;
d) Track project change requests;
e) Coordination of monthly dashboard and earned value cycles and reports;
f) Manage scheduling;
g) Attend meetings and record meeting notes to prepare records of decision;
h) Print and assemble background information for meetings;
i) Inputting, processing, monitoring, tracking and updating requests and correspondence;
j) Routing correspondence and creating and maintaining a Bring Forward (BF) System;
k) Research and complete internal forms;
l) Responsible to maintaining records in Apollo
m) Review for accuracy, grammar and assess the completeness of documents provided for corporate Deliverables; and
n) Ensure timely completion of Deliverables.

1.9.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Provide regular status updates on deliverables and tasks as required;
b) Meeting minutes and records of decisions, as required;
c) Clear and coherent emails communicating deadlines and information requests;
d) Completion of internal forms;
e) Creation of a bring forward log; and
f) Provide a list of links to files saved in Apollo.

1.10 RISK MANAGEMENT SPECIALIST (*Senior and Intermediate Levels*)

1.10.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Conducting risk assessments and evaluating potential risk and losses;
b) Identifying project and procurement risks;
c) Reviewing and auditing claims;
d) Recommending alternative solutions, methodologies and strategies for risk mitigation and management;
e) Assisting in prioritization and assignment of risks;
f) Assisting in the development and/or implementation of Risk Management Plans;

g) Developing and managing the implementation of Risk Management Plans (safety programs) to identify, analyze, plan, track, evaluate and control project risks on a continuous basis throughout the project life cycle;
h) Coaching, mentoring and training project teams in risk mitigation techniques;
i) Developing and implementing business continuity plans;
j) Developing crisis and emergency communication and/or management planning strategies;
k) Reviewing the organization's insurance and risk management programs and making recommendations regarding coverage improvements, administration, loss control and financing mechanisms;
l) Providing leadership and support to the design, implementation and evaluation of clients products/services performance measures, risk management and risk mitigation strategies;
m) Documenting process improvements;
n) Preparing reports for internal or external publication (Corporate Services, Policy, Communications)
o) Liaising with and interviewing stakeholders, as required, to obtain, clarify and exchange information, in-order to co-ordinate and manage the Risk Assessment Process;
p) Identifying, confirming and documenting the risk tolerance for the process, project, program, or strategic risk and using this tolerance to guide all analysis, assessment and recommendations undertaken or produced;
q) Identifying, confirming and documenting the objectives and priorities specific to the process, project, program or strategic direction being assessed, feasibility studies;
r) Identifying relevant risks and opportunities (including, but not limited to, economic, political, operational, legal, reputation, technical, organizational, accounting, banking and social risks) that threaten the objectives and priorities;
s) Utilizing both quantitative and qualitative techniques, as appropriate, to assess the likelihood that a risk event will occur; and the impact if the risk event occurs;
t) Recommending a ranked-order for risks and opportunities identified;
u) Recommending and documenting suggested Risk Responses necessary to manage the likelihood and/or impact of the identified risks;
v) Performing Control Risk Assessments and analysis, which may include statistical sampling and analysis of existing controls;
w) Assisting with the on-going monitoring of risk and assisting with the implementation of risk response and mitigation strategies;
x) Preparing draft and finalized risk assessments, briefing notes, presentations and papers related to risk management, and developing and updating risk management plans; and
y) Providing advice with respect to risk management best practices and providing guidance and direction to assist in managing risk.

1.10.2 DELIVERABLES

a) Identify project and procurement risks;
b) Review audit claims;
c) Recommend alternative solutions, methodologies and strategies
d) Develop and/or implement Risk Management Plans;
e) Coach, mentor and train project teams;
f) Develop and implement business continuity plans;
g) Develop crisis and emergency communication
h) Reports for internal or external publication
i) Perform Control Risk Assessments and analysis,
j) Draft and finalize risk assessments, briefing notes, presentations and papers.

1.11 BUSINESS ANALYST (Senior and Intermediate Levels)

1.11.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Develop and document statements of requirements for considered alternatives.
b) Perform business analyses of functional requirements to identify information, procedures, and decision flows.
c) Evaluate existing procedures and methods, identify and document items such as database content, structure, application subsystems.
d) Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems.
e) Establish acceptance test criteria with Client.
f) Support and use the selected departmental methodologies.
g) Utilize business process tools (examples include VISIO, BPWIN, Oracle Case, Rational Rose and RUP) to carry out the above activities.

1.11.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Statements of Requirements Development;
b) Functional Requirement Business Analyses;
c) Manual to Automated Operations Definition;
d) Acceptance Test Criteria; and
e) Knowledge Transfer.

1.12 Business Architect (Senior Level)

1.12.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Assist with the development of an aligned Business Architecture against the Enterprise Architecture including processes, models, strategies and organizational structures to enhance the business environment in which architectures are defined, developed and aligned with business goals;
b) Develop artifacts to support the business (e.g., Baseline and Target Business Architecture Descriptions, Candidate Roadmap Components, Architecture Definition Document);
c) Assist with the development of information product architectures to provide process and requirement recommendations for improvement;
d) Participate in requirement definition sessions with stakeholders and clients where required;
e) Provide expert advice on the key initiatives that enable enterprises to deploy high-impact business processes that are focused, accountable and measurable, particularly about principles of leadership, governance and operational competencies;
f) Analyze functional requirements to identify improvements in information, procedures, and decision flows, and make recommendations;
g) Provide expert advice in developing and integrating process and information models between business processes to eliminate information and process redundancies;
h) Oversee and manage product user interface designs, organize user experience testing with end-users, and introduce necessary changes to products where needed to ensure a unified user experience across all technical product solutions;
i) Develop Business Capabilities and Business Knowledge documentation and design Business Operational and Organizational Views;
j) Assist with the implementation and growth of the Client-TBS Portfolio Alignment Framework (e.g. customization of the framework within the directorate and development of all artifacts needed to support and maintain this important piece of work;
k) Perform gap analyses between business goals and planned solutions to identify areas for better alignment of technical product solutions with business needs;

l) Evaluate service and application interfaces including manual to automated operations within application sub-systems, external systems and between new and existing systems;
m) Identify opportunities to create new definitions and leverage existing IT services, create service portfolios, establish service contracts (e.g., Service Level Agreements) and plans for continual service improvement;
n) Identify opportunities for leveraging existing Commercial off the Shelf (COTS) products and other procured solutions for reducing operational costs;
o) Define business models to serve as the foundation for enhancing accountability and improve decision-making within the Directorate;
p) Assess impact of legislative and operational requirement changes to product architectures;
q) Support development of business architectures, frameworks and strategies for each major application area to meet the business requirements related to information, usability, and performance criteria for a business line;
r) Participate in the financial planning for technical products and solutions;
s) Participate in change impact analysis and change management activities;
t) Preparing visual impact assessments (e.g., dashboards, plans, charts, tables and diagrams) to assist in communicating and analyzing project issues within the Directorate;
u) Enforce departmental architectural standards (where required);
v) Assist the conducting of post project reviews (“lessons learned”) where necessary to help project teams with continual improvement; and
w) Provide regular recommendations for improvements to methodologies, technologies and procedures.
x) Utilize business process tools (examples include VISIO, BPWIN, Oracle Case, Rational Rose and RUP) to carry out the above activities.

1.12.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Aligned Business Architecture Development;
b) Baseline and Target Business Architecture Descriptions, Candidate Roadmap Components, and Architecture Definition Documents;
c) Business and Information Product Architectures;
d) Expert Advice On Key Initiatives (High-Impact Business Processes, Particularly About Principles Of Leadership, Governance and Operational Competencies;
e) Improvements In Information, Procedures, Decision Flows, and Recommendations;
f) Product User Interface Designs;
g) Business Capability and Business Knowledge Documentation;
h) Business Operational and Organizational Views;
i) Gap Analyses between Business Goals and Planned Solutions;
j) Service and Application Interface Evaluation;
k) Business Model Definitions;
l) Legislative and Operational Requirement Changes to Product Architectures;
m) Business Architecture Development;
n) Change Impact and Change Management Analysis;
o) Visual Impact Assessments (Dashboards, Plans, Charts, Tables and Diagrams);
p) Post Project Reviews; and
q) Knowledge Transfer.

1.13 Business Process Consultant (Senior and Intermediate levels)

ATIP - Released under the Access to Information Act
AIPRP - Divulgué en vertu de la Loi sur l'Accès à l'information.

1.13.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Review existing work processes and organizational structure;
b) Analyze business functional requirements to identify information, procedures and decision flows;
c) Identify candidate processes for re-design; prototype potential solutions, provide trade-off information and suggest a recommended course of action; Identify the modifications to the automated processes;
d) Provide expert advice in defining new requirements and opportunities for applying efficient and effective solutions; identify and provide preliminary costs of potential options;
e) Provide expert advice in developing and integrating process and information models between processes to eliminate information and process redundancies;
f) Identify and recommend new processes and organizational structures;
g) Provide expert advice on and assist in implementing new processes and organizational changes;
h) Document workflows; and
i) Use business, workflow and organizational modeling software tools.

1.13.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Existing Work Processes and Organizational Structure Reviews;
b) Business Functional Requirements Analysis;
c) Candidate Process Identification;
d) Expert Advice about Efficient And Effective Solutions;
e) Expert Advice about Process And Information Models;
f) New Processes and Organizational Structures;
g) Expert Advice on New Processes and Organizational Changes;
h) Workflow Documentation; and
i) Knowledge Transfer.

1.14 Project Manager (Senior and Intermediate levels)

1.14.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Manage several Project Managers, each responsible for an element of the project and its associated project team;
b) Manage the project during the development, implementation and operations startup by ensuring that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters;
c) Formulate statements of problems; establishe procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtain approval thereof;
d) Define and document the objectives for the project; determine budgetary requirements, the composition, roles and responsibilities and terms of reference for the project team;
e) Report progress of the project on an ongoing basis and at scheduled points in the life cycle;
f) Meet in conference with stakeholders and other project managers and state problems in a form capable of being solved;
g) Prepare plans, charts, tables and diagrams to assist in analyzing or displaying problems; work with a variety of project management tools; and
h) Project sign-off.

1.14.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Statements Of Problems;

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'Accès à l'information.

b) Procedures For The Development And Implementation Procedures;
c) Project Objectives Definitions;
d) Budgetary Requirements;
e) Project Team Composition, Roles And Responsibilities;
f) Progress Reports;
g) Stakeholder Conference Meetings;
h) Plans, Charts, Tables and Diagrams; and
i) Knowledge Transfer.

1.15 Project Leader/Executive (Senior Level)

1.15.1 TASKS: The undernoted services may include, but are not limited to the following:

a) Define and confirm the objectives for the project, determine budgetary requirements, the composition, roles and responsibilities and terms of reference for the project team;
b) Develop or review Project Charter, Business Case and detailed project plans;
c) Lead the development of briefings, solutions and status reports for presentation to executive management;
d) Develop and deliver presentations to senior management and stakeholder groups as required, including the preparation of plans, charts, tables and diagrams to assist in analyzing or displaying problems;
e) Oversee and provide guidance to several Project Managers, each responsible for an element of the project and its associated project team;
f) Provide Requirements Management and Project Control throughout the project;
g) Provide advice to ensure business strategies are developed and implemented; project schedules are developed, maintained and respected; risks and issues are managed; and change request procedures are followed;
h) Provide guidance and recommendations for the design, development, test, implementation within the Department as well as onboarding of users, and post implementation support phases;
i) Meet with other organizational executives to ensure all internal and external stakeholders are committed and moving forward on project and organizational goals;
j) Manage internal and external stakeholder relations;
k) Lead working groups and consultations and obtain consensus and reach decisions with respect to recommendations and strategic options pertaining to the project;
l) Coordinate the efforts of multiple stakeholders and to support senior management, in delivering a portfolio approach to project management;
m) Provide expert solution and business transformation leadership for the project with all stakeholders;
n) Ensure compliance with portfolio-wide standards for business architecture and business transformation;
o) Support release planning including requirements, and associated planning and execution of work to support identified requirements;
p) Provide solution and transformation alignment leadership from a project planning perspective;
q) Provide leadership and oversight for the design activities, including usage of deliverables necessary to satisfy the methodology, including, but not limited to:
    - Strategic Business Objectives and Critical Success factors;
    - Definition of business competencies, capabilities, value drivers, outcomes and measures;
    - Definition of target business model, operating model, and target service model;

- Definition and development of strategy and value components such as strategy maps, competency maps, value maps, value clusters, goal chains and value chain diagrams;
- Identification and analysis of pain points, pain clusters and pain chains;

r) Support the development of the transformation roadmap and transition plan;
s) Report progress of the project on an ongoing basis and at scheduled points in the life cycle;
t) Review and comment on all project deliverables from Initiation to project completion;
u) Manage scope, context and business requirements, working with departmental leads and key clients;
v) Provide project oversight during the development, implementation and operations start-up to ensure that resources are made available and that the project is developed and is fully operational within previously agreed time, cost and performance parameters;
w) Formulate statements of problems; establish procedures for the development and implementation of significant, new or modified project elements to solve these problems, and obtain approval thereof; and
x) Other work as deemed necessary relating to business architecture, solutions, commercial products, industry best practices and business transformation.

1.15.2 DELIVERABLES: Deliverables may include the following but will be further defined in the TA:

a) Advice on a daily basis to ensure business strategies are developed and implemented, project schedules are developed, maintained and respected, risks and issues are managed, and change request procedures are followed;
b) Guidance and recommendations required to coordinate the efforts of multiple stakeholders and to support senior management and the respective Project Director in delivering a portfolio approach to project management, business transformation and change management, solution and transformation alignment and enterprise architecture;
c) Conduct and document Lessons learned and internal reviews as well as reviews and updates to strategic project documents (i.e. Project Charter, Business Case, detailed project plan etc.);
d) Document consensus and decisions with respect to recommendations and strategic options pertaining to the project;
e) Guidance and recommendations required to coordinate the efforts of multiple stakeholders and to support senior management in delivering a portfolio approach to project management, business transformation and change management, solution and transformation alignment and enterprise architecture;
f) Project plans and presentations as required; and
g) A close-out report which will include a final evaluation and lessons learned to transfer knowledge to the project team and client staff through individual and group training and demonstrations and written instructions and documents.

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

DEFINITIONS:

- **Benefits realization** is the pre-planning for, and ongoing management of benefits promised to be enabled by the successful implementation of an IT/IM or e-government project.
- **Business transformation** is defined as any organizational or business change (people, process and technology) that makes effective use of change management and is aligned against strategic business objectives and must demonstrate core business service change rather than merely optimizing or implementing a technology service. Hence, a business transformation must be both visible from an internal/external perspective and is directly measurable against identified business objectives.
- **Complex** is defined as a project or program that has multiple internal stakeholders and at least one stakeholder external to the corporate or government entity.
- **Experience** is defined as being either in the role of consultant or employee except as otherwise specified herein. Unless otherwise stated, experience must be within the last 15 years to qualify.
- **Financial Management Capacity** is defined as extraction of financial and non-financial information, with a view to validating and interpreting the results to be able to make or recommend financial and non-financial decisions.
- **IT Service Management** is defined as the entirety of activities - directed by policies, organized and structured in processes and supporting procedures – that are performed by an organization or part of an organization to plan, deliver, operate and control IT services offered to customers
- **Large** is defined as a project or program valued at $10 million dollars (CDN) or more
- **Maintenance** is defined as the keeping of all records and project correspondence, materials, in order and up to date
- **PPM (Project and Portfolio Management)** is defined as the centralized management of processes, methods, and technologies used by project managers and project management offices to analyze and collectively manage current or proposed projects based on numerous key characteristics.
- **Post-secondary education** is defined as a level of education that is provided at recognized academies, universities, colleges, seminaries, institutes of technology, and certain other collegiate-level institutions, such as vocational schools, trade schools, and career colleges. Degrees, diplomas and certificates in the fields of science, technology, engineering, math and business administration, which include related IM/IT or project management courses as part of their training programs, are accepted.
- **Recognized Institution** is defined as recognized by the Department of Education of any Canadian province, or for degrees obtained in a foreign country, by either of the credential assessment organizations listed on the Web site WWW.CICIC.CA
- **Related Field of IM/IT** is defined as:
  a) A field of study dealing with electronic hardware that directly supports the delivery of informatics services; or

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information

b) A field of study dealing with the creation and architecture of software that directly supports the delivery of informatics services; or

c) A field of study that deals with the development of infrastructure architectures solutions that supports the delivery of informatics services.

- **Senior Management** is defined as Director General or above in a Crown Corporation, Federal, Provincial or municipal government department and as Vice-President or above in the private sector.
- **Stakeholder** is defined as an individual or organization that has influence over a project's objectives and outcomes, is actively involved in the project or project oversight, and whose interests may be affected as a result of project execution or project completion.
- **Work Experience** is defined as experience gained by a resource as either an employee or a consultant.
- **Experience within the last number of months or years** is defined as the period of time immediately preceding the issue date of the Task Authorization (TA).

ANNEX B, BASIS OF PAYMENT

A- Initial Contract for a 2 years Period

During the period of the Contract, for Work performed in accordance with the Contract, the Contractor will be paid as specified below.

1.0 Professional Fees

The Contractor will be paid all inclusive fixed time rates as follows:

MGIS Inc.			**INITIAL CONTRACT PERIOD: From Contract Award date to 2 years later**
	Categories	**Level of Expertise**	**Quoted Price**

*For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and sick leave. If time worked is more or less than a day, the all inclusive fixed daily rate must be prorated to reflect the actual time worked.

2.0 Cost Reimbursable Expenses

2.1 Authorized travel and living expenses for Work performed outside the National Capital Region (NCR) only

Concerning the requirements to travel described in section 11 of the Statement of Work in Annex A, the Contractor will be reimbursed its authorized travel and living expenses reasonably and properly incurred in the performance of the Work done, delivered or performed outside the National Capital Region (NCR) defined in the *National Capital Act (R.S.C., 1985, c. N-4)*, available on the Justice Website (http://laws-lois.justice.gc.ca/eng/acts/N-4/page-9.html#docCont), at cost, without any allowance for profit and administrative overhead, in accordance with the meal, private vehicle and incidental expenses provided in Appendices B, C and D of the National Joint Council Travel Directive; and with the other provisions of the directive referring to "travellers", rather than those referring to "employees.

Canada will not accept travel and living expenses that may need to be incurred by the Contractor for any relocation of resources required to satisfy its contractual obligations.

All travel must have the prior authorization of the CBSA Project Authority.

The authorized travel and living expenses will be paid upon submission of an itemized statement supported by receipt vouchers. All payments are subject to government audit.

[illegible] - Released under the Access to Information Act
[illegible] - Divulgué en vertu de la loi sur l'accès à l'information.

B- Option to Extend the Term of the Contract

This section is only applicable if the option to extend the Contract is exercised by Canada.

During the extended period of the Contract specified below, the Contractor will be paid as specified below to perform all the Work in relation to the Contract extension.

B-1 Extended Contract Period (From Expiry of Contract Period 1 To 3 Year Later)

3.0 Professional Fees

The Contractor will be paid all inclusive fixed time rates as follows:

12. a) Is the description of the work contained within this SRCL PROTECTED and/or CLASSIFIED?
La description du travail visé par la présente LVERS est-elle de nature PROTÉGÉE et/ou CLASSIFIÉE?

☑ No / Non ☐ Yes / Oui

If Yes, classify this form by annotating the top and bottom in the area entitled "Security Classification".
Dans l'affirmative, classifier le présent formulaire en indiquant le niveau de sécurité dans la case intitulée « Classification de sécurité » au haut et au bas du formulaire.

12. b) Will the documentation attached to this SRCL be PROTECTED and/or CLASSIFIED?
La documentation associée à la présente LVERS sera-t-elle PROTÉGÉE et/ou CLASSIFIÉE?

☑ No / Non ☐ Yes / Oui

If Yes, classify this form by annotating the top and bottom in the area entitled "Security Classification" and indicate with attachments (e.g. SECRET with Attachments).
Dans l'affirmative, classifier le présent formulaire en indiquant le niveau de sécurité dans la case intitulée « Classification de sécurité » au haut et au bas du formulaire et indiquer qu'il y a des pièces jointes (p. ex. SECRET avec des pièces jointes).

Security Classification / Classification de sécurité

ANNEX D, INSURANCE REQUIREMENTS

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

2. The Commercial General Liability policy must include the following:

a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.
b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.
c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.
d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.
e. Cross Liability/Separation of Insured: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.
f. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.
g. Employees and, if applicable, Volunteers must be included as Additional Insured.
h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)
i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.
j. Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.
k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.
l. Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.
m. Non-Owned Automobile Liability - Coverage for suits against the Contractor resulting from the use of hired or non-owned vehicles.
n. Advertising Injury: While not limited to, the endorsement must include coverage piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.
o. All Risks Tenants Legal Liability - to protect the Contractor for liabilities arising out of its occupancy of leased premises.

Where the Supplier is a JV, for the purposes of the SA and any related documents (including insurance certificates), Canada requires that the JV Contractor identify itself by a single name. Upon request by Canada, a JV Contractor must specify the name of the JV to the Contracting Authority.

ANNEX E, TASK AUTHORIZATION FORM

Contract Number	Enter the resulting contract number.
Task Authorization (TA) Number	Instructions to the TA Authority: Enter the number here.
Contractor's Name and Address	
Instructions to the TA Authority: Enter the name and address here.	
Total Estimated Cost of Task (Applicable Taxes extra) before any revisions:	$____________ Instructions to the TA Authority: Enter the amount here.
TA Revisions Previously Authorized	
Instructions to the TA Authority: the information for the previously authorized revisions must be presented in ascending order of assigned revision numbers (the first revision must be identified as No. 1, the second as No. 2, etc). If no increase or decrease was authorized, enter $0.00. Add rows, as needed	
TA Revision Number: ____________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: ____________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: ____________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: ____________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
TA Revision Number: ____________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
New TA Revision	
Instructions to the TA Authority: the first revision must be identified as No. 1, the second as No. 2, etc. If no increase or decrease is authorized, enter $0.00.	
TA Revision Number: ___________ Instructions to the TA Authority: Enter the number here, as applicable.	Authorized Increase or Decrease (Applicable Taxes extra) $___________ Instructions to the TA Authority: Enter the amount here, as applicable.
Total Estimated Cost of Task (Applicable Taxes extra) after this revision:	$_____________ Instructions to the TA Authority: Enter the amount here, as applicable.
Contract Security Requirements (as applicable)	
This task includes security requirements. Check the applicable boxes. ☐ No ☐ Yes. Refer to the Security Requirements Checklist (SRCL) annex of the Contract. Remarks: Enter the remarks, if any, or enter : "N/A".	

Required Work

Instructions to the TA Authority: The content of sections A, B, C and D below must be in accordance with the Contract. To view the instructions for Section A, click on the hyperlink.

[illegible] under the Access to Information Act
AIPRP - Divulgation en vertu de la loi sur l'Accès à l'information.

Contract No. - N° du contrat 47419-178445/005/ZQ	Amd. No. - N° de la modif. 002	Buyer ID - Id de l'acheteur 002zq
Client Ref. No. - N° de réf. du client 1000328445	File No. - N° du dossier 002zq.47419-178445	CCC No./N° CCC - FMS No./N° VME

This contract amendment is hereby raised to :
-Add additional information for the incentive;
-Extend the contract to March 31, 2021;
-Change the Project Authority; and
-Increase the contract value to $1,750,000.00 taxes included.

Delete 1.1.1 Task Authorization Section J entirely.

Replace with:

J Corporate Incentive

In the event that the same Contractor's resource remains in the position for the full term of the TA assignment (for all TAs in excess of a 6 month period), the Contractor will be provided an incentive amount based on the following formula:

Incentive amount = (TA duration (in number of working days) * Learning Period (20%) * Per Diem of the ressource * Productivity Loss (50%)) * Vendor share (50%)

(E.G. A Task Authorization has been issued to a Contractor for a resource having a firm period in excess of 6 months. Should that resource remain in place for the full duration of the TA, the Contractor would be paid a lump sum incentive, the amount to be calculated against the total cost of that resource's TA value at completion of the TA period as per the above formula.)

Please note that when a TA includes multiple resources, all resources must remain in their position for the full term as defined for the respective resources within the TA, in order for the incentive to be paid for that TA.

Should a TA be extended or amended for additional period of time, the incentive will be paid on the original TA period in excess of 6 months. Should the amended TA extended for a period in excess of 6 months, the incentive will also be paid on the additional period.

Delete 10 Term of Contract entirely

Replace with:

10 Term of Contract

10.1 Period of the Contract

The period of the Contract is from date of Contract award to March 31, 2021.

Delete 10.1 Project Authority entirely

Replace with

10.1 Project Authority

The Project Authority for the Contract is:
Name: Mireille Wilson
Title: Director
Organization: Canada Border Services Agency
Address: 333 North River Road, Tower A, 10th Floor
Ottawa, Ontario K1A 0L8
Canada
Telephone: 343-291-7526
E-mail address: Mireille.Wilson@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

Delete 12.2 Canada's Total Liability entirely

Replace with:

12.2 Canada's Total Liability

Limitation of Expenditure - Cumulative Total of all Task Authorizations

A. Canada's total liability to the Contractor under the Contract for all authorized TAs, inclusive of any revisions, must not exceed the sum of $1,750,000.00, customs duties and the Applicable Taxes are included.

B. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

C. The Contractor must notify the Contracting Authority, in writing, as to the adequacy of this sum:

1. when it is 75 percent committed, or
2. four (4) months before the Contract expiry date, or
3. as soon as the Contractor considers that the sum is inadequate for the completion of the Work required and requested in all authorized TAs, inclusive of any revisions, the applicable basis of payment of which is limitation of expenditure contract clause 7.6.1.1, TA subject to a Limitation of Expenditure,

whichever comes first.

D. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

10.1 Period of the Contract

The period of the Contract is from date of Contract award to March 31, 2021.

Delete 10.1 Project Authority entirely

Replace with

10.1 Project Authority

The Project Authority for the Contract is:
Name: Mireille Wilson
Title: Director
Organization: Canada Border Services Agency
Address: 333 North River Road, Tower A, 10th Floor
Ottawa, Ontario K1A 0L8
Canada
Telephone: 343-291-7526
E-mail address: Mireille.Wilson@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

Delete 12.2 Canada's Total Liability entirely

Replace with:

12.2 Canada's Total Liability

Limitation of Expenditure - Cumulative Total of all Task Authorizations

A. Canada's total liability to the Contractor under the Contract for all authorized TAs, inclusive of any revisions, must not exceed the sum of $18,000,000.00, customs duties and the Applicable Taxes are included.

B. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

C. The Contractor must notify the Contracting Authority, in writing, as to the adequacy of this sum:

   1. when it is 75 percent committed, or

   2. four (4) months before the Contract expiry date, or

   3. as soon as the Contractor considers that the sum is inadequate for the completion of the Work required and requested in all authorized TAs, inclusive of any revisions, the applicable basis of payment of which is limitation of expenditure contract clause 7.6.1.1, TA subject to a Limitation of Expenditure,

   whichever comes first.

D. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

ASFC - Divulgation en vertu de la Loi sur l'Accès à l'information.

This amendment is raised to:

1. To extend the Contract for the period from date of contract award July 6, 2017 to December 31, 2021;
2. To modify the Terms of the contract;
3. To update the Contracting Authority;
4. To update Canada's total liability;
5. To update the Annex B – Basis of Payment.

---

1. **At Article 10.1 Period of the Contract**

DELETE: 10.1 in its entirety

and

INSERT:

10.1 Period of the Contract

The period of the Contract is from July 6, 2017 and ends December 31, 2021.

2. **At Article 10.2 Option to Extend the Contract**

DELETE: 10.2 in its entirety

3. **At Article 11.1 PSPC Contracting Authority**

DELETE: 11.1 in its entirety

and

INSERT:

11.1 PSPC Contracting Authority

The Contracting Authority for the Contract is:

Natalie Bastianello-Lamoureux
Supply Specialist
Public Works and Government Services Canada (PWGSC)
Acquisitions Branch
Professional Services Procurement Directorate – ZV
Building Terrasses de la Chaudières, 10 Wellington, Floor 4,
Gatineau, Quebec, K1A 0S5
(873) 355-2126
E-mail address: Natalie.Bastianello-Lamoureux@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

4. At Article 12.2 Canada's Total Liability

DELETE: 12.2 in its entirety

and

INSERT:

12.2 Canada's Total Liability

Limitation of Expenditure - Cumulative Total of all Task Authorizations

A. Canada's total liability to the Contractor under the Contract for all authorized TAs, inclusive of any revisions, must not exceed the sum of **$18,672,566.37**. Customs duties are included and the Applicable Taxes are extra.

B. No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

C. The Contractor must notify the Contracting Authority, in writing, as to the adequacy of this sum:

1. when it is 75 percent committed, or
2. four (4) months before the Contract expiry date, or
3. as soon as the Contractor considers that the sum is inadequate for the completion of the Work required and requested in all authorized TAs, inclusive of any revisions, the applicable basis of payment of which is limitation of expenditure contract clause 12.1.1, TA subject to a Limitation of Expenditure,

whichever comes first.

D. If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Provision of such information by the Contractor does not increase Canada's liability.

5. At Annex B, BASIS OF PAYMENT

DELETE: ANNEX B, BASIS OF PAYMENT in it's entirety

and

INSERT:

ANNEX B, BASIS OF PAYMENT

A- Contract Period (From July 6, 2017 to December 31, 2021)

During the period of the Contract, for Work performed in accordance with the Contract, the Contractor will be paid as specified below.

[illegible] the Access to Information Act
[illegible] Divulgation en vertu de la loi sur l'accès à l'information.

*For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and sick leave. If time worked is more or less than a day, the all-inclusive fixed daily rate must be prorated to reflect the actual time worked.

Total Estimated Cost of Professional Fees: **$18,672,566.37** taxes extra.

2.0 Cost Reimbursable Expenses

2.1 Authorized travel and living expenses for Work performed outside the National Capital Region (NCR) only

Concerning the requirements to travel described in section 11 of the Statement of Work in Annex A, the Contractor will be reimbursed its authorized travel and living expenses reasonably and properly incurred in the performance of the Work done, delivered or performed outside the National Capital Region (NCR)

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

defined in the *National Capital Act (R.S.C., 1985, c. N-4)*, available on the Justice Website (http://laws-lois.justice.gc.ca/eng/acts/N-4/page-9.html#docCont), at cost, without any allowance for profit and administrative overhead, in accordance with the meal, private vehicle and incidental expenses provided in Appendices B, C and D of the National Joint Council Travel Directive; and with the other provisions of the directive referring to "travellers", rather than those referring to "employees.

Canada will not accept travel and living expenses that may need to be incurred by the Contractor for any relocation of resources required to satisfy its contractual obligations.

All travel must have the prior authorization of the CBSA Project Authority.

The authorized travel and living expenses will be paid upon submission of an itemized statement supported by receipt vouchers. All payments are subject to government audit.

Total Estimated Cost of Authorized Travel and Living Expenses: $0.00

*For the purpose of this Contract, a day is defined as 7.5 hours of work, exclusive of meal breaks. Payment will be made for days actually worked, with no provision for annual leave, statutory holidays and

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

sick leave. If time worked is more or less than a day, the all-inclusive fixed daily rate must be prorated to reflect the actual time worked.

Total Estimated Cost of Professional Fees**$ 23,011,647.79** applicable taxes extra.

2.0 Cost Reimbursable Expenses

2.1 Authorized travel and living expenses for Work performed outside the National Capital Region (NCR) only

Concerning the requirements to travel described in section 11 of the Statement of Work in Annex A, the Contractor will be reimbursed its authorized travel and living expenses reasonably and properly incurred in the performance of the Work done, delivered or performed outside the National Capital Region (NCR) defined in the *National Capital Act (R.S.C., 1985, c. N-4)*, available on the Justice Website (http://laws-lois.justice.gc.ca/eng/acts/N-4/page-9.html#docCont), at cost, without any allowance for profit and administrative overhead, in accordance with the meal, private vehicle and incidental expenses provided in Appendices B, C and D of the National Joint Council Travel Directive; and with the other provisions of the directive referring to "travellers", rather than those referring to "employees.

Canada will not accept travel and living expenses that may need to be incurred by the Contractor for any relocation of resources required to satisfy its contractual obligations.

All travel must have the prior authorization of the CBSA Project Authority.

The authorized travel and living expenses will be paid upon submission of an itemized statement supported by receipt vouchers. All payments are subject to government audit.

Total Estimated Cost of Authorized Travel and Living Expenses: $0.00

All other terms and conditions remain unchanged

Annex B Basis of Payment

Annex C Security Requirements Check List (SRCL)

Annex D Non-Disclosure Agreement

The following clauses apply to and form part of any contract resulting from the bid solicitation.

1. Requirement

(a) Emerion (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client**: Under the Contract, the "**Client**" is Canada Border Services Agency.

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Project Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

2. Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

(b) **Assessment of Resources Proposed at TA Stage**: Processes for issuing, responding to and assessing Task Authorizations are further detailed in Appendix A, B, C and D of Annex A.

(c) **Form and Content of draft Task Authorization**:

  (i) The Project Authority will provide the Contractor with a description of the task in a draft Task Authorization using the form specified in Appendix B of Annex A.

  (ii) The draft Task Authorization will contain the details of the activities to be performed, and must also contain the following information:

    (A) the task number;

    (B) The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);

    (C) the categories of resources and the number required;

    (D) a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);

    (E) the start and completion dates;

(F) milestone dates for deliverables and payments (if applicable);

(G) the number of person-days of effort required;

(H) whether the work requires on-site activities and the location;

(I) the language profile of the resources required;

(J) the level of security clearance required of resources;

(K) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

(L) any other constraints that might affect the completion of the task.

(d) **Contractor's Response to Draft Task Authorization**: The Contractor must provide to the Project Authority, within 2 working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

(e) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to **$250,000.00** (excluding Applicable Taxes), the TA must be signed by:

a. the Project Authority; and

b. the Canada Border Services Agency Administrative Authority.

(ii) for any TA with a value greater than this amount, a TA must include the following signatures:

a. the Project Authority; and

b. the Canada Border Services Agency Administrative Authority; and

c. the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

(f) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under Task Authorizations validly issued under the Contract. The

Contractor must provide this data to Canada in accordance with the reporting requirements detailed below. If some data is not available, the reason must be indicated. If services are not provided during a given period, the Contractor must still provide a "NIL" report. The data must be submitted on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

(A) 1st quarter: April 1 to June 30;

(B) 2nd quarter: July 1 to September 30;

(C) 3rd quarter: October 1 to December 31; and

(D) 4th quarter: January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 20 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended):

(A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;

(B) a title or a brief description of each authorized task;

(C) the name, Resource category and level of each resource involved in performing the TA, as applicable;

(D) the total estimated cost specified in the validly issued TA of each task, exclusive of Applicable Taxes;

(E) the total amount, exclusive of Applicable Taxes, expended to date against each authorized task;

(F) the start and completion date for each authorized task; and

(G) the active status of each authorized task, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TA's (as amended):

(A) the amount, exclusive of Applicable Taxes, specified in the Contract (as last amended, as applicable) as Canada's total liability to the Contractor for all validly issued TA's; and

(B) the total amount, exclusive of Applicable Taxes, expended to date against all validly issued TA's.

(g) **Consolidation of TA's for Administrative Purposes**: The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TA's for administrative purposes.

3. Minimum Work Guarantee

(a) In this clause,

(i) "**Maximum Contract Value**" means the amount specified in the "**Limitation of Expenditure**" clause set out in the Contract; and

(ii) "**Minimum Contract Value**" means $20,000.00.

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

  (i) for default;

  (ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or

  (iii) for convenience within ten business days of Contract award.

4. Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

(a) **General Conditions**:

  (i) 2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

  With respect to Section 30 - Termination for Convenience, of General Conditions 2035, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

  4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

  5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:

    (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or

    (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

  6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions**:

  The following Supplemental General Conditions:

(i) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

5. Security Requirement

The following security requirements (SRCL #19 and related clauses provided by ISP) as set out under Annex "B" to the Supply Arrangement, applies to and forms part of the Contract.

a) Common PS SRCL #19 Security Clauses:

Security Requirement for Canadian Supplier: PWGSC File #Common-PS SRCL#19

1. The Contractor/Offeror must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of SECRET, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).
2. The Contractor/Offeror personnel requiring access to PROTECTED/CLASSIFIED information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **RELIABLITY STATUS**, **CONFIDENTIAL** or **SECRET** as required, granted or approved by CISD/PWGSC.
3. The Contractor/Offeror MUST NOT remove any PROTECTED/CLASSIFIED information from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.
4. Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.
5. The Contractor/Offeror must comply with the provisions of the:
   a. Security Requirements Check List and security guide (if applicable), attached at Annex C;
   b. *Industrial Security Manual* (Latest Edition).

b) CBSA Security Requirement:

The CBSA, will conduct its own personnel Reliability Status assessment of the Contractor (specifically the Contractor personnel), which is allowed under the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard. Reliability Status assessment conducted by the CBSA will include a credit check.

If the Contractor (specifically the Contractor personnel), has already been screened under the TBS Policy on Government Security - Personnel Security Standard, the Contractor (specifically the Contractor personnel), will still undergo a security screening process to be conducted by the CBSA.

The credit check and fingerprinting*, if required, will be performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian and International Industrial Security Directorate" (CIISD).

Until the credit check, fingerprinting* (if required) and all other security screening processes required have been completed and the Contractor (specifically the Contractor personnel) is deemed suitable by the CBSA, the Contractor (specifically the Contractor personnel) will not be permitted access to Protected / Classified information or assets, and further, will not be permitted to enter sites where such information or assets are kept.

***Fees are applicable. Fingerprinting, if required, will be at the Contractor's cost.**
The Company Security Officer (CSO) must ensure through the Contract Security Program that the Contractor and individual(s) hold a valid security clearance at the required level.

6. Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends 3 years later; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to 2 additional 1-year period(s) under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

7. Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Sylvie Morin
Title: Supply Specialist
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Informatics and Telecommunications Systems Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec
Telephone: 613-859-0761
E-mail address: Sylvie.morin@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Project Authority

The Project Authority for the Contract is:

Name: Corey Loverock
Title: Manager
Organization: Canada Border Services Agency
Address: 333 North River Road, Ottawa, Ontario K1A 0L8
Telephone: 343-291-6219
Facsimile: 343-291-6234
E-mail address: corey.loverock@cbsa-asfc.gc.ca

The Project Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Project Authority; however, the Project Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

(c) Contractor's Representative *(to be completed at contract award)*

Name:
Title: Director, Business Development
Emerion
Address: 368 Dalhousie Street. Suite 200, Ottawa, Ontario K1N 7G3
Telephone:

E-mail address:

8. Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

9. Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex B, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

(ii) **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex B), Applicable Taxes extra.

(iii) **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

(iv) **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract within the time described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole or in part or chooses to exercise any of the rights provided to it under the general conditions, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Corrective Measure Policy (or equivalent) then in effect, which measures may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

(b) **Limitation of Expenditure – Cumulative Total of all Task Authorizations**

(i) Canada's total liability to the Contractor under the Contract for all validly issued Task Authorizations (TAs), inclusive of any revisions, must not exceed the amount set out on page 1 of the Contract, less any Applicable taxes. With respect to the amount set out on page 1 of the Contract, Customs duties are included and Applicable Taxes are included

(ii) No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

(iii) The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

(A) when it is 75 percent committed, or

(B) 4 months before the contract expiry date, or

(C) As soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

(i) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) **Method of Payment for Task Authorizations with a Maximum Price**: For each Task Authorization validly issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) **Method of Payment for Task Authorizations with a Firm Price - Lump Sum Payment on Completion**: Canada will pay the Contractor upon completion and delivery of all the Work associated with the validly issued Task Authorization in accordance with the payment provisions of the Contract if:

(i) an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

(ii) all such documents have been verified by Canada; and

(iii) the Work delivered has been accepted by Canada.

(e) **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contract must repay any overpayment, at Canada's request.

(f) **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises

10. Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

(c) By submitting invoices, the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

(d) The Contractor must provide the original and two copies of each invoice to the Project Authority, and a copy to the Contracting Authority.

11. Certifications and Additional Information

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, any TA quotation and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire Contract Period.

12. Federal Contractors Program for Employment Equity - Default by Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

13. Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

14. Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;

(b) Supplemental General Conditions, in the following order:

(i) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

(c) General Conditions 2035 (2016-04-04), Higher Complexity - Services;

(d) Annex A, Statement of Work - Statement of Work including its Appendices as follows;

(i) Appendix A to Annex A - Tasking Assessment Procedure;

(ii) Appendix B to Annex A - Task Authorization (TA) Form;

(iii) Appendix C to Annex A - Resource Assessment Criteria and Response Table;

(iv) Appendix D to Annex A - Certifications at the TA stage;

(e) Annex B, Basis of Payment;

(f) Annex C, Security Requirements Check List;

(g) the validly issued Task Authorizations and any required certifications; and

(h) the Contractor's bid dated May 16, 2018.

15. Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

16. Insurance Requirements

(a) Compliance with Insurance Requirements

(i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

(ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

(iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) Commercial General Liability Insurance

(i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

(ii) The Commercial General Liability policy must include the following:

(A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

(B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

(C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

(D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

(J) Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

(K) If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(L) Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

17. Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from any breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of any unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

18. Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Project Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if

Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Project Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the “Excusable Delay” Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

19. Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

20. Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

21. Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Project Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

22. Government Property

Canada agrees to supply the Contractor with the items listed below (the "**Government Property**").The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

1. Laptop
2. Office
3. Telephone
4. Data Mining Software

23. Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

7.26 Non-disclosure Agreement

The Contractor must obtain from its employee(s) or subcontractor(s) the completed and signed non-disclosure agreement, attached at Annex D, and provide it to the Project Authority before they are given access to information by or on behalf of Canada in connection with the Work.

ANNEX A

STATEMENT OF WORK

1. Requirement

The National Targeting Centre (NTC) requires the services of an integrated core team of six (6) resources that will work together to support the design and development of technical elements of the Beyond the Border Action Plan in relation to Canada Border Services Agency (CBSA) priorities. All resources will be working on an as and when requested basis using task authorizations.

The Core Team for this requirement includes:

RESOURCE CATEGORY	LEVEL OF EXPERTISE
B.6 Business System Analyst	Level 3
I.5 IM Architect	Level 3
B.2 Business Architect	Level 3
B.3. Business Consultant	Level 3
G.5 GIS Data Architect	Level 3

2. Background

The Operations Branch (OPB) of the CBSA has a mandate to secure the border strategically by enhancing its ability to assess risk, determine admissibility, investigate criminal activities, and increase immigration compliance.

In a dynamic threat environment, the CBSA continues to rely on the use of high-quality information that integrates intelligence and analytics with enforcement statistics to manage border-related risks. The CBSA will continue to partner with its United States (U.S.) counterparts, its Border Five and other law enforcement through the Beyond the Border Action Plan initiatives that aim to strengthen border security between both countries and promote economic prosperity by making border processes more effective and efficient.

In order to ensure the border remains secure for Canadians, the Director General of the National Border Operations Centre is leading the development of an operational data analytics strategy. In an effort to enhance operational decision-making, the core team of resources are required within the NTC.

3. Objective

The Contractors will provide professional services to the CBSA that will help the National Targeting Centre enhance current data analytics capabilities, in order to better identify trends and patterns, and enhance current risk assessment strategies.

To ensure the border remains secured for Canadians, the CBSA will advance the analytical capabilities at the National Targeting Centre. The Plan is in place to enable effective and efficient border management through the design, development, implementation, delivery and operation of innovative data analytics solutions. The results of the consultants work will directly support the development of predictive models, trend and pattern development, reporting, geospatial analysis, network analytics, etc.

Secure the Border Strategically

The CBSA is committed to strengthen its ability to intercept inadmissible people, the Agency will make ongoing program improvements to manage risks away from the border, including:

- Continuing to modernize Agency tools to better identify and mitigate risks at the earliest point in the travel and trade streams;
- Implementing and ensuring compliance with regulatory amendments that will impose new requirements on commercial carriers to enhance the Agency's ability to make admissibility determinations prior to the arrival of shipments into Canada;
- Continuing the implementation of eManifest to support the electronic transmission of advance commercial information to the CBSA;
- Implementing the Interactive Advance Passenger Information (IAPI) initiative which would allow the CBSA to work collaboratively with commercial air carriers to modernize the screening of air passengers prior to departure to Canada; and,
- Enhancing the screening of travellers prior to their departure for Canada by integrating new predictive analytics to the targeting function.

The below are the three identified Agency's top external risks, as evaluated by senior management and found in the CBSA Enterprise Risk Profile, the Agency's overarching, enterprise-level risk document.

Contraband: Over the past two decades, organized crime such as drug and currency trafficking, and the illegal movement of firearms, tobacco and vehicles has become increasingly sophisticated and presents enforcement complexity as it reaches beyond national jurisdictions. Ongoing collaboration with law enforcement partners, the use of automated targeting systems, and the work accomplished by a variety of enforcement teams are examples of ways the Agency controls its exposure to the Contraband risk. However, the fact that the number and quantity of drug seizures has been climbing in recent years indicates that the Contraband risk continues to be considerable, and therefore the Agency is continuing efforts to mitigate it.

Terrorist Activities: Terrorism is recognized as a national security threat as Canada has been identified as a target by certain extremist groups, such as the Islamic State of Iraq and the Levant. In addition, the existence of 'insider threats' has been identified as an emerging national security trend, with the terrorist attacks in Saint-Jean-sur-Richelieu and Ottawa in October 2014 serving as an example of such horrific events. The overseas detection and capacity building work of CBSA liaison officers, heightened screening by CBSA personnel, as well as improved targeting capacity as a result of the implementation of the National Targeting Centre are a few of the current controls mitigating the Terrorist Activities risk. However, there is a constant need for vigilance and the Agency is continuing to mitigate the risk as the occurrence of a terrorist act either in, or associated with Canada, could have significant impacts.

Food Plant and Animal: The speed and ease with which travel and trade move around the globe has increased Canada's vulnerability to FPA-related threats. The economic and ecological impacts resulting from the introduction of dangerous FPA commodities to Canada could be considerable. External factors such as the oversight capacity of other countries and the high volumes of cargo drive the exposure to this risk. While continued cooperation with the Canadian Food Inspection Agency helps to ensure threats are identified and understood, the Agency faces challenges with its examination capacity for FPA in commercial streams. As such, the Agency is taking additional steps to mitigate the FPA risk.

4. Scope of Work

The CBSA requires the services of a Contractor to enhance the safety and security of the country, by "pushing the border out", and using data analytics to ensure our efforts and resources are focused on high-risk people and goods destined for our borders. Overall consulting resources will be used for the overall strategy formulation work, reporting requirements gathering, design & development of the agency innovative solutions, agency performance monitoring requirements gathering, data analysis, geospatial analysis and coordination of stakeholder activities. The resources will be responsible to design, develop the specifications for where, how and why the various organizational components fit together and how they support the CBSA operations and projects components. Also, the resources will create Briefing Note, presentations, reports and use cases; consult and present to various stakeholders.

5. Technical Environment

The technical environment at CBSA comprises several technologies. All hardware and software will be provided by CBSA. Technologies involved include but are not limited to the following:

- Microsoft PowerPoint, Visio, Word, Excel, Internet Explorer, Windows 2000 and XP, MS Project, 'R', Python, GeoSpatial Software, SPSS. As technology evolves and new tools are leveraged, the consultants need to be able to adapt and use these new technologies.

6. Client Support

The Contractor will be provided with a CBSA user ID, password, workstation or laptop, and other materials as required in order to process, store, and/or transmit CBSA data on the CBSA network during the contract. The use of contractor IT systems is not permitted.

7. Constraints

Working onsite at CBSA locations within the National Capital Region may be required in order to co-locate with work staff for the efficient exchange of business knowledge and collaboration with project stakeholders.

CBSA data must not be accessed to or from the contractor's IT systems through the use of a session or link (e.g. VPN).

The Contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

The Contractor must not remove any protected information/data without the proper approval of the Project Authority.

8. Tasks and Deliverables

Tasks and Deliverables for individual resources could include but will not be limited to the following:

The Business System Analyst (Level 3)

TASKS

- Develop artifacts, including topic maps, content flow diagrams, content models, and navigation models;
- Lead the statistical analysis of data using SPSS;
- Lead the design and implementation of statistical predictive models using SPSS;
- Design and implement statistical algorithms;
- Design and develop forecasting models in SPSS; and
- Design and develop optimization algorithms.

DELIVERABLES

- Development of trend and pattern analysis and implement the framework within the CBSA
- Implementation of statistical analysis within the CBSA to support Operations
- Enhancement of current Operational analytics

The IM Architect (Level 3)

TASKS

- Research, design and implement analytical formulas to conduct quantitative risk assessment of trade goods;
- Lead the development of predictive analytics;
- Mentor/train and provide strategic advice in the use and application of predictive analysis

techniques;
- Apply predictive analytics to the development of CBSA IM/IT systems.

DELIVERABLES
- Development of and implementation of predictive models
- Development of Standard Operating Procedures for the implementation of predictive models
- Development and delivery of a training package for developing and implement predictive models

The Business Architect (Level 3)

TASKS
- Develop policies and rules that allow the CBSA to carry out its mandate and functional responsibilities, and that govern the organization's actual and planned capabilities in terms of the overall project delivery;
- Develop the specifications for where, how and why the various organizational components fit together as they do, and how they support the organization's mandate.

DELIVERABLES
- Delivery of Standard Operating Procedures that support overall project delivery within the National Targeting Centre (NTC)
- Delivery of frameworks to support the various projects within the NTC

The Business Consultant (Level 3)

TASKS
- Develop and implement overall project strategy;
- Lead the design and implement of business intelligence applications under the project;
- Lead the design and development of business processes for the implementation of a CBSA reporting system under the project;
- Lead the identification of data reporting requirements and the design of reporting capabilities under the project; and
- Lead the development of statistical solutions under the project.

DELIVERABLES
- Delivery of data reporting requirements document
- Delivery of a proposed action plan for advancing analytics within the CBSA
- Delivery of business processes for the implementation of analytics within the CBSA

The GIS Data Architect (Level 3)

TASKS
- Design and develop data architecture for the project, in the context of the overall system architecture;
- Set Data Policy and technical solution for the management, storage, access, navigation, movement, and transformation of data;
- Specify recommended DBMS and ETL tools and technologies for structured and unstructured content;
- Design the Metadata Repository;
- Create a data model for the project that is independent of the technology solution;
- Examine and enforce opportunities to provide data reuse, balance the issues of centralization and replication;
- Ensure the preservation of strategic data assets as applications and technologies evolve; and

- Monitor and support the development of the system's data to ensure it is compliant with the data architecture, and refine the data architecture as required.

DELIVERABLES

- Development and production of GeoSpatial products to support targeting efforts within the CBSA
- Delivery of enterprise geospatial capabilities that will be used across the CBSA
- Establishment of a framework and best practices for GeoSpatial analysis within the CBSA

9. Travel requirement

There is no travel requirement under this contract.

10. Language of Work

All work will be performed and delivered in English.

11. Location of Work

The majority of the work will be performed at the following CBSA locations:

333 North River Road, Ottawa, ON
2265 St. Laurent Blvd, Ottawa, ON

Work may on occasion be performed at other locations within the NCR as required by the Project Authority.

ANNEX B

BASIS OF PAYMENT

INITIAL CONTRACT PERIOD:

Initial Contract Period (Date of Contract award to September 26, 2021)		
Resource Category	**Level of Expertise**	**Firm Per Diem Rate**
B6. Business System Analyst	**Level 3**	[redacted]
I5.IM Architect	**Level 3**	[redacted]
B2. Business Architect	**Level 3**	[redacted]
B3. Business Consultant	**Level 3**	[redacted]
G5. GIS Data Architect	**Level 3**	[redacted]

OPTION PERIODS:

Option Period 1 (September 27, 2021 to September 26, 2022)		
Resource Category	**Level of Expertise**	**Firm Per Diem Rate**
B6. Business System Analyst	**Level 3**	[redacted]
I5.IM Architect	**Level 3**	[redacted]
B2. Business Architect	**Level 3**	[redacted]
B3. Business Consultant	**Level 3**	[redacted]
G5. GIS Data Architect	**Level 3**	[redacted]

Option Period 2 (September 27, 2022 to September 26, 2023)		
Resource Category	**Level of Expertise**	**Firm Per Diem Rate**
B6. Business System Analyst	**Level 3**	[redacted]
I5.IM Architect	**Level 3**	[redacted]
B2. Business Architect	**Level 3**	[redacted]
B3. Business Consultant	**Level 3**	[redacted]

ANNEX C

SECURITY REQUIREMENTS CHECK LIST

Attached hereto

[illegible] - Released under the Access to Information Act
ATIP - Divulgation en vertu de la Loi sur l'Accès à l'information.

ANNEX D

NON-DISCLOSURE AGREEMENT

I, ___________, recognize that in the course of my work as an employee or subcontractor of ___________, I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. _______ between Her Majesty the Queen in right of Canada, represented by the Minister of Public Works and Government Services and ________ , including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce, copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: _________________

APPENDIX A TO ANNEX A

TASKING ASSESSMENT PROCEDURE

1. Where a requirement for a specific task is identified, a draft Task Authorization Form (TA Form) as attached at Appendix B to Annex A will be provided to the Contractor. Once a draft TA Form is received, the Contractor must submit to the Project Authority a quotation of rates to supply the requested Resource Categories based on the information identified in the TA Form. The quotation must be signed and submitted to Canada within the time for response identified in the TA Form. The Contractor will be given a minimum of 48 hours turnaround time to submit a quotation.

2. For each proposed resource the Contractor must supply a résumé, the requested security clearance information and must complete the Response Tables at Appendix C of Annex A applicable to the Resource Categories identified in the draft TA. The same individual must not be proposed for more than one Resource Category. The résumés must demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to the proposed resources:

   (i) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (Refer to Appendix D to Annex A, Certifications).

   (ii) For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource before the date the draft TA was first issued to the Contractor.

   (iii) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of draft TA issuance and must continue, where applicable, to be a member in good standing of the profession or membership throughout the assessment period and Contract Period. Where the designation or membership must be demonstrated through a certification, diploma or degree, such document must be current, valid and issued by the entity specified in this Contract or if the entity is not specified, the issuer must have been an accredited or otherwise recognized body, institution or entity at the time the document was issued.

   (iv) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

   (v) For any requirements that specify a particular time period (e.g., 2 years) of work experience, Canada will disregard any information about experience if the résumé does not include the relevant dates (month and year) for the experience claimed (i.e., the start date and end date). Canada will evaluate only the duration that the resource actually worked on a project or projects (from his or her start date to end date), instead of the overall start and end date of a project or a combination of projects in which a resource has participated.

   (vi) A résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirement, or reusing the same wording as the TA Form, will not be considered "demonstrated" for the purposes of the assessment. The Contractor should provide complete details as to where, when, month and year, and how, through which activities/responsibilities, the stated qualifications / experience were obtained. In situations in which a proposed resource worked at the same time on more than one project, the duration of any overlapping time period will be counted only once toward any requirements that relate to the individual's length of experience.

3. The qualifications and experience of the proposed resources will be assessed against the requirements set out in Appendix C to Annex A to determine each proposed resource's compliance with the mandatory and rated criteria. Canada may request proof of successful completion of formal training, as well as reference information. Canada may conduct reference checks to verify the accuracy of the information provided. If reference checks are done, they will be conducted in writing by e-mail (unless the contact at the reference is only available by telephone). Canada will not assess any points or consider a mandatory criterion met unless the response is received within 5 working days. On the third working day after sending out the e-mails, if Canada has not received a response, Canada will notify the Contractor by e-mail, to allow the Contractor to contact its reference directly to ensure that it responds to Canada within 5 working days. Wherever information provided by a reference differs from the information supplied by the Contractor, the information supplied by the reference will be the information assessed. Points will not be allocated or a mandatory criteria considered as met if the reference customer is not a customer of the Contractor itself (for example, the customer cannot be the customer of an affiliate of the Contractor). Nor will points be allocated or a mandatory criteria considered as met if the customer is itself an affiliate or other entity that does not deal at arm's length with the Contractor. Crown references will be accepted.

4. During the assessment of the resources proposed, should the references for two or more resources required under that TA either be unavailable or fail to substantiate the required qualifications of the proposed resources to perform the required services, the Contracting Authority may find the quotation to be non-responsive.

5. Only quotations that meet all of the mandatory criteria will be considered for assessment of the point rated criteria. Each resource proposed must attain the required minimum score for the point rated criteria for the applicable Resource Category. If the minimum score for any proposed resource is less than what is required, the Contractor's quotation will be found to be non-responsive.

6. Once the quotation has been accepted by the Project Authority, the TA Form will be signed by Canada and provided to the Contractor for signature. The TA Form must be appropriately signed by Canada prior to commencement of any work. The Contractor must not commence work until a validly issued TA Form (the Task Authorization) has been received, and any work performed in its absence is done at the Contractor's own risk.

APPENDIX C TO ANNEX A

RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Annex. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

1. a) MANDATORY REQUIREMENTS - B.6 BUSINESS SYSTEM ANALYST - Level 3

#	Mandatory Technical Criteria	MET	NOT MET	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
MT1	The Contractor must demonstrate that the proposed resource has a minimum of 120 months of combined experience, within the last 180 months preceding the Task Authorization issuance date, performing one or more of the following tasks as a Business System Analyst: • Develop and document a detailed statement of requirements for the proposed alternative recommended in the preliminary analysis report; • Perform business analyses of functional requirements to identify information, procedures, and decision flows; • Evaluate existing procedures and methods, identify and document items such as database content, structure, application subsystems, and develop data dictionary; • Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems; • Identify candidate business processes for re-design, prototype potential solutions, provide trade-off information and suggest a recommended course of action. Identify the modifications to the automated processes; and, • Support and use the selected departmental methodologies.			
MT2	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience, within the last 120 months preceding the Task Authorization issuance date, developing artifacts which would include topic maps, content flow diagrams, content models, and navigation models.			
MT3	The Contractor must demonstrate that the proposed resource has a minimum of 12 months of experience, within the last 60 months preceding the Task Authorization issuance date, providing statistical analysis of data using SPSS.			
MT4	The Contractor must demonstrate that the proposed resource has a minimum of 12 months of experience, within the last 60 months preceding the Task Authorization issuance date, providing design and implementation of statistical predictive models using SPSS.			

MT5	The Contractor must demonstrate that the proposed resource has a minimum of 12 months of experience, within the last 60 months preceding the Task Authorization issuance date, designing and implementing statistical algorithms including decision trees, ANOVA, and multivariate analysis using SPSS.			

b) POINT RATED REQUIREMENTS - B.6 BUSINESS SYSTEM ANALYST - Level 3

#	**Point Rated Technical Criteria**	**Scoring Methodology**	**Maximum points**	**Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)**
RT1	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT3.	13 to 24 months = 5 points 25 to 36 months = 10 points 37 months or more = 15 points	15	
RT2	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT4.	13 to 24 months = 5 points 25 to 36 months = 10 points 37 months or more = 15 points	15	
RT3	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT5.	13 to 24 months = 5 points 25 to 36 months = 10 points 37 to 48 months = 15 points 49 months or greater = 20 points	20	
RT4	The Contractor should demonstrate that the proposed resource has experience conducting Pattern Recognition and Knowledge Discovery using SPSS.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	

RT5	The Contractor should demonstrate that the proposed resource has experience designing predictive models for forecasting, linear and non-linear regression, classification, association, and clustering.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	
RT6	The Contractor should demonstrate that the proposed resource has experience with SPSS scripting to automate analytical jobs.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	
RT7	The Contractor should demonstrate that the proposed resource has experience with the design and development of forecasting models in SPSS.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	
RT8	The Contractor should demonstrate that the proposed resource has experience designing and developing optimization algorithms.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	
Total:			125	
Required Pass Mark:			75	
Points Achieved B.6 BUSINESS SYSTEM ANALYST – Level 3 (A)				

2. a) MANDATORY REQUIREMENTS - I.5 IM ARCHITECT - Level 3

#	Mandatory Technical Criteria	MET	NOT MET	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
MT1	The Contractor must demonstrate that the proposed resource has a minimum of 120 months of combined experience, within the 180 months preceding the Task Authorization issuance date, performing one or more of the following tasks as a IM Architect: • Analyze existing capabilities and requirements, develop redesigned frameworks and recommend areas for improved capability and integration. Develop and document detailed statements of requirements. • Evaluate existing procedures and methods, identify and document database content, structure, and application subsystems, and develop data dictionary. • Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems. • Prototype potential solutions, provide tradeoff information and suggest recommended courses of action. • Perform information modelling in support of BPR implementation. • Perform cost/benefit analysis of implementing new processes and solutions. • Provide advice in developing and integrating process and information models between business processes to eliminate information and process redundancies. • Provide advice in defining new requirements and opportunities for applying efficient and effective solutions; identify and provide preliminary costs of potential options.			
MT2	The Contractor must demonstrate that the proposed resource has experience working on at least One (1) IM/IT project involving the movement of goods across international borders. • The cited project **must** have an iterative multi-phase rollout; • The cited project **must** have had a 24/7 operational mandate • The Proposed Resource **must** have worked on the cited project for a minimum duration of 6 months; and • The cited project **must** have had a dollar value exceeding $100M CAD.			
MT3	The Contractor must demonstrate that the proposed resource has a minimum of 36 months of experience researching, designing and implementing analytical formulas to conduct quantitative risk assessment of trade goods.			

MT4	The Contractor must demonstrate that the proposed resource has a minimum of 24 months of experience using IBM SPSS Modeller to support the development of predictive analytics.			
MT5	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience training and/or mentoring and providing strategic advice to clients in the use and application of predictive analysis techniques.			

b) POINTS RATED REQUIREMENTS - I.5 IM ARCHITECT - Level 3

#	Point Rated Technical Criteria	Scoring Methodology	Maximum points	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
RT1	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT1.	121 to 132 months = 2 points 133 to 144 months = 4 points 145 to 156 months = 6 points 157 to 168 months = 8 points 169 to 180 months = 10 points 181 to 192 months = 12 points 193 to 204 months = 14 points 205 months or greater = 16 points	16	
RT2	The Contractor should demonstrate that the proposed resource has experience applying predictive analytics to the development of IM/IT systems.	12 months or less = 0 points 13 to 36 months = 5 points 37 to 60 months = 10 points 61 months or greater = 15 points	15	
RT3	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT3.	37 to 48 months = 6 points 49 to 60 months = 8 points 61 months or greater = 10 points	10	
RT4	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT4.	25 to 36 months = 5 points 37 to 48 months = 10 points 49 to 60 months = 15 points 61 months or greater = 20 points	20	

RT5	The Contractor should demonstrate that the proposed resource has experience working on projects that incorporates the use of World Customs Organization (WCO) standards.	0 projects = 0 points 1 project = 2 points 2 projects = 4 points 3 projects = 6 points 4 projects = 8 points 5 projects or greater = 10 points	10	
Total:			71	
Required Pass Mark:			43	
Points Achieved I.5 IM ARCHITECT – Level 3 (B)				

3. a) MANDATORY REQUIREMENTS - B2 BUSINESS ARCHITECT– Level 3

#	Mandatory Technical Criteria	MET	NOT MET	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
MT1	The Contractor must demonstrate that the proposed resource has a minimum of 120 months of experience developing functional and business architectures in support of IM/IT business transformation projects valued at $10M CAD or more.			
MT2	The Contractor must demonstrate that the proposed resource has experience performing the following tasks on three separate and distinct IM/IT projects: • Use case development; • Facilitating stakeholders (internal and/or external) workshops; • One-on-one interviews and/or consultations; and, • Teleconferences and Joint Application Development (JAD) Sessions. In order for a project to qualify, the resource must have performed all tasks listed above on each project referenced. Additionally, each project referenced must be 6 months or greater in duration.			
MT3	The Contractor must demonstrate that the proposed resource has a minimum of 120 months experience assessing business needs and translating requirements into system functional specifications.			
MT4	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience developing and coordinating policies, processes, and systems related to the assessment of risk and operational surveillance.			

MT5	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience developing business use cases using the Rational Unified Process (RUP) methodology for business modeling and business requirements definition. Rational Unified Process is an iterative software development process framework.			

b) POINT RATED **REQUIREMENTS - B2 BUSINESS** ARCHITECT – **Level 3**

#	**Point Rated Technical Criteria**	**Scoring Methodology**	**Maximum points**	**Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)**
RT1	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT1.	121 to 132 months = 2 points 133 to 144 months = 4 points 145 to 156 months = 6 points 157 to 168 months = 8 points 169 to 180 months = 10 points 181 to 192 months = 12 points 193 to 204 months = 14 points 205 months or greater = 16 points	16	
RT2	The Contractor should demonstrate that the proposed resource has experience over and above the minimum of 3 projects required in MT2.	4 Projects = 4 points 5 Projects = 8 points 6 Projects = 12 points 7 Projects = 16 points	16	
RT3	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT3.	121 to 132 months = 2 points 133 to 144 months = 4 points 145 to 156 months = 6 points 157 to 168 months = 8 points 169 to 180 months = 10 points 181 to 192 months = 12 points 193 to 204 months = 14 points 205 months or greater= 16 points	16	
RT4	The Contractor should demonstrate that the proposed resource has experience over and	61 to 72 months = 2 points 73 to 84 months = 4 points 85 to 96 months = 6 points 97 to 108 months = 8 points	10	

	above the minimum requirements in MT4.	109 months or more = 10 points		
RT5	The Contractor should demonstrate that the proposed resource has experience on IM/IT system projects working at an enterprise strategic level.	36 months or less = 0 points 37 to 48 months = 2 points 49 to 60 months = 4 points 61 to 72 months = 6 points 61 to 84 months = 8 points 85 months or more = 10 points	10	
RT6	The Contractor should demonstrate that the proposed resource has experience scoping new project and solutions to change requests related to key lines of business.	36 months or less = 0 points 37 to 48 months = 2 points 49 to 60 months = 4 points 61 to 72 months = 6 points 61 to 84 months = 8 points 85 months or more = 10 points	10	
Total:			78	
Required Pass Mark:			47	
Points Achieved B2 BUSINESS ARCHITECT – Level 3 (C)				

4. a) MANDATORY REQUIREMENTS - B.3 BUSINESS CONSULTANT - Level 3

#	Mandatory Technical Criteria	MET	NOT MET	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
MT1	The Contractor must demonstrate that the proposed resource has a minimum of 120 months of experience, within the last 240 months preceding the Task Authorization issuance date, performing one or more of the following tasks as a Business Consultant: • Analyze, evaluate, develop business processes (financial, operational, systems, etc.); • Identify organizational and/or project business opportunities for improvement and streamlining of business processes; • Identify and evaluate critical success parameters, factors and performance measurements; and, • Assist other stakeholders in development and implementation of business improvement processes and programs.			
MT2	The Contractor must demonstrate that the proposed resource has a minimum of 84 months of experience, within the last 180 months preceding the Task Authorization issuance date, in the design and implementation of Business Intelligence applications that incorporate the use of data analytics software.			
MT3	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of demonstrated experience, within the last 120 months preceding the Task Authorization issuance date, in the			

ATIA - Released under the Access to Information Act
AIPRP - Divulgué en vertu de la Loi sur l'accès à l'information.

	design and development of business processes for the implementation of a reporting system.			
MT4	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of demonstrated experience, within the last 120 months preceding the Task Authorization issuance date, in the identification of data reporting requirements and the design of reporting capabilities.			
MT5	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of demonstrated experience, within the last 120 months preceding the Task Authorization issuance date, in the development of reporting prototypes.			

b) POINT RATED REQUIREMENTS - B.3 Business Consultant - Level 3

#	**Point Rated Technical Criteria**	**Scoring Methodology**	**Maximum points**	**Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)**
RT1	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT2.	85 to 119 months = 10 points 120 months or greater = 20 points	20	
RT2	The Contractor should demonstrate that the proposed resource has experience in the development of data processes and algorithms.	0 to 11 months = 0 points 12 months to 23 months = 5 points 24 months to 35 months = 10 points 36 to 59 months = 15 points 60 months or greater = 20 points	20	
RT3	The Contractor should demonstrate that the proposed resource has experience in the development of data processes to simplify and improve data flows.	0 to 11 months = 0 points 12 months to 23 months = 5 points 24 months to 35 months = 10 points 36 to 59 months = 15 points 60 months or greater = 20 points	20	
RT4	The Contractor should demonstrate that the proposed resource has experience in the design and development of data structures and data models.	0 to 23 months = 0 points 24 to 35 months = 5 points 36 to 59 months = 10 points 60 months or greater = 15 points	15	
RT5	The Contractor should demonstrate that the proposed resource has demonstrated experience, within the last 120 months preceding the Task Authorization issuance date, performing the following duties to support the implementation of	0 to 23 months = 0 points 24 to 35 months = 5 points 36 to 59 months = 10 points 60 months or greater = 15 points	15	

	Business Intelligence Solutions within the Government of Canada: • data analysis; • documenting data requirements; and, • defining transformation rules.			
Total:			90	
Required Pass Mark:			54	
Points Achieved B.3 Business Consultant – Level 3 (D):				

5. a) MANDATORY REQUIREMENTS – G.5 GIS DATA ARCHITECT – Level 3

#	Mandatory Technical Criteria	MET	NOT MET	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
MT1	The Contractor must demonstrate that the proposed resource has a minimum of 120 months of experience, within the last 240 months preceding the Task Authorization issuance date, performing one or more of the following tasks as a GIS Data Architect: • Designing and developing the data architecture for the project, in the context of the overall system architecture; • Setting Data Policy and the technical solution for the management, storage, access, navigation, movement, and transformation of data; • Specifying recommended DBMS and ETL tools and technologies for structured and unstructured content. • Designing the Metadata Repository; • Creating a data model for the project that is independent of the technology solution; • Examining and enforcing opportunities to provide data reuse, balancing the issues of centralization and replication; • Ensuring the preservation of strategic data assets as applications and technologies evolve; and, • Monitoring and supporting the development of the system's data to ensure it is compliant with the data architecture, and refine the data architecture as required.			
MT2	The Contractor must demonstrate that the proposed resource has a minimum of 60 months experience providing services on geo-spatial related projects using GIS Product Suites.			
MT3	The Contractor must demonstrate that the proposed resource has a minimum of 60 months experience designing and developing a project's data architecture in the context of the overall system architecture. To qualify, each of the referenced project must:			

	• have had a dollar value exceeding $10M CAD; • have had a 24/7 operational mandate (24/7 is defined as an operation that functions 24 hours a day, 7 days a week); and, • have had the proposed resource work on the projects for a minimum duration of 6 months.			
MT4	The Contractor must demonstrate that the proposed resource has a minimum of 60 months experience working on large-scale data management and data modeling concepts, with both relational and dimensional data models. Any projects used to respond to this criterion must meet the requirements below: • Cited projects must have had a dollar value exceeding $10M CAD; • Cited projects must have had a 24/7 operational mandate (24/7 is defined as an operation that functions 24 hours a day, 7 days a week); and, • Cited projects must have had the proposed resource work on the projects for a minimum duration of 6 months.			
MT5	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience analyzing existing capabilities and requirements, developing redesigned frameworks and recommending areas for improved capability and integration.			
MT6	The Contractor must demonstrate that the proposed resource has a minimum of 60 months of experience assessing existing procedures, methods, database content, structure, and application subsystems.			

b) POINT RATED REQUIREMENTS – G.5 GIS DATA ARCHITECT – Level 3

#	Point Rated Technical Criteria	Scoring Methodology	Maximum points	Contractor's Response Demonstrated Experience and Cross Reference to proposal (Page #)
RT1	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT1.	121 to 132 months = 2 points 133 to 144 months = 4 points 145 to 156 months = 6 points 157 to 168 months = 8 points 169 to 180 months = 10 points 181 to 192 months = 12 points 193 to 204 months = 14 points 205 or more months = 16 points	16	

RT2	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT3.	61 to 72 months = 2 points 73 to 84 months = 4 points 85 to 96 months = 6 points 97 to 108 months = 8 points 109 to 120 months = 10 points 121 to 132 months = 12 points 133 to 144 months = 14 points 144 months or greater = 16 points	16	
RT3	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT4.	61 to 72 months = 2 points 73 to 84 months = 4 points 85 to 96 months = 6 points 97 to 108 months = 8 points 109 to 120 months = 10 points 121 to 132 months = 12 points 133 to 144 months = 14 points 144 months or greater = 16 points	16	
RT4	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT5.	61 to 72 months = 2 points 73 to 84 months = 4 points 85 to 96 months = 6 points 97 to 108 months = 8 points 109 to 120 months = 10 points 121 to 132 months = 12 points 133 to 144 months = 14 points 144 months or greater = 16 points	16	
RT5	The Contractor should demonstrate that the proposed resource has experience over and above the minimum requirements in MT6.	61 to 72 months = 2 points 73 to 84 months = 4 points 85 to 96 months = 6 points 97 to 108 months = 8 points 109 to 120 months = 10 points 121 to 132 months = 12 points 133 to 144 months = 14 points 144 months or greater = 16 points	16	
RT6	The Contractor should demonstrate that the proposed resource has experience with the development of business driven	0 to 12 months = 0 points 13 to 24 months = 1 point 25 to 36 months = 2 points 37 to 48 months = 3 points	10	

	data governance methodologies for a Business Intelligence project.	49 to 60 months = 4 points 61 to 72 months = 5 point 73 to 84 months = 6 points 85 to 96 months = 7 points 97 to 108 months = 8 points 109 to 120 months = 9 point 121 months or greater = 10 points		
RT7	The Contractor should demonstrate that the proposed resource has experience with the development of data governance, stewardship frameworks, and best practices using DAMA International and/or COBiT models.	0 to 12 months = 0 points 13 to 24 months = 1 point 25 to 36 months = 2 points 37 to 48 months = 3 points 49 to 60 months = 4 points 61 to 72 months = 5 point 73 to 84 months = 6 points 85 to 96 months = 7 points 97 to 108 months = 8 points 109 to 120 months = 9 point 121 months or greater = 10 points	10	
RT8	The Contractor should demonstrate that the proposed resource has experience creating, updating, revising, and documenting GIS and/or earth observation data sets.	0 to 12 months = 0 points 13 to 24 months = 1 point 25 to 36 months = 2 points 37 to 48 months = 3 points 49 to 60 months = 4 points 61 to 72 months = 5 point 73 to 84 months = 6 points 85 to 96 months = 7 points 97 to 108 months = 8 points 109 to 120 months = 9 point 121 months or greater = 10 points	10	
RT9	The Contractor should demonstrate that the proposed resource has experience developing project material documentation and presenting to both business and IT (technical) communities.	0 to 12 months = 0 points 13 to 24 months = 1 point 25 to 36 months = 2 points 37 to 48 months = 3 points 49 to 60 months = 4 points 61 to 72 months = 5 point 73 to 84 months = 6 points 85 to 96 months = 7 points 97 to 108 months = 8 points 109 to 120 months = 9 point 121 months or greater = 10 points	10

APPENDIX D TO ANNEX A

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the Contractor's quotation when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all the information provided in the résumés and supporting material proposed for completing the subject work, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Contractor to be true and accurate. Furthermore, the Contractor warrants that every individual proposed by the Contractor for the requirement is capable of performing the Work described in the Task Authorization.

_______________________________________ _____________________

Print name of authorized individual & sign above Date

2. CERTIFICATION OF AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under this Task Authorization, the persons proposed in the quotation will be available to commence performance of the work within a reasonable time from the date of issuance of the valid Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

_______________________________________ _____________________

Print name of authorized individual & sign above Date

3. CERTIFICATION OF STATUS OF PERSONNEL

If the Contractor has proposed any individual who is not an employee of the Contractor, the Contractor certifies that it has permission from that individual to propose his/her services in relation to the Work to be performed under this TA and to submit his/her résumé to Canada. At any time during the Contract Period the Contractor must, upon request from the Contracting Authority, provide the written confirmation, signed by the individual, of the permission that was given to the Contractor of his/her availability. Failure to comply with the request may result in a default under the Contract in accordance with the General Conditions.

_______________________________________ _____________________

Print name of authorized individual & sign above Date

4. CERTIFICATION OF LANGUAGE

The Contractor certifies that the proposed resource(s) in response to this draft Task Authorization is/are fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

Annex D non-disclosure agreement

Canada Border Services Agency | Agence des services frontaliers du Canada

PART 7 - RESULTING CONTRACT CLAUSES

The following clauses apply to and form part of any contract resulting from the bid solicitation.

7.1 REQUIREMENT

(a) ***BiR Consulting Inc.*** (the Contractor) agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with and at the prices set out in the Contract. This includes providing professional services as requested by Canada.

(b) **Client:** Under the Contract, the 'Client' is Canada Border Services Agency (CBSA).

(c) **Reorganization of the Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

(e) **Location of Services:** Services must be delivered as requested to the locations specified in the Contract, which delivery locations must exclude any area subject to one of the Comprehensive Land Claim Agreements (CLCAs).

7.2 TASK AUTHORIZATION ("TA")

(a) Purpose of TA

Services to be provided under the Contract on an "as-and-when-requested basis" will be ordered by Canada using the Task Authorization ("TA") process. The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a valid, fully signed TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk..

(b) Process for Issuing a TA

If a requirement for a specific task is identified, a draft "statement of task" will be prepared by the Client and sent to the Contractor by the Contracting Authority. Once it receives the statement of task, the Contractor must submit a response to the Contracting Authority identified in the TA detailing the cost and time to complete the task. The Contractor's response must be based on the rates set out in the Contract. The Contractor will not be paid for providing the response or for providing other information required to prepare and issue the TA. The Contractor must provide any information requested by Canada in relation to the preparation of a TA within five (5) working days of the request, unless otherwise specified.

(c) Approval Process

If Canada approves the Contractor's task response, Canada (by its authorized representative, as described in this contract) will issue the TA by forwarding a fully signed copy of the final TA form to the Contractor. Whether or not to approve or issue a TA is entirely within Canada's discretion.

(d) Authority to Issue a TA

Any TA must be issued directly by the Contracting Authority.

(e) Contents of a TA

A Task Authorization must contain the following information, if applicable:

(i) a task number;

(ii) the number of resources in each category required;

(iii) a statement of work for the task outlining the activities to be performed and identifying any deliverables;

(iv) the duration of the task is to be carried out (start and end dates);

(v) milestone dates for deliverables and payments (if applicable);

(vi) the number of person-days of effort required;

(vii) the specific work location;

(viii) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

any other constraints that might affect the completion of the task.

(f) Charges for Work under a TA

The Contractor must not charge Canada anything more than the price set out in the Task Authorization unless Canada has issued a TA amendment authorizing the increased expenditure. Canada will not pay the Contractor for any design changes, modifications or interpretations of the Work unless they have been approved, in writing, by the Contracting Authority before being incorporated into the Work.

(g) Consolidation of TAs for Administrative Purposes

The Contract may be amended from time to time to reflect all Task Authorizations issued and approved by the Contracting Authority to date, to document the Work performed under those TAs for administrative purposes.

(h) Refusal of Task Authorizations

Unless specified otherwise in the RFP, the Contractor is required to submit a response in response to every draft statement of task issued by Canada. Canada may immediately, and without further notice, terminate the Contract for default if the Contractor does not submit a response in response to a draft statement of task issued during the Contract Period.

(i) Minimum Work Guarantee

In this clause, "**Minimum Contract Value**" means 5% of the amount identified as the Total Estimated Cost on page 1 of the Contract when it is first awarded. The Contractor must perform the Work described in the Contract as and when requested by Canada during the Contract Period. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with paragraph (c). In consideration of this obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract.

If Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work performed.

Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract in whole or in part for default.

(j) Evaluation and Qualification of Additional Resources

Resources who are being proposed in response to a TA who were not qualified at bid closing must meet all mandatory requirements and achieve the minimum (or greater) pass mark in the point rated criteria within the Technical Criteria, as per Attachment 4.1 to Part 4, for the resource category under which they are being proposed.

[redacted]

7.3 AVAILABILTY AND REPLACEMENT OF RESOURCE– TASK AUTHORIZATION

A) The contractor must ensure that the originally evaluated resource is available for the initial task authorization issued in relation to this contract. The crown reserves the right to award the resulting contract to the next ranked bidder should the originally evaluated resource not be available for the initial task authorization.

B) Replacement resources will be evaluated according to the original mandatory and point rated evaluation criteria. The replacement resource to be evaluated must obtain a minimum score that is:

> 1) meet all the mandatory criteria and achieve the minimum (or greater) pass mark in the point rated criteria.

7.4 MINIMUM WORK GUARANTEE

a. In this clause,
    i. "**Minimum Contract Value**" means the amount specified in the "Limitation of Expenditure" clause set out in the Contract (excluding Applicable Taxes); and
    ii. "Minimum Contract Value" means **5%** of the Maximum Contract Value on the date the contract is first issued.

b. Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

c. In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the cost of the Work performed.

d. Canada will have no obligation to the Contractor under this clause if Canada terminates the Contract
    i. for default.
    ii. for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or
    iii. for convenience within ten business days of Contract award.

7.5 STANDARD CLAUSES AND CONDITIONS\

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (http://sacc.pwgsc.gc.ca/sacc/index-e.jsp) issued by Public Works and Government Services Canada.

(a) **General Conditions:**

2035 (2016-04-04), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

The text under Subsection 04 of Section 41 Code of Conduct and Certifications, of General Conditions 2035 referenced above is replaced by:

> During the entire period of the Contract, the Contractor must diligently update, by written notice to the Contracting Authority, the list of names of all individuals who are directors of the Contractor whenever there is a change. As well, whenever requested by Canada, the Contractor must provide the corresponding Consent Forms.

With respect to Section 30 - Termination for Convenience, of General Conditions 2035, unless already present, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.

5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of

(a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Revenue Guarantee, or due to the Contractor as of the date of termination, or

(b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions:**

The following Supplemental General Conditions:

(i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services; and

(ii) 4006 (2010-08-16), Supplemental General Conditions - Contractor to Own Intellectual Property Rights in Foreground Information;

apply to and form part of the Contract.

7.6 SECURITY REQUIREMENT

SECURITY REQUIREMENT FOR CANADIAN SUPPLIER:

PWGSC FILE #	***Contractor Clearance***	***Personnel Security Screening***	***Contractor and its personnel***
Common Service PS SRCL #19	*FSC*	*SECRET*	*MUST NOT remove any protected/CLASSIFIED information*

7.6.1 The Contractor/Offeror must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of SECRET, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC).

7.6.2 The Contractor/Offeror personnel requiring access to PROTECTED/CLASSIFIED information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **Secret**, granted or approved by CISD/PWGSC.

7.6.3 The Contractor/Offeror MUST NOT remove any PROTECTED/CLASSIFIED information or assets from the identified work site(s), and the Contractor/Offeror must ensure that its personnel are made aware of and comply with this restriction.

7.6.4 Subcontracts which contain security requirements are NOT to be awarded without the prior written permission of CISD/PWGSC.

7.6.5 The Contractor/Offeror must comply with the provisions of the:

CBSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

a) Security Requirements Check List and security guide, attached at Annex B;
b) *Industrial Security Manual* (Latest Edition).

7.6.6 Prior to the work beginning under a TA the following security requirement must be considered.

ADDITIONAL SECURITY REQUIREMENT: The Canada Border Services Agency will conduct its own personnel Reliability Status assessment on the recommended Contractor and its personnel as per the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard, irrespective of whether such assessment has already been conducted under any such policies. The Reliability Status assessment conducted by the CBSA will include a credit check performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian Industrial Security Directorate" (CISD) and the "International Industrial Security Directorate" (IISD).

For each proposed resource under a Task Authorization, the Contractor must submit a completed signed original TBS 330-23 Form Personnel Screening Consent and Authorization (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf) upon request of the Contracting Authority.

Until the credit check and all other security screening processes required by the CBSA have been completed and the Contractor and its personnel is considered suitable by the CBSA, no Task Authorizations will be awarded and the Contractor (specifically, the Contractor personnel) shall **not** be permitted access to Protected / Classified information or assets, and further, shall **not** be permitted to enter sites where such information or assets are kept.

In the event the Contractor (specifically the Contractor personnel) does not pass the security screening process required by the CBSA, the Contractor's proposed resource will be considered non-responsive and no Task Authorization will be issued.

Contractor personnel can include in some instances landlords, property management employees and principles of companies when the latter have access to the premises where the CBSA designated or classified information\assets are kept.

7.7 DISPUTE RESOLUTION SERVICES

A potential supplier who has made an objection regarding a procurement relating to a designated contract to the relevant government institution, and is denied relief by that government institution, may file a complaint with the Tribunal within 10 working days after the day on which the potential supplier has actual or constructive knowledge of the denial of relief, if the objection was made within 10 working days after the day on which its basis became known or reasonably should have become known to the potential supplier.

https://buyandsell.gc.ca/for-businesses/selling-to-the-government-of-canada/supplier-complaint-process/recourse-mechanisms

7.8 CONTRACT PERIOD

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:
    (i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends five (5) years after contract award.

7.9 AUTHORITIES

(a) **Contracting Authority**
The Contracting Authority for the Contract is:

Name:	Robert Penwarden
Title:	Senior Procurement Officer

[redacted]

Organization: Canada Border Services Agency
Address: 355 North River Road, 17th Floor, Ottawa, Ontario K1A 0L8
Telephone: (343) 291-5669
Facsimile: (343) 291-5722
E-mail address: Robert.Penwarden@cbsa-asfc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) **Technical Authority**

The Technical Authority for the Contract is:

Name: Karan Hauser
Title: IT Manager - Secondary Processing and Passage History
Organization: Canada Border Services Agency
Address: 333 North River Road, 3rd Floor, Ottawa, Ontario K1A 0L8
Telephone: (343) 291-6747
E-mail address: Karan.Hauser@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

Contractor's Representative

The Contractor's Representative for the Contract is:

Name:
Title: Director BiR Consulting Inc.
Organization: BiR Consulting Inc.
Address: 5731 Atkins Street, Ottawa, Ontario, K1W 1B3
Telephone:
E-mail address:

7.10 PAYMENT

A. **Basis of Payment**:

One or more of the basis of payment options below will be specified in the TA:

i. **Professional Services provided under a Task Authorization with a Limitation of Expenditure**: For professional services requested by Canada, Canada will pay the Contractor, in arrears, up to the Maximum Price, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex C, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

ii. **Professional Services provided under a Task Authorization with a Firm Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the firm price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

iii. **Professional Services provided under a Task Authorization with a Ceiling Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor the ceiling price set out in the Task Authorization (based on the firm, all-inclusive per diem rates set out in Annex C, Applicable taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

iv. **Pre-Authorized Travel and Living Expenses:**
Canada will not pay any travel or living expenses associated with performing the Work.

v. **Competitive Award**: The Contractor acknowledges that the Contract has been awarded as a result of a competitive process. No additional charges will be allowed to compensate for errors, oversights, misconceptions or underestimates made by the Contractor when bidding for the Contract.

vi. **Professional Services Rates**: In Canada's experience, bidders from time to time propose rates at the time of bidding for one or more Resource Categories that they later refuse to honour, on the basis that these rates do not allow them to recover their own costs and/or make a profit. This denies Canada of the benefit of the awarded contract. If the Contractor does not respond or refuses to provide an individual with the qualifications described in the Contract (or proposes instead to provide someone from an alternate category at a different rate), whether or not Canada terminates the Contract as a whole, Canada may impose sanctions or take other measures in accordance with the PWGSC Vendor Performance Policy (or equivalent) then in effect, which may include an assessment that results in conditions applied against the Contractor to be fulfilled before doing further business with Canada, or full debarment of the Contractor from bidding on future requirements.

vii. **Purpose of Estimates**: All estimated costs contained in the Contract are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to purchase services in these amounts. Any commitments to purchase specific amounts or values of services are described elsewhere in the Contract.

B. **Canada's total responsibility**

i. **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, Canada will pay the Contractor, in arrears, up to the Maximum Price, for actual time worked and any resulting deliverables in accordance with the firm all-inclusive per diem rates set out in Annex C, Basis of Payment, Applicable Taxes extra. Partial days will be prorated based on actual hours worked based on a 7.5-hour workday.

Estimated Cost: $1,550,000.00 CAD

ii. **Applicable Taxes** :

Estimated Cost: $201,500.00 CAD

2. No increase in the total liability of Canada or in the price of the Work resulting from any design changes, modifications or interpretations of the Work, will be authorized or paid to the Contractor unless these design changes, modifications or interpretations have been approved, in writing, by the Contracting Authority before their incorporation into the Work. The Contractor must not perform any work or provide any service that would result in Canada's total liability being exceed before obtaining the written approval of the Contracting Authority. The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum when:

   A. It is 75 percent committed, or

   B. 4 months before the Contract expiry date, or

   C. as soon as the Contractor considers that the contract funds provided are inadequate for the completion of the Work,

   whichever comes first.

If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

c. **Methods of Payment - Approved TA:** One or more of the following methods of payment will form part of the approved TA:

For a Firm Price TA:

(a) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

- i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
- ii. all such documents have been verified by Canada;
- iii. the Work performed has been accepted by Canada.

(b) **Milestone Payment:** Canada will pay the Contractor on a milestone basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

- i. an accurate and complete claim for payment and any other document required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
- ii. all required certificates have been signed by the respective authorized representatives; all work associated with the milestone and as applicable any deliverable required has been completed and accepted by Canada.

For the Work specified in an approved TA subject to a limitation of expenditure or ceiling price:

(c) **Single Payment:** Canada will pay the Contractor on a single basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

- i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
- ii. all such documents have been verified by Canada;
- iii. the Work performed has been accepted by Canada.

(d) **Monthly Payment:** Canada will pay the Contractor on a monthly basis for work performed during the month covered by the invoice in accordance with the payment provisions of the Contract if:

- i. an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;
- ii. all such documents have been verified by Canada;
- iii. the Work performed has been accepted by Canada.

d. **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contract must repay any overpayment, at Canada's request.

e. **Payment Credits**

i. **Failure to Provide Resource:**

A. If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of *10 days*.

B. **Corrective Measures:** If credits are payable under this Article for *two consecutive months* or for *three months in any twelve-month period*, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and *20 working days* to rectify the underlying problem.

C. **Termination for Failure to Meet Minimum Availability Level**: In addition to any other rights it has under the Contract, Canada may terminate the Contract for default by giving the Contractor *3 months'* written notice of its intent, if any of the following apply :

1. the total amount of credits for a given monthly billing cycle reach a level of *10%* of the total billing for that month; or
2. the corrective measures required of the Contractor described above are not met.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

ii. **Credits Apply during Entire Contract Period**: The Parties agree that the credits apply throughout the Contract Period.

iii. **Credits represent Liquidated Damages**: The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

iv. **Canada's Right to Obtain Payment**: The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

v. **Canada's Rights & Remedies not Limited**: The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

vi. **Audit Rights**: The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

f. **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

i. Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

ii. If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

7.11 INVOICING INSTRUCTIONS

a. The Contractor must submit invoices in accordance with the information required in the General Conditions.
b. The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.
c. By submitting invoices the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.
d. The Contractor will submit invoices on its own form, which will include:
    (i) the date;
    (ii) the Contractor name and address;
    (iii) the Destination
    (iv) Standing Offer/Supply Arrangement number;
    (v) Contract serial number;
    (vi) Financial codes, including GST or HST (as applicable) registration number;
    (vii) Description of the Work
    (viii) Category(ies) of Personnel and number of days worked;
    (ix) Firm Per Diem Rate on which the total dollar amount of the invoice is based;
    (x) the amount invoiced (exclusive of the Goods and Services Tax (GST) or Harmonized Sales Tax (HST) as appropriate) and the amount of GST or HST, as appropriate, shown separately;
    (xi) Client Reference Number (CRN);
    (xii) Business Number (BN); and
    (xiii) Total value billed to date and the dollar amount remaining in the Contract to date.
e. The Contractor will send the original and one copy of the invoice to the Technical Authority's paying office (CBSA Finance) at the following location on a monthly basis:

Canada Border Service Agency – Agence des services frontaliers du Canada
vendors-fournisseurs@cbsa-asfc.gc.ca (Preferred)
(National Invoice Reception Unit)
105 Rue McGill #250-01
Montreal Quebec H2Y 2E7

A copy of the invoice must be sent to the Contracting Authority at the following location on a monthly basis:

Att: Robert Penwarden
Strategic Procurement and Material Management Division (SPMMD)
Robert.Penwarden@cbsa-asfc.gc.ca

7.12 CERTIFICATIONS

a. Compliance with the certifications provided by the Contractor in its bid or any TA quotation is a condition of the Contract and subject to verification by Canada during the entire Contract Period. If the Contractor does not comply with any certification or it is determined that any certification made by the Contractor is untrue, whether made knowingly or unknowingly, Canada has the right, under the default provision of the Contract, to terminate the Contract for default.

7.13 FEDERAL CONTRACTORS PROGRAM FOR EMPLOYMENT EQUITY – DEFAULT BY CONTRACTOR

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and HRSDC-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by HRSDC will constitute the Contractor in default as per the terms of the Contract.

7.14 APPLICABLE LAWS

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in the province of Ontario.

7.15 PRIORITY OF DOCUMENTS

If there is a discrepancy between the wordings of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) These Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;
(b) Supplemental general conditions, in the following order:
  (i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;
  (ii) 4006 (2010-08-16), Supplemental General Conditions - Contractor to Own Intellectual Property Rights in Foreground Information;
(c) General Conditions 2035 (2016-04-04);
(d) Signed Task Authorizations;
(e) Annex A Statement of Work;
  i. Appendix A to Annex A Task Authorization Form

(f) Annex C Basis of Payment;
(g) Annex B Security Requirements Check List;
(h) Supply Arrangement Number EN578-055605/218/EI (the "**Supply Arrangement**");
(i) the Contractor's bid dated June 10, 2016.

7.16 FOREIGN NATIONALS (CANADIAN CONTRACTOR)

SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

7.17 INSURANCE REQUIREMENTS

A. Compliance with Insurance Requirements

1. The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.
2. The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.
3. The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

B. Commercial General Liability Insurance

1. The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

2. The Commercial General Liability policy must include the following:

a. Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

b. Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

c. Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

d. Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

e. Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

f. Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

g. Employees and, if applicable, Volunteers must be included as Additional Insured.

h. Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

i. Broad Form Property Damage including Completed Operations: Expands the Property Damage coverage to include certain losses that would otherwise be excluded by the standard care, custody or control exclusion found in a standard policy.

j. Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of policy cancellation.

k. If the policy is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

l. Owners' or Contractors' Protective Liability: Covers the damages that the Contractor becomes legally obligated to pay arising out of the operations of a subcontractor.

m. Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

C. Errors and Omissions Liability Insurance

1. The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

2. If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

3. The following endorsement must be included:

   Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

7.18 LIMITATION OF LIABILITY - INFORMATION MANAGEMENT/INFORMATION TECHNOLOGY

a. This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

b. **First Party Liability** :

i. The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to :

A. any infringement of intellectual property rights to the extent the Contractor breaches the section of the general conditions entitled "Intellectual Property Infringement and Royalties";

B. physical injury, including death.

ii. The Contractor is liable for all direct damages affecting real or tangible personal property owned, possessed, or occupied by Canada.

iii. Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

iv. The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i.A) above.

v. The Contractor is also liable for any other direct damages to Canada caused by the Contractor in any way relating to the Contract, including :

A. any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

B. any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of [.75] times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under paragraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00 , whichever is more.

vi. If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent backup kept by Canada. Canada is responsible for maintaining an adequate backup of its records and data.

c. **Third Party Claims :**

i. Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

ii. If Canada is required, as a result of joint and several liability, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite paragraph (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

iii. The Parties are only liable to one another for damages to third parties to the extent described in this paragraph c.

7.19 PROFESSIONAL SERVICES - GENERAL

a. The Contractor must provide professional services on request as specified in this contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, and language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

b. If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

c. In General Conditions 2035, the Section titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

1. If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:
    a. the name, qualifications and experience of a proposed replacement immediately available for Work; and
    b. security information on the proposed replacement as specified by Canada, if applicable.

    The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

2. Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:
    a. exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract for default under Section titled "Default of the Contractor", or
    b. assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that meet or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this subarticle (c).
3. Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Section. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates. The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that a resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order that a resource stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.
4. The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

[redacted]

7.20 SAFEGUARDING ELECTRONIC MEDIA

a. Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.
b. If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

7.21 REPRESENTATIONS AND WARRANTIES

The Contractor made statements regarding its and its proposed resources experience and expertise in its bid that resulted in the award of the Contract and issuance of TAs. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TAs. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

7.22 ACCESS TO CANADA'S PROPERTY AND FACILITIES

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

7.23 TRANSITION SERVICES AT END OF CONTRACT PERIOD

The Contractor agrees that, in the period leading up to the end of the Contract Period and for up to three months afterwards, it will make all reasonable efforts to assist Canada in the transition from the Contract to a new contract with another supplier. The Contractor agrees that there will be no additional charge for these services.

7.24 IDENTIFICATION PROTOCOL RESPONSIBILITIES

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:
a. Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify if an individual is not a permanent employee of the Contractor prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not a Contractor permanent employee;
b. During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and
c. If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.
d. If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to

eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

e. In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

7.25 NON-DISCLOSURE AGREEMENT

The Contractor must obtain from its employee(s) or subcontractor(s) the completed and signed non-disclosure agreement, which can be found in Annex D, and provide it to the Contracting Authority before they are given access to information by or on behalf of Canada in connection with the Work.

Canada Border Services Agency　Agence des services frontaliers du Canada

ANNEX A
STATEMENT OF WORK

TITLE	**Application/Software Architect - Level 3**
OBJECTIVE	The Senior Application/Software Architects will be required to: - Develop technical architectures, frameworks and strategies to meet the business and applications requirements. - Produce technical documents such as technical design documents and technical requirements specifications. - Provide technical direction, solution options and recommendations to meet the application requirements. - Identify the impact and provide option analyses and requirements specifications based on given requirements. - Develop, integrate and deploy solutions on CBSA's infrastructure for the section. - Identify policies and requirements that drive out a particular solution. - Analyze and evaluate alternative technology solutions to meet business requirements - Evaluate software relative to their ability to support specified requirements, by determining potential and actual bottlenecks and improve system performance - Monitor industry trends to ensure that solutions fit with government and industry directions for technology. - Provide support to application and/or technical support teams in the proper application of infrastructure and development frameworks. - Review application and program design or technical infrastructure design to ensure adherence to standards and to recommend improvements.
BACKGROUND	The Secondary Processing and Passage History section is responsible for the development and implementation of several key

ANNEX A
STATEMENT OF WORK

	Government of Canada commitments under the Canada-U.S. Beyond the Border Action plan and Biometrics Expansion including: • Entry/Exit Basic Query – to provide basic query access to entry/exit information to CBSA user groups across Canada, including border services officers (BSOs) at Secondary ports of entry (POE), Inland Enforcement, and CBSA users outside of Canada • Entry/Exit CIC Query — to allow authorized CIC employees the access for the entry and exit of travelers to support and improve border and immigration program management • Entry/Exit Identity Resolution and Reconciliation — a process which establishes and permits information sharing the entry and exit events of a traveller so that a traveller's entry record into one country can be utilized to establish an exit record from the other for CBSA security management • Other Entry/Exit projects including and not limited to Notifications, OGD Sharing, Vetting, etc. • Generic Passage Flow – a consolidated operational model of traveller processing to improve border and security management • Primary Inspection Kiosk - an initiative to streamline the border clearance process in air mode by incorporating the documents authentication, facial recognition, iris and fingerprint scanning and the use of mobile technologies • Biometrics Expansion – Integrated border services with the CIC and the RCMP through several projects for immigration information sharing to strengthen the integrity of immigration and border programs in Canada and the United States In order to support the development of the above initiatives, the SPPH section is in need of a Senior Application Architect/Designer/Developer with a strong background in analysis, design, options evaluation, development and implementation of solutions and strong communication and mentoring skills.
SCOPE	The Secondary Processing and Passage History section requires up to two (2) Senior Application/Software Architects for five years on an as and when requested basis through the issuance of task authorizations.

ANNEX A
STATEMENT OF WORK

	Each task authorization will list/specify the specific tasks to be completed. Regardless of the Objective and Background sections above, should a requirement for work from another CBSA sector align with the tasks and deliverables of this contract, CBSA may, at its discretion, leverage resources from this contract to support and assist with that requirement.
TASKS	1. Work closely with Senior Technical Advisors and Project Architects to provide options, technical direction and make recommendations to team, senior management, clients and stakeholders. 2. Work closely with other members of the Development Team to analyze, design and develop detailed specification documents with clear project deliverables and timelines to ensure timely completion of deliverables. 3. Develop project/system documentation as required as part of the Service Life Cycle Management Framework (SLMF). 4. Attend meetings as needed during all phases of project development 5. Work with various team leaders, clients and Service Managers to analyze, design and develop (if required) solutions 6. Determine appropriate architecture, and other technical solutions, and make relevant recommendations to the team, senior management, clients and stakeholders. 7. Communicate to the Management with efficiency and accuracy project statuses. 8. Engage in strategic thinking to provide high value-of-service. 9. Alert colleagues to emerging technologies and/or applications and the opportunities to integrate them into operations and activities while adhering to the agency framework and guidelines. 10. Be actively involved in and contribute regularly to the development community by participating in technical meetings including but not limited to the Divisional Technical Meetings.

ANNEX A
STATEMENT OF WORK

	11. Regular status reports will be submitted to supervisors.
CONSTRAINTS	The target delivery timeline for the major Beyond the Border initiatives for Entry/Exit are slated for fiscal years 2016 to 2017. The target delivery timelines for the Biometric Expansion projects are targeted for 2016 to 2018. To ensure the projects can be delivered on time, the SPPH section requires a strong skilled and experienced Senior Application Architect/Designer/Developer with secret security clearance. Each task authorization will specify any additional constraints.
DELIVERABLES	The Senior Application/Software Architect will provide project documentation, technical solutions, and make relevant recommendations to the team, senior management, clients and stakeholders based on requirements. The Senior Application/Software Architect will perform knowledge transfer to the EXIS and SPPH team members in the form of coaching and documentation throughout the duration of the contract. Regular status reports will be submitted to supervisors. Detailed timesheets must be submitted on a monthly basis to supervisors.
TRAVEL REQUIREMENTS	While there is no travel expected in the conduct of the work, each Task Authorization will describe any travel, if required.
LANGUAGE	The Senior Application/Software Architect must work and produce deliverables in English.

APPENDIX A TO ANNEX A
TASK AUTHORIZATION (TA) FORM

TASK AUTHORIZATION	
Contractor:	**Contract Number:**
Task Number:	**Date:**
Amendment Number:	

TA Request
(For completion by Technical Authority)

Background/Objective:

This section should provide context for the work and a high level outcome. For example: This is the 1st phase of the project so the focus is only on certain aspects of the work. This will assist the procurement officer in their review and will distinguish from previous or subsequent TAs.

Tasks:

This section lists the detailed and specific tasks the resource is required to perform to achieve the outcome.

Deliverables and Associated Schedule:

This section lists the detailed deliverables the resource must produce along with the due dates of when they must submit them. The description of the deliverables should make it clear to the supplier and their resource what constitutes an acceptable deliverable so there is no ambiguity in terms of the quality we expect. If we do not provide this, we have little to no recourse for poor performance.

Format of Deliverables:

2. PERIOD OF SERVICES	**From:** __________	**To:** _____________
3. Work Location		
4. Other Conditions /Restraints	**[ ] Yes [ ] No Specify:**	
5. Travel	**[ ] Yes [ ] No Specify:**	
6. Basis of Payment	**Limitation of Expenditure [ ] Ceiling Price [ ]** **Firm Price [ ]**	

7. METHOD OF PAYMENT:

☐ Single ☐ Monthly ☐ Milestones

8. LEVEL OF SECURITY CLEARANCE REQUIRED FOR THE CONTRACTOR'S PERSONNEL

ANNEX C

BASIS OF PAYMENT

Bidders must submit their financial bid in accordance with the Attachment 4.2

1.0 The Contractor will be paid in accordance with the following Basis of Payment for Work performed pursuant to this Contract.

For the provision of Informatics Professional Services as described in Annex A, Statement of Work, the Contractor shall be paid the all-inclusive firm daily rate(s) below in the performance of this Contract, HST extra.

Contract Period
(a period of 5 years)

Resource Category	**Per Diem Rate Contract**
Application/ Software Architect (Level 3)	

Please Note: This is a Tier 1 TBIPS requirement for the services of Application/Software Architect(s) (Level 3) on an as and when requested basis for a maximum value of up to $1,977,500.00 including applicable taxes.

2.0 GST/HST

(a) All prices and amounts of money in the contract are exclusive of Goods and Services Tax (GST) or Harmonized Sales Tax (HST), as applicable, unless otherwise indicated. The GST or HST, whichever is applicable, is extra to the price herein and will be paid by Canada.

(b) The estimated HST is included in the total estimated cost shown on page 1 of this Contract. The estimated HST to the extent applicable will be incorporated into all invoices and progress claims and shown as a separate item on invoices and progress claims. All items that are zero-rated, exempt, or to which the HST does not apply, are to be identified as such on all invoices. The Contractor agrees to remit to Canada Revenue Agency (CRA) any amounts of HST paid or due.

(c) All deliverables are F.O.B. Destination, and Canadian Customs Duty included, where applicable.

(d) The Crown will not accept any travel and living expenses incurred by the Contractor as a consequence of any relocation required to satisfy the terms of the Contract.

All estimates contained in the Contract relating to travel, optional items or as and when requested goods or services are included solely for the administrative purposes of Canada and do not represent a commitment on the part of Canada to exercise such options or purchase such services.

Canada Border Services Agency   Agence des services frontaliers du Canada

ANNEX D

NON-DISCLOSURE AGREEMENT

The successful resource (s) will be required to sign the agreement prior to contract award.

I, _________________________ , recognize that in the course of my work as an employee or subcontractor of _______ , I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract No. __________ between Her Majesty the Queen in right of Canada, represented by the President of the CBSA and ____________, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract No. __________________.

INSERT:

6.0 Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

  (i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends two (2) years later; and

  (ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

  (i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to **one (1) additional two (2) year** period under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

  (ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN THE SAME.

AMENDMENT 004

This amendment is hereby raised to make the following changes:

1. AT Page 1 of the Contract, Total Estimated Cost:

DELETE: $ 6,300,000.00
INSERT: $ 12,600,000.00

2. AT CLAUSE 6.0 Contract Period:

DELETE: In it's entirety;

INSERT:

6.0 Contract Period

(a) Contract Period: The "Contract Period" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "Contract Period", which begins on the date the Contract is awarded and ends December 14, 2024.

3. AT CLAUSE 7.0 Authorities subsection (a) Contracting Authority and (b) Technical Authority:

DELETE: In it's entirety;

INSERT:

7.0 Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name:	Alexander Cornelisse
Title:	Supply Specialist
Organization:	Public Services and Procurement Canada
Directorate:	Professional Services Procurement Directorate
Address:	10 Rue Wellington, Gatineau, QC K1A 0S5
Telephone:	(873)-354-8817
E-mail address:	Alexander.Cornelisse@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Kaveh Afshar-Zanjani
Title: Executive Director, Data Strategy
Organization: Canada Border Services Agency
Directorate: Chief Data Office, Strategic Policy Branch
Address: 333 North River Road, Ottawa ON K1A 0L8
Telephone: 613-608-2244
E-mail address: Kaveh.Afshar-Zanjani@cbsa-asfc.gc.ca

The Technical Authority is the representative of the department or agency for whom the Work is being carried out under the Contract and is responsible for all matters concerning the technical content of the Work under the Contract. Technical matters may be discussed with the Technical Authority; however, the Technical Authority has no authority to authorize changes to the scope of the Work. Changes to the scope of the Work can only be made through a contract amendment issued by the Contracting Authority.

In their absence, the Technical Authority for the Contract is:

Name: Michel Villeneuve
Title: Manager
Organization: Canada Border Services Agency
Directorate: Chief Data Office, Strategic Policy Branch
Address: 333 North River Road, Ottawa ON K1A 0L8
Telephone: 819-360-6548
E-mail address: Michel.Villeneuve@cbsa-asfc.gc.ca

ALL OTHER TERMS AND CONDITIONS OF THE CONTRACT REMAIN UNCHANGED.

Canada

1.1 Requirement

(a) Team MAKWA/TPG (the "**Contractor**") agrees to supply to the Client the services described in the Contract, including the Statement of Work, in accordance with, and at the prices set out in, the Contract. This includes providing professional services as and when requested by Canada, to one or more locations to be designated by Canada, excluding any locations in areas subject to any of the Comprehensive Land Claims Agreements.

(b) **Client**: Under the Contract, the "**Client**" is Canada Border Services Agency (CBSA).

(c) **Reorganization of Client**: The Contractor's obligation to perform the Work will not be affected by (and no additional fees will be payable as a result of) the renaming, reorganization, reconfiguration, or restructuring of any Client. The reorganization, reconfiguration and restructuring of the Client includes the privatization of the Client, its merger with another entity, or its dissolution, where that dissolution is followed by the creation of another entity or entities with mandates similar to the original Client. In connection with any form of reorganization, Canada may designate another department or government body as the Contracting Authority or Technical Authority, as required to reflect the new roles and responsibilities associated with the reorganization.

(d) **Defined Terms**: Words and expressions defined in the General Conditions or Supplemental General Conditions and used in the Contract have the meanings given to them in the General Conditions or Supplemental General Conditions. Any reference to an Identified User in the Supply Arrangement is a reference to the Client. Also, any reference to a "deliverable" or "deliverables" includes all documentation outlined in this Contract. A reference to a "local office" of the Contractor means an office having at least one full time employee that is not a shared resource working at that location.

1.2 Task Authorization

(a) **As-and-when-requested Task Authorizations**: The Work or a portion of the Work to be performed under the Contract will be on an "as-and-when-requested basis" using a Task Authorization (TA). The Work described in the TA must be in accordance with the scope of the Contract. The Contractor must not commence work until a validly issued TA has been issued by Canada and received by the Contractor. The Contractor acknowledges that any work performed before such issuance and receipt will be done at the Contractor's own risk.

(b) **Allocation of Task Authorizations**: More than one contract has been awarded for this requirement. As a result, the Task Authorizations issued under this series of contracts will be allocated in accordance with the following:

(i) At the time this series of contracts was awarded, each contractor was allocated an amount of funding as specified in the Limitation of Expenditure based on the evaluation process described in the bid solicitation that resulted in the award of this series of contracts.

(ii) When a Task Authorization is issued, Canada will use a rotational method to allocate the draft Task Authorizations where the rotation is based on the ranking obtained by the Contractor during the Bid Solicitation.

(iii) Canada will send the first TA to the first ranked Contractor, the second TA to the second ranked Contractor This rotational process will be repeated for each subsequent series of TAs issued by Canada.

(iv) The Contractor sent a draft TA will have the time set out further below under the sub-paragraph entitled "Contractor's Response to Draft Task Authorization" to respond to the Contracting Authority.

(v) If the Contractor to whom the draft TA is first sent either fails to respond on time or confirms in writing that it refuses to perform the task, the draft TA will then be forwarded to the next-ranked Contractor. In the event that Canada determines the proposed resource(s) does not meet the minimum experience or other requirements of the categories identified in the draft TA, Canada may, at its entire discretion request that the Contractor propose another resource and the Contractor will have the time set out in the subparagraph "Contractor's Response to Draft Task Authorization" to respond. If the Contractor fails to respond on time or Canada determines that the proposed resource(s) does not meet the minimum experience or other requirements of the categories identified in the draft TA, the draft TA will be forwarded to the next-ranked Contractor.

(vi) If the Contractor refuses a TA or fails to submit a valid response, the dollar value of the TA may be subtracted from the dollar value of the Contractor's Contract and may be re-allocated, at the Contracting Authority's sole discretion, in whole or in part, to the other contractors in that same Workstream.

(vii) The process of sending out a draft TA will continue until Canada either cancels the requirement for the task or it has been validly issued to one of the contractors. If none of the contractors can perform the task (in accordance with all the terms and conditions of this series of contracts), Canada may acquire the required Work by other means.

(viii) Any of the contractors may advise the Technical Authority and the Contracting Authority in writing that it is unable to carry out additional tasks as a result of previous commitments under one or more TAs issued under this series of contracts, and no draft TA will be sent to that contractor until that contractor has given notice in writing to the Technical Authority and the Contracting Authority that it is again available to perform additional tasks.

(ix) If it is found that the allocation process described at part (ii) above has resulted in the award of a disproportionate dollar value of work between the Contractors, the Contractors agree that Canada, in its sole discretion, may deviate from the allocation process and issue TAs in the manner required to re-establish a proportional allocation.

(c) **Assessment of Resources Proposed at TA Stage**: Processes for issuing, responding to and assessing Task Authorizations are further detailed in Appendices A, B, C and D of Annex A.

(d) **Form and Content of draft Task Authorization**:

(i) The Technical Authority will provide the Contractor with a description of the task in a draft Task Authorization using the form specified in Annex A.

(ii) The draft Task Authorization will contain the details of the activities to be performed, and must also contain the following information:

(A) the task number;

(B) The date by which the Contractor's response must be received (which will appear in the draft Task Authorization, but not the issued Task Authorization);

(C) the categories of resources and the number required;

(D) a description of the work for the task outlining the activities to be performed and identifying any deliverables (such as reports);

(E) the start and completion dates;

(F) milestone dates for deliverables and payments (if applicable);

(G) the number of person-days of effort required;

(H) whether the work requires on-site activities and the location;

(I) the language profile of the resources required;

(J) the level of security clearance required of resources;

(K) the price payable to the Contractor for performing the task, with an indication of whether it is a firm price or a maximum TA price (and, for maximum price task authorizations, the TA must indicate how the final amount payable will be determined; where the TA does not indicate how the final amount payable will be determined, the amount payable is the amount, up to the maximum, that the Contractor demonstrates was actually worked on the project, by submitting time sheets filled in at the time of the work by the individual resources to support the charges); and

(L) any other constraints that might affect the completion of the task.

(e) **Contractor's Response to Draft Task Authorization:** The Contractor must provide to the Technical Authority, within five (5) working days of receiving the draft Task Authorization (or within any longer time period specified in the draft TA), a quotation with the proposed total price for performing the task and a breakdown of that cost, established in accordance with the Basis of Payment specified in the Contract, as well as its corresponding proposed resource(s) in accordance with Appendix A to Annex A of the Contract. The Contractor's quotation must be based on the rates set out in the Contract. The Contractor will not be paid for preparing or providing its response or for providing other information required to prepare and validly issue the TA.

(f) **Task Authorization Limit and Authorities for Validly Issuing Task Authorizations**:

To be validly issued, a TA must include the following signatures:

(i) for any TA, inclusive of revisions, with a value less than or equal to $300,000.00 (excluding Applicable Taxes), the TA must be signed by:

a. the Technical Authority; and

b. a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA.

(ii) for any TA with a value greater than this amount, a TA must be signed by:

a. the Technical Authority;

b. a representative from the Strategic Procurement and Material Management Division (SPMMD) of CBSA; and

c. the Contracting Authority.

Any TA that does not bear the appropriate signature(s) is not validly issued by Canada. Any work performed by the Contractor without receiving a validly issued TA is done at the Contractor's own risk. If the Contractor receives a TA that is not appropriately signed, the Contractor must notify the Contracting Authority. By providing written notice to the Contractor, the Contracting Authority may suspend the Client's ability to issue TA's at any time, or reduce the dollar value threshold described in sub-article (i) above; any suspension or reduction notice is effective upon receipt.

(g) **Periodic Usage Reports**:

(i) The Contractor must compile and maintain records on its provision of services to the federal government under Task Authorizations validly issued under the Contract. The Contractor must provide this data to Canada in accordance with the reporting requirements detailed below. If some data is not available, the reason must be indicated.

If services are not provided during a given period, the Contractor must still provide a "NIL" report. The data must be submitted on a quarterly basis to the Contracting Authority. From time to time, the Contracting Authority may also require an interim report during a reporting period.

(ii) The quarterly periods are defined as follows:

(A) 1st quarter: April 1 to June 30;

(B) 2nd quarter: July 1 to September 30;

(C) 3rd quarter: October 1 to December 31; and

(D) 4th quarter: January 1 to March 31.

The data must be submitted to the Contracting Authority no later than 15 calendar days after the end of the reporting period.

(iii) Each report must contain the following information for each validly issued TA (as amended)

(A) the Task Authorization number and the Task Authorization Revision number(s), if applicable;

(B) a title or a brief description of each authorized task;

(C) the name, Resource category and level of each resource involved in performing the TA, as applicable;

(D) the total estimated cost specified in the validly issued TA of each task, exclusive of Applicable Taxes;

(E) the total amount, exclusive of Applicable Taxes, expended to date against each authorized task;

(F) the start and completion date for each authorized task; and

(G) the active status of each authorized task, as applicable (e.g., indicate whether work is in progress or if Canada has cancelled or suspended the TA, etc.).

(iv) Each report must also contain the following cumulative information for all the validly issued TA's (as amended) :

(A) the amount, exclusive of Applicable Taxes, specified in the Contract (as last amended, as applicable) as Canada's total liability to the Contractor for all validly issued TA's; and

(B) the total amount, exclusive of Applicable Taxes, expended to date against all validly issued TA's.

(h) **Refusal of Task Authorizations or Submission of a Response which is not Valid**: The Contractor is not required to submit a response to every draft TA sent to it by Canada. However, in addition to Canada's other rights to terminate the Contract, Canada may immediately, and without further notice, terminate the Contract for default in accordance with the General Conditions if the Contractor in at least three instances has either not responded or has not submitted a valid response when sent a draft TA. For greater clarity, each draft TA, which is identifiable by its task number, will only count as one instance. A valid response is one that is submitted within the required time period and meets all requirements of the draft TA issued, including proposing the required number of resources who each meet the minimum experience and other requirements of the categories identified in the draft TA at pricing not exceeding the rates set out in Annex B.

(i) **Consolidation of TA's for Administrative Purposes**: The Contract may be amended from time to time to reflect all validly issued Task Authorizations to date, to document the Work performed under those TA's for administrative purposes.

1.3 Minimum Work Guarantee

(a) In this clause,

- (i) "**Maximum Contract Value**" means the amount specified in the "**Limitation of Expenditure**" clause set out in the Contract; and
- (ii) "**Minimum Contract Value**" means $20,000.00 (excluding Applicable Taxes).

(b) Canada's obligation under the Contract is to request Work in the amount of the Minimum Contract Value or, at Canada's option, to pay the Contractor at the end of the Contract in accordance with sub-article (c), subject to sub-article (d). In consideration of such obligation, the Contractor agrees to stand in readiness throughout the Contract Period to perform the Work described in the Contract. Canada's maximum liability for work performed under the Contract must not exceed the Maximum Contract Value, unless an increase is authorized in writing by the Contracting Authority.

(c) In the event that Canada does not request work in the amount of the Minimum Contract Value during the Contract Period, Canada must pay the Contractor the difference between the Minimum Contract Value and the total cost of the Work requested.

(d) Canada will have no obligation to the Contractor under this article if Canada terminates the entire Contract

- (i) for default;
- (ii) for convenience as a result of any decision or recommendation of a tribunal or court that the contract be cancelled, re-tendered or awarded to another supplier; or
- (iii) for convenience within ten business days of Contract award.

1.4 Standard Clauses and Conditions

All clauses and conditions identified in the Contract by number, date and title are set out in the Standard Acquisition Clauses and Conditions Manual (https://buyandsell.gc.ca/policy-and-guidelines/standard-acquisition-clauses-and-conditions-manual) issued by Public Works and Government Services Canada.

(a) **General Conditions**:

- (i) 2035 (2020-05-28), General Conditions - Higher Complexity - Services, apply to and form part of the Contract.

With respect to Section 30 - Termination for Convenience, of General Conditions 2035, Subsection 04 is deleted and replaced with the following Subsections 04, 05 and 06:

4. The total of the amounts, to which the Contractor is entitled to be paid under this section, together with any amounts paid, due or becoming due to the Contractor must not exceed the Contract Price.
5. Where the Contracting Authority terminates the entire Contract and the Articles of Agreement include a Minimum Work Guarantee, the total amount to be paid to the Contractor under the Contract will not exceed the greater of:
    - (a) the total amount the Contractor may be paid under this section, together with any amounts paid, becoming due other than payable under the Minimum Work Guarantee, or due to the Contractor as of the date of termination, or
    - (b) the amount payable under the Minimum Work Guarantee, less any amounts paid, due or otherwise becoming due to the Contractor as of the date of termination.

6. The Contractor will have no claim for damages, compensation, loss of profit, allowance arising out of any termination notice given by Canada under this section except to the extent that this section expressly provides. The Contractor agrees to repay immediately to Canada the portion of any advance payment that is unliquidated at the date of the termination.

(b) **Supplemental General Conditions**:

The following Supplemental General Conditions:

(i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

(ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

apply to and form part of the Contract.

1.5 Security Requirement

The following security requirements (SRCL #19 and related clauses provided by the Contract Security Program) as set out under Annex "B" to the Supply Arrangement EN578-170432, applies to and forms part of the Contract.

1. The Contractor must, at all times during the performance of the Contract, hold a valid Facility Security Clearance at the level of Secret, issued by the Canadian Industrial Security Directorate (CISD), Public Works and Government Services Canada (PWGSC)
2. The Contractor personnel requiring access to protected/classified information, assets or sensitive work site(s) must EACH hold a valid personnel security screening at the level of **Secret** as required, granted or approved by CISD/PWGSC
3. The Contractor must not remove any protected/classified information from the identified work site(s), and the Contractor must ensure that its personnel are made aware of and comply with this restriction
4. Subcontracts which contain security requirements are not to be awarded without the prior written permission of CISD/PWGSC
5. The Contractor must comply with the provisions of the:

   (i) Security Requirements Check List and security guide (if applicable), attached at Annex C; and

   (ii) Industrial Security Manual (Latest Edition)

6. ADDITIONAL SECURITY REQUIREMENT:

   (i) The Canada Border Services Agency will conduct its own personnel Reliability Status assessment on the recommended Contractor and its personnel as per the Treasury Board Secretariat of Canada's (TBS) "Security and Contracting Management Standard" and the Policy on Government Security – Personnel Security Standard, irrespective of whether such assessment has already been conducted under any such policies. The Reliability Status assessment conducted by the CBSA will include a credit check performed by an authorized security official with the CBSA's "Personnel Security Screening Section" (PSSS), which is independent of the Public Works and Government Services Canada's (PWGSC), "Canadian Industrial Security Directorate" (CISD) and the "International Industrial Security Directorate" (IISD).

(ii) For each proposed resource, the recommended Contractor must submit a completed signed original TBS 330-23 Form – Personnel Screening Consent and Authorization (http://www.tbs-sct.gc.ca/tbsf-fsct/330-23-eng.pdf) upon request of the Contracting Authority prior to Contract Award.

(iii) Until the credit check and all other security screening processes required by this Request for Proposal have been completed and the recommended Contractor and its personnel is considered suitable by the CBSA, no contract will be awarded and the recommended Contractor (specifically the Contractor personnel) shall not be permitted access to Protected / Classified information or assets, and further, shall not be permitted to enter sites where such information or assets are kept.

(iv) In the event the recommended Contractor (specifically the Contractor personnel) does not pass the security screening process required by the CBSA, the said Contractor's proposal will be considered non-responsive and the next ranked bidder will be contacted. If only one bid was obtained and the proposed bidder does not meet the security requirement, then, the contracting officer will determine the next steps in order to ensure all requirements are met

(v) Contractor personnel can include in some instances landlords, property management employees and principles of companies when the latter have access to the premises where the CBSA designated or classified information\assets are kept.

1.6 Use of individual protective equipment and Occupational Health and Safety (OHS) guideline(s)

a. The Contractor must comply with Government of Canada onsite requirements in respect of individual Protective Pieces of Equipment (PPE) and adhere to Occupational Health and Safety (OHS) guidelines in force in the workplace.

b. The Contractor will provide its resources the following individual PPE for working on site: prescribed face covering mask, gloves, protective shield, and anything else that is required as a pre-requisite to entry and to work on Government of Canada premises. Canada reserves the right to modify the list of PPE and OHS guidelines, if required, to include any future recommendations proposed by the Public Health Agencies.

c. The Contractor warrants that its resources will wear the PPE mentioned above when onsite and follow at all times the Occupational Health and Safety (OHS) guidelines in force in the workplace during the contract period. If resources are not wearing the prescribed PPE and/or are not following the Occupational Health and Safety (OHS) guidelines in force in the workplace, they will not be permitted access to government of Canada sites.

1.7 Contract Period

(a) **Contract Period**: The "**Contract Period**" is the entire period of time during which the Contractor is obliged to perform the Work, which includes:

(i) The "**Initial Contract Period**", which begins on the date the Contract is awarded and ends two (2) years later; and

(ii) The period during which the Contract is extended, if Canada chooses to exercise any options set out in the Contract.

(b) **Option to Extend the Contract**:

(i) The Contractor grants to Canada the irrevocable option to extend the term of the Contract by up to two (2) additional two (2) year period under the same terms and conditions. The Contractor agrees that, during the extended period of the Contract, it will be paid in accordance with the applicable provisions set out in the Basis of Payment.

(ii) Canada may exercise this option at any time by sending a written notice to the Contractor before the expiry date of the Contract. The option may only be exercised by the Contracting Authority, and will be evidenced, for administrative purposes only, through a contract amendment.

1.8 Authorities

(a) Contracting Authority

The Contracting Authority for the Contract is:

Name: Daniel Michaud
Title: Supply Team Leader
Public Works and Government Services Canada
Acquisitions Branch
Directorate: Informatics and Telecommunications Systems Procurement Directorate
Address: 10 Wellington St., Gatineau, Québec
Telephone: (613) 858-8483
E-mail address: daniel.michaud@tpsgc-pwgsc.gc.ca

The Contracting Authority is responsible for the management of the Contract and any changes to the Contract must be authorized in writing by the Contracting Authority. The Contractor must not perform work in excess of or outside the scope of the Contract based on verbal or written requests or instructions from anybody other than the Contracting Authority.

(b) Technical Authority

The Technical Authority for the Contract is:

Name: Jeff Carr
Title: Executive director, Data Strategy
Directorate: Chief Data Office, Strategic Policy Branch, CBSA
Address: 333 North River Road, Ottawa, ON, K1A 0L8
Telephone: 613 290 5069
Email address: jeff.carr@cbsa-asfc.gc.ca

[redacted]

(c) Contractor's Representative

President

1.9 Proactive Disclosure of Contracts with Former Public Servants

By providing information on its status, with respect to being a former public servant in receipt of a Public Service Superannuation Act (PSSA) pension, the Contractor has agreed that this information will be reported on departmental web sites as part of the published proactive disclosure reports, in accordance with Contracting Policy Notice: 2012-2 of the Treasury Board Secretariat of Canada.

1.10 Payment

(a) Basis of Payment

(i) **Professional Services provided under a Task Authorization with a Maximum Price**: For professional services requested by Canada, in accordance with a validly issued Task Authorization, Canada will pay the Contractor, in arrears, up to the Maximum Price for the TA, for actual time worked and any resulting deliverables in accordance with the firm all-

[redacted]

(b) **Limitation of Expenditure – Cumulative Total of all Task Authorizations**

(i) Canada's total liability to the Contractor under the Contract for all validly issued Task Authorizations (TAs), inclusive of any revisions, must not exceed the amount set out on page 1 of the Contract, less any Applicable taxes. With respect to the amount set out on page 1 of the Contract, Customs duties are excluded and Applicable Taxes are included

(ii) No increase in the total liability of Canada will be authorized or paid to the Contractor unless an increase has been approved, in writing, by the Contracting Authority.

(iii) The Contractor must notify the Contracting Authority in writing as to the adequacy of this sum:

(A) when it is 75 percent committed, or

(B) 4 months before the contract expiry date, or

(C) As soon as the Contractor considers that the sum is inadequate for the completion of the Work required in all authorized TAs, inclusive of any revisions,

whichever comes first.

(i) If the notification is for inadequate contract funds, the Contractor must provide to the Contracting Authority a written estimate for the additional funds required. Providing this information does not increase Canada's liability.

(c) **Method of Payment for Task Authorizations with a Maximum Price**: For each Task Authorization validly issued under the Contract that contains a maximum price:

(i) Canada will pay the Contractor no more frequently than once a month in accordance with the Basis of Payment. The Contractor must submit time sheets for each resource showing the days and hours worked to support the charges claimed in the invoice.

(ii) Once Canada has paid the maximum TA price, Canada will not be required to make any further payment, but the Contractor must complete all the work described in the TA, all of which is required to be performed for the maximum TA price. If the work described in the TA is completed in less time than anticipated, and the actual time worked (as supported by the time sheets) at the rates set out in the Contract is less than the maximum TA price, Canada is only required to pay for the time spent performing the work related to that TA.

(d) **Method of Payment for Task Authorizations with a Firm Price - Lump Sum Payment on Completion**: Canada will pay the Contractor upon completion and delivery of all the Work associated with the validly issued Task Authorization in accordance with the payment provisions of the Contract if:

(i) an accurate and complete invoice and any other documents required by the Contract have been submitted in accordance with the invoicing instructions provided in the Contract;

(ii) all such documents have been verified by Canada; and

(iii) the Work delivered has been accepted by Canada.

(e) **Electronic Payment of Invoices – Contract**

The Contractor accepts to be paid using any of the following Electronic Payment Instrument(s):

(i) Visa Acquisition Card;

(ii) MasterCard Acquisition Card;

(iii) **Direct Deposit (Domestic and International);**

(iv) Electronic Data Interchange (EDI);

[illegible] - [illegible] under the Access to Information Act
[illegible] - Divulgation en vertu de la Loi sur l'Accès à l'information.

(v) Wire Transfer (International Only);

(vi) Large Value Transfer System (LVTS) (Over $25M)

(f) **Time Verification**

Time charged and the accuracy of the Contractor's time recording system are subject to verification by Canada, before or after payment is made to the Contractor. If verification is done after payment, the Contractor must repay any overpayment, at Canada's request.

(g) **Payment Credits**

(i) **Failure to Provide Resource**:

(A) If the Contractor does not provide a required professional services resource that has all the required qualifications within the time prescribed by the Contract, the Contractor must credit to Canada an amount equal to the per diem rate (based on a 7.5-hour workday) of the required resource for each day (or partial day) of delay in providing the resource, up to a maximum of 10 days.

(B) **Corrective Measures**: If credits are payable under this Article for two consecutive months or for three months in any 12-month period, the Contractor must submit a written action plan describing measures it will implement or actions it will undertake to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority and 20 working days to rectify the underlying problem.

(C) **Termination for Failure to Meet Availability Level**: In addition to any other rights it has under the Contract, Canada may terminate the Contract for default in accordance with the General Conditions by giving the Contractor three months' written notice of its intent, if any of the following apply:

(1) the total amount of credits for a given monthly billing cycle reach a level of 10% of the total billing for that month; or

(2) the corrective measures required of the Contractor described above are not met.

This termination will be effective when the three month notice period expires, unless Canada determines that the Contractor has implemented the corrective measures to Canada's satisfaction during those three months.

(ii) **Credits Apply during Entire Contract Period**: The Parties agree that the credits apply throughout the Contract Period.

(iii) **Credits represent Liquidated Damages**: The Parties agree that the credits are liquidated damages and represent their best pre-estimate of the loss to Canada in the event of the applicable failure. No credit is intended to be, nor will it be construed as, a penalty.

(iv) **Canada's Right to Obtain Payment**: The Parties agree that these credits are a liquidated debt. To collect the credits, Canada has the right to hold back, draw back, deduct or set off from and against any money Canada owes to the Contractor from time to time.

(v) **Canada's Rights & Remedies not Limited**: The Parties agree that nothing in this Article limits any other rights or remedies to which Canada is entitled under the Contract (including the right to terminate the Contract for default) or under the law generally.

(vi) **Audit Rights**: The Contractor's calculation of credits under the Contract is subject to verification by government audit, at the Contracting Authority's discretion, before or after payment is made to the Contractor. The Contractor must cooperate fully with Canada during the conduct of any audit by providing Canada with access to any records and systems that Canada considers necessary to ensure that all credits have been accurately credited to Canada in the Contractor's invoices. If an audit demonstrates that past invoices contained errors in the calculation of the credits, the Contractor must pay to Canada the amount the audit reveals was required to be credited to Canada, plus interest, from the date Canada remitted the excess payment until the date of the refund (the interest rate is the Bank of Canada's discount annual rate of interest in effect on the date the credit was first owed to Canada, plus 1.25% per year). If, as a result of conducting an audit, Canada determines that the Contractor's records or systems for identifying, calculating or recording the credits are inadequate, the Contractor must implement any additional measures required by the Contracting Authority.

(h) **No Responsibility to Pay for Work not performed due to Closure of Government Offices**

(i) Where the Contractor, its employees, subcontractors, or agents are providing services on government premises under the Contract and those premises are inaccessible because of the evacuation or closure of government offices, and as a result no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if there had been no evacuation or closure.

(ii) If, as a result of any strike or lock-out, the Contractor or its employees, subcontractors or agents cannot obtain access to government premises and, as a result, no work is performed, Canada is not responsible for paying the Contractor for work that otherwise would have been performed if the Contractor had been able to gain access to the premises.

1.11 Invoicing Instructions

(a) The Contractor must submit invoices in accordance with the information required in the General Conditions.

(b) The Contractor's invoice must include a separate line item for each subparagraph in the Basis of Payment provision, and must show all applicable Task Authorization numbers.

(c) By submitting invoices, the Contractor is certifying that the goods and services have been delivered and that all charges are in accordance with the Basis of Payment provision of the Contract, including any charges for work performed by subcontractors.

(d) The Contractor must provide the original of each invoice to the Technical Authority, and a copy to the Contracting Authority.

1.12 Certifications and Additional Information

Unless specified otherwise, the continuous compliance with the certifications provided by the Contractor in its bid or precedent to contract award, any TA quotation and the ongoing cooperation in providing additional information are conditions of the Contract and failure to comply will constitute the Contractor in default. Certifications are subject to verification by Canada during the entire Contract Period.

1.13 Federal Contractors Program for Employment Equity - Default by Contractor

The Contractor understands and agrees that, when an Agreement to Implement Employment Equity (AIEE) exists between the Contractor and Employment and Social Development Canada (ESDC)-Labour, the AIEE must remain valid during the entire period of the Contract. If the AIEE becomes invalid, the name of the Contractor will be added to the "FCP Limited Eligibility to Bid" list. The imposition of such a sanction by ESDC will constitute the Contractor in default as per the terms of the Contract.

1.14 Applicable Laws

The Contract must be interpreted and governed, and the relations between the parties determined, by the laws in force in Ontario.

1.15 Priority of Documents

If there is a discrepancy between the wording of any documents that appear on the following list, the wording of the document that first appears on the list has priority over the wording of any document that appears later on the list:

(a) these Articles of Agreement, including any individual SACC clauses incorporated by reference in these Articles of Agreement;

(b) Supplemental General Conditions, in the following order:

  (i) 4002 (2010-08-16), Supplemental General Conditions - Software Development or Modification Services;

  (ii) 4007 (2010-08-16), Supplemental General Conditions - Canada to Own Intellectual Property Rights in Foreground Information;

(c) General Conditions 2035 (2020-05-28), Higher Complexity - Services;

(d) Annex A, Statement of Work – Annex A including its Appendices as follows;

  (i) Appendix A to Annex A - Tasking Assessment Procedure;

  (ii) Appendix B to Annex A - Task Authorization (TA) Form;

  (iii) Appendix C to Annex A - Resource Assessment Criteria and Response Table;

  (iv) Appendix D to Annex A - Certifications at the TA stage;

(e) Annex B, Basis of Payment;

(f) Annex C, Security Requirements Check List;

(g) the validly issued Task Authorizations and any required certifications (including all of their annexes, if any); and

(h) the Contractor's bid dated February 26, 2021.

1.16 Foreign Nationals (Canadian Contractor)

(a) SACC Manual clause A2000C (2006-06-16) Foreign Nationals (Canadian Contractor)

1.17 Insurance Requirements

(a) **Compliance with Insurance Requirements**

  (i) The Contractor must comply with the insurance requirements specified in this Article. The Contractor must maintain the required insurance coverage for the duration of the Contract. Compliance with the insurance requirements does not release the Contractor from or reduce its liability under the Contract.

  (ii) The Contractor is responsible for deciding if additional insurance coverage is necessary to fulfill its obligation under the Contract and to ensure compliance with any applicable law. Any additional insurance coverage is at the Contractor's expense, and for its own benefit and protection.

  (iii) The Contractor should forward to the Contracting Authority within ten (10) days after the date of award of the Contract a Certificate of Insurance evidencing the insurance coverage. Coverage must be placed with an Insurer licensed to carry out business in Canada and the Certificate of Insurance must confirm that the insurance policy complying with the requirements is in force. If the Certificate of Insurance has not been completed and submitted as requested, the Contracting Authority will so inform the Contractor and provide the Contractor with a time frame within which to meet the requirement. Failure to comply with the request of the Contracting Authority and meet the requirement within the time period will constitute a default under the General Conditions. The Contractor must, if requested by the Contracting Authority, forward to Canada a certified true copy of all applicable insurance policies.

(b) **Commercial General Liability Insurance**

(i) The Contractor must obtain Commercial General Liability Insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature, but for not less than $2,000,000 per accident or occurrence and in the annual aggregate.

(ii) The Commercial General Liability policy must include the following:

(A) Additional Insured: Canada is added as an additional insured, but only with respect to liability arising out of the Contractor's performance of the Contract. The interest of Canada should read as follows: Canada, as represented by Public Works and Government Services Canada.

(B) Bodily Injury and Property Damage to third parties arising out of the operations of the Contractor.

(C) Products and Completed Operations: Coverage for bodily injury or property damage arising out of goods or products manufactured, sold, handled, or distributed by the Contractor and/or arising out of operations that have been completed by the Contractor.

(D) Personal Injury: While not limited to, the coverage must include Violation of Privacy, Libel and Slander, False Arrest, Detention or Imprisonment and Defamation of Character.

(E) Cross Liability/Separation of Insureds: Without increasing the limit of liability, the policy must protect all insured parties to the full extent of coverage provided. Further, the policy must apply to each Insured in the same manner and to the same extent as if a separate policy had been issued to each.

(F) Blanket Contractual Liability: The policy must, on a blanket basis or by specific reference to the Contract, extend to assumed liabilities with respect to contractual provisions.

(G) Employees and, if applicable, Volunteers must be included as Additional Insured.

(H) Employers' Liability (or confirmation that all employees are covered by Worker's compensation (WSIB) or similar program)

(I) Broad Form Property Damage including Completed Operations: Expands the

(M) Advertising Injury: While not limited to, the endorsement must include coverage for piracy or misappropriation of ideas, or infringement of copyright, trademark, title or slogan.

(c) **Errors and Omissions Liability Insurance**

(i) The Contractor must obtain Errors and Omissions Liability (a.k.a. Professional Liability) insurance, and maintain it in force throughout the duration of the Contract, in an amount usual for a contract of this nature but for not less than $1,000,000 per loss and in the annual aggregate, inclusive of defence costs.

(ii) If the Professional Liability insurance is written on a claims-made basis, coverage must be in place for a period of at least 12 months after the completion or termination of the Contract.

(iii) The following endorsement must be included:

Notice of Cancellation: The Insurer will endeavour to provide the Contracting Authority thirty (30) days written notice of cancellation.

1.18 Limitation of Liability - Information Management/Information Technology

(a) This section applies despite any other provision of the Contract and replaces the section of the general conditions entitled "Liability". Any reference in this section to damages caused by the Contractor also includes damages caused by its employees, as well as its subcontractors, agents, and representatives, and any of their employees. This section applies regardless of whether the claim is based in contract, tort, or another cause of action. The Contractor is not liable to Canada with respect to the performance of or failure to perform the Contract, except as described in this section and in any section of the Contract pre-establishing any liquidated damages. The Contractor is only liable for indirect, special or consequential damages to the extent described in this Article, even if it has been made aware of the potential for those damages.

(b) **First Party Liability**:

(i) The Contractor is fully liable for all damages to Canada, including indirect, special or consequential damages, caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any infringement of intellectual property rights to the extent the Contractor breaches the section of the General Conditions entitled "Intellectual Property Infringement and Royalties";

(B) physical injury, including death.

(ii) The Contractor is liable for all direct damages caused by the Contractor's performance or failure to perform the Contract affecting real or tangible personal property owned, possessed, or occupied by Canada.

(iii) Each of the Parties is liable for all direct damages resulting from its breach of confidentiality under the Contract. Each of the Parties is also liable for all indirect, special or consequential damages in respect of its unauthorized disclosure of the other Party's trade secrets (or trade secrets of a third party provided by one Party to another under the Contract) relating to information technology.

(iv) The Contractor is liable for all direct damages relating to any encumbrance or claim relating to any portion of the Work for which Canada has made any payment. This does not apply to encumbrances or claims relating to intellectual property rights, which are addressed under (i)(A) above.

(v) The Contractor is also liable for any other direct damages to Canada caused by the Contractor's performance or failure to perform the Contract that relate to:

(A) any breach of the warranty obligations under the Contract, up to the total amount paid by Canada (including any applicable taxes) for the goods and services affected by the breach of warranty; and

(B) Any other direct damages, including all identifiable direct costs to Canada associated with re-procuring the Work from another party if the Contract is terminated either in whole or in part for default, up to an aggregate maximum for this subparagraph (B) of the greater of .75 times the total estimated cost (meaning the dollar amount shown on the first page of the Contract in the cell titled "Total Estimated Cost" or shown on each call-up, purchase order or other document used to order goods or services under this instrument), or $1,000,000.00.

In any case, the total liability of the Contractor under subparagraph (v) will not exceed the total estimated cost (as defined above) for the Contract or $1,000,000.00, whichever is more.

(vi) If Canada's records or data are harmed as a result of the Contractor's negligence or willful act, the Contractor's only liability is, at the Contractor's own expense, to restore Canada's records and data using the most recent back-up kept by Canada. Canada is responsible for maintaining an adequate back-up of its records and data.

(c) **Third Party Claims**:

(i) Regardless of whether a third party makes its claim against Canada or the Contractor, each Party agrees that it is liable for any damages that it causes to any third party in connection with the Contract as set out in a settlement agreement or as finally determined by a court of competent jurisdiction, where the court determines that the Parties are jointly and severally liable or that one Party is solely and directly liable to the third party. The amount of the liability will be the amount set out in the settlement agreement or determined by the court to have been the Party's portion of the damages to the third party. No settlement agreement is binding on a Party unless its authorized representative has approved the agreement in writing.

(ii) If Canada is required, as a result of joint and several liability or joint and solidarily liable, to pay a third party in respect of damages caused by the Contractor, the Contractor must reimburse Canada by the amount finally determined by a court of competent jurisdiction to be the Contractor's portion of the damages to the third party. However, despite Sub-article (i), with respect to special, indirect, and consequential damages of third parties covered by this Section, the Contractor is only liable for reimbursing Canada for the Contractor's portion of those damages that Canada is required by a court to pay to a third party as a result of joint and several liability that relate to the infringement of a third party's intellectual property rights; physical injury of a third party, including death; damages affecting a third party's real or tangible personal property; liens or encumbrances on any portion of the Work; or breach of confidentiality.

(iii) The Parties are only liable to one another for damages to third parties to the extent described in this Sub-article (c).

1.19 Joint Venture Contractor

(a) The Contractor confirms that the name of the joint venture is Makwa Resourcing Inc. and TPG Technology Consulting Ltd. CJV (Team MAKWA/TPG) and that it is comprised of the following members:

1. Makwa Resourcing Inc.

2. TPG Technology Consulting Ltd.

(b) With respect to the relationship among the members of the joint venture Contractor, each member agrees, represents and warrants (as applicable) that:

(i) Wendy Roberts has been appointed as the "representative member" of the joint venture Contractor and has fully authority to act as agent for each member regarding all matters relating to the Contract;

(ii) by giving notice to the representative member, Canada will be considered to have given notice to all the members of the joint venture Contractor; and

(iii) all payments made by Canada to the representative member will act as a release by all the members.

(c) All the members agree that Canada may terminate the Contract in its discretion if there is a dispute among the members that, in Canada's opinion, affects the performance of the Work in any way.

(d) All the members are jointly and severally or solidarily liable for the performance of the entire Contract.

(e) The Contractor acknowledges that any change in the membership of the joint venture (i.e., a change in the number of members or the substitution of another legal entity for an existing member) constitutes an assignment and is subject to the assignment provisions of the General Conditions.

(f) The Contractor acknowledges that all security and controlled goods requirements in the Contract, if any, apply to each member of the joint venture Contractor.

1.20 Professional Services - General

(a) The Contractor must provide professional services on request as specified in this Contract. All resources provided by the Contractor must meet the qualifications described in the Contract (including those relating to previous experience, professional designation, education, language proficiency and security clearance) and must be competent to provide the required services by any delivery dates described in the Contract.

(b) If the Contractor fails to deliver any deliverable (excluding delivery of a specific individual) or complete any task described in the Contract on time, in addition to any other rights or remedies available to Canada under the Contract or the law, Canada may notify the Contractor of the deficiency, in which case the Contractor must submit a written plan to the Technical Authority within ten working days detailing the actions that the Contractor will undertake to remedy the deficiency. The Contractor must prepare and implement the plan at its own expense.

(c) In General Conditions 2035, the Article titled "Replacement of Specific Individuals" is deleted and the following applies instead:

Replacement of Specific Individuals

(i) If the Contractor is unable to provide the services of any specific individual identified in the Contract to perform the services, the Contractor must within five working days of having this knowledge, the individual's departure or failure to commence Work (or, if Canada has requested the replacement, within ten working days of Canada's notice of the requirement for a replacement) provide to the Contracting Authority:

(A) the name, qualifications and experience of a proposed replacement immediately available for Work; and

[illegible] - Released under the Access to Information Act
AIPRP - Divulgation en vertu de la loi sur l'Accès à l'information.

(B) security information on the proposed replacement as specified by Canada, if applicable.

The replacement must have qualifications and experience that meet or exceed those obtained for the original resource.

(ii) Subject to an Excusable Delay, where Canada becomes aware that a specific individual identified under the Contract to provide services has not been provided or is not performing, the Contracting Authority may elect to:

(A) exercise Canada's rights or remedies under the Contract or at law, including terminating the Contract in whole or in part for default under the Article titled "Default of the Contractor", or

(B) assess the information provided under (c) (i) above or, if it has not yet been provided, require the Contractor to propose a replacement to be rated by the Technical Authority. The replacement must have qualifications and experience that are similar or exceed those obtained for the original resource and be acceptable to Canada. Upon assessment of the replacement, Canada may accept the replacement, exercise the rights in (ii) (A) above, or require another replacement in accordance with this sub-article (c).

Where an Excusable Delay applies, Canada may require (c) (ii) (B) above instead of terminating under the "Excusable Delay" Article. An Excusable Delay does not include resource unavailability due to allocation of the resource to another Contract or project (including those for the Crown) being performed by the Contractor or any of its affiliates.

(iii) The Contractor must not, in any event, allow performance of the Work by unauthorized replacement persons. The Contracting Authority may order that an original or replacement resource stop performing the Work. In such a case, the Contractor must immediately comply with the order. The fact that the Contracting Authority does not order a resource to stop performing the Work does not relieve the Contractor from its responsibility to meet the requirements of the Contract.

(iv) The obligations in this article apply despite any changes that Canada may have made to the Client's operating environment.

1.21 Safeguarding Electronic Media

(a) Before using them on Canada's equipment or sending them to Canada, the Contractor must use a regularly updated product to scan electronically all electronic media used to perform the Work for computer viruses and other coding intended to cause malfunctions. The Contractor must notify Canada if any electronic media used for the Work are found to contain computer viruses or other coding intended to cause malfunctions.

(b) If magnetically recorded information or documentation is damaged or lost while in the Contractor's care or at any time before it is delivered to Canada in accordance with the Contract, including accidental erasure, the Contractor must immediately replace it at its own expense.

1.22 Representations and Warranties

The Contractor made statements regarding its own and its proposed resources' experience and expertise in its bid that resulted in the award of the Contract and the issuance of TA's. The Contractor represents and warrants that all those statements are true and acknowledges that Canada relied on those statements in awarding the Contract and adding work to it through TA's. The Contractor also represents and warrants that it has, and all its resources and subcontractors that perform the Work have, and at all times during the Contract Period they will have and maintain, the skills, qualifications, expertise and experience necessary to perform and manage the Work in accordance with the Contract, and that the Contractor (and any resources or subcontractors it uses) has previously performed similar services for other customers.

1.23 Access to Canada's Property and Facilities

Canada's property, facilities, equipment, documentation, and personnel are not automatically available to the Contractor. If the Contractor would like access to any of these, it is responsible for making a request to the Technical Authority. Unless expressly stated in the Contract, Canada has no obligation to provide any of these to the Contractor. If Canada chooses, in its discretion, to make its property, facilities, equipment, documentation or personnel available to the Contractor to perform the Work, Canada may require an adjustment to the Basis of Payment and additional security requirements may apply.

1.24 Government Property

Canada agrees to supply the Contractor with the items listed at Article 5. Client Support of Annex A – Statement of Work. The section of the General Conditions entitled "Government Property" also applies to the use of the Government Property by the Contractor.

1.25 Transition Services at End of Contract Period

The Contractor agrees to execute the transition tasks identified within the Task Authorizations (if applicable) and it will make all reasonable efforts to assist Canada in the transition from the incumbent to the Contractor and from the Contractor to a new contract with another supplier.

1.26 Identification Protocol Responsibilities

The Contractor will be responsible for ensuring that each of its agents, representatives or subcontractors (hereinafter referred to as Contractor Representatives) complies with the following self-identification requirements:

(a) Contractor Representatives who attend a Government of Canada meeting (whether internal or external to Canada's offices) must identify themselves as Contractor Representatives prior to the commencement of the meeting, to ensure that each meeting participant is aware of the fact that the individual is not an employee of the Government of Canada;

(b) During the performance of any Work at a Government of Canada site, each Contractor Representative must be clearly identified at all times as being a Contractor Representative; and

(c) If a Contractor Representative requires the use of the Government of Canada's e-mail system in the performance of the Work, then the individual must clearly identify him or herself as an agent or subcontractor of the Contractor in all electronic mail in the signature block as well as under "Properties." This identification protocol must also be used in all other correspondence, communication, and documentation.

(d) If Canada determines that the Contractor is in breach of any obligation stated in this Article, upon written notice from Canada the Contractor must submit a written action plan describing corrective measures it will implement to eliminate the recurrence of the problem. The Contractor will have five working days to deliver the action plan to the Client and the Contracting Authority, and twenty working days to rectify the underlying problem.

(e) In addition to any other rights it has under the Contract, Canada may terminate the Contract for default if the corrective measures required of the Contractor described above are not met.

1.27 Dispute Resolution

(a) The parties agree to maintain open and honest communication about the Work throughout and after the performance of the contract.

(b) The parties agree to consult and co-operate with each other in the furtherance of the contract and promptly notify the other party or parties and attempt to resolve problems or differences that may arise.

(c) If the parties cannot resolve a dispute through consultation and cooperation, the parties agree to consult a neutral third party offering alternative dispute resolution services to attempt to address the dispute.

(d) Options of alternative dispute resolution services can be found on Canada's Buy and Sell website under the heading "Dispute Resolution".

ANNEX A

STATEMENT OF WORK

SW1 BACKGROUND

The Canada Border Service Agency (CBSA) has a mandate to provide integrated border services that support national security and public safety priorities, while facilitating the free flow of legitimate trade and travel. The Agency is committed to protecting the safety and security of Canadian communities, as well as the stability and prosperity of our economy.

In support of its mandate, the CBSA has embarked on Agency-wide modernization efforts to strengthen its management foundation and enhance its capabilities to respond effectively to the evolving border continuum. With the exponential growth of data produced by the CBSA and its partners, the CBSA is seeking opportunities to increase its Analytics footprint by fostering people, process, data and technology in order to guide strategic, operational and tactical decision-making along its business lines.

In order to support the advancements of the CBSA's Analytics investment, the Agency needs to secure an agile, connected and high-performing workforce skilled on the use of modern techniques and tools.

CBSA Information, Science and Technology Branch (ISTB) will require resources to supplement and support the staff currently in place and work on high performance, high availability, and mission critical national systems, built on the IT Environment identified in Section 4 below.

SW2 SCOPE OF WORK

Applicable resource categories listed below:

TBIPS Category	TBIPS Level
A.1. Application/Software Architect (Analytics)	3
A.6 Programmer/Software Developer	2 and 3
A.7 Programmer/Analyst	3
I.2 Database Administrator	3
I.3 Database Analyst / IM Administrator	3
I.3 Database Analyst / IM Administrator (Data Engineer)	3
I.4 Database Modeller / IM Modeller	3
I.4 Database Modeller/IM Modeller (Data Architect)	3
I.5. IM Architect	3
I.5 IM Architect (Data Scientist)	3
I.5 IM Architect (Privacy Architect)	3
I.11. Technology Architect	3

SW3 TASKS AND DELIVERABLES

3.1 Technical Stream

3.1.1 A.1. Application/Software Architect (Analytics) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop technical architectures, frameworks and strategies for analytics systems, either for an organization or for a major application area to meet the business and application requirements.
2. Identify the policies and requirements that drive out a particular analytics solution.
3. Analyze and evaluate alternative technology solutions to meet business problems.
4. Engage with business clients and data scientists to drive out a particular analytics solution.
5. Analyze functional requirements to identify information, procedures and decision flows.
6. Evaluate existing procedures and methods, identify and document data content, structure, application sub-systems and develop data dictionary.
7. Identify and document system, such as, specific standards relating to programming, documentation and testing, covering program libraries, data dictionaries, and naming conventions.
8. Ensures the integration of all aspects of technology solutions.

Additional Tasks could include but are not limited to:

9. Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
10. Define and document interfaces of manual to automated operations within application sub-systems to external systems and between new and existing systems.
11. Define input/output sources, including detailed plan for technical design phase and obtain approval of the system proposal.

3.1.2 A.6 Programmer/Software Developer (Level 2):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Develop and prepare diagrammatic plans for solution of business, analytics, scientific and technical problems by means of computer systems of significant size and complexity.
2. Analyze the problems outlined by the systems analysts/designers in terms of such factors as style and extent of information to be transferred to and from storage units, variety of items to be processed, extent of sorting and format of final printed results.
3. Design detailed programs, flow charts, and diagrams indicating mathematical computation and sequence of machine operations necessary to copy and process data and print the results.
4. Test instructions, and assemble specifications, flow charts, diagrams, layouts, programming and operating instructions to document applications for later modification or reference.

Additional Tasks could include but are not limited to:

5 Select and incorporate available software programs

7. Verify accuracy and completeness of programs by preparing sample data, and testing them by means of system acceptance test runs made by operating personnel.
8. Correct program errors by revising instructions or altering the sequence of operations.

3.1.3 A.6 Programmer/Software Developer (Level 3):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Develop and prepare diagrammatic plans for solution of business, analytics, scientific and technical problems by means of computer systems of significant size and complexity.
2. Analyze the problems outlined by the systems analysts/designers in terms of such factors as style and extent of information to be transferred to and from storage units, variety of items to be processed, extent of sorting, and format of final printed results.
3. Design detailed programs, flow charts, and diagrams indicating mathematical computation and sequence of machine operations necessary to copy and process data and print the results.
4. Test instructions, and assemble specifications, flow charts, diagrams, layouts, programming and operating instructions to document applications for later modification or reference.
5. Translate detailed flow charts into coded machine instructions and confer with technical personnel in planning programs.
6. Verify accuracy and completeness of programs by preparing sample data, and testing them by means of system acceptance test runs made by operating personnel.

Additional Tasks could include but are not limited to:

7. Select and incorporate available software programs.
8. Correct program errors by revising instructions or altering the sequence of operations.
9. Provide development activities level of effort and duration estimates for schedule planning.
10. Review and analyze the effectiveness and efficiency of existing systems and develop strategies for improving or further leveraging current systems.
11. Assist in the prioritization and planning for resolution of all known defects and enhancements in support of business.
12. Develop and maintain effective collaborative relationships with the stakeholders to discuss and resolve issues.
13. Work with stakeholders to proactively maintain all IT systems documentations aligned with business documentation.
14. Provide updates on work in progress, work completed, work planned, and issues potentially impacting the timely completion or quality level of work.
15. Provide leadership, guidance, and support to less senior resources.

3.1.4 A.7 Programmer/Analyst (Level 3):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Create and modify code and software.
2. Create and modify screens and reports.
3. Gather and analyze data for the conduct of studies to establish the technical and economic feasibility of proposed computer systems and for the development of functional and system design specifications.

4. Design methods and procedures for small computer systems, and sub-system of larger systems.
5. Produce forms, manuals, programs, data files and procedures for systems and/or applications.

Additional Tasks could include but are not limited to:

6. Develop, test and implement small computer systems, and sub-systems of larger systems.

3.1.5 I.2 Database Administrator (Level 3):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Generate new database with the client.
2. Maintain configuration control of the database.
3. Control and coordinate changes to the database, including the deletion of records, changes to the existing records, and additions to the database.
4. Develop and implement procedures that will ensure the accuracy, completeness, and timeliness of data stored in the database.
5. Develop and implement security procedures for the database, including access and user account management.

Additional Tasks could include but are not limited to:

6. Customize database conversion routines.
7. Finalize Conversion Strategy.
8. Maintain data dictionaries.
9. Advise programmers, analysts, and users about the efficient use of data.
10. Perform and/or coordinate updates to the database design.
11. Develop and coordinate back-up, disaster recovery and virus protection procedures.

3.1.6 I.3 Database Analyst / IM Administrator (Level 3):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Develop Complex SQL queries incorporating inner joins, outer joins, aggregates, unions, subqueries, group by, where clause, having clause, triggers, cursors, views, XML query function and other advanced SQL fundamentals and utilize SQL expertise to support and assist Data Modelers, Data Warehouse Analysts, Testers and End Users.
2. Provide support to develop an Enterprise Data Warehouse model; including logical model integration of data from multiple subject areas and use Kimball Methodology (dimensional models integrated via conformed dimensions).
3. Identify requirements for improvements to existing databases by determining users' information requirements and system performance and functional requirements.
4. Develop and implement procedures that will ensure the accuracy, completeness, and timeliness of data stored in the database.

Additional Tasks could include but are not limited to:

5. Develop a comprehensive understanding of CBSA Data Warehouse processes and content (data).

6. Provide support, develop and present Enterprise Data Warehouse (EDW)/ Business Intelligence (BI) strategies, roadmaps and project plans.
7. Assist Data Base Administrator(s) (DBA) with BI/DW database performance and design related issues.
8. Mediates and resolves conflicts among users' needs for data.
9. Advise programmers, analysts, and users about the efficient use of data.
10. Provide input into Data Warehouse Design decisions.
11. Examine data available in existing data source and collect statistics about that data.
12. Write source to target mappings.
13. Work within the Service Lifecycle Management Framework.

3.1.7 I.3 Database Analyst / IM Administrator (Data Engineer) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop, analyze, design, and implement Highly Scalable data management systems (data storage and data movement solutions) to ensure high levels of data quality and availability.
2. Develop capacity planning, backup and restore procedures for the highly scalable data management systems.
3. Build analytics tools and solutions using “Big Data” technologies which utilize the data pipelines to provide users with the said tools and solutions for data modeling, mining and analysis.
4. Collaborate with stakeholders to ensure systems meet business requirements and industry best practices.to
5. Build the infrastructure required for optimal extraction, transformation, and loading of data from a wide variety of data sources using various on-premise and cloud-based technologies.
6. Develop processes supporting data transformation, data structures, metadata, dependency and workload management.
7. Develop and maintain data pipelines and data science solutions on cloud-based platforms.

Additional Tasks could include but are not limited to:

8. Develop or assist in development of disaster recovery plans and procedures;
9. Collaborate with stakeholders to assist with data-related technical issues and support their data infrastructure needs.
10. Collaborate with stakeholders to build and implement high-performance algorithms, prototypes, and proof of concepts for use in statistical analysis, prediction models and machine learning.
11. Integrate new data management technologies and software engineering tools into existing structures.
12. Deploy tools using various programming languages to marry systems together.
13. Research opportunities for data acquisition and new uses for existing data
14. Recommend ways to improve data reliability, efficiency and quality
15. Develop and maintain comprehensive end user documentation and reference materials/guides in the data repository and ensure it is current and accurate.
16. Coach, mentor, train and knowledge transfer to internal resources to facilitate organizational onboarding.

3.1.8 I.4 Database Modeller / IM Modeller (Level 3):

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks:

Baseline Tasks:

1. Develop and maintain the Architecture and Data Models for project initiative
2. Design, develop and maintain Logical Data Models.
3. Participate in data analysis as a result of new/updated requirements.
4. Analyze and evaluate alternative data architecture solutions to meet business problems/requirements to be incorporated into the corporate data architecture

Additional Tasks could include but are not limited to:

5. Analyze proposed changes to databases from the context of the Logical Data Model.
6. Provide technical expertise in the use and optimization of data modeling techniques to team members.
7. Provide technical assistance, guidance and direction in terms of data analysis and modeling to team members.
8. Provide assistance to project team and business users relating to data issues and data analysis concepts.
9. Participate in the development of data modeling and metadata policies and procedures.
10. Apply approved changes to Logical Data Models.
11. Comply with corporate data architectures, strategies and frameworks, including enterprise data warehouse activities. .
12. Review corporate architecture strategies and directions, data requirements, and business information needs and devise data structures to support them.
13. Improve modeling efficiency through recommendations on how to better utilize current metadata repositories.
14. Participate in data architecture refinement.
15. Define access strategies.

3.1.9 I.4 Data Modeler/IM Modeler (Data Architect) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and maintain the Architecture and Data Models for corporate and project specific initiatives, including the identification of data most valuable to the department, the integration of this data, and the development of core relating data models. The resulting data models will be based on data architecture and modeling design principles and tenets.
2. Develop and maintain Architecture and Data Models for non-traditional data structures and technologies for corporate and project specific initiatives, including the identification of data most valuable to the department, the integration of this data, and the development of core relating data models.
3. Monitor and support the development of the system's data to ensure it is compliant with the data architecture, and provide recommendations in refinement of data architecture as required.
4. Develop data model, metadata policies and procedures in support of the enterprise, the data warehouse and repositories.
5. Analyze and develop data models in a hybrid cloud computing context.

Additional Tasks could include but are not limited to:

6. Analyze and evaluate alternative data architecture solutions to meet business requirements to be incorporated into the corporate data architecture.

7. Set Data Policy and the technical solution for the management, storage, access, navigation, movement, and transformation of data.
8. Design, develop, maintain and apply approved changes to data models.
9. Analyze proposed changes to databases and other data repositories from the context of the Data Model.
10. Provide technical assistance and expertise, guidance and direction in terms of data analysis and data modeling to team members.
11. Provide assistance to project team and business users relating to data issues and data analysis concepts.
12. Conform to corporate data architectures, World Customs Organization data standards, strategies and frameworks, including enterprise data warehouse activities and enterprise data analytics activities.
13. Review corporate architecture strategies and directions, data requirements, and business information needs and devise data structures to support them.
14. Conform and improve modeling efficiency through recommendations on how to better utilize current metadata repositories.
15. Examine and enforcing opportunities to provide data reuse, balancing the issues of centralization and replication.
16. Define access strategies.
17. Construct, monitor and report on work plans and schedules, while participating in projects, forums and working groups varying in scope and complexity.
18. Work within the confines of data governance, ensuring the compliance within privacy and security policies of the organization.

3.1.10 I.5. IM Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Analyze existing capabilities and requirements, develop redesigned frameworks and recommend areas for improved capability and integration. Develop and document detailed statements of requirements.
2. Evaluate existing procedures and methods, identify and document database content, structure, and application subsystems, and develop data dictionary.
3. Develop data management standards and processes.
4. Provide support in the development of data governance artefacts.
5. Design, implement meta-data standards and processes.

Additional Tasks could include but are not limited to:

6. Define and document interfaces of manual to automated operations within application subsystems, to external systems, and between new and existing systems.
7. Prototype potential solutions, provide tradeoff information and suggest recommended courses of action.
8. Perform information modelling in support of Business Process Reengineering (BPR) implementation.
9. Perform cost/benefit analysis of implementing new processes and solutions.
10. Provide advice in developing and integrating process and information models between business processes to eliminate information and process redundancies.
11. Provide advice in defining new requirements and opportunities for applying efficient and effective solutions; identify and provide preliminary costs of potential options.

CRSA - Released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'Accès à l'information.

3.1.11 I.5 IM Architect (Data Scientist) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Perform data exploitation on data to provide tactical and strategic insights directly to analysts, business owners, and decision makers.
2. Design experiments, test hypotheses, and build models.
3. Conduct advanced data analysis and highly complex design algorithms.
4. Apply advanced statistical, mining and modeling techniques to build, maintain, and improve on the advance analytics program.
5. Perform prototyping and developing data exploitation capabilities using advanced data analytics technologies and techniques.
6. Perform prototyping and developing data exploitation capabilities using cloud computing platforms.
7. Develop innovative and effective approaches utilizing advanced algorithms and statistical techniques to resolve client's analytics problems and communicate results and methodologies.
8. Interpret data and present material using visualizations, writing reports, producing functional notebooks, designing and delivering presentations.

Additional Tasks could include but are not limited to:

9. Identify what data is available and relevant, including internal and external data sources (structured and unstructured), leveraging data collection processes.
10. Collaborate with stakeholders and business analysts gathering requirements to identify opportunities to apply data science towards business objectives and program improvements.
11. Model and frame business scenarios that are meaningful and which impact business processes, decisions and program integrity.
12. Advise on best practises and approaches using available toolsets, while recommending and aiding to implement new tools based on researched recommendations.
13. Provide strategic recommendations on data collection, integration and retention requirements incorporating business requirements and knowledge of best practices.
14. Collaborate with stakeholders to define the validity of the information, the length of time the information is meaningful, and makes relationships to other information.
15. Work within the confines of data governance, ensuring the compliance within privacy and security policies of the organization. This includes validating where data can be stored, the retention period and sharing of data.
16. Provide leadership, guidance, and support to stakeholders and the data community.

3.1.12 I.5 IM Architect (Privacy Architect) (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop and maintain a corporate privacy program architecture roadmap that aligns with the direction set by the data privacy and information security officers to guide and inform initiatives (i.e., design principles, source systems, business rules/logic, technology and business alignment, etc.).
2. Develop and apply an end-to-end vision for software and information architecture and guides the selection, implementation, and management of enterprise and domain level solutions through partnerships with domain, solution, and enterprise architects, as well as the data privacy and information security officers.

3. Drive strategies, governance, and design for the identified solutions to meet the strategic goals of the corporate privacy program.
4. Integrate privacy and information lifecycle requirements into processes, controls and assessments and create direct mapping to requirements, solutions and patterns. Eliminate redundancies, close current gaps and enable agility and automation.
5. Design blueprints that protect corporate data assets and ensures those assets are effectively managed to meet the strategic goals of the corporate privacy program.

Additional Tasks could include but are not limited to:

6. Develop systematic, automated data deletion for structured and unstructured data including automated description and processing of legal, regulatory and other policies.
7. Collaborate with domain architects to identify business critical gaps and discrepancies; propose and implement remediation plans and tactics to meet corporate privacy program goals.
8. Work collaboratively with architecture and development teams fostering re-use, design for scale, stability, and operational efficiency principles.
9. Develop and drive strategies, governance, and design for the identified solutions to meet the strategic goals of the corporate privacy program.
10. Promote the merits, values, and efficiencies of privacy by design principles and effectively communicate benefits for privacy and information security-related initiatives.
11. Collaborate with other domain architects from the data, information security, and enterprise operations areas to define best practices and development methodologies to meet privacy standards.
12. Identify privacy architecture standards and tools to be mandated for functions including Cloud First, data warehouse, analytics, and data archival.
13. Develop end-to-end vision for software, information architecture and guides the selection, implementation, and management of enterprise and domain level solutions through partnerships with domain, solution, and enterprise architects, as well as the data privacy and information security officers.
14. Develop estimates for privacy, data security ad data related components of a solution.
15. Work within the confines of data governance, ensuring the compliance within privacy and security policies of the organization.

3.1.13 I.11. Technology Architect (Level 3)

Responsibilities include all of the following Baseline Tasks along with any combination of the following Additional Tasks, without limitation:

Baseline Tasks:

1. Develop technical architectures, frameworks and strategies, either for an organization or for a major application area, to meet the business and application requirements.
2. Identify the policies and requirements that drive out a particular solution.
3. Advise Senior Management on trends and emerging technologies and their impact on the organization's architectures and business strategies.
4. Analyze and evaluate alternative technology solutions to meet business problems.
5. Monitor industry trends to ensure that solutions fit with government and industry directions for technology.
6. Perform impact analysis of technology changes.

Additional Tasks could include but are not limited to:

7. Ensures the integration of all aspects of technology solutions.
8. Provide information, direction and support for emerging technologies.

9. Provide support to applications and/or technical support teams in the proper application of existing infrastructure.
10. Review application and program design or technical infrastructure design to ensure adherence to standards and to recommend performance improvements.

SW4 OVERALL CBSA TECHNICAL ENVIRONMENT

1. IBM DB2 on UNIX
2. IBM PureData
3. IBM InfoSphere Information Governance Catalog
4. IBM Information Server for Data Integration
5. IBM InfoSphere Information Server for Data Quality
6. IBM InfoSphere DataStage
7. IBM InfoSphere Change Data Capture
8. IBM InfoSphere QualityStage
9. IBM InfoSphere FastTrack
10. InfoSphere Business Glossary Anywhere
11. IBM InfoSphere Information Analyzer
12. IBM InfoSphere Metadata Workbench
13. IBM InfoSphere Data Architect
14. IBM InfoSphere Information Services Director
15. IBM InfoSphere DataStage and QualityStage Designer
16. IBM SPSS
17. IBM SPSS Modeler Server
18. IBM Cognos Framework Manager
19. IBM Cognos Business Intelligence Transformer
20. IBM Cognos Administration
21. IBM Cognos PowerPlay Studio
22. IBM Cognos Software Development Kit
23. SQL
24. Sybase
25. XML
26. R
27. Python
28. ArcGIS

37. Microsoft Azure cloud
38. Amazon Web Services cloud

CBSA - released under the Access to Information Act
ASFC - Divulgué en vertu de la Loi sur l'accès à l'information.

SW5 GOVERNMENT FURNISHED EQUIPMENT/INFORMATION

5.1 The CBSA Data Management team will provide an appropriate workspace with access to the appropriate tools for the resources to carry out the expectations set out in this SOW.

5.2 The Contractor will be provided with a CBSA user ID, password, workstation or laptop, email address, and other materials (supporting documentation) as required in order to process, store, and/or transmit CBSA data on the CBSA network during the contract. The use of contractor IT systems is not permitted.

SW6 ACCEPTANCE CRITERIA

All work and services are to be provided to the entire satisfaction and approval of the Project Authority.

SW7 DELIVERABLES

The Contractor will provide various reports, plans, analysis and other related documents as specified in the applicable Task Authorization.

SW8 CONSTRAINTS

At no time and in no way is CBSA data to be removed from CBSA sites, nor will access to or from the contractor's IT systems through the use of a session (e.g VPN) be permitted.

The contractor must comply with CBSA internal security policies, directives, standards, and guidelines at all times during the contract.

SW9 REPORTING REQUIREMENTS

Timesheets are to be provided on a monthly depicting hours worked on a daily basis.

SW10 WORK LOCATION

All work will be performed in the National Capital Region on-site at CBSA offices, or remotely when authorized by CBSA.

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

Appendix A – Glossary

Acronym or Term	Definition
Architecture and Data Model	An abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities.
Business Cases	A presentation or a proposal to an authority by an organization seeking funding, approval, or both for an activity, initiative, or project. A business case puts a proposed investment decision into a strategic context and provides the information necessary to make an informed decision about whether to proceed with the investment and in what form.
Business Intelligence	The strategies and technologies used by enterprises for the data analysis of business information. BI technologies provide historical, current and predictive views of business operations.
Business Process Reengineering	A business management strategy focusing on the analysis and design of workflows and business processes within an organization.
Business Transformation Enablement Program	A set of tools which have been developed to provide an integrated approach for strategic management and alignment, and business transformation.
Cloud First	Adoption strategy in which cloud is the preferred option for delivering IT services and public cloud is the preferred option for cloud deployment.
Complex SQL	Is the use of SQL queries which go beyond the standard SQL of using the SELECT and WHERE commands. Complex SQL often involves using complex joins and sub-queries, where queries are nested in WHERE clauses. Complex queries frequently involve heavy use of AND and OR clauses.
Critical Success Factors	A management term for an element that is necessary for an organization or project to achieve its mission.
Data Analytics	The process of examining data sets in order to draw conclusions about the information they contain.
Data Policy	A set of measurable rules for a set of data elements, in the context of an organizational scope, for the benefit of a business process, irrespective of where the data is stored and the party that provides the data.
Data Base Management System	A software package designed to define, manipulate, retrieve and manage data in a database.
Enterprise Data Warehouse	An Enterprise Data Warehouse (EDW) is a collection of corporate information and data derived from operational systems and external data sources. An EDW is designed to support business decisions by allowing data consolidation, analysis and reporting at different aggregate levels
Federated Architecture Program	A pattern in enterprise architecture that allows interoperability and information sharing between semi-autonomous de-centrally organized lines of business (LOBs), information technology systems and applications.
GC Information Management Policies	Government of Canada's policy to achieve efficient and effective information management to support program and service delivery; foster informed decision making, facilitate accountability transparency and collaboration; and preserve and ensure access to information and records for the benefit of present and future generations.
Highly Scalable	is the capability to add more capacity when required to handle the increased workload
Information and Communications Technology	A term for information technology (IT) which stresses the role of unified communications[1] and the integration of telecommunications (telephone lines and wireless signals), computers as well as necessary enterprise

	software, middleware, storage, and audio-visual systems, which enable users to access, store, transmit, and manipulate information.
Logical Data Model	Is the description of the data in as much detail as possible, without regard to how they will be physical implemented in the database.
Memorandum to Cabinet	A minister's vehicle for proposing and explaining a proposed measure to the Cabinet and for obtaining its approval.
Project Charters	A statement of the scope, objectives, and participants in a project. It provides a preliminary delineation of roles and responsibilities, outlines the project objectives, identifies the main stakeholders, and defines the authority of the project manager.
Project Controls	The data gathering, data management and analytical processes used to predict, understand and constructively influence the time and cost outcomes of a project or program; through the communication of information in formats that assist effective management and decision making.
Requirements Management	The process of documenting, analyzing, tracing, prioritizing and agreeing on requirements and then controlling change and communicating to relevant stakeholders.
Risk Assessment Process	The process of assessing risks and their inherent risk associated with a particular project scope and its expected benefits.
Risk Management Plans	The document which is prepared to foresee risks, estimate impacts, and define responses.
Risk Responses	The process of documenting for each risk, a risk response in the risk register. Aiming to eliminating the risk, lowing the probability of risk occurrence and lowering the impact of the risk on the project objectives.
Strategic Business Objectives	Goals deemed most important to the current and future health of an organization.
Technology Architecture	The process of development of methodical information technology specifications, models and guidelines, using a variety of Information Technology notations, for example UML, within a coherent Information Technology architecture framework, following formal and informal Information Technology solution, enterprise, and infrastructure architecture processes.
World Customs Organization	The World Customs Organization (WCO), established in 1952 as the Customs Co-operation Council (CCC) is an independent intergovernmental body whose mission is to enhance the effectiveness and efficiency of Customs administrations. http://www.wcoomd.org/

APPENDIX A TO ANNEX A

TASKING ASSESSMENT PROCEDURE

1. Where a requirement for a specific task is identified, a draft Task Authorization Form (TA Form) as attached at Appendix B to Annex A will be provided to the Contractor in accordance with the allocation methodology stated in the Contract Article titled "Allocation of Task Authorizations". Once a draft TA Form is received, the Contractor must submit to the Technical Authority a quotation of rates to supply the requested Resource Categories based on the information identified in the TA Form. The quotation must be signed and submitted to Canada within the time for response identified in the TA Form. The Contractor will be given a minimum of 48 hours turnaround time to submit a quotation.

2. With each quotation the Contractor must propose the required number of resources and for each proposed resource the Contractor must supply a résumé, the requested security clearance information and must complete the Response Tables at Appendix C of Annex A applicable to the Resource Categories identified in the draft TA. The same individual must not be proposed for more than one Resource Category. The résumés must demonstrate that each proposed individual meets the qualification requirements described (including any educational requirements, work experience requirements, and professional designation or membership requirements). With respect to the proposed resources:

   (i) Proposed resources may be employees of the Contractor or employees of a subcontractor, or these individuals may be independent contractors to whom the Contractor would subcontract a portion of the Work. (Refer to Appendix D to Annex A, Certifications).

   (ii) For educational requirements for a particular degree, designation or certificate, Canada will only consider educational programmes that were successfully completed by the resource before the date the draft TA was first issued to the Contractor.

   (iii) For requirements relating to professional designation or membership, the resource must have the required designation or membership by the time of draft TA issuance and must continue, where applicable, to be a member in good standing of the profession or membership throughout the assessment period and Contract Period. Where the designation or membership must be demonstrated through a certification, diploma or degree, such document must be current, valid and issued by the entity specified in this Contract or if the entity is not specified, the issuer must have been an accredited or otherwise recognized body, institution or entity at the time the document was issued.

   (iv) For work experience, Canada will not consider experience gained as part of an educational programme, except for experience gained through a formal co-operative programme at a post-secondary institution.

   (v) For any requirements that specify a particular time period (e.g., 2 years) of work experience, Canada will disregard any information about experience if the résumé does not include the relevant dates (month and year) for the experience claimed (i.e., the start date and end date). Canada will evaluate only the duration that the resource actually worked on a project or projects (from his or her start date to end date), instead of the overall start and end date of a project or a combination of projects in which a resource has participated.

   (vi) A résumé must not simply indicate the title of the individual's position, but must demonstrate that the resource has the required work experience by explaining the responsibilities and work performed by the individual while in that position. Only listing experience without providing any supporting data to describe responsibilities, duties and relevance to the requirement, or reusing the same wording as the TA Form, will not be

considered "demonstrated" for the purposes of the assessment. The Contractor should provide complete details as to where, when, month and year, and how, through which activities/responsibilities, the stated qualifications / experience were obtained. In situations in which a proposed resource worked at the same time on more than one project, the duration of any overlapping time period will be counted only once toward any requirements that relate to the individual's length of experience.

3. The qualifications and experience of the proposed resources will be assessed against the requirements set out in Appendix C to Annex A to determine each proposed resource's compliance with the mandatory and rated criteria. Canada may request proof of successful completion of formal training, as well as reference information. Canada may conduct reference checks to verify the accuracy of the information provided. If reference checks are done, they will be conducted in writing by e-mail (unless the contact at the reference is only available by telephone). Canada will not assess any points or consider a mandatory criterion met unless the response is received within 5 working days. On the third working day after sending out the e-mails, if Canada has not received a response, Canada will notify the Contractor by e-mail, to allow the Contractor to contact its reference directly to ensure that it responds to Canada within 5 working days. Wherever information provided by a reference differs from the information supplied by the Contractor, the information supplied by the reference will be the information assessed. Points will not be allocated or a mandatory criteria considered as met if the reference customer is not a customer of the Contractor itself (for example, the customer cannot be the customer of an affiliate of the Contractor). Nor will points be allocated or a mandatory criteria considered as met if the customer is itself an affiliate or other entity that does not deal at arm's length with the Contractor. Crown references will be accepted.

4. During the assessment of the resources proposed, should the references for two or more resources required under that TA either be unavailable or fail to substantiate the required qualifications of the proposed resources to perform the required services, the Contracting Authority may find the quotation to be non-responsive.

5. Only quotations that meet all of the mandatory criteria will be considered for assessment of the point rated criteria. Each resource proposed must attain the required minimum score for the point rated criteria for the applicable Resource Category. If the minimum score for any proposed resource is less than what is required, the Contractor's quotation will be found to be non-responsive.

6. Once the quotation has been accepted by the Technical Authority, the TA Form will be signed by Canada and provided to the Contractor for signature. The TA Form must be appropriately signed by Canada prior to commencement of any work. The Contractor must not commence work until a validly issued TA Form (the Task Authorization) has been received, and any work performed in its absence is done at the Contractor's own risk.

APPENDIX C TO ANNEX A

RESOURCES ASSESSMENT CRITERIA AND RESPONSE TABLE

To facilitate resource assessment, Contractors must prepare and submit a response to a draft Task Authorization using the tables provided in this Annex. When completing the resource grids, the specific information which demonstrates the requested criteria and reference to the page number of the résumé should be incorporated so that Canada can verify this information. The tables should not contain all the project information from the resume. Only the specific answer should be provided.

(SEE DOCUMENT ATTACHED)

[illegible] - Released under the Access to Information Act
[illegible] - Divulgation en vertu de la loi sur l'Accès à l'information.

APPENDIX D TO ANNEX A

CERTIFICATIONS AT THE TA STAGE

The following Certifications are to be used, as applicable. If they apply, they must be signed and attached to the Contractor's quotation when it is submitted to Canada.

1. CERTIFICATION OF EDUCATION AND EXPERIENCE

The Contractor certifies that all the information provided in the résumés and supporting material proposed for completing the subject work, particularly the information pertaining to education, achievements, experience and work history, has been verified by the Contractor to be true and accurate. Furthermore, the Contractor warrants that every individual proposed by the Contractor for the requirement is capable of performing the Work described in the Task Authorization.

Print name of authorized individual & sign above Date

2. CERTIFICATION OF AVAILABILITY OF PERSONNEL

The Contractor certifies that, should it be authorized to provide services under this Task Authorization, the persons proposed in the quotation will be available to commence performance of the work within a reasonable time from the date of issuance of the valid Task Authorization, or within the time specified in the TA Form, and will remain available to perform the work in relation to the fulfillment of the requirement.

Print name of authorized individual & sign above Date

3. CERTIFICATION OF STATUS OF PERSONNEL

If the Contractor has proposed any individual who is not an employee of the Contractor, the Contractor certifies that it has permission from that individual to propose his/her services in relation to the Work to be performed under this TA and to submit his/her résumé to Canada. At any time during the Contract Period the Contractor must, upon request from the Contracting Authority, provide the written confirmation, signed by the individual, of the permission that was given to the Contractor of his/her availability. Failure to comply with the request may result in a default under the Contract in accordance with the General Conditions.

Print name of authorized individual & sign above Date

4. CERTIFICATION OF LANGUAGE - English

The Contractor certifies that the proposed resource(s) in response to this draft Task Authorization is/are fluent in English. The individual(s) proposed must be able to communicate orally and in writing in English without any assistance and with minimal errors.

Print name of authorized individual & sign above Date

5. NON-DISCLOSURE AGREEMENT

I, _______________________ (name of proposed resource), recognize that in the course of my work as an employee or subcontractor of ___________________ (name of contractor), I may be given access to information by or on behalf of Canada in connection with the Work, pursuant to Contract Serial No. ________________ between Her Majesty the Queen in right of Canada, represented by the Minister of Public Works and Government Services and Canada Border Services Agency, including any information that is confidential or proprietary to third parties, and information conceived, developed or produced by the Contractor as part of the Work. For the purposes of this agreement, information includes but not limited to: any documents, instructions, guidelines, data, material, advice or any other information whether received orally, in printed form, recorded electronically, or otherwise and whether or not labeled as proprietary or sensitive, that is disclosed to a person or that a person becomes aware of during the performance of the Contract.

I agree that I will not reproduce copy, use, divulge, release or disclose, in whole or in part, in whatever way or form any information described above to any person other than a person employed by Canada on a need to know basis. I undertake to safeguard the same and take all necessary and appropriate measures, including those set out in any written or oral instructions issued by Canada, to prevent the disclosure of or access to such information in contravention of this agreement.

I also acknowledge that any information provided to the Contractor by or on behalf of Canada must be used solely for the purpose of the Contract and must remain the property of Canada or a third party, as the case may be.

I agree that the obligation of this agreement will survive the completion of the Contract Serial No.: ____________________.
